Organizations of farmers is progressing as it never has before. In some Kansas and Oklahoma towns, car loads of goods arrive, billed direct from some factory to the local farm organization. The farmers say that if the merchants persist in handling trust made goods, and charge the price that the system of handling by a long line of middlemen demands, they will "cut everything out," and buy as directly as possible. In many instances, the merchants do not get an undue portion of the profits when they charge a high price. The system of handling the goods is responsible. There are too many middlemen, each asking and getting his "fair" profit. We are going to see an awakening in the manner of buying, by the farmers, in the next few years. If present conditions of trade are pushed one step further in the way it has come in the last few years—a way that is lined by middlemen—there will be organizations of farmers, formed for the sole purpose of buying in car load lots, direct from the factories, or from houses but one step removed from the manufacturer.

An illustrated bulletin of fifteen pages giving information as to the cost of filling silos has just been issued by the department of agriculture. The bulletin is the work of Lyman Carrier, scientific assistant of farm management investigations of the bureau of plant industry. Mr. Carrier confined his inquiry to Jefferson and Fond du Lac counties, Wis., and Branch and Lewanee counties, Mich., silos having been in use in these localities for several years. He visited thirty-one farms and took notes on the number and arrangement of men and teams, the machinery used and the length of time taken. He also made measurements of the silos. The average yield of silage to the acre was 9.01 tons. The average cost a ton was 64 cents. The average

The "ONLY" Waterer  
\$100 REWARD \$100

The "ONLY" will not run over or clog. It will run all winter. If you try our waterer and don't find this true the \$100.00 is yours. Used everywhere. Will last forever. Write today. Send ten cents for book on raising 1,000 hogs a year.

ONLY MFG. CO., -- Hawarden, Iowa

amount of silage cut daily per man was 4.9 tons, and the average cost per acre for putting the corn in the silo was \$5.98.

J. G. Hickey, of Whitefish Bay, Wis., recently purchased the Guernsey herd owned by E. D. Jordan, of Plymouth, Mass. This herd contained many noteworthy animals. Wisconsin is rapidly becoming a far-famed center for the very best Guernseys—having received several large and important additions and importations during the past season. Mr. Hickey's last purchase contained the well known sire Birthright, which was recently purchased by Mr. Jordan from Frank R. Bennett, of Mast Yard, New Hampshire. This bull is of the best breeding and is a handsome individual.

Lightning set fire to a barn in the town of Lima, Wis., destroying four head of horses, forty sheep, valuable farm implements and a large amount of grain. The loss is estimated at \$10,000.

## W. A. Forsythe's Sale of Short-horns.

A steady rain the day previous and a cloudy day with some rain did not make the prospects any too bright for Mr. W. A. Forsythe, of Greenwood, Mo., sale day, May 31st. With all the discouraging elements facing him, Mr. Forsythe met those who came with a smile and a hearty handshake. The cattle were fully as good as represented and from the start bidders started the hall rolling briskly, but with no intention of paying more than was necessary. On the forty-one lots sold an average of \$133 was made. This does not represent the full value of the cattle, but shows up well under all conditions. The top of the sale was \$300, paid by Mr. I. R. Burky, of Louisville, Kan., for Lot 38, the Violet bull, Violet's Improver. Mr. Burky was also the heaviest buyer of females and secured some rare bargains. The top on females was \$230, paid by Mr. H. M. Hill, of La Fontaine, Kan., for Lot 2, a Violet cow, and choice of twin heifer calves. Mr. Hill and Mr. C. S. Nevius, of Chiles, Kan., were the heaviest buyers, aside from Mr. Burky. Colonels Bellows and Harman conducted the sale in their usual satisfactory manner. Following is a list of all sales over \$100:

## FEMALES.

Bapton Countess 3d, three years, sire Imp. Bapton Arrow, J. N. Bower, Greenwood, Mo. ....	\$180
Violet Cloud 5th, ten years, sire Marquis Craclidan, and c. c., H. M. Hill, La Fontaine, Kan. ....	230
Bapton's Wild Eyes, three years, sire Imp. Bapton Arrow, and c. c., I. R. Burky, Louisville, Kan. ....	155
May Maynard 3d, six years, sire My Lord, and b. c., H. M. Hill. ....	150

## Plain Facts About the Richest Agricultural Land in the World

# Southern California

This page of interesting information is supplied by the Development Society of California, a body of public spirited men contributing time and money to spreading broadcast the truth about California.

It is not a private advertisement in any way, nor has the Development Society anything to sell. This is mentioned because we want every farmer, agriculturist and stockman to feel free to write us and ask questions. The Society will furnish accurate information without any cost to you. If your questions cannot be answered from information on hand, your letter will be referred to some Chamber of Commerce or other civic body which will supply you with full facts and figures.

### No Blizzards, No Bitter Winters, No Hot Nights in Summer. Agriculture is a Pleasure

The farmer's lot in Southern California is indeed a pleasant one compared to the struggles and hardships of his Eastern brother. Soil, climate and market conditions unite to make agricultural pursuits both agreeable and profitable. In the North and East there are five to seven producing months, in California there are twelve.

The California farmer can eat strawberries and picnic at Christmas time while the Eastern farmer is huddled behind a stove to keep from freezing. In the summer there are no hot, suffocating nights, but the Californian is glad to tuck himself beneath blankets.

This glorious health-giving climate is sufficient itself to attract settlers, but Southern California has other things to offer. No other section of the United States pays a bigger reward in dollars and cents to the farmer.

Southern California is truthfully called the "Land of Sunshine." It is the garden spot of the world, including within its confines a wonderful variety of climates, soil and topography.

Even two or three acres are sufficient in some lines of agriculture to return a larger income than one can make from two or three hundred acres in the East set to ordinary crops.

### In Southern California Single Acres Have Produced Over \$1,000 Net Profit Per Year.

The farmer is chiefly interested in Southern California because the land yields him a bounteous harvest which is readily marketed at a satisfactory price. Farming is not drudgery in Southern California, but more of a business, and a very profitable one. The average Eastern farmer could double or triple his income with one-half the work, here in Southern California.

The district is growing so rapidly, especially the large cities, that the demand for many agricultural products is becoming far in excess of the supply. In spite of the great quantity of vegetables, hay, grain, swine, sheep, cattle, fruits, berries and other farm products that are grown the prices of these commodities are frequently very high.

In the older sections of the United States the soil is less rich and more or less worked out. Frost may ruin a year's crop, or over-supply may cut down prices till the farmer has nothing left for his hard labor. California soil is of a magical productiveness. The market is always hungry for California products. It is a joy and pleasure to work out of doors.

More Southern California people own their own homes than in any other state, and the average deposit in Southern California savings banks is greater than in any part of the country.

One can profitably farm in Southern California in an infinite number of ways, either specializing in some direction or growing a variety of crops. Every thrifty man can find some particular line of agriculture that suits him and is within his means.

You will make more profit in California, you will live longer, feel better, endure fewer troubles and discomforts, and be happier.

The people of Southern California are very broad minded, liberal and hospitable, with no prejudices against any religion, any sect or political belief. You will like Southern California people. The newcomer is always welcomed. In fact, Southern California is a great happy land of plenty, where men work and play—the nearest approach to paradise that is possible on this earth.

Why not move your home to this beautiful country and let your family enjoy the blessings of life as they should? The railroads are constantly making very low rates. Now is the time to act while land may still be had at reasonable prices. Sit down and write a letter asking all the questions you wish.

## DEVELOPMENT SOCIETY OF CALIFORNIA,

ROOM 106, HUNTINGTON BLDG., LOS ANGELES, CALIFORNIA.

### Write at Once for Further Particulars

The Development Society of California has nothing to sell. It is a body of public spirited men, organized for the purpose of spreading the truth about California throughout the United States.

### EVERY FARMER SHOULD READ THESE FACTS

Figures From the Last United States Census Report.

Fertilizers are an expensive item of farming in most states. Massachusetts spends yearly over \$4,400,000 for fertilizers. It costs Georgia 5.5 per cent of the total value of a crop to pay for the fertilizers used. In California it is less than 1 per cent (.7 per cent).

In Iowa the average value of hay per acre is \$6.59. Compare this with California oranges that pay as high as \$500 to \$1,000 per acre; or California English walnuts that frequently bring \$1,000 per acre.

In California vegetables average \$86.42 per acre. In Ohio, \$58.64. In Iowa, \$35.67.

The average value of potatoes per acre in the United States is \$33.48. In California, \$62.65.

Oats in California average \$11.06 as against Iowa's \$7.08.

The average value of eggs in United States is 11.2c per dozen. In California, 15.8c.

California excels all other states in production of barley, asparagus, peas, peaches, plums, prunes, cherries, grapes, oranges, lemons, citrons, olives, figs, almonds, English walnuts.

California produces 21.5 per cent of all fruits in the country.

An acre of sugar in California is worth more than in any other state.

California produces 117,935,727 lbs. of dried fruits.

California ranks second in the production of beans and of honey.

All crops that can be grown anywhere in the United States can be successfully cultivated in California.

California is economically an empire by itself where farmers get far bigger prices for their crops, where an acre yields larger volume of crops and where farming is conducted with less expense, less work and less risk.

Horses, cattle, sheep and swine pay big profits in California.

## FIELD NOTES.

Galloway huls are offered for sale by Mr.  
W. W. Scholes, Onawa, Iowa.

A few French draft and Percheron mares  
are offered for sale by Mr. C. T. Gollehon,  
of Blair, Neb.

Chester White gilts, bred for June farrow,  
are offered for sale by Mr. S. J. Philson, of  
Harlan, Iowa.

Mr. August Voge, Portsmouth, Iowa, is offer-  
ing some very good Duroc Jersey fall  
boars for sale.

A splendid bunch of young Short-horn  
boars are offered for sale by Mr. A. B. Clark,  
Wayne, Neb.

Four fall Duroc Jersey boars are offered  
for sale by Carl Hansen, Herman, Neb., at  
200 pieces, as he needs the room.

Two good yearling Meddler boars are of-  
fered for sale by Messrs. Wm. Ray & Son,  
Dance, Iowa. They also have some other

splendid boars that they are pricing. Read  
their advertisement on page 27 of this week's  
issue and write them.

A good 2,200-pound Percheron stallion,  
sired by the great show horse, Sully, is  
offered for sale by Mr. J. S. Golder, of Scrib-  
ner, Neb.

A few good fall Duroc Jersey boars, sired  
by a son of the sweepstakes boar, Red  
Knight, are offered for sale by Mr. August  
Voge, of Portsmouth, Iowa.

A splendid bunch of Shropshire rams and  
ewes are offered for sale by that veteran  
breeder, Mr. Geo. Allen, of Lexington, Neb.  
These are strictly all right.

Messrs. Hood & Baker, Dunlap, Iowa, are  
offering some cracking good young Here-  
ford bulls for sale. It will pay any of our  
readers to go and see these bulls.

A few nice young Scotch bulls are offered  
for sale by Mr. Ernest Funke, of Greenfield,  
Iowa. He is pricing these within the reach  
of anybody who wants a good bull.

Marshall Favorite, a yearling Scotch bull,  
sired by Imp. Fashion Favorite, and out of  
Imp. Jilted Maid, is offered for sale at a  
very reasonable price by Mr. J. D. McDermott,  
of Wota, Iowa.

Three Ohio Chief boars are offered for sale  
by C. F. Kirk, Pawnee, Neb. Two of these  
are fall boars and one is a yearling. Home-  
stead readers who want an Ohio Chief boar  
should write him at once.

An administratrix sale of Short-horn cat-  
tle will be held October 1st, at Traer, Iowa,  
by Mrs. Welcome Mowry. In this sale ev-  
ery animal in the herd will go at the price  
named by the bidder. Fuller particulars in  
due time.

A splendid lot of fall Poland China boars  
are offered for sale by Mr. F. W. McIntyre,  
of Red Oak, Iowa. Homestead readers who  
want a fall boar should write for one of  
these, as they are very good and the price  
is reasonable.

Mr. W. H. Trenchard, of Bosworth, Mo.,  
writes: "We have just sold to Messrs.  
Jos. Miller & Sons, Granger, Mo., nine head  
of Scotch cattle, which no doubt will make  
quite an addition to their already valuable  
herd of Scotch cattle."

Messrs. Hunter & Smith, of Beatrice, Neb.,  
have a choice string of young Jersey bulls,  
got by Emanon, their leading show, and  
breeding bull. These are from imported and  
St. Lambert cows that are noted as high  
testing and heavy milking cows.

Mr. U. G. Davidson, of Manson, Iowa, wants  
a good, steady farm hand. Good wages  
and work the year round to the right party.  
Any young man desiring such a position  
would do well to communicate with Mr.  
Davidson at once, and mention The Home-  
stead.

Mr. R. Waldo, of Harlan, Iowa, breeds  
Duroc Jerseys, and he has about fifty spring  
pigs which he is developing for his fall trade.  
The most of his foundation stock was pur-  
chased from the W. W. Wheeler herd, and  
contains the blood lines of some of the most  
noted strains. His advertisement will be  
found in The Homestead later in the season,  
when he will have some good boars to offer  
the trade.

Mr. J. W. Briggs, of Alden, Iowa, is offer-  
ing Duroc Jersey pigs of February and  
March litters, sired by Jack Orion 52275 and  
Ind. Chief 52273, both prize-winning boars.  
Pairs of males not akin can be shipped if  
desired. Also pens will be sold at special  
prices. Here is an opportunity to get some  
well-bred pigs at prices that are made to  
reduce the herd. When you write kindly  
mention The Homestead. See page 28 and  
address as above.

Mr. F. A. Kruse, of Waco, Neb., reports  
125 pigs from his herd of Duroc Jerseys thus  
far. For sires there are represented Golden  
Chief and Fashion Improver Jr., both proving  
good pig getters. The latter named boar  
will be sold or traded. He is the grandsire  
of Improver II. 13365 and Proud Advance  
23549. As he is only two years old his age  
of usefulness is barely begun and he should  
make a good herd boar for someone. When  
writing for prices kindly mention The Home-  
stead.

On page 27 of this week's Homestead will  
be found the O. I. Chester White advertise-  
ment of Mr. H. C. Mehning, Manson, Iowa.  
Mr. Mehning, while yet one of the young  
breeders, has some good stock and he can  
furnish either boars or sows at reasonable  
prices at all times. He has some pigs now  
twelve and sixteen weeks old which he is  
pricing very reasonably. Besides this he is  
making prices on pairs, trios, and pens. Five  
fall boars are also for sale. Write him  
your wants, kindly mentioning The Home-  
stead.

The Scotch herd bull, Secret Prince  
248363, now at the head of the herd of Mr.  
W. R. Winder, of Ireton, Iowa, is for sale.  
Secret Prince was calved March, 1904, in  
the herd of Mr. H. G. McMillan, of Rock  
Rapids, Iowa, and his sire is Prince of  
America Maine Valley 157971 and dam is  
Simplicity 6th, tracing to Imp. Simplicity by  
Cumberland 50626. This bull is a nice red  
in color and in conformation conforms to  
the standard of well-bred Scotch Short-horns.  
Write for price and kindly say you saw the  
advertisement in The Homestead. See page  
26. Address Mr. W. R. Winder, Ireton,  
Iowa.

Messrs. Hanks & Bishop, of New London,  
Iowa, the well-known breeders of Duroc Jer-  
sey swine, have had good luck with their  
spring pigs. These gentlemen have one of  
the best herds in the state. They have sev-  
eral litters by Model Wonder, a son of Crim-  
son Wonder I Am, the champion boar at the  
Iowa State Fair in 1905, and is a half  
brother to Crimson Wonder Again, the cham-  
pion boar at the Iowa State Fair in 1906.  
This young boar is a strong proposition for  
championship honors this year. He has  
proven a most excellent breeder and pigs  
sired by him will look well in any company.  
Eight litters are sired by Iowa Chief. This  
boar was sired by Golden Rule and is out of  
Col's Belle II. by Ohio Chief. This boar  
was bred by Messrs. Watt & Foust and is  
one of the heavily-boned and best-footed  
boars the writer has seen this season. He  
also has proven himself a good breeder, and  
the crop of pigs sired by him are doing well.  
Top Notcher I Am is the sire of a few lit-  
ters. This boar was sired by Top Notcher  
Again, a World's Fair winner, and his dam

was by Indicator, a prize winner at the Iowa  
State Fair. This firm are making reason-  
able prices on spring pigs and will be glad  
to correspond with anyone in need of a herd  
boar. The herd is bred along popular lines  
and the prices are very reasonable. Cor-  
respondence promptly answered, and satis-  
faction is always guaranteed. Later the an-  
nouncement will appear in these columns.  
Send your order early and get the pick of the  
spring pigs. Kindly mention The Homestead  
when writing.

"Korn, Klover and Kattle Farms" is the  
title of a neat little circular issued by a  
Kansas farmer who sells farms at owners'  
prices. It contains some valuable advice to  
those who are soon to buy land in new re-  
gions. It lists also a good collection of  
farms which are farms where crops have  
never failed. Where markets and neighbors  
are good. If you want to buy a good farm  
from an honest, reliable seller then write  
to Mr. Wm. A. Gilliland, Mayetta, Kansas.  
Kindly mention The Homestead when you  
write, and ask for the above mentioned cir-  
cular.

"Our Mr. Taylor starts next week for  
Europe for our new importation of stallions,"  
writes the firm of Taylor & Jones, Williams-  
ville, Ill., "and he expects to bring back  
100 head of the best he can find. All of our  
customers write they are getting more busi-  
ness than they can well do and the out-  
look for the coming season is most favor-  
able. We are proud of the fact that our  
former patrons always come back to us  
when they are in the market for a horse.  
This to us is worth more than money be-  
cause it bespeaks a confidence gained only  
by dealing honestly with all men. We ap-  
preciate the fact that your paper has had  
not a little to do in bringing the trade for  
which we are duly grateful."

Mr. W. S. Karnaghan, of Kankakee, Ill.,  
has entered the ranks of live stock auction-  
eers. He has been a breeder of live stock  
for over fifteen years and has had a wide  
experience in all branches of the live stock  
industry, and should be able to give good  
service to parties expecting to hold public  
sales. He intends to make a specialty of  
Poland China and Duroc sales, believing that  
his past experience in handling these two  
breeds successfully and his knowledge con-  
cerning them especially fits him for this  
work. He will be pleased to hear from  
readers of The Homestead who have not as  
yet secured the services of an auctioneer, or  
who need help on their sales. Look up the  
advertisement on page 28 of this issue.

Mr. E. B. Ryan, of Neola, Iowa, known  
as "the hog man" because he can raise more  
pigs than any other man in his community,  
has over 200 Duroc Jerseys on his place  
this year and he expects to be able to offer  
the boys some first-class stock this fall. He  
has used the following boars at the head of  
his herd: Top Notcher Prince by Tip Top  
Notcher; Crimson King by Crimson Wonder,  
and one of the best living sons of that noted  
old sire; E. Z. by Surprise; Ito by Orion;  
Iowa Cashier, and Wehr's Perfection by  
Munson's Perfection. He has some pigs on  
the place by nearly all of these hogs, besides  
a few by outside boars and from sows that  
he purchased last winter. Mr. Ryan is a  
pusher in the hog business and his always  
culls pretty closely. He only saves the tops  
for breeders and the rest he puts on the  
market. He will have something to say to  
prospective buyers this fall.

One of the good herds of Duroc Jerseys a  
representative of The Homestead has re-  
cently inspected is that of Messrs. E. M.  
Castle & Son, of Joy, Ill. They have in the  
neighborhood of 250 head of spring pigs, a  
large number of which are sired by their  
noted herd boar, Perfection Chief. This boar  
was third at the Iowa State Fair in 1905  
in a strong class of sixty-eight and headed  
the third-prize young herd; second at Min-  
nesota State Fair, 1905-06, first at Wiscon-  
sin State Fair 1905-06. He is a boar of  
most style and character, will weigh 900  
pounds in show form, and is as smooth as  
a ribbon. He has been a good breeding  
boar, as his spring pigs will show. Messrs.  
Castle have been good buyers the past season  
at many of the noted sales and have a  
variety of good breeding in their herd. There  
are good litters by Sue's Tip Top Notcher,  
a good son of Tip Top Notcher, and out of a  
prize-winning dam by Kruger. Another  
boar which is the sire of good litters is  
Prairie Paul, he by old Oom Paul, and out  
of Prairie Top Notcher, she by Tip Top  
Notcher and out of Goldie O. 40th, one of  
the best sows ever owned in the noted herd  
of Messrs. Seckman & Son. With this line  
of breeding in the males one would naturally  
expect the sows to be equally well bred.  
This is the case and the pigs which are  
now offered for sale will please the most dis-  
criminating buyers. The following letter re-  
cently received by Messrs. Castle is ample  
evidence of the many satisfied customers  
that this firm have: "We received the sow  
the 27th and are well pleased with her.  
She came through in good shape. Anyone  
wanting fair and square treatment and first-  
class stock will make no mistake in writing  
to you for it, and also for prompt shipment.  
I am pleased to recommend you to anyone  
needing Durocs. E. Sheller, Ashland, Ohio."  
We are pleased to recommend these gentle-  
men and their stock to readers of this paper  
and will give further particulars in regard  
to this good herd in later issues. Their  
advertisement will appear in these columns  
within a short time. Those of our readers  
in the market for spring pigs will do well  
to write this firm, kindly mentioning The  
Homestead.

## HEREFORD BULLS FOR SALE.

Those of our readers who want Hereford  
bulls should write or go and see Mr. A.  
Spooner, Mondamin, Iowa. He is offering  
twenty-five good yearling and two-year-olds  
sired by Beau Donald 12th, one of the best  
sons of old Beau Donald.

HARGROVE'S SILOS AT IOWA STATE  
FAIR THIS FALL.

After carefully looking over the Hargrove  
exhibit of silos at the Iowa State Fair last  
year 10,000 farmers signified their intention  
of building silos this season. What could  
speak more for the interest that is being  
manifested in the silo. The shortage of for-  
age this year should be an inducement to  
every stock farmer to try the merits of sil-  
age. The time is at hand to plan for the  
details incident to the erection of that silo,  
so long anticipated. One of the most popu-

lar manufacturers of silos is Mr. H. C. Har-  
grove, 316 E. Walnut St., Des Moines, Iowa.  
He will gladly furnish you with plans, prices,  
etc. Write him, mentioning The Homestead.  
See page 7.

## HEREFORD BULLS.

Anyone wanting a good young Hereford  
bull should read the advertisement of Mr.  
A. Spooner, of Mondamin, Iowa. He has  
twenty-five for sale sired by Beau Donald  
12th, a son of the great Beau Donald, that  
won fame and fortune for Mr. Curtice, of  
Kentucky. Mr. Spooner could fill a car-load  
order if wanted.

## LARGE POLAND CHINA SOWS.

Mr. W. H. Cooper, Hedrick, Iowa, is offer-  
ing in this issue ten sows which are a part  
of his foundation stock. They are from one  
to four years old and fully matured. They  
have been bred to his herd boar, B's Dude  
91429, a massive son of Nemo L's Dude.  
These sows, Mr. Cooper writes, all farrowed  
large litters this spring and to anyone wish-  
ing to establish a new herd or replenish the  
present one this offer should present a good  
opportunity. For breeding and prices write,  
mentioning The Homestead. See page 27.  
Address as above.

## TEMPTING GRAPES AND PEACHES.

Are available at only a comparatively  
short season each year. With a reproduction  
of the magnificent picture of a \$5,000 paint-  
ing of these fruits on your walls, any fam-  
ily can have this fruit the year round. The  
picture itself is 16x20 inches, in a nice gild-  
ed frame and the fruit is in natural colors.  
To get this picture you send ten cents for a  
three months' subscription to Mother's Maga-  
zine, a well edited illustrated family paper.  
Address, The Mother's Magazine, Elgin, Ill.  
See page 16 and kindly mention The Home-  
stead when you send for the picture.

## LEWIS HAS FALL BOARS FOR SALE.

To those who are in the market for a good  
fall boar that is a prospective herd header  
we wish to say that Mr. Chas. Lewis has  
some Poland Chinas that are extra good.  
They are sons of his herd boar, Norvall  
Chief, that won fourth in his class at the  
Nebraska State Fair in 1906 and is the sire  
of the majority of the good individuals that  
Mr. Lewis has been showing in the last two  
years. They are very growty, big-boned  
fellows and are from such dams as Black  
Jessie M. and Jessie M., both daughters of  
the great Nebraska Chief, and Dora Wilkes  
by Guy Wilkes. If you are in the market  
for a good fall boar to head a young herd  
it would be a good plan to call on or write  
Mr. Lewis, as he has some extra good ones.  
When writing please mention this paper.

HAS EXCEPTIONAL WEARING QUALI-  
TIES.

The Century Rubber Roofing is so named  
on account of its good wearing qualities. It  
has been named the Century on account of  
this fact. Whether a roof covered with Cen-  
tury Rubber Roofing will remain unaffected  
by the elements after 100 years of use or  
not we are not prepared to say. However,  
we think it would be a safe statement to  
make that if any roofing material will stand  
for a century, the Century Roofing will. Dura-  
ble, easy to lay, inexpensive and so much  
superior to ordinary forms of roofing, the  
Century Roofing appeals to the builder of  
farm or other buildings. A catalog quoting  
prices and containing full particulars will be  
sent to any address if it be sent on a postal  
to the Century Mfg. Co., Department 770 R,  
East St. Louis, Ill. For the advertisement  
see page 4.

## KEEP THEM HEALTHY.

Under the above heading appears an ad-  
vertisement elsewhere which contains some  
good practical advice to poultry raisers. Suc-  
cess with poultry depends not so much on the  
number of chickens hatched as on the num-  
ber saved. It is the number of chickens  
that are brought to maturity that bring in  
the "pitt money" as the housewife says. Pre-  
cautionary measures against disease are ab-  
solutely necessary in the flock even when  
conditions are the most favorable. Every  
chick or mature bird is liable to disease. One  
of the most simple preventives against  
cholera, howel complaint, and kindred poul-  
try diseases is Germozone. It is a tonic  
that is given in the drinking water twice a  
week. Simple, isn't it? It prevents as well  
as cures. It is indorsed by practical poul-  
try people over the country. Send today for  
a package and a copy of "Mandy's Poultry  
School" also a 1901 egg record will be in-  
cluded. Address, Geo. H. Lee, Omaha, Neb.  
Mention this paper when you write. See  
page 11.

## A DAY WITH W. W. WHEELER.

A representative of The Homestead had  
the pleasure of calling on Mr. W. W.  
Wheeler, of Harlan, Iowa, recently, and  
inspected both his herd of mastodon Poland  
China hogs and Hereford cattle, and we are  
here to say that no man lives that has better  
than will be found on the Wheeler farm.  
We saw were one of the best bunches of  
spring pigs that we have seen this season,  
of the famous mastodon type of Poland  
Chinas. There are about thirty February  
boars among the number and he is now  
booking orders for these and will hold them  
for future delivery. He has four yearling  
and seven fall boars that he will sell and  
ship at any time. These are sired by Sur-  
prise Wonder 5th and Sunshine Chief, both  
boars of great size, and they are out of  
Orange-Maid D., Lady Wonder 5th, Lady  
Wonder 6th and other big sows. The farmer  
or breeder who is looking for something  
with plenty of size and lots of length will  
get it in these boars. His spring crop is  
sired by his great boar, Columbia Chief,  
Longfellow B., Mastodon and Mastodon 2d.  
In Herefords he has a grand lot of calves  
this year, largely sired by Beau Donald 37th.  
These are out of daughters of old Columbus,  
Imp. Britisher, Acrohat, Heslod 2d, St. Louis,  
Bold Briton, Thickett and Improver. He has  
fifteen imported cows in the herd and few  
herds in the West can show as grand a lot  
of table-hacked matrons as will be found  
in this Wheeler herd. He has about thirty  
young bulls on hand and for sale. There  
are a number of these that should go to  
head herds. One of these is St. Louis Wilton,  
a yearling that will weigh 1,600 pounds. He  
is sired by Gay Wilton 98084, he by old  
Anxiety Monarch, and his dam is the great  
cow, Armour's Sunflower, for which Mr. Kirk  
cow, Armour once paid \$1,000. Here is one of  
the best young bulls we know of for a herd  
bull. Another good one is Beau Monarch

by Beau Donald 33d, out of an Anxiety Monarch dam, and another very toppy bull is called Archie, by Mariner 71749 out of Tidy Archibald 3d. Besides these Mr. Wheeler has a splendid lot of yearling and two-year-old bulls and it will pay anyone who wants a Hereford bull to lay off a day and go and see the bulls and also the herd. Remember he has some big yearling and fall boars for sale and he will book orders for spring pigs. Write him or go and see his herds, and don't forget to mention The Homestead.

#### ELLERBECK'S POLAND CHINAS.

A recent visit to the herd of Mr. J. T. Ellerbeck, of Beatrice, Neb., found him caring for a nice prospective bunch of young Poland, mostly the get of his herd boar, Logan B. In Logan B. he has a hog of great scale and has produced some of the best stuff that has come from this section of Nebraska. He is a son of Logan Chief and he by the great breeding boar, Chief Tec. 3d. His dam was Maria's daughter by Corwin Medium. He is assisted in service by King Do Do Jr., son of King Do Do, and he by the great Expansion. His dam was Samson's Sister 2d by Logan Chief. The greater part of the spring crop of pigs are by these two boars. They are from richly-bred dams, there being daughters of such boars as Nemo L's Dude, C's O. K., Logan B. and many other boars of much prominence as producers of show stuff. Mr. Ellerbeck has some very good show prospects that will be seen at the state fair this fall if nothing happens them. If you are in the market for anything in his line write him, as he will surely treat you right if you care to place an order with him. When writing please mention this paper.

#### THE LAST CALL FOR THE CUTLER DISPERSION SALE.

Readers of The Homestead who want some good Short-horn cattle should not forget the dispersion sale of Mr. W. E. Cutler, which will take place at New York, Iowa, ten miles south of Chariton, Iowa, Saturday, June 8th. There will be eight head of Scotch cattle in the sale besides a splendid lot of Scotch-topped, an excellent foundation. One of the prizes in the offering is the herd bull Baron Victor 259111, a Cruickshank Victoria bull and a good one. This bull should go to the head of some good herd. We have referred to this bull in past issues of The Homestead, and we only now want to say to our readers who are looking for a good herd header to go and buy this fellow. This is a dispersion sale, made so by the sickness of Mr. and Mrs. Cutler, and everything has to go. This herd was bred up along the most approved blood lines, and the past three bulls used were all Cruickshank Victorias. The cows are nearly all great milkers and are large, roomy, broad-backed matrons. Individual merit was one of the essentials with Mr. Cutler, when building up the herd and he is certainly offering some good cattle. The Scotch tribes represented are Victorias, Lavenders, and other well-known sorts, and these are good enough to go into the best of herds. Readers of The Homestead are requested to attend the sale. Remember the date is Saturday, June 8th.

#### DISPERSION OF THE L. H. KERRICK HERD OF ABERDEEN ANGUS CATTLE.

Probably the most important event in the history of the Aberdeen Angus breed will be the dispersion of the Wells herd, established and owned by the late Hon. L. H. Kerrick, of Bloomington, Ill., which will be held at the farm near that place on June 25th, 26th and 27th. Mr. Kerrick occupied a unique position in the Angus world. He never showed any of his stock in the breeding classes, but preferred to show in the fat stock classes. It is doubtful if any breeder did as much to popularize the Angus in the minds of the feeder and farmer as did Mr. Kerrick. His success in the show yards is too well known to require mention here, but through his influence and his untiring energy the Angus breed rapidly forged to the front in the minds of the meat producers of this country. The offering which is to be sold on the dates above mentioned includes representatives of the most fashionable families of the breed. There is an abundance of show material for the breeder who wishes to strengthen his herd. As is the case in dispersion sales only, many valuable animals are offered at auction that are under no other circumstances parted with at any price. This herd is strictly a business herd. The cattle are in good, thrifty condition and a large number of calves are sold with their dams. There are over 250 listed (not including calves at foot) and this great number insures bargains for those present. This great offering is also distinguished on account of including the Ballindalloch Lady Fanny Bull, Imp. Lord Fretful, one of the two bulls (the other being his grandsire, Imp. Prince Ito) now in service in America, that was bred at Ballindalloch and kept in service in that noted herd. There are also cataloged numerous of the get of this imported bull and thirty other representatives of this Ballindalloch Lady Fanny family descending through a dam, by the renowned Trojan, whose granddaughter in America was bred to the great bull, Imp. Ermine Bearer. No sale in this country has ever included so many of this famous family. The Ericas are an attractive lot, including numerous imported and home-bred animals that will suit the most discriminating buyer, including the two-year-old bull, Eric 9th of Keilor Park. The Blackbirds contain the stock bull, Black Roy of the Wells, and other good specimens of this tribe. The Prides are of the strain which produced Imp. Prince Ito, the \$9,100 bull, and his son, Prince Ito 2d, the undefeated champion of America. One of the most valuable families in the herd has been the Antelopes, descending through Antelope of Creston, one of the greatest daughters of Black Knight, and dam of the sire of prize winners, Craft of the Wells, and grandam of Dan Wessels of the Wells, two bulls that have been used in the herd with excellent results. Further mention of individuals in this offering will be made in following issues. The cattle have been raised in a practical manner and purchasers may rest assured that with ordinary care and feed their stock will continue thrifty and potent. The herd has been prolific in the extreme, and nothing has been cataloged about which there is any question as to its future usefulness. The catalogs are out and can be had by addressing Mr. W. C. McGavock, of Springfield, Ill., under whose

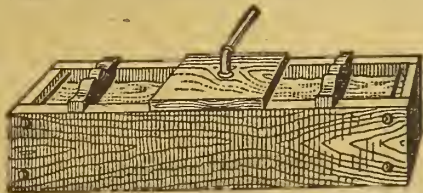

management the sale will be held. The number of the offering insures the prospective buyer many bargains and the class of cattle which go to make up this offering will surely please those present sale day. Write for catalog at once, kindly mentioning The Homestead, as per the advertisement on page 29 of this issue, and plan to be present at this noted sale.

#### A POLAND CHINA BREEDER WITH 100 PIGS.

For something like twenty-one years the name of M. G. Arnold, of Strawberry Point, Iowa, has been familiar to Homestead readers. It is something near that number of years since the writer made his first pilgrimage to Mr. Arnold's farm near Strawberry Point in the interests of The Homestead. In all the succeeding years we have never found Mr. Arnold short on a good crop of pigs. This has been one of the difficult seasons for the proper saving of the spring crop of pigs, yet Mr. M. G. Arnold has by careful watching saved his usual quota of pigs, among which are a number of good early ones that promise to make fine specimens with which to supply the early trade. The major portion of these pigs are sired by that splendid boar, Justice 105245, a son of the great show boar, Corrector, and out of the prize-winning sow, U. S. Lady, by Black U. S. Chief. U. S. Lady was winner of first prize at the Illinois and Iowa State fairs the year that she was shown. This boar, Justice, has proven a great success as a breeder, and although Mr. Arnold has recently parted with him, some fears are entertained that he has made a mistake. Among other so-called fashionably-bred ones are some daughters of Mischief Maker, with nice litters at foot by the great boar, On Up. Later in the season Mr. Arnold will have something to say concerning his choice string of pigs. It is certainly gratifying to know that such an old and reliable breeder is still pursuing the business in that even tenor of manner that insures success.

#### THE ONLY WATERER.

We desire to call the attention of Homestead readers to the advertisement of the Only Waterer on page 18 of this week's issue. This is one of the hog waterers that gives entire satisfaction, runs as well in winter as in summer, and the thousands of users have testified that this is today one of the very best waterers on the market. The Only is simple, durable and reliable and it cannot run over or clog and it runs all

winter. Your hogs will do so much better because they always have fresh and clean water before them, and besides it saves you a great deal of time. Every reader of The Homestead who raises hogs should have one of these waterers and they cannot afford to not have one of them. The Only Manufacturing Company, of Hawarden, Iowa, make a very reasonable proposition. They are offering to send one on trial free as per their announcement in their circular. Readers of The Homestead are requested to send for their free circular and investigate the merits of the Only Waterer, and we feel that they will be well repaid for their trouble. When writing kindly mention The Homestead.

#### THE ROBERTS DUROC JERSEYS.

Every reader of The Homestead who loves a red hog will be interested in knowing of the herd of Messrs. L. H. Roberts & Son, of Paton, Iowa. This herd is undoubtedly one of the oldest Duroc Jersey herds in the United States, tracing back to the days of Messrs. Wm. Roberts & Son, who were in their time among the most noted in this country. Much of the foundation stuff now on the place traces in unbroken line to the prominent sires that were in this herd twenty-five years ago. Mr. L. H. Roberts, the senior member of the present firm, is one of the well-known judges in the West, and it is due to his judgment and his long association with the breed that this herd has been brought up to its present standard. At the present time they have about 450 head on the home place, together with a large bunch on the old farm two miles from town. At the head is the two-year-old son of Ohio Chief, Walt's Chief and Liberty Chief. Mr. Roberts went back to Ohio and purchased these two boars and they stand today at the head of the herd. It is useless to give a description of these two hogs at this time. Let it suffice to say that he is bringing them along and breeders may have an opportunity to see them in the show rings this fall. They have about 275 spring pigs and they are sired by these two boars, also by King of Iowa and Fogg's Col. They also have a number of litters by outside boars, the sows having been purchased by Mr. Roberts in the leading sales this past winter. They have about 275 spring pigs on the place and they are one of the most uniform and best head and ear bunches of pigs we have seen. Mr. Roberts has endeavored to keep up the size in the herd and then went after the head and ear and then the finish. He has bred for a certain type and being a good judge, has succeeded in getting it. He will show at the leading state fairs this fall and he will put out a yearling and an aged herd, and they will be as true to type as has ever been seen at the fairs. He has some very good aged sows, also some good yearling sows, together with a nice representation of fall and yearling boars. These are all being carried along for the fall shows and will afterwards be put into their fall sale which promises to be one of the best that will be held this fall. From a breeder's standpoint the Roberts herd forms an interesting study, and no sow or boar is put into the herd without first knowing their ancestry for generations back. This firm invite a critical inspection of their herd and will be glad to have breeders pay them a visit and look over their stock. The herd of Messrs. Roberts & Son was one of the first Duroc Jersey herds that was advertised in The Homestead, and every prominent herd today can trace much of the breeding back

to sires used in this herd at one time or another. Their advertisement appears regularly in The Homestead and it is worth the while of any of our readers to make an inspection of how they grow and develop Durocs on the Roberts farm. See their advertisement on page 28 and when writing them please mention The Homestead.

#### FINE SHROPSHIRE COMING FROM ENGLAND.

Mr. Howard A. Chandler, of Chandler Bros., Chariton, Iowa, writes from England the following regarding their August importation: "Arrived in England a few weeks ago and as yet there are no other large foreign buyers here. I have visited the best and oldest established flocks and made careful selections of the very tops. We will have one of the largest and best bunches of Shropshires that have ever been seen in America. We invite breeders and admirers of Shropshires, also mutton producers who are investigating the merits of different breeds, to visit us at Chariton, Iowa, and if they do not care to buy they will have had a good study of the top selections of the world's best flocks. The importation will arrive at Clover Hill about the 15th to 17th of August and then will be a good time for buyers to make their selections. We will have show sheep of both sexes and all ages for those desiring to exhibit at state or county fairs this season. The number of yearling rams and ewes for breeding purposes will be very large and we can satisfy the most exacting buyers with both sheep and price. Will also have lambs of both sexes. At Clover Hill we are now offering at very reasonable prices a lot of richly-bred, strong-constituted home-bred rams of exceptional quality. We can please anyone interested in home-bred or imported Shropshires in large or small lots." See advertisement on page 15 and mention The Homestead when you write.

#### TO NEBRASKA PAINT USERS.

There are a great variety of mixtures that go under the name of paint. Absolutely the only kinds of paints to buy nowadays are those which are guaranteed to be pure. Cheap ordinary paints are not advertised as high grade paints are. The competition is too enterprising for the cheap article. In looking over our columns this week will be found a new paint advertisement in the Minnesota Linseed Oil Paint Company's Pure Prepared Paint. This article of paint is sold under the guarantee of a well known and absolutely reliable lumber company in Sioux City, Iowa. They have lumber yards scattered well over the state of Nebraska and it is the paint users of that state that this company is trying to interest. Like any other high grade article of paint, the Minnesota Linseed Oil paint is sold strictly on its merits. It conforms in every particular to the pure paint law of North Dakota. No further proof of the fact that this paint is composed of pure white lead and linseed oil should need to be given to convince our readers of the fact. Pure paint costs a trifle more than an adulterated article, but it wears vastly longer. It is elastic, tenacious and sticks to the boards. On the other hand poor paint checks, cracks and peels off, making a worse looking job than no paint at all. Nebraska paint users are heartily invited to ask to see a sample can of Minnesota Linseed Oil paint at the Edwards & Bradford Lumber Co.'s yards in that state. The paint has stood the test of time; what more could be required? Ask for it, always at the Edwards & Bradford Lumber Company's yards, for your next job of painting. Good for inside or outside work. Either house or outbuildings. See the advertisement of this paint on page 4 and when talking with your local dealer kindly mention The Homestead.

#### THE COLE DISPERSION ABERDEEN-ANGUS SALE.

The very best bargains that have ever been offered in Angus cattle were in dispersion sales. Dispersion sales differ from draft sales inasmuch as in dispersion sales everything good in the herd goes in. Therefore the forthcoming sale of the "Tenderloin Angus Herd," owned by Mr. H. A. Cole, of Chicago, which will be held at the Iowa State Fair grounds on June 18th, promises to be one of the events that Angus men cannot afford to overlook. The writer remembers well when Mr. Cole was founding his herd and he also knows that neither time nor money was spared when buying foundation stock. Four of the very choicest females in the Escher dispersion sale cost him over \$2,000 and these will all be included in the sale. There will be three imported cows in the sale and his present herd bull, Imp. Electrician, together with their descendants. This imported bull will be one of the bargains in this sale and the breeder who is looking for a bull of this kind should attend. He will weigh 2,200 pounds and is a royally-bred Erica and a bull that is a good breeder. He is now seven years old, but is just in his prime. As a breeder he has done good service in the Cole herd and he will prove a valuable find for the man that gets him. He is not overloaded with fat, because he has been kept for a breeder, but he will be in the right condition to do good for the man who buys him. Among the females to be sold is Imp. Krista Pride, a grandly-bred Pride cow, and her yearling heifer and she will be bred back again to Imp. Electrician. This cow is a young one and is just in her prime and any good breeder can afford to own her. Imp. Queen of Kirkbridge is another good young cow that is just in her prime and she is safe in calf to Imp. Electrician. Imp. Sherbert of Southgate is a cow that Mr. Cole purchased of Mr. A. C. Binnie and she will have a bull calf at foot by Imp. Electrician. There will be three Blackbird females in the sale, Blackbird of Glen Lea will have a bull calf at foot by Imp. Electrician. She is a three-year-old and is in her prime. Double Gay Dolly Blackbird is a four-year-old, and she will have a heifer calf in the sale and she will also have a calf at foot by sale day to Imp. Electrician. There will be three Queen Mothers in the sale and they are a good representation of this family. There will be a good Barbara cow in the sale and one nice Barbara bull. There will be two Heather-bloom cows in the sale, one a seven-year-old daughter of Lord Woodlawn and a three-year-old, also one Heatherbloom bull. The Easter Tulloch Duchess and the Drumin Lucy families will be well represented and there will be nineteen Georgians in the offering. The latter tribe will furnish the largest number of any one family in the sale and this

branch of Angus cattle has been a great money maker for Mr. Cole. Just a word as to the bulls that have been used on this herd. His first herd bull was 2d Lad of Emerson, a royally-bred Trojan Erica, and a son of the renowned Gay Lad. He was in service in the McIlhenry herd when Mr. Cole bought him. Fourteen females and one bull are sired by him and all will be included in this sale. His next purchase was Imp. Marmion's Eric, but he lost him after having used him, but thought enough of his calves that he afterwards went and bought his full brother, Imp. Electrician. There will be thirteen cows and six young bulls in the sale sired by Imp. Marmion's Eric, and the most of these are out of dams having the Gay Lad Trojan Erica top. There will be a lot of calves at foot, and there will also be a goodly number of yearling and two-year-old bulls in the sale. Anyone who is thinking of buying Angus cattle will certainly find some good bargains in this dispersion sale. Read the advertisement on page 27 of this week's issue and write Mr. Cole for catalog. Kindly mention The Homestead when asking for the same.

#### IDEAL COUNTRY LIFE.

There is no section of the United States in which ideal country life may be so well realized as in southern California. In no other section can an acre of land be made to yield products of so great value. Here may be found beautiful rural homes, whose owners are in touch of social life, and enjoy the best features of the city and country combined. There is a great variety of soil, as well as climate in southern California, varying from light sandy loam to heavy adobe. The price of land also varies greatly, ranging from \$30 to \$100 per acre for lands adapted to grain, hay and deciduous fruits, without irrigation, up to \$250 or \$500 per acre for first-class citrus land, with an ample water right. To most people from the states east of the mountains these prices will appear high, but it should be remembered that land is worth what it will pay interest on. In this case, irrigated land at \$250 per acre, is often relatively cheaper than the unirrigated land at \$30 an acre which will only raise grain and hay and not even that when there happens to be a drouth. Land may be purchased in southern California on easy terms. Many improved places, with bearing orchards and comfortable homes, are always on the market, there being, as elsewhere, a considerable number of citizens who are never content to stay very long in one place, even though that place be as near perfection as can be found on earth. For those who have the means it is often more advisable to purchase one of these improved places than to buy raw land and improve it. It is not claimed that the climate of southern California is perfect, but it may be safely asserted that it approaches as near perfection as can be found on the globe. The subject of irrigation is one that troubles many eastern people, who think of coming to settle in southern California, to judge from the inquiries received. A mistaken idea prevails that farming is only carried on in southern California by means of irrigation, and that without it crops would be a failure. For all grain and winter crops, irrigation is not employed. Corn is irrigated in some localities, being summer crop, but is successfully grown in many places without irrigation. Upon some lands, after a crop raised without irrigation has been harvested, another is raised by means of irrigation. On irrigated land two or three crops a year are frequently raised. The advantages of irrigation are so manifest as not to need discussion. With an artificial supply of water the farmer is rendered independent of his land is enormously increased. One of the surprises to new arrivals in this section is the small amount of land that is needed to support a family. It is a fact that many families in southern California cannot only make a good living on five acres, or even less, of irrigated land, carefully tilled, but also manage to lay something by every year for a rainy day. In such cases families raise most of the food products that are consumed, and always have something to sell. Ten acres are, in fact, about all that one man and his family can attend to if worked to their full capacity, and as soon as settlers begin to hire help the profits decrease very rapidly. Fruit trees can be planted on the land between small fruit, and then again vegetables, until the trees become too large. Under such circumstances there is a constant succession of crops. A favorite method of settling land in southern California, which offers many advantages, is the colony system. These colonies are made up, either here or in the East, among persons who are acquainted with each other, generally being residents of the same section. Each settler owns his ten, twenty or more acres independently, but by purchasing the land at wholesale, in a block, a great saving is effected. The settlers can also co-operate in purchasing supplies, piping water, canning, drying and otherwise preserving fruit, making olive oil and marketing their products. Besides all this they have the advantage of the social life from the start, with school, churches, library, store, postoffice, etc., which otherwise might be long in coming. They do not feel like "strangers in a strange land," and their land will increase in value twice as fast as it would were it settled in a desultory manner. Many flourishing towns have started thus. The development of the horticultural industry in Los Angeles during the past years has been remarkable. The most important horticultural product of the country is the orange. Other fruits raised in southern California are the lemon, almond, fig, prune, apricot, walnut, peach, pear and berries. The shipment of citrus fruits—oranges and lemons—from southern California points for the past season amounted to about 30,000 carloads. Deciduous fruits are shipped fresh, canned, dried and crystallized. As previously mentioned, an active demand for our dried fruit has grown up in Europe. The olive flourishes in the San Fernando Valley, and the almond thrives in the Antelope Valley where they have cool winters and land is cheap. The country around Downey is an all round farming region, where large quantities of pork, butter, cheese, corn and vegetables are raised. The walnut does particularly well around Rivera, just south of Los Angeles city. Alfalfa, which is largely grown for hay, is a most valuable forage plant. It is cut from three to six

times a year. Large quantities of wheat and barley are raised. Southern California corn sometimes grows to a height of twenty feet. Pumpkins have been raised that weighed 400 pounds. There is a beet sugar factory at Alamitos. Los Angeles honey is celebrated all over the country. In the neighborhood of Los Angeles calla lilies, tube roses, carnations and other flowers are raised by the acre. Floriculture is indeed an important and rapidly growing industry. Several women have made successes along this line. Flowers, bulbs and seeds are shipped east in large quantities. Eastern seed men declare that southern California grown seeds are the best they handle. The nursery business is also an important one. Hundreds of acres are devoted to the cultivation of celery, which is shipped east by the train-loads. Winter vegetables, such as string beans, tomatoes, green peas and chile peppers are shipped to the North and East during the winter months, realizing high prices. Berry culture is an industry that brings in thousands of dollars. One does not have to wait long for a patch of berries to bear. The principal berries raised are the strawberry, blackberry, dewberry and loganberry, the latter attaining great size. A number of creameries have been established during the past few years, with highly successful results. The creameries are mostly run on the co-operative plan. There is scarcely a record of one that has not paid good dividends. There is also a successful condensed milk factory in Orange county. Cheese is made, but not enough to supply local demand. Poultry does well when it is given the same attention it receives in the East. Eggs always command a good price, seldom falling below twenty cents per dozen, and up to fifty cents per dozen. Southern California is an ideal section for live stock. The horses raised have been noted for their speed and endurance from the time of the early Spanish settlers. Some famous thoroughbreds have been raised in southern California, and it is the opinion of many that this section will one day rival Kentucky as a breeding ground for fine horses. The mild winters are a great advantage in this industry.

#### DISPERSION SALE OF SCOTCH SHORT-HORNS.

This will be the last opportunity of The Homestead to direct attention to the very important dispersion sale of Scotch and Scotch-topped Short-horn cattle, the property of Mr. H. H. Diers, at Farmersburg, Clayton county, Iowa, June 14th. In previous articles we have set forth the fact that this was an exceptionally good offering of cattle. We desire at this time to emphasize this statement and add that there has not been a better opportunity offered, for some time at least, for breeders and farmers to secure as high-class stock as will be sold here on the above date. In the foundation of this herd Mr. Diers paid from \$700 to \$1,200 for Scotch cows, from which this herd has been built up; nor were these extreme prices paid indiscriminately for Scotch stock simply because it was Scotch. Individual merit has always been the leading consideration in establishing the Center Valley herd. The cows referred to were purchased because of their intrinsic worth and their very superior breeding, and it seems sad indeed at this time to see the good and successful work of Mr. Diers being scattered, as it were, to the four winds, in a single day. Any breeder that can take four Scotch cows and build up such a herd as Mr. Diers has done is certainly worthy to be classed among the best breeders of Short-horns of his day. We believe that we are not extravagant when we say that few breeders have accomplished as much, and it is lamentable when a breeder of this character and ability dispenses with the product of his efforts. Certainly good judgment, proper care and right mating have been the instruments largely responsible for the success of the Center Valley herd. As has been stated in former notices of the sale the best imported bulls were procured and used with marked success. It is a notable fact that in all the bulls used at the head of the herd, but one slight mistake has ever been made. Few breeders with large experience can say as much. It is with pleasure and pride that The Homestead directs the attention of its readers to this dispersion sale where an opportunity will be offered to secure high-class Scotch cattle at their own prices. Owing to the somewhat isolated reputation of Mr. Diers as a breeder, there is a great probability that breeders will be disposed to underrate this offering and not attend. For that reason the wise buyer who is looking for bargains in high-priced stock should arrange to be present. It will be a grand opportunity for the young breeder to buy the nucleus for a good Scotch herd, purchasing cattle that are not only grand individuals, but whose pedigrees are faultless and cattle that have been built up by good care and generous treatment from the most prolific dams that are to be found in any herd. Of the six Scotch bulls to be sold, Imp. Crown Imperial is one. This is a red bull calved Dec. 22, 1901, sired by Village Fancy 2d and out of Imp. Minorka Maid. He has been used with marked success on the herd and owing to the dispersion will, of course, be sold. A beautiful red yearling bull will be found in Lot 31, Baron Duke 275641. He was calved Nov. 20, 1905, sired by Imp. Gladstone and out of Center Valley Bud by Imp. Prince Oderic. He is a Cruickshank Brawth Bud or Foxglove bull. His breeding is faultless. No one in search of a straight Scotch bull need hesitate on account of pedigree on this fellow. Lot 32 is of the same family and sired by the same bull, except that his dam is Pride of Center by Imp. Crown Imperial and her dam is the dam of Lot 31, Baron Duke. This is a roan bull, full of quality and a herd header. Another one of equal type and character is Champion, Lot 33, a rich red roan, sired by Imp. Gladstone and out of the Duchess of Gloster cow Duchess of Center 2d. There is one outcross in this bull's pedigree through the bull Ben Hur. Aside from this it is a straight Scotch pedigree, good enough for the most fastidious breeder on earth. Ben Hur was sired by Financier and he by a pure Scotch bull, the outcross being on the dam's side. This is simply an outcross of Bates breeding and is in no wise inferior to the Scotch blood that predominates. Lot 34 is a red bull called Bryan, sired by Gladstone and out of Minorka's Pride, sbe by Imp. Ava-

lanche. This is a good red bull that will not be a year old until October 20th. A choicely-bred Cruickshank Victoria will be found in Lot 36, Baron Secret. He was sired by Imp. Crown Imperial and out of Victoria Red Rose by Imp. Prince Oderic, sbe out of Varna Victor by Imp. Duca! Crown, and traces directly to Imp. Victoria 71st by Roan Gauntlet. Lot 37 is also a Cruickshank Victoria called Victor Baron, sired by Allerton, a pure Scotch bull, and out of Imp. Minorka's Maid, his sire being Imp. Avalanche. Victor Baron's dam is Victoria Red Rose, the dam of Baron Secret. The remainder of the bulls are Scotch-topped and are splendid individuals worthy to do service in any farmer's herd in the land. All of these cattle are in good, thrifty, breeding shape and need no apologies offered for them. We trust that those in the market for good cattle at moderate prices will not forget this date and place. Particulars are set forth on page 31 in the announcement. Kindly mention The Homestead when writing for catalogs, which are now ready to mail.

#### YOUNG'S DUROC JERSEYS.

A recent visit to the herd of Duroc Jerseys owned by Messrs. E. K. Young & Son, of Havelock, Neb., found them caring for a fine bunch of pigs which they consider the most promising they have ever had at this time of the year. The greater part of them are sired by their herd boar, Luther H., a son of Hambletonian, the first prize yearling at that state fair in 1904. His dam was Merry Jumbo by Jumbo Red, the 1,030 lb. hog. As you see by this hog's breeding he is from prize-winning ancestry and his get are bound to prove equally as good as their ancestors. After a careful inspection of the many good sows on this farm we find that they are of prize winning ancestry and among them are some very choice individuals. Primrose, a daughter of the great Crimson Wonder, and having for her dam Miss Bob, one of the great producers of the business at the present time, is among the good things found in this herd. She is raising a very promising litter of pigs by Proud Lady's Orion No. 10. This sow is a litter sister to the great sow, Morrison's Peach, that Mr. Wilson, of Bethany, Neb., refused \$1,000 for last spring. Crimson Queen is another of the good ones by Crimson Wonder, her dam was Maud's Best by West's Model. She is raising a good litter of eight pigs by Luther H. Lady Russell by Gold Dust Jim, the first prize aged boar at Iowa in 1905, is another that deserves mention. Mr. Wilson & Son are offering a yearling boar for sale by Morrison's Belle Top. His dam is a daughter of Won't Be Beat by the great Kan't Be Beat. If you are in the market for a good boar write them for description and price and mention the Homestead.

#### LAST CALL FOR F. O. LOWDEN'S PHENOMENAL SALE OF SHORT-HORNS.

The above caption may be unique for a heading of an article that has to do with Short-horn cattle. Nevertheless the consignment of Short-horns of which we speak are of such an extraordinary character that we submit the above. There has been no time in American Short-horn history in many years when it was possible for any breeder to break into the ranks of his breeding herd, apparently sending the herd from top to bottom and from center to circumference, as is the case at the great Smississippi breeding establishment of Col. Frank O. Lowden, at Oregon, Ill. We believe that every statement that has been made in this journal concerning this extraordinary offering will be borne out by the fact when the cattle are led into the ring in the sale pavilion on June 11th. The writer had expected on his tour of inspection to see a superior lot of Short-horns; in fact, had been apprised of this fact before he reached Smississippi farm; but the surprise was far beyond anything expected or anticipated, and while we profess to be somewhat conservative in our expressions and endeavor to never lose our head over something that is far beyond the ordinary, yet we confess that in looking over this offering carefully and methodically, in company with the owner, Col. F. O. Lowden, and Supt. Thos. Stanton, we were perfectly willing to go on record as saying that they were the choicest lot of Scotch cattle for the great number consigned that it had ever been the fortune of a single breeder in America to put forward in a sale ring. So much for the above apparently extravagant statement. It is not the desire or design in endeavoring to set forth the high character of this offering to persuade any to believe that these cattle will sell at fabulous prices. We do not believe that such will be the case, nor is it desirable that they should. We simply wish to furnish our hundred thousand readers with information that will enable them to realize the real character of this

#### OUR RED LETTER

## Combination Offer

AGAIN OPEN TO THE FARMERS OF THE MIDDLE WEST

**FIVE SPLENDID PAPERS and MAGAZINES for \$1.25 A YEAR. SEND US YOUR SUBSCRIPTION TODAY.**

The Homestead has never made an offer to its subscribers which proved so widely and immediately popular as did our famous "Red Letter Combination" last season. Thousands upon thousands of farmers throughout the corn belt took advantage of it to supply their families with an abundance of wholesome, instructive and entertaining periodical literature, and we have been asked many times if the offer would again be open to renewals and new subscriptions. Although the profit on such an offer is necessarily small, we have decided to repeat the offer during the present season and have secured the consent of the other publishers interested to advertise it again for a limited time, subject at any time to revocation without notice.

**THESE FIVE PUBLICATIONS FOR \$1.25 A YEAR.**

The Homestead, the world's greatest farm paper, published weekly at the heart of the corn belt and dealing with agricultural problems from the middle-western point of view; edited by farmers residing upon and operating their own farms; not a one-man paper, but the embodiment of the combined wisdom and experience of a large staff of editors and contributors; with departments covering the whole range of farm life in this section.

The Chicago Weekly Inter Ocean, a grand general family newspaper, giving an abundance of news, literature, poetry, humor, market reports, reading matter for women and children—something for every member of the family.

The Kansas City Weekly Star, an able, fearless, independent newspaper, dealing with the problems of the day from an independent point of view. Literary contents very attractive and uplifting.

The Homemaking, a delightful monthly for the women and children of the farm, readable and valuable from first page to last—brightening and broadening the life of every member of the farm.

The Farm Gazette, a beautiful magazine of profitable agriculture, printed on fine paper, with elegant illustrations and a cover in colors.

If already a subscriber for any of them, your terms will be extended for one year.

To secure this great bargain, clip and fill out the following coupon:

Date .....190..

Homestead Company, Des Moines, Iowa:

Enclosed find \$1.25, for which please send the following five newspapers and magazines for one year to my address: Iowa Homestead, Chicago Weekly Inter Ocean, Kansas City Weekly Star, Farm Gazette and Homemaking, as per your special offer to Homestead readers.

Name .....

Postoffice .....

Rural Route ..... State .....

offering, and can assure them that they can travel long distances to see this consignment, without any fear whatever of being disappointed. Yet, it should be remembered that it is an auction sale, where the buyer has everything to say with regard to the selling price and the seller must sit idly by and take his medicine. This is precisely what will happen in Chicago June 11th. There are no strings tied to these cattle in any way. They are fully paid for, and no difference what the price set may be, Colonel Lowden will continue to breed Short-horns just the same and will be in market to secure some choice Scotch bargains if any be in future sales. This splendid draft of cattle by no means includes all the good ones at the Smississippi farm, as Mr. Lowden is retaining seventy head, including animals of very similar breeding to those offered in the sale. For example, he still retains the dams of many of the show calves that have brought renown to his herd in recent years and retains a splendid bunch of Ceremonious heifers. We do not anticipate great record-breaking prices for these cattle; nevertheless they are worthy from every point of view. We had not anticipated any individual mention of the females other than the fact that as a whole they were the best lot ever offered in this country. Yet, to properly put forth the high character, we will say that the great show heifer, Clara Belle, the red roan daughter of Imp. Choice Goods, and out of Imp. Clara 58th by Golden Victor, is among the noted celebrities in the offering. This is the heifer calf that alternated in her winnings with Ruberta's daughter, Fair Louisiana,

during their calthood. There is a goodly number of imported cows, of the highest type and character. Mary Gray is one of these and was sired by Rosalie. She is certainly a very valuable cow and will have a calf at foot by Cumberland's Last. Imp. Lena is another of the richly-bred Scotch sort that have crossed the water. She, too, is carrying a calf by Cumberland's Last. Imp. Ballechin Charming Maid is a beautiful roan cow calved Jan. 18, 1901, and is one of the grand good Scotch cows of the breed. She has a bull calf at foot sired by Ceremonious Archer dropped March 16th. A beautiful daughter of Imp. Count Amaranth will be found in Lady Park Augusta. This is one of the very desirable things in the offering. She has a beautiful white cow calf at foot, sired by Ceremonious Archer and was re-bred to this bull March 12th. The great white cow that topped the Chrysalis sale some two years ago is Mario's Heir-ess Second, a daughter of Scottish Victor and out of Imp. Mario's Heir-ess by Marengo. This cow is the dam of a beautiful roan bull calf dropped September 1, 1906, by Imp. Lovat Champion, and is due to calve soon to the service of Ceremonious Archer. This cow is a very rapid breeder, a splendid individual and would add credit to any herd in which she may find her way. Her full sister will be found in Lot 10 of the catalog, Mario's Heir-ess Third. She is just two years younger and has a dark roan bull calf dropped December 3d, by Lovat Champion. Smississippi Beauty is correctly named. She is a beautiful white two-year-old heifer by White Hall Sultan and out of Imp. Heather Blossom. During recent years the Cruickshank Broadhocks family have gained quite prominent distinction. This being the case we wish to call attention to the fact that there are three Broadhocks females in this offering and can be found as follows: Anoka Broadhocks, Lot 12, Duchess 4th, Lot 15, Heather Bloom, Lot 22. Lot 12 is a daughter of Ceremonious Archer and needs no introduction at this time. She was one of the successful show animals of the two last years at the International and other great American shows. She has a white cow calf at foot by the \$8,000 White Hall Marshall. Lot 15, Duchess 4th, another of this famous Broadhocks family, is a four-year-old, sired by Bapton Ensign and out of Imp. Dalmeny Duchess 5th. Her beautiful cow calf at foot by the great show and breeding bull, March Knight, makes her an attraction that will doubtless be sought after eagerly. Lot 22, Heather Bloom, is the last of this family and is out of Imp. Fair Duchess of Bluff View and sired by Duke of Oakland 2d. She has a beautiful red heifer calf at foot sired by the Cruickshank Secret bull, Secret Viscount. She will be bred to one of the herd bulls at Smississippi prior to sale time. As has been before stated, space forbids mentioning all of the good things in this offering, and by drawing this individual description to a close, we are leaving out numerous great matrons that are the equal, if not the superior, of many thus described. This is one of the reasons why it is impossible to attempt an individual description of any of these cattle without injury to those not described. The only solution to the problem would be to describe each and every one of

This group of young Red Polled bulls are included in the sale of Lake & Stubbs on June 12th at Hampton, Neb.

the sixty-one lots, but such a thing is not possible in an article of this kind, our chief aim being to impress lovers of Short-horn cattle of the advantage of sending early for one of the sale catalogs and study the pedigrees carefully. A volume might be written on the ten two-year-old daughters of Cere-monious Archer consigned to this sale and bred to Cumberland's Last. In fact, there is material for several articles on these ten heifers alone which we must pass by with this slight notice. June 11th will be a pleasant time of year to take a day's vacation from the arduous labors of the farm and herd and attend this sale. The brief and very modest announcement in the sale catalog, written by Colonel Lowden himself, is one of the most unassuming of any that we have yet read concerning an offering about which so much might be said. The announcement, however, being modest will doubtless serve to a better purpose than were greater claims made by the owner of Sinnissippi. Certainly at no time in the history of Short-horns has there been an opportunity for Col. F. M. Woods, who will doubtless make the opening address, to find material for a greater speech than at this time. It is fully conceded by all that Colonel Woods stands alone in making an oratorical spellbinding talk on Short-horn cattle; if the Colonel is at himself on June 11th, we expect to hear the speech of his life time, for the reason that he has the material at hand in the way of high-class Short-horns to talk about. While the sale will be held in Chicago, applications for catalog should be made to Col. Frank O. Lowden, or Mr. Thos. Stanton, at Oregon, Ill. The big four group of auctioneers, Colonels Woods, Bellows, Jones and Gardner, will have the proud distinction of selling this superior lot of Short-horns. See the advertisement on page 32.

#### OSBORN'S OHIO CHIEFS.

A representative of The Homestead who has been calling on Mr. O. E. Osborn, West-on, Iowa, for many years, paid him a visit the fore part of last week, and found the best prospect for spring pigs that has ever been on his place. Every breeder knows that here is the home of the great Ohio Chief, considered today one of the greatest living Duroc Jersey boars. Mr. Osborn owns one-half interest in him, the other half interest being owned by R. J. Harding, Macedonia, Iowa, and he divides his time between these two places. Mr. Osborn has a splendid crop of Ohio Chief spring pigs and they are doing well; altogether he has 130 spring pigs, and these are sired by Ohio Chief, Belle's Chief I Am (a son of Ohio Chief out of the noted sow Nebraska Belle), Iowa Chief, Baxter's Buddy K 3d, old Kan't Be Beat and Kruger Lad, the first prize Iowa State Fair boar. Here is an aggregation of well-known sires that are hard to beat, and Mr. Osborn has a good representative lot of pigs by them. In yearling boars he has Iowa Chief, a son of Ohio Chief out of Ruby 3d by Young Orion. He has a good yearling in this fellow, is right on the top of his toes, is a splendid-bodied hog, and Mr. Osborn has some splendid pigs by him. This pig has not been crowded, but is doing well, and he is one of the good Ohio Chief boars. He would make a splendid boar to head some good herd, but Mr. Osborn says he is not for sale. Whether he could be induced to change his mind remains to be seen. He has two nice yearling Ohio Chief sows, and these are full sisters to the Austin Renshaw boar. Mr. Osborn will put a few finishing touches on these for the fair this fall. He also has two good daughters of Briggs' Prince that he is bringing along for the eighteen-months class. His sows averaged good litters this year and he had more pigs on his place than ever before. During April he lost a lot of pigs on account of the weather, but those that remained were the survival of the fittest, and he has a good bunch of them. He has six fall boars for sale sired by Ohio Chief and one by Crimson I Am, a son of Crimson Wonder. Anyone wanting one of these should write Mr. Osborn. He is making the price right on these. Kindly mention The Homestead when writing him.

#### LAST CALL FOR THE THOMAS, JAMESON & MITCHELL SALE OF SHORT-HORNS.

On next Thursday, June 13th, in the fine stock pavilion at Kansas City, Mo., will be held the sale of fifty head of Short-horns from the herd of Messrs. Thomas, Jameson & Mitchell, of Allen, Kan. The catalogs of this event are out and every breeder of Short-horns should have one, as the breeding of the cattle that have made this herd should, and no doubt will, prove interesting to all who study same. Fine half tones of a dozen of the sale animals will be found in the catalog. They are good illustrations of the cattle and show the type which is found throughout the Thomas, Jameson & Mitchell herd. Mr. E. K. Thomas, of Paris, Ky., senior member of the firm, and Mr. S. D. Mitchell, of Allen, Kan., junior member of and active manager of the herd, will each continue in the business, the sale being made necessary in order to settle with Mrs. Jameson, who retires from the firm. These gentlemen regret that the herd must be scattered, as they will be forced to once more re-engage in building their herds to such a state of perfection as to command the prominence of the present herd. The entire show herds of the past two years are included in the sale and breeders who need show stock to fill in show herds for the coming fall shows will find stock here that needs but to be carried on. The young breeder wanting choice breeding stock for foundation purposes or to add to his herd will find this an opportunity such as does not come

every year. The herd bulls, Orange Viscount, a son of the champion, Lavender Viscount, and White Goods, a son of the champion, Choice Goods, are the strongest pair to be found in a single sale this year in the West. Orange Viscount, the senior herd bull, has been shown with success, as has White Goods, and he should now be retired as a stock bull to some herd where the thick, meaty, short-legged Short-horn is duly appreciated. The twelve head of his get that sells will establish his value to those who are not familiar with his ability to reproduce his kind. White Goods has developed well since the shows of 1906 and promises to be a factor in the aged bull class this year. He is siring a class of roan calves that show him to be a sire with a great future. All females in the sale will be bred to one of these two bulls, unless it be heifers too young to breed or one or two show heifers left open for show purposes. Mention has been made of many of the leading families and we feel that it is now up to the men wanting absolutely high-class Short-horn cows and heifers to be on hand. The Cruickshank and Scotch sorts are well represented by stock that has either won or furnished many winners. Many of these Scotch cows have calves at foot that show great promise. The Barrister Young Marys are a type of low-down, thick-fleshed cattle that have been bred for many years by Mr. E. K. Thomas. It is this tribe that some years ago won so many prizes for Mr. Thomas and are today pronounced the equal of any tribe known to the breed. There is not an animal in the sale but that will be a credit to the herd from which it came and which will fit nicely into the best herds in the country. If you have not yet received a catalog send for one, then arrange to be on hand June 13th. See page 28 for advertisement and kindly mention this paper when writing for catalogs.

#### THE IOWA BANNER HERD OF DUROCS.

A representative of this paper who has for several years been in close touch with the Iowa Banner Herd of Durocs, owned by Messrs. W. L. Addy & Son, of Parnell, Mo., recently paid the herd a visit and if ever Messrs. Addy & Son had reasons to feel that their Duroc Jersey herd was such a herd as should attract the attention of breeders it is now. Never before has the writer seen so many fine prospects in the Iowa Banner herd and barring accidents Messrs. Addy & Son will from the crop of spring boars and gilts now coming on have an exceptionally strong lot to offer. For years Messrs. Addy & Son have used breeding stock that is today looked on as the stock that has furnished the Duroc world with its top stuff and we find the blood of such sires as old Protection, Ohio Chief, Top Notcher, Proud Advance predominating through their herd of sows. These had been reared under favorable circumstances, on a farm that is naturally adapted to the production of hogs and in 1905 Messrs. Addy & Son added that great breeding boar W. L. A.'s Choice Goods to the herd, making the proper move at the proper time. Through W. L. A.'s Choice Goods the blood of such sires and dams as Lafollete, Belle's Chief, Red Chief I Am, Duroc King, the great Nebraska Belle, Bishop's Choice and L. E.'s Model 9th was introduced into the herd and through a boar that is such a prepotent sire as to transmit the many good qualities found in his ancestors as well as in himself. The few pigs got by W. L. A.'s Choice Goods last year were of such quality that Messrs. Addy & Son could not supply the demand for sows bred to him and offered in their bred sow sale were picked up at good round figures and by men who had seen his get. For the trade now and later on, Messrs. Addy & Son have undoubtedly the best lot of boars ever produced in the Iowa Banner herd. Among these are four fall boars, two of which should have been carried on for the fall shows. They have the spring of rib, the fullness over rump and through rear quarters, good heads and the best of feet and legs. Some appreciative breeder should look after these. In future issues more will be said of the spring crop as Messrs. Addy & Son will have some herd boar material here that will do good as well as an exceptionally strong lot of boars for the men who want boars that will get the kind that top the leading markets. See page 29 for Messrs. Addy & Son's advertisement and when writing or visiting them kindly mention this paper.

#### A. H. BRETT'S SHORT-HORN SALE.

On June 27th, Mr. A. H. Brett will sell at Mason City, Iowa, sixty head of Short-horn cattle, among which are a goodly number of straight Scotch, including two imported cows. The offering, to be exact about it, is as follows: fifty females, twelve of which are Scotch, including Imp. Likely and Imp. Roan Ribbon. There will also be twelve nice two-year-old heifers, and the entire female offering will be bred to good Scotch bulls. Mr. Brett's present herd bull is a son of the great Imp. Merry Hampton. The remainder of the offering will be ten bulls of serviceable age. It has been the custom for a number of years for Mr. Brett to make these June sales, and they have been marked with success from the start, and it is to be hoped that this offering will in no wise differ in this respect from its predecessors. Either before or immediately after the cattle sale Mr. Brett will sell four registered draft mares and one two-year-old registered Clydesdale stallion. They are all bred to the best of stallions and should be good property, inasmuch as the draft horse business is constantly on the ascendancy. The two imported cows that Mr. Brett is offering in this sale are a choice pair fit to grace any herd in the land. It will be remembered that they were purchased by a Minnesota party along with a lot of other cattle at one of Mr.

Brett's former sales, and the party could not make proper settlement for any of the stock; hence these beautiful cows were left on hand at the farm. We offer this explanation for the reason that some may wonder why these cows are again listed for sale. They were bid off by an agent for a party who could not settle either by note or cash. There is scarcely a herd in America that would not be proud to own either of these imported cows. Their pedigrees and more minute particulars will follow in future issues. Inasmuch as the sale catalog has not as yet reached our hands, we are at a loss to give the breeding of any of the offering further than in a general way. Certain it is that Col. Al F. Mason, the auctioneer, will have the opportunity to dispose of a lot of cattle of the most practical sort. A Homestead representative has inspected the offering recently and finds them all out on grass, not fat, but in the pink of thrift and breeding condition. The cold and backward spring has retarded the growth of grass so that these cattle have not put on their sale clothes to that extent that they ordinarily would have done by this time. Nevertheless this is but a minor attribute and would only cause the buyer to pay more money for the cattle without adding one single dollar to their intrinsic worth from a breeder's standpoint. Mr. Brett is busy at work on the sale catalog and by the time this article is read it will no doubt be ready to mail and will be sent free to readers who say they saw the announcement of his sale in The Homestead. Future issues will contain further descriptions of this very useful offering. The sale will be held at a very opportune time for breeders and farmers to get away from home for a day or two, and further, the pastures will doubtless be much improved by that time so that purchasers of cattle can turn them right out on the grass with little or no expense for keep for a number of months. The date of this sale should be firmly impressed on the mind of every breeder in the middle West that contemplates purchasing good Short-horns this summer. See advertisement on page 26.

#### COMBINATION RED POLLED SALE AT HAMPTON, NEB., JUNE 12TH.

Forty-two head of Red Polled cattle will be included in the sale of Messrs. W. H. Lake, of Hampton, Neb., and F. H. Stubbs & Son, of Bradshaw, Neb., at the farm of the former on June 12th. All of this consignment except one are either yearlings or two-year-olds and the man in search of some choice young stuff or foundation stock should attend this sale or be represented by a bid. Those who attend can expect to see a strictly high-class lot of this splendid dual-purpose breed of cattle. At the heads of both of these herds have stood some of the best bulls, of the strongest blood lines known to the breed. The Lake herd for some years has been headed by Dandy B. 7th 8012, one of the best sons of the renowned show and breeding bull, Iowa Davison 10th. The females which are offered in this sale speak for this line of breeding. At the present time North Star 5742, got by Imp. Ensign, is the most prominent herd bull at the Lake herd. He is a short-legged, thickly-made masculine fellow, exceptionally well filled and carrying great scale; in fact, he is just the type which so many are searching for. In 1900 he won first and sweepstakes at the Nebraska State Fair and his sire, The Ensign, was not only a winner at the English Royal but at many of our leading state fairs. His ability as a sire of unusual merit will be fully demonstrated in his produce on sale day. Mr. Lake's consignment consists of twenty-three head, of which fifteen are females, some with calves at foot and all of breeding age. The eight bulls listed are of sufficient merit to command the close attention of bull buyers. The milking qualities of all the animals offered in the sale are well pronounced, and some of the cows are exceptionally heavy milk producers. The F. H. Stubbs & Son offering consists of nineteen head, of which twelve are females all safe in calf. This herd was established some fifteen years ago by the elder Mr. Stubbs, who ranks among the oldest breeders of the state. Previous to the present herd sire Naller 7396 stood at the head. He was got by the noted show bull, Iowa Davison 10th, and has been standing right at the top of his class at the Iowa State Fair for two years past. A part of the females were sired by him. Sprites' Perfection 6685, got by Governor McKinley out of the great show cow, Sprite 3d, stands at the head of the herd at present. His dam produced the three great herd headers, Manning 4023, Emery 4871 and Sprites' Perfection. At the head of this herd Sprites' Perfection has proven a high-class sire and the yearling bulls and heifers are by him. There are several re-

## AN EXCELLENT HOME RECIPE

One That Will Relieve All Sufferers From Stomach Troubles.

More stomachs get out of order than any other organ in the human body. More people dose for stomach troubles than any other disease. No better evidence is wanted than the fact that there are more patent medicines on the market for stomach troubles than for any other disease. If your stomach is out of gear, if your digestion is off, don't dope with these patent nostrums, but go to your druggist and get the following simple prescription filled:

Compound Tincture of Cinchona, one ounce; Proseine Compound, one ounce, and Sherry Wine, half a pint. Mix these together and take one teaspoonful in a wine glass full of water before meals and at bed time.

markable cows in this herd, also, one of which is Silica, now seventeen years old and has a record of sixteen calves to her credit. Every animal in this sale is guaranteed a breeder. Those who are looking for some first-class specimens of the farmer's cow should not fail to be in attendance on sale day. The announcement of this sale appears on page 30 and bids may be sent to the representative of this paper, Mr. Ray Page, in care of Mr. W. H. Lake. Send for catalog and kindly mention this paper.

#### BENTON COUNTY, IOWA, SALE OF SHORT-HORNS.

On page 28 of The Homestead will be found the announcement of Mr. N. P. Halgren setting forth the advantages of attending his sale of Short-horn cattle to be held at his farm four miles from Vinton, Iowa, on June 19. Mr. Halgren has a very attractive and useful herd of Short-horns and is making a practical dispersion sale of the same. The offering includes both his herd bulls and all of the stock that is in any way desirable. There will be some thirteen bulls in the offering and thirty-four females, including a few Scotch cattle and two exceptionally good Scotch bulls. All of the heifers of breeding age and young desirable cows not sired by Prince Royal will be bred to this bull. Those sired by him will be bred to Royal Pride, Lot 38 of the catalog. The last named was sired by Royal Banner, a Cruickshank Queen of Beauty bull, got by Banner Pro and out of Beauty's Pride B. 2d by Imp. Harvester. She out of Pride of Orchard Farm by Imp. Goldstick and she in turn out of Imp. Queen of Beauty by Senator. Imp. Queen of Beauty was sold in the Robt. Miller dispersion sale at West Liberty, Iowa, in about 1888, to Mr. C. S. Barclay, and from her have sprung practically all of the Queen of Beauty Short-horns now in this country. Royal Pride's dam is Imp. Louise 2d by Golden Fancy. Golden Fancy was a splendid bull got by Scottish Fancy and out of Golden Day 3d by Master of the Ceremonies. Imp. Louise 2d was out of Imp. Louise, she by Watchman, he by Watchard, a bull of considerable note in the hands of Mr. J. B. Fletcher, of Europe. Imp. Louise 2d was imported in dam by John Isaac, of Canada. She was bred by William Wilson, of Barmfshire, Scotland. It will be seen that this bull is choicely bred and has a little fresh blood of English extraction through the bull, Watchman. The Prince Royal bull, or the old herd bull, was calved Oct. 19, 1900, and is a thick-fleshed, massive red bull, sired by Imp. Prince Odgeric. Prince Royal's dam was Sunnyside by Sir Charming 2d. Sir Charming 2d was sired by Imp. Salamis, a Duthie-bred bull, that was purchased in the old country by Mr. C. C. Norton, of Corning, Iowa. Sunnyside is only three removes from Imp. Daybreak 4th, and the Daybreak family are Miss Ramsdens, all founded on the cow, Miss Ramsden by Duke (3630). Here is a bull that has done Mr. Halgren a world of good in the up-building of his herd, and he would not be for sale at this time only for the fact that the herd is practically being disposed of. He is a quiet dispositioned fellow, is sure and a splendid breeder. More particulars concerning this sale will be found in our next issue. In the meantime all information not contained in the announcement may be had of Mr. Halgren, at Vinton, Iowa, by simply asking him for a catalog and mentioning the fact that this notice was seen in The Homestead.

#### SOME GOOD OHIO CHIEF BOARS.

Readers of this paper, and especially those who are looking for a good Duroc Jersey boar to head their herd, will be interested in the advertisement of Mr. W. A. Rankin, Carson, Iowa. Besides the original owners of the great Ohio Chief, Mr. Rankin has perhaps more of his get than any other living man. He has fifteen fall boars and sows, thirteen spring pigs. Three sows to farrow to him in a week or two, and he also owns the splendid yearling boar, Wonder's Ohio Chief, that he now offers for sale. The time to buy a good Ohio Chief boar is right now, and Mr. Rankin has them for sale and at a reasonable figure. Wonder's Ohio Chief, the yearling boar that he offers to sell, is by Ohio Chief and out of Wonder's Queen, a daughter of the noted brood sow, Beatrice Queen, unquestionably one of the greatest brood sows living today. This boar is bred right and is the making of a splendid herd boar. He is a good-bodied hog, with a good back, and plenty of spread to the rib, stands on good feet and has quite a good head and ear. Mr. Rankin makes the very reasonable price of \$200 on this boar, and no man can buy him for a cent less. If a man wants a herd boar he cannot do better for the price than to go after this fellow. He also offers seven fall boars for sale, all sired by Ohio Chief, and there are some good ones among these and for less money. It will pay anyone who wants an Ohio Chief boar to write or go and see these

The above is a correct likeness of Mr. H. G. Warren, Inland, Neb., who opened the eyes of the Duroc world by paying \$1,575 for the sow, Rose Bud Lady.

**F. S. BURCH & CO., 177 Illinois Street, CHICAGO, ILL.**

The first man that comes gets the pick of the offering. No one in the state has a better bred herd than Mr. Rankin. He has 140 to 150 spring pigs this year and they are sired by Proud Lady's Orion, a son of old Orion out of the \$1,275 sow Proud Lady. This boar cost Mr. Rankin \$425 at the R. J. Harding sale last fall. The others are sired by Wonder's Ohio Chief, Glendale Critic out of a Gold Dust Jim 2d sow; Sure Winner, out of a Red Knight sow; two litters by Belle's Model, (a son of Red Chief I Am and out of Nebraska Belle) and one of these litters is out of a daughter of Proud Advance; Que litter by Perfection Chief, the Iowa State Fair winner, and last, but by no means least, a litter of seven Ohio Chiefs out of the splendid brood sow, Pottawattamie Belle. This sow was one of the greatest brood sows Mr. R. J. Harding ever owned, and he made a hatful of money out of her. He sold her in his last sale. Mr. Rankin bought her and she was a great find for him. There are four boars and three sows in this litter. The litter is extra good, and it looks as though he will have a couple of boars that the boys will want for herd headers. The wide awake breeder might do worse than to keep his eye on this litter of Ohio Chiefs, as there are some splendid boars and sows in the bunch. Model Lady, by Malcolm's Model and out of a Gold Dust Jim sow has a litter of seven by Ohio Chief. He has three sows to farrow yet to Ohio Chief. One of these is a daughter of Beatrice Queen, one is a daughter of the Iowa State Fair sweepstakes boar Gold Dust Jim, and another is a daughter of Gold Dust Jim 2d. Just now, however, Mr. Rankin is wanting to sell these fall and the yearling Ohio Chief boars. He has some good ones and they can be bought right. Write him at once or go and see them. Kindly mention this paper when writing.

SEVEN YEARLING ABERDEEN ANGUS BULLS FOR SALE.

That well-known breeder of Aberdeen Angus cattle, Mr. E. C. Fussell, of Fayette, Iowa, is offering at the present time seven very choice yearling Aberdeen Angus bulls from ten to fourteen months old, principally beyond the yearling age. They are every one sired by that splendid herd bull, Major Midnight 77269. This is a Queen Mother bull, sired by Imp. Prilleno 80280. Prilleno was sired by Proud Duke of Ballindalloch and he by Prince Inca, he by Illad, while Prilleno's dam, Ellene, was also by Prince Illad. Major Midnight has for his dam the great show cow, Queen Midnight 2d, by Trooper, and out of Queen Midnight by Tanzey, a son of Ermine Bearer and he, of course, was by young Viscount. We must say that during our acquaintance with Mr. Fussell's herd he has never owned so good a herd bull as Major Midnight. He is also a show bull of no mean proportions, having already been a winner at the local county fairs, contesting with some grand good bulls of his own breed, as well as showing in sweepstakes with splendid bulls of other deep breeds. Major Midnight has a beautiful head, chock full of breed character and masculinity to spare. His beautiful crest, bulging neck vein, smooth and evenly-laid shoulder, coupled with the extreme general smoothness and proper contour that go to make up the typical doddie, all serve to place Major Midnight in that high position among the upper class of strictly first-class Aberdeen Angus sires. Any farmer or breeder that is desirous of securing a strictly first-class individual Angus bull should lose no time in making a trip to Fayette and making a selection from among this nice bunch of youngsters. Mr. Fussell's herd, in a general way has been greatly improved during the past three years. The weeding-out process has been gradually going on, and in addition to this, numerous purchases of first-class animals have been added to the herd, until it now assumes the proportions and role of one among the best herds of northern Iowa. For particulars concerning any one of these young bulls, address Mr. E. C. Fussell, at Fayette, Fayette county, Iowa. His farm is only one mile from town, with telephone connection. Visitors will be cheerfully met, conveyed to and from the farm and entertained in a royal manner. We speak this from our own standpoint, as Mr. Fussell is a very modest man and probably would not like to say the above out loud. Nevertheless every visitor can rest assured of proper and courteous treatment, as well as being treated to a splendid Aberdeen Angus show. His new announcement appears on page 27.

ROGERS OFFERS SHOW HERD IN OMAHA SALE, JUNE 14TH.

In a recent letter from Mr. W. N. Rogers, we are informed that in the sale he is to make on June 14th, at South Omaha, he will offer one of his entire show herds and among them are individuals that have a right to win in the greatest shows in America. This herd will consist of a cow, two-year-old heifer, yearling heifer and heifer calf. The bull that is heading this great herd is Beau of Shadeland 20th, a full brother to Beau of Shadeland 13th, the great prize-winning calf of 1904 which sold in one of Mr. Rogers' former sales at South Omaha for \$880. He was surely the great calf of 1904 as his winnings here shown will tell. He won at the Kansas Exposition, Topeka, 1904, first in Junior class and stood at the head of first prize young herd, also first as get of sire and produce of cow. At the Kansas State Fair, Hutchinson, 1904, he was first in class, headed first prize young herd, and was sweepstakes get of sire and produce of cow. At the Sioux City Interstate Fair, 1904, he was second in class, first at head of first prize young herd and sweepstakes get of sire and produce of cow. The same year he headed the first prize young herd at Lincoln, Neb., and was first prize calf at the Colorado State Fair, at Pueblo, where he also stood at the head of the first prize young herd and took sweepstakes get of sire and produce of cow. Surely this is a great record for a calf; with proper treatment he should be able to win many more prizes in the two-year-old classes. Although Beau of Shadeland 13th was a great winner, his brother that is included in this sale is conceded by very competent judges to be just as good a calf. He will weigh right at a ton by fair time and anyone looking for a great prospect in his class cannot afford to miss this sale. The show cow that is included in this herd is Monarch's Maid 1st, a cow of great scale, weighing right at 1,800 pounds, and we consider her one of the best things that will go through any sale ring

**Table Backed Herefords**  
THIRTY-THREE bulls from 12 to 28 months old. Five of them are herd headers. Prices about half what you would have to pay for the same individually and breeding from others. Try me. W. W. Wheeler, Box H, Harlan, Ia.

**MAPLE LAWN HEREFORDS**  
FOR sale, (Imp.) Islain 145736, and also choice young bulls, ranging from 11 to 24 months old, well bred, and good individuals. A. F. HAGER, AVOCA, IOWA.

**40 Choice Hereford Bulls**  
**40 Choice Bred Heifers**  
RANGING in age from twelve months to two years. All sired by prize-winners. EDMONDS, SHADE & CO., Kingsley, Iowa

**BERKSHIRE HOGS.**  
**1907 Crop of Berkshires at Chapel Hill.**

THE spring crop of big-boned English Berkshire pigs, has been arriving at Chapel Hill for some time, and to my Homestead patrons and others who wrote for boars and brood sows bred, only to find me entirely sold out, I would say "get your orders in early for the present crop." Address, W. D. McTavish, Coggon, Iowa

**TOO LATE TO CLASSIFY.**  
**FOR SALE**

MY Scotch herd bull, Secret Prince, No. 24863. He is a low-down, blocky bull with a good red color. Price right. W. R. Winder, Ireton, Iowa.

**WANTED**  
A GOOD industrious farm hand. Steady employment and good wages. No bunnies need apply. Address U. G. Davidson, Manson, Ia.

this year. She is a daughter of old Monarch of Shadeland 3d, by Anxiety Monarch, and having for her dam Wiltona Vincent by Vincent 2d. She is as richly bred as is generally found and as an individual is hard to beat. The two-year-old heifer is Shadeland's Maid 33d, a heifer that will make 1,600 pounds at fair time and she is a full sister to Shadeland's Maid 25th, that was the grand champion cow at the Denver Show last January and a third prize winner as a calf. The yearling heifer Shadeland's Maid 36th, should weigh 1,300 pounds at fair time and a heifer that is sure to make a great showing as a two-year-old with anything like the proper care. The heifer calf that is included is one of the most promising that Mr. Rogers has ever offered in any of his previous sales and it is surely with much regret that he parts with her. Her dam, Monarch's Maid 1st, was a blue ribbon winner as a calf and will be a very prospective show animal for this fall. Taking this great lot of show cattle together we consider it one of the best offerings that has ever been made in the West in late years and anyone wanting a full show herd or one extra good animal to fill his own show herd will find this a great place to find what you want. Four of them are the get of the great show bull, Beau Donald 28th, the great sweepstakes winner and sire of prize winners. It is an offering that should attract attention of the best buyers in the land. Write them for catalog and mention this paper.

When writing to advertisers please mention this paper. When writing to advertisers please mention this paper.

# DISPERSION SALE OF THE ENTIRE HERD OF ABERDEEN ANGUS CATTLE

Belonging to H. A. Cole at Iowa State Fair Grounds, Des Moines, Iowa, June 18, 1907.

THERE will be 65 head in the sale. Among these will be 18 bulls, including my herd bull Imp. Electrician, a richly bred Erica bull, weighing 2,200 lbs. The rest will be two-year-old bulls. There will be 47 head of cows and heifers in the sale, 15 of which will have calf at foot. Among these are several imported cows of the Pride, Queen Mother and Drumm Lucy families. There is also an excellent representation of Ericas, Blackbirds, Barbaras, Heatherblooms, Easter Tulloch Duchesses, Georgianas, Kinachtry Blue Belles, Rose of Sheen and Lady Fern families. There never was a better opportunity offered to buy good Angus cattle, as we only bought the best for foundation stock. There will be a splendid lot of young heifers in the sale and some excellent young bulls. A change in business and having sold my farm necessitates my disposing of the herd. If you want to buy Angus cattle here will be the greatest opportunity of the year to buy right. Write me for catalog at once. Address,

**H. A. COLE, 3211 S. WESTERN AVE., CHICAGO, ILLINOIS.**

COLS. F. M. WOODS AND IGO, AUCTIONEERS.

Thomas, Jameson and Mitchel.

HERD OF

# SHORT-HORNS

In Sale Pavilion, at Kansas City, Mo.,

Thursday, June 13, '07.

## 50

HEAD. 30 straight Cruickshank and Scotch; also the famous Barrister Young Marys.

45 Cows and two year old heifers, all in calf to or with calves at foot by our great herd bulls. Orange Viscount or White Goods.

## 50

Attention is called to the following great brood cows: Duchess of Gloster 45th, and bull calf by White Goods; 47th Duchess of Gloster, a show heifer that has always stood first or second in the big shows; Imp. Bessie 51st, bred by Mr. Marr. She is the dam of White Goods; Sunbeam, a Secret, with bull calf by White Goods; Rose of Strathleven and heifer calf by Orange Viscount; this is one of the greatest cows of the breed; Cowslip's Pride, a Clipper, with show heifer by White Goods; Gratitude 2d, a Brawith Bud, with bull calf by White Goods; Lavender Bud, with bull calf by White Goods; she is the dam of our 1905 and 1906 show heifer. Ten two-year-old daughters of Orange Viscount all alike, and all in calf to the show bull White Goods. Such a fine of pure Cruickshank and Scotch cattle have not been offered in recent years if ever in a single sale in America. The famous Barrister Young Marys, all of one type will be found as great a lot of square framed, thick-fleshed cattle as are often found.

### 5 - BULLS - 5

Our herd bulls, Orange Viscount, a straight Cruickshank Orange Blossom bull, got by the Champion Lavender Viscount, and White Goods got by the champion Choice Goods and out of Imp. Bessie 51st, by Sittytton Pride are included. Two such herd bulls will not soon again be exposed at public treaty. The others are desirable young Scotch hulls, just of serviceable ages. Write today for illustrated catalog which gives complete information mentioning this paper.

# ADMINISTRATOR'S SALE OF THE GREAT ABERDEEN ANGUS HERD.....

The property of the estate of the late Hon. L. H. Herrick

ON THE  
FARM  
BLOOMINGTON,  
ILLINOIS.

Tuesday,  
Wednesday,  
Thursday,  
June 25-26-27

Following the instructions Mr. C. A. Ewing, administrator of the above estate, this entire famous herd numbering 253 head besides calves at foot will be auctioned. Thirty-seven bulls and 216 cows and heifers are cataloged, constituting the largest dispersion sale that has occurred in the history of the breed. They represent the blood with which Mr. Kerrick succeeded in producing more champion market topping steers than any other man and the blood which has given him the honor of having done more for American breeding interests than any man engaged in the business. The offering includes the great \$5,000 stock bull Imp. Lord Fretful, and numerous of his get and thirty other representatives of the same family; the Trojan-Erica bull Eric 9th of Keillor Park; the double Blackbird bull Black Boy of the Wells; the Blackbird topped Pride bull, Afton Jam; and other high class herd headers. It is a great list of females cataloged including members of the Blackbird, Erica, Pride, Lady Fanny, Queen Mother, Heather Bloom, Antelope, Mina, Pearl, Maid of Orleans and other noted strains all of which have produced animals of the excellent type for which the herd is famed. Purchasers to the amount of \$300 will have railroad fare refunded. The sale will be held on the farm some twelve miles south of Bloomington, and the catalog, which contains full information concerning how to reach the farm and interesting details concerning the herd and the auction, will be mailed on application to

W. C. McCAVOCK, SALE MANAGER,

SPRINGFIELD, ILLINOIS.

27 High-grade heifers will also be auctioned some time during the three days of the sale.

## DUROC JERSEY HOGS.

### BUDDY K. IV HIGHEST PRICED DUROC BOAR ...EVER SOLD AT AUCTION....

HANLEY, one of the greatest sires of the breed. A few sows will be bred to these noted boars at \$100 each. Write for particulars. September boars by these noted sires for sale at reasonable prices.

Mc NEIL, BROTHERS,

BOWEN, ILL.

### AMERICA'S GREATEST DUROC HERD

Owned By S. E. MORTON & CO., CAMDEN, OHIO.

We are now booking orders for spring pigs. Thirty daughters of Ohio Chief in pig to King of Colonels, the sensational breeding boar. Prices reasonable. Description guaranteed. Mention Homestead when writing.

### TIP TOP NOTCHER 20729 AT HEAD OF HERD

GRAND CHAMPION Duroc Boar World's Fair St. Louis 1904. Sire 2d prize get of boar and champion herd from Illinois same show, and sire of State Fair champions. We are booking orders for spring males by this sire and from dams of fashionable breeding. Address,

FAGAN, BROWNING & McCABE,

HERSMAN, ILL.

### GOLDEN HERD DUROC JERSEYS.

HEADED by Tip Top Notcher 20729, grand champion boar World's Fair 1904, and Ambition, first prize pig Illinois State Fair 1905 and 2d prize boar 1906, and sire of more prize winners at Illinois State Fair, 1906, than any other boar. Ambition's first 16 gilts sold for \$1,877.50. A few sows of late farrow bred to these boars for sale. Service fees to Tip Top Notcher \$100; to Ambition \$50. Will book a limited number of sows at above prices. The best is none too good.

L. E. Thomas, Golden, Illinois.

R. E. Hogsett, La Prairie, Illinois.

### PENNYRILE HERD OF DUROCS.

HOME of Commodore 13381, the greatest boar of the breed, assisted by Top Notcher 10th, Sensation 9th, and Commodore 3d. Orders now booked for spring pigs. All others sold. Address,

AMOS W. HARRIS & SONS,

WAVERLY, KY.

### THREE SPLENDID FALL BOARS

Sired by I Am a Wonder, a son of the sweepstakes boar Crimson Wonder I Am, and out of the \$1500 sow Ruberta. Come and see these if you want a herd header. Address,

F. E. Garrett,

Lohrville, Iowa.

### FALL BOARS AND YEARLING BULLS FOR SALE

I HAVE a number of good Duroc Jersey fall boars by Shamrock 20473 and out of a daughter of Gold Dust Jim and a granddaughter of Higgins' Model. They are very growthy, weighing 260 lbs. at 8 months old. I will also sell my herd boar Sensation Jr. I. Am 42833, a two year old son of the great Sensation Jr. 22481. ## Dispersion Sale of Scotch and Scotch Topped SHORT-HORNS

ON JUNE 14th

at Farmersburg, Clayton County, Iowa,

I will disperse my entire herd of Scotch and Scotch topped Short-horn cattle, consisting of

**29 FEMALES AND 12 BULLS**

HERE will be 20 Scotch females and 6 Scotch bulls in the offering, among which are as good Scotch Short-horns as are to be found in America to-day. The cows are in calf to Imp. Great North 179848. This is the best lot of Scotch cattle ever offered in this section of Iowa. Farmersburg is on the Elkader branch of the Milwaukee system southwest of North McGregor, Ia. Parties from Illinois, Wisconsin and Iowa will find this a convenient point to reach by way of the Milwaukee system. Good judges pronounce much show material in this offering. All parties from the west coming the night before the sale should get off at Monona, where free livery will be in waiting the following morning for the sale. All others from the southeast and north get off at North McGregor and arrive at Farmersburg at 10 o'clock the morning of the sale. Send for catalog, now ready. Mention Homestead.

HORSES.

**FRANK IAMS'**

"Peaches and Cream"

"Black Boys"

Largest pair of Stallions in U. S.

Sweepstakes Winners.

A Whole Horse Show

All of Iams' "Superb bunch" of "show stallions" are offered for sale. Dad, it's a "100 to 1" they are the "best ever." Get into "Iams' band wagon." All railroads lend to Iams' Importing Barns at 2 cents a mile, and Iams'

**SUMMER PRICES**

are pushing competitors "off the roof" hypnotizing buyers with "top notchers" at "LET-LIVE-PRICES." John, if you pay cash or bankable note you will buy a stallion of IAMS. IAMS' "SELLING CLOTHES" "FIT" "all the boys." He saves thousands of dollars to stallion buyers. He is not in the "STALLION TRUST." He places \$1,000 or \$1,500 Insurance.

**\$1,000 — SAVED AT IAMS — \$1,000**

Ikey! what a rich graft these "SLICK STALLION SALESMEN" are working on the honest farmer, selling fourth rate stallions at \$2,000 to \$5,000. Iams sells "top notchers" so good, big and cheap THAT THEY DO NOT NEED TO BE PEDDLED TO BE SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is worth going 2,000 miles to see. Iams makes his competitors "HOLLER." He is knocking "HIGH PRICES" out of the Xmas tree. Iams saws wood, "BUTTS IN," sells more stallions each year. He makes every statement good. George, dear! Buy a stallion of Iams. His \$1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000 for. Then I can wear the diamonds. Iams speaks the languages, buys direct from BREEDERS, pays no buyers, salesmen or interpreters, has no two to ten men to divide profits with. Iams guarantees to sell you a BETTER stallion at \$1,000 to \$1,500 (a few higher), than are sold to Stock Companies at \$2,500 to \$5,000 by SLICK SALESMEN, or pay you \$100 for your trouble, you the judge. Iams pays horse's freight and buyer's fare; gives 60 per cent breeding guarantee.

Write for eye-opener and greatest horse catalog on earth.

From Sinnissippi Farm, at Chicago, Ill.,  
**JUNE 11, 1907**

On June 11th I will sell 65 head, 4 bulls and 61 cows and heifers. All of breeding ages. Forty females have calves at foot, and all are bred to Ceremonious Archer, Cumberland's Last, or other noted bulls.

EVERY female is fit to grace any herd and every bull a herd header, including Cumberland's Last. Many of the best imported females from Aberdeenshire and the cream of America's best breeding establishments are to be found in this consignment. I am told that no breeder ever offered at one day's sale the equal of this selection (numbers considered). Every animal is of breeding age. It has been my ambition to sell an offering of Scotch cattle second to none. In parting with Cumberland's Last I am selling what I believe to be the best individual Short-horn bull I have ever seen. His calves are very promising. Every breeder and admirer of Short-horn cattle in America is earnestly invited to be with me at Chicago, Ill., June 11, 1907, to inspect these cattle.

## A FEW PEDIGREES

### Cumberland's Last 229822

White, of March 18, 1904. Bred by C. A. Saunders, Manilla, Iowa.  
Dams  
Sires  
Got by Cumberland 118578 ..... R. J. Johnston  
Imp. Lady Douglas ..... Lord Douglas 132003 ..... Wm. Duthie  
Lady Cromwell ..... Albion 95912 ..... W. S. Marr  
Miss Cromwell ..... Comet 96835 ..... J. Murray  
Lady Dalhousie ..... Cassius 96626 ..... Mr. Mackie  
Bella 3d ..... Nobility 99686 ..... Mr. Chalmers  
Missie ..... Banker 96033 ..... Mr. Longmore  
Bella ..... Coeur de Lion 2d 96786 ..... J. Milne  
Jessie ..... California 25830 ..... Mr. Hay  
Kate ..... Bang 64865 ..... Mr. Hay  
Rosa ..... Duplicate Duke (6952) ..... Mr. Whitaker  
Lady ..... Sir Thomas Fairfax (5196) ..... Mr. Whitaker  
Miss Ramsden ..... Duke (3630) ..... Sir J. Ramsden

### Lavender Archer 242432

Roan, of Jan. 4, 1905. Bred by Frank O. Lowden, Oregon, Ill.  
Dams  
Sires  
Got by Ceremonious Archer 17149 G. Harding & Son  
Lavinia 2d ..... Martinet 187766 ..... J. Miller & Son  
Imp. Lavinia ..... First Choice 107872 ..... S. Campbell  
Lavender 50th ..... Baron Violet 90446 ..... A. Cruickshank

### Gladstone 239313

Roan, of June 25, 1904. Bred by E. S. Kelly, Yellow Springs, Ohio.  
Dams  
Sires  
Got by White Hall Sultan 163573 ..... J. Deane Willis  
Mina Lavender ..... Lavender Jimmy 145005 ..... John Isaac  
Gipsy Maid ..... Golden Crown 119413 ..... S. Campbell  
Gipsy Queen ..... Gladstone 51801 ..... S. Campbell  
Imp. Minerva ..... Luminary 52566 ..... A. Cruickshank  
Mina 3d ..... Duke (28342) ..... S. Campbell

### Mary Gray (Imported)

Red, of May 6, 1901. Bred by Adam Gray, Little Pittman, Old Meldrum, Scotland.  
Dams  
Sires  
Got by Rosalie 180742 ..... W. Adams  
Lizzie ..... Superb 141553 ..... Wm. Duthie  
Helen 14th ..... Aristocrat 144597 ..... J. Johnston  
Helen 8th ..... Earl of Lethenty 132006 ..... E. Cruickshank  
Helen 5th ..... Marmaduke (43617) ..... Major Ramsay  
Helen 4th ..... Archbishop (27888) ..... A. Cruickshank  
Helen 2d ..... Garabach (47924) ..... N. Reid  
Helen ..... Romance (20701) ..... A. Cruickshank  
Empress ..... The Baron (13833) ..... R. Chaloner  
Eugenie ..... Matadore (11800) ..... W. Smith  
Elegance ..... Prince Edward Fairfax (9506) ..... A. Cruickshank  
Venus ..... Saturn (5089) ..... J. Simpson  
Dalrymald ..... Favorite (6997) ..... Bred in England

### Lena (Imported)

Red, of March 1, 1900. Bred by H. R. Macrea, Inverness, Scotland. Imported by John Isaac, Bomanton, Ontario.  
Dams  
Sires  
Got by Scotland's Fame 167040 ..... Wm. Duthie  
Loveletter ..... Mandarin 157933 ..... J. L. Reid  
Lovetock ..... Star of Underley 144843 ..... G. Inglis  
Lovelace 2d ..... Lord Chelmsford (45073) ..... J. Bruce  
Lovelace ..... Lord Forth (26649) ..... A. Cruickshank  
Early Morn ..... Earl of Aberdeen (12800) ..... Mr. Hay  
Topsy ..... Balmoral (9920) ..... A. Longmore  
The Scottish Maid ..... Seaford (9616) ..... A. Longmore  
Red Ribbon ..... Jacob (16306) ..... J. C. Grant Duff  
Derby ..... Satellite (1420) ..... Mr. Robertson

### Ballechin Charming Maid (Imported)

Roan, of January 18, 1901. Bred by A. Robertson, Ballechin, Scotland. Imported in 1903 by Brownale Farm, Minneapolis, Minn.  
Dams  
Sires  
Got by Macbeth 207128 ..... Lord Lovat  
Cherry Sweet ..... Mutineer 150049 ..... Wm. Duthie  
Cherry Ripe ..... Airy Monarch 151709 ..... W. S. Marr  
Cherry Blossom 2d ..... Dauntless 130855 ..... A. Cruickshank

### Clara Belle

Red roan, of Sept. 11, 1904. Bred by Tebo Land & Cattle Co., Clinton, Mo.  
Dams  
Sires  
Got by Choice Goods 136802 ..... James Durno  
Imp. Clara 58th ..... Golden Victor 140610 ..... J. Deane Willis  
Clara 53d ..... Captain of the Guard 132059 ..... A. Cruickshank  
Clara 42d ..... William of Orange 95786 ..... A. Cruickshank

### Village Sultana

White, of Sept. 21, 1904. Bred by E. S. Kelly, Yellow Springs, Ohio.  
Dams  
Sires  
Got by Whitehall Sultan 165673 ..... J. Deane Willis  
Imp. Scottish Maid ..... Scottish Fancy 157741 ..... W. S. Marr  
Village Maid 19th ..... Star 136639 ..... James Black  
Village Maid 16th ..... Royal Heir 100626 ..... W. S. Marr  
Village Maid 18th ..... Ventriloquist 78218 ..... A. Cruickshank

### Mario's Heiress Second

White, of Dec. 7, 1900. Bred by Bronson C. Ramsey, Buffalo, N. Y.  
Dams  
Sires  
Got by Scotch Victor 133330 ..... C. B. Dustin & Son  
Imp. Mario's Heiress ..... Marengo 141581 ..... Wm. Duthie  
Dainty Lass ..... Star of Morning 121243 ..... Wm. Duthie  
Marian ..... Mario 131994 ..... Wm. Duthie  
Dainty Lady ..... Actor 139994 ..... Wm. Duthie

### Lake Park Augusta

Roan, of Dec. 15, 1901. Bred by Thomas H. Canfield, Lake Park, Minn.  
Dams  
Sires  
Got by Imp. Count Amaranth 144608 ..... Wm. Duthie  
Imp. Augusta 99th ..... Waverly 136405 ..... A. Strachan  
Augusta 44th ..... Banduliae 149524 ..... J. Bruce  
Augusta 24th ..... Allison 132052 ..... G. Anderson  
Augusta 5th ..... Privy Seal 109647 ..... A. Cruickshank

### Anoka Broadhooks

Roan, of June 2, 1904. Bred by F. W. Harding, Waukesha, Wis.  
Dams  
Sires  
Got by Ceremonious Arch. 171479 G. W. Harding & Son  
Imp. Shenstone Princess ..... Bulwark 228401 ..... C. M. Cameron  
Imp. Twin Princess 9th ..... Idor 201627 ..... J. Bruce  
Twin Princess 7th ..... Lord Violet 144899 ..... Wm. Duthie  
Twin Princess ..... Duke of Beaufort 141833 ..... Earl of Dunmore  
Broadback ..... Highland Chief 150703 ..... J. Geddes  
Young Broadhooks ..... King's Seal 61390 ..... C. Bruce  
Broadhooks 10th ..... Champion of Eng'd (17527) ..... A. Cruickshank

### Duchess Fourth

Red, of March 9, 1903. Bred by C. E. Clarke, St. Cloud, Minn.  
Dams  
Sires  
Got by Bapton Ensign 172542 ..... J. Deane Willis  
Imp. Dalmeny Duchess 5th ..... Dictator 134586 ..... Wm. Duthie  
Dalmeny Duchess 2d ..... Sittytton Seal 149570 ..... Wm. Duthie

**F. O. LOWDEN,**  
THOS. STANTON, MANAGER.

**OREGON, ILLINOIS.**  
COLS. WOODS, BELLOWS, JONES AND GARDNER, AUCTIONEERS.

#### DISCARDING OLD SOWS.

An Iowa subscriber sends the following communication:

I was considerably interested in the contribution that recently appeared in your paper by Mr. Roth, and in your editorial remarks on his views. While it is true that the old sow, as a rule, will bring through a better litter of pigs than the young sow, at the same time it is not a fact that the young sow's litter is often more uniform than the pigs from the old sow? It is my experience that after the second or third litter the udder of a sow becomes more or less irregular. This may be the result of careless weaning of the pigs, but it happens nevertheless, even when considerable care is taken. I have had an old sow start off with eight or nine pigs and while she would bring some of them through in splendid shape, on the other hand she would have two or three runts at weaning time. This I attribute to the fact that some of the lobes of the udder were better milkers than others. In the case of a young sow you seldom find an instance of this kind. I think, all things considered, it is a good thing to discard a sow after she has raised two or three litters and substitute in her place the gilt, or so much the better if you have fall ewes; that is, sows that instead of being nine months old at breeding time are about fifteen months old.

The suggestion given here is perfectly in order, because it is true that the method of feeding before and immediately after farrowing time and the manner in which pigs are weaned frequently results in spoiling parts of the udder of a sow, and especially the heavy-milking aged sow.

The udder of a sow can be kept "evenly balanced" for years if she is not fed milk-making foods immediately before and after farrowing time so as to cake the udder, and in the second place if her ration is cut down and the pigs are weaned by the drying-up process. We have known instances where men, when pigs get eight, nine or ten weeks old, adopt the uniform practice of weaning them no matter what the condition of the sow may be. In some cases the pigs are turned away abruptly and never again turned to their dam, while others prefer tapering off and allowing the pigs to be turned to the sow a fewer number of times each succeeding day until the weaning is accomplished. However, as said before, the best way to wean pigs from a heavy-milking sow is to cut down her ration and let her dry up naturally. Under such circumstances there will be no spoiling of the different lobes of the udder, because the pigs themselves will prevent that. The very worst thing that can happen to an old sow is to allow one or two pigs out of a litter to gain access to her a few times after the weaning date. This is very apt to permanently injure parts of the udder. Where these precautions are taken there is no reason why a sow cannot be kept in splendid breeding condition for many years and be profitable until the end.

#### PROBLEMS IN HAY MAKING.

We have many times been amused by the fatherly advice given to farmers about hay making by men who never handled a forkful of hay and who had no knowledge whatever of the obstacles that are ordinarily met during the haying season. Because of the free propagation of such advice we feel diffident about offering suggestions on the subject. When haying weather prevails any man who has gumption enough to run a farm can make good hay, and when the weather is bad the most scientific hay-maker will be not only puzzled, but will sometimes make as much of a fizzle of curing hay as the most enterprising man.

As a general proposition we like to

get the hay under cover just as soon after it is cut as possible. It would be better for the hay in all probability if one has time to put it in the shock and allow it to cure there for from twenty-four to forty-eight hours, but under ordinary conditions where there is much hay to handle this method is not practicable today. By cutting in the afternoon and tedding the next morning just as soon as the dew is off, the hay in good weather will do to haul in the afternoon, and it pays to take it in rather than to run the risk of getting it wet by first putting it in the shock to cure. With liberal salting one need not hesitate to put hay in the stack or mow even when it is a little "heavy," providing, of course, that there is no external moisture present from dew or rains. It is true that there are those who object to salt, but our most practical farmers use it and use it freely. Any kind of hay will get hot after being placed in a body, but if it is salted well it will be much less musty when taken out.

One of the hard problems connected with haying operations is to know just when to start, especially when the weather is "catchy." We have always preferred to cut down and cure a few acres before the crop is actually ready to cut, providing the ground is reasonably dry and the weather settled. Of course it takes a little more curing, but if one will be on the outlook he can often secure ten or fifteen tons of excellent hay before his neighbors really begin operations. During unsettled weather in the haying season it is much better to put off the cutting for a week or two than to risk getting it spoiled when down. It is surprising how succulent hay will remain, especially clover, even after all the heads are dead if it is left uncut; and there is this advantage in leaving it late, that it will cure very rapidly when it is cut. In many cases it is possible to do some cutting in the morning and haul the hay in the afternoon when it has matured standing. Of course we do not make the claim that such hay is as nutritious or as palatable as that which

is cut at the right time and properly cured, but, as said before, rather than risk getting a considerable part of the crop spoiled after cutting we prefer to delay the cutting considerably.

#### THE GOOD HIRED MAN.

The following communication has been received from a subscriber, Mr. M. R. Wiley, of Washington county, Kan.:

I have been intending to drop you a line before this, but have been very busy, having to depend entirely on hired help on a farm of 240 acres. But I must say that I have been very fortunate in getting good men. I had a man last year about forty years old who was first-class and did the work well and up to date. I have a man this year about thirty years of age, who is a crack-jack. He stays right here all the time and is ready for business. I think those of us who have to hire help should consult our hired men, if they show good horse sense, and take them in as co-partners as far as the work is concerned. They will then take more interest in the work and take better care of the stock. Don't try to make a mule of them. And another thing, I like to pay a man good wages if he is worth it and if he isn't worth it I don't want him. I don't want a man that isn't worth \$20 a month. I pay mine \$25 and am well satisfied.

There is one suggestion here to which we give our special indorsement, namely, that of taking the hired man into one's confidence and thereby giving him a share in the responsibility associated with farm affairs. We have known men who simply would have their own way no matter what turned up, and under no circumstances were the hired men given any special credit when things panned out satisfactorily.

No hired man can earn the prevailing wage that is paid nowadays unless he is in the game with his head as well as with his hands; consequently, as said before, the employer can well afford to share the responsibility of management with his men as well as the burden of the labor.

We agree with the other statement made by Mr. Wiley, that a man who is not worth \$20 a month is not worth having around the farm. Our experience is that the cheap man is always the dear one in the long run. A neighbor of ours hired a cheap man this year and

up to the present time, through careless driving, this man killed a valuable horse, started a fire through a young orchard and destroyed a few dozen trees, and sweened another horse. This man was discharged at the end of one month, being paid in full the sum of \$20, though leaving a debit account behind him of about \$400. There was no bad luck connected with any part of his work, but absolutely bad management, being a case where the hands without the head were engaged. Of course the serious part of it from the farmer's standpoint is that he has to "try out" a man to find what is in him and the trying out process often involves considerable loss.

#### FEEDING VALUE OF SPELTZ.

There is considerable interest being taken in recent years in the growing and feeding of speltz. Although this grain is specially adapted to semi-arid regions, yet we have in mind many instances right in the heart of the corn belt where it has given a yield of fifty, fifty-five and sixty bushels per acre, when under similar conditions oats would not yield more than forty or forty-five bushels. At the South Dakota Experiment Station it has yielded as high as sixty-three bushels per acre. That station has conducted extensive experiments in testing the feeding value of this crop and summarizes in a recent bulletin the results obtained, as follows:

Results in feeding it to sheep as a fattening ration are as follows: It required 5.09 pounds of barley as compared to 7.47 pounds of speltz to produce a pound of gain. In Bulletin No. 80 results are reported in feeding it to lambs as compared to eight other different grain rations. In this experiment it required 7.2 pounds when fed whole and 8.3 pounds when ground as compared to 5.3 pounds of corn to produce a pound of gain.

It required two pounds more of speltz to produce a pound of butterfat when fed to dairy cows than it did barley or corn, other conditions being equal. The cows made a gain in weight of eighteen pounds per head during the period. They consumed one-third more of speltz per head daily than did the lots receiving barley or corn. Speltz proved to be a good feed for the dairy cow.

Speltz was fed to range lambs as a single grain, and mixed with corn, barley and wheat, half and half by weight to four different lots. The record of the lot fed on speltz in this test confirms the results obtained by feeding this grain in former experiments, that it requires from one to two pounds more of gain than with the other grains.

And in Bulletin No. 97, "The Production of Baby Beef," speltz was used as one of the grain rations with the following result: The lot fattened on speltz made an average daily gain of 1.69 pounds, while the lot fattened on corn made an average daily gain of 1.84 pounds.

During the grass period the lot fed on speltz gained 112 pounds more than did the lot fed on corn. It required only 5.16 pounds of speltz for a pound of gain, as compared with 7.03 pounds of corn to produce a pound of gain during the grass period.

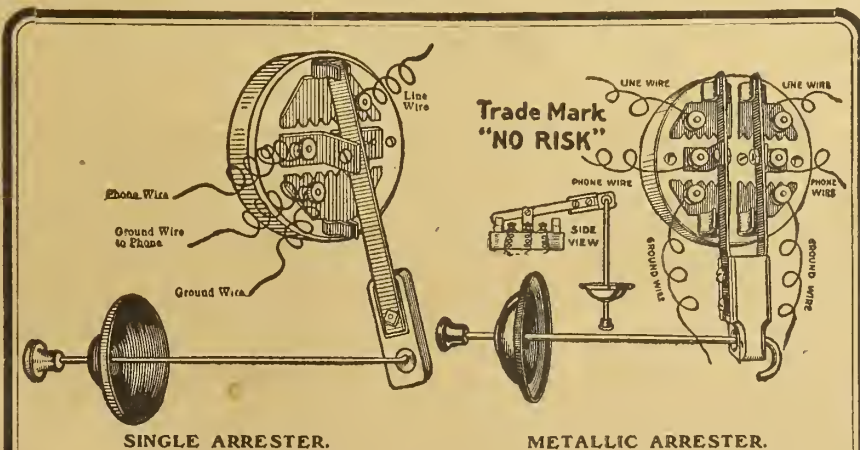

The lot fed on speltz did not consume as much hay per pound of gain as did other lots, indicating that the husk of speltz is a good substitute for hay.

Speltz produces a hard fat, about the same as oats; and as good a quality of meat as corn.

With the exception of the speltz lot, the spayed heifers brought the same price as the steers. In this case a reduction of 50 cents per hundred was made on account of the spayed heifer being smaller than the steers in the lot which brought \$6.00 per hundred.

The lot of calves fattened on speltz sold for forty cents a hundred less on the Chicago market than did the lot fattened on corn, and dressed 2 per cent less than did the corn lot.

According to these results, it appears that there might be an important place for speltz in the rotations adopted both in the corn and wheat belts. While for sheep this grain is not equal to barley or corn in feeding value, pound for pound, nor for dairy cows, at the same time the fact that it is a heavy yielder

Rural telephones are a constant source of danger during an electrical storm. At any instant the wires may become too heavily charged and melt, thereby setting fire to the surrounding wood work and the house. Persons near by at such times are frequently injured by the current of electricity, and often killed. The above illustration represents two forms of the "No Risk" lightning arrester. In speaking of this device the manufacturer says that "Of all the so-called lightning arresters on the market to be used on telephones the "No Risk" lightning arrester is the only one today that gives absolute safe protection and is the only one that we know of that is guaranteed to prevent the lightning from coming in to the telephone." The "No Risk" arrester goes on the outside of the building and is operated from the inside by a rubber button. A child can operate it. It is guaranteed to prevent flashing, popping, or ringing of the telephone bell in the hardest electrical storm, if put up as directed. This "No Risk" arrester may be bought direct from the manufacturer, or through the agents. If there is no agent in your locality it will pay you to secure the agency, as this arrester is easy selling and is well advertised in leading agricultural papers. For full description and particulars and booklet on Telephones and Lightning, address The W. E. Ashby Telephone Cut Out Co., 101 Square St., Charlton, Iowa. See page 3.

partly, and in some cases wholly, makes up for the difference. In the production of beef, speltz is found to have nearly the feeding value of corn in dry-lot feeding, while on grass-feeding better results were obtained with speltz than with corn.

#### THE IOWA LAW ON FEEDING-STUFFS AND AGRICULTURAL SEEDS.

No law passed by the last legislature of Iowa will be so far-reaching in its effect as the one relating to agricultural seeds and commercial feeding-stuffs. According to the terms of this law each manufacturer of feeding-stuffs must file with the state food and dairy commissioner a certified copy of the statement that the law requires to be attached to his feeding-stuffs, and also a sample of each brand of his concentrated commercial feeding-stuff, together with its proper affidavit. Labels on feeding stuffs shall show the net number of pounds in the package, the name and brand of the article, the name and address of the manufacturer, importer or dealer, place of manufacture, statement of percentages of crude protein, crude fiber and crude fat, and also the names of all ingredients. In the case of condimental stock foods the law does not require that a statement be given of the percentage of crude protein, crude fiber and crude fat, nor does it require the name of all ingredients, though the name and the percentage of diluent must be given on the labels of the packages.

All manufacturers, importers, dealers or agents of concentrated commercial feeding-stuffs will be obliged to pay the state dairy and food commissioner an inspection fee of ten cents per ton for each ton sold or offered for sale in the state. In the case of agents who handle condimental stock foods an annual fee of \$100 must be paid in lieu of such inspection fee.

This law, if properly enforced, will have a high educational value as affecting farmers and feeders within the borders of the state. The labeling of all feeding-stuffs will make each and every purchaser a student of chemistry, and in the future feeding-stuffs will be fed more intelligently on account of the greater knowledge imparted concerning their feeding constituents.

The agricultural seed section of the law prevents the sale of seeds containing wild mustard, quack grass, Canada thistle, wild oats, clover and alfalfa dodder, field dodder and corn cockle. Some protection is made, of course, in the law whereby seedsmen are not compelled to comply with absolutely unreasonable or impossible rulings. For example, in the sale of red clover, mammoth clover or alfalfa the law does not allow more than 5 per cent, by weight, of yellow clover, sweet clover or bur clover; in the case of rape 5 per cent of common mustard or black mustard must be the limit; alfalfa must be 96 per cent pure, red clover 92 per cent, white clover 90 per cent, corn 99 per cent, flax 96 per cent, millet 99 per cent and oats 98 per cent. The law also relates to the germinating qualities of agricultural seeds. For example, red clover must germinate 80 per cent, corn 94 per cent, sweet corn 75 per cent, timothy 85 per cent, wheat 90 per cent and oats 90 per cent. Practically the whole list of crops grown within the borders of the state are enumerated and the percentage of purity and germination given.

In order that our readers may have proper information concerning the full effect of this law, it is suggested that application be made to Dairy Commissioner H. R. Wright, Des Moines, Iowa, for a pamphlet recently published, giving the laws relating to commercial feeding-stuffs and agricultural seeds. The law becomes effective July 4, 1907.

#### MACHINE TILING.

A subscriber from Elliott, Iowa, asks for information about machine tiling. He states that there are thousands of rods of tile being put down in southwestern Iowa, and consequently farmers are becoming greatly interested in the machine proposition. Some of them are now in use, but the information desired at this time is from those who have used the machines five or ten years. The kind of machine in use in that locality is really the old mole ditcher with a carrier to draw the tile in the hole made by the mole.

If any of our readers have had experience extending over a number of years in putting down tile with any kind of a machine, we shall be pleased to have

them give the result of that experience through the columns of The Homestead.

#### Cement Floors for Crib.

To the Editor of The Homestead:

Seeing in a recent issue of your paper, a request for information concerning cement floors for corn-cribs, bins, etc., I give my experience and method of construction.

I built my barn in the fall of 1904, and the ground-space to be occupied by cribs, bins, etc., was leveled off and covered with broken stone, gravel, etc., to a depth of four inches. To one part cement I put six parts sand and added water and mixed mortar to a thin consistency, so thin that when poured over the rocks it went right in and filled all crevices. I put enough of this mortar on to just cover all the rocks, and then tamped down well. This tamping settled the rocks down and helped to settle the cement around the rocks. This was allowed to stand over night. I then covered this all over with a coating of cement one inch thick, in the proportion of one part cement to three parts sand and enough water to make it work well and troweled down smooth.

Before putting on this top coating, I laid down 2x4 pieces where I wanted walls, partitions, etc., and bedded them in cement to keep them from slipping or spreading; on these pieces I spiked the studding.

I let this stand in this condition all winter, and when the frost was coming out of the ground in the spring I noticed considerable frost would accumulate or form around all blocks of wood or other things that happened to be lying about. I was then satisfied that it was a very unsafe proposition to risk keeping grain, especially wheat or other shelled grain for any great length of time on this floor.

When I finished the bins I laid thin strips like lath down on the cement and laid a tight board floor on them. This left a small dead-air space between the floor and the cement, and also left the bins practically mouseproof. I have used these bins for two years and am well pleased with them.

I have my horse-stalls cemented; also a feeding-pen out of doors for my hogs. If I was to build another barn I think I would first make a cement floor for the whole barn—stalls, bins, driveway, etc., and then put up the building and it would all be on one solid foundation and ratproof. Jas. H. Chenoweth, Jr.  
Clinton county, Mo.

I noticed in the last issue of your paper that a Kansas subscriber would like to know how a cement floor would do for granary and corn cribs. As I have had practical experience for six years with corn and oats but not with wheat bins, I will say this: For my oat bins I laid an inch floor (shiplap is all right) on the cement floor with two or three cleats tacked across the top to hold floor in place. This will keep the oats from molding except along the foundation, but this is such a little that it is hardly worth mentioning. I unload my corn on the bare cement floor and it keeps well enough. The main thing is to have the cement floor considerably higher than the outside ground floor. Have a good, solid foundation all around to keep water and rats out, and have a good building over the floor—no slat building so rain and snow can blow in. I am well pleased with my corn and oats bin.

If a cement floor is put down right there is no waste room and no rat nest under it. I don't think I have had a rat on the place since I commenced to use cement floors; before that I had them by the wholesale.

Nokomis, Ill. A Subscriber.

In answer to the inquiry of your Kansas subscriber concerning concrete floor in granary, I will state that last summer I built a bin with concrete floor in my barn. This was about the first of August and about the first of October I filled it with oats. The oats are now perfectly dry and free from mold, and that which lies directly upon the concrete is just as light as the oats in any other part of the bin. Newton Bawn.  
Wright county, Iowa.

#### The Old Sow Preferred.

To the Editor of The Homestead:

In a late issue of this paper I read an article on pig raising by Mr. Roth, of Washington county, Iowa. I see Mr.

Roth favors the idea of keeping young sows.

In the spring of 1906 I had six young sows that farrowed forty-one pigs and saved thirty-four; in 1907 four of the same sows farrowed fifty pigs and a few were farrowed dead. I gave five of them to a neighbor and have succeeded in saving thirty-seven pigs and have part of them weaned. My pigs from the same sows—the sows now being two years old—are much stronger and seem to be growing much faster than their first litter of pigs.

I protect my pigs from the old sows laying on them by nailing boards across the corners of the pen and around the sides. The last sow that farrowed laid on four pigs just because I neglected to fix her pen in this way.

I always pen my sows in a separate pen at night and let them out during the day time until they have milk; then I leave them shut up and watch for the increase. After a sow has her pigs I never give her any slop or grain for twenty-four or thirty-six hours. Then she is quiet and the pigs get filled up and get strength to help themselves before the sow stirs around much.

I think with proper care the old sow is most profitable. For my part I will take the old sow.

Poweshiek county, Ia. P. S. Brunk.

#### Iowa Climate and Crop Bulletin.

The following climate and crop bulletin is issued by the United States Department of Agriculture, Iowa section, from the central station at Des Moines, Iowa, for the week ending June 10, 1907:

The average daily deficiency in temperature was seven to nine degrees, and there was also a large excess of cloudiness. Showers of varying amount were reported every day but one during the week, and heavy downpours with considerable damage by wind and local floods occurred on Sunday afternoon and night. It was generally a very unfavorable week for field work, and the corn fields show the need of cultivation, as also the need of heat and sunshine to restore normal color and promote growth of the plants. Reports are quite general as to the deficient stand of corn, and the unusual amount of replanting being attempted. Conditions have been more favorable for oats, wheat, barley, potatoes, meadows and pastures, and improvement is noted in garden truck and small fruit.

The regular June reports from correspondents of the Iowa Weather and Crop service have been tabulated, and following is a brief summary:

Area planted.—Corn, 103 per cent; wheat, 94; oats, 98; rye, 91; barley, 94; meadows, 95; flax, 87; potatoes, 100.  
Condition.—Corn, 88; wheat, 88; oats, 89; rye, 90; barley, 81; flax, 83; potatoes, 86; hay, 74; apples, 55; peaches, 27; plums, 42; cherries, 30; grapes, 80; berries, 78 to 82.  
Conditions Last Year.—Corn, 99; wheat, 98; oats, 96; barley, 96; hay, 92; potatoes, 101.

#### ESSENTIALS OF A GOOD ROOFING.

There are a number of points which should be kept in mind in buying a prepared roofing material. One of the worst objections to some brands of roofing is that they "stick" in hot weather, and again they get stiff and crack in cold weather. Roofing of this kind soon yields to the elements and on the whole gives very poor satisfaction. Some brands of roofing are impregnated with a quality of waterproofing that melts under a hot sun and even runs, dripping down from the eaves of the building. In other brands of roofing on the market the felt or body is of very short-fibered material and is easily torn or punctured. This is a serious objection and results in a short-lived roof. Again, there are brands of roofing which are what we might call back numbers in the market. The companies manufacturing them have failed to keep their machinery and materials up to date. Their sales have been slow and they often palm off an article that has been stored away for some time, causing it to lose some of its good qualities. Among the brands of up-to-date roofing will be found Huttig's Rubber Roofing. This brand is sold under the most liberal guarantee and the factory which makes it is up to date in all of its appointments. Huttig's Rubber Roofing is made of long-fibered wool felt, densely compressed and heavily saturated with specially-prepared asphalt. The result is a roofing material which is practically proof against wear and weather, as well as fire. Samples of this roofing material will be mailed to any of our readers who will ask for Booklet "B" and special iron-clad guarantee. Address Huttig Manufacturing Company, 707 East Second St., Muscatine, Iowa. See page 12.

#### THRASHING OUTFITS AT BARGAIN PRICES.

The Cascaden Manufacturing Company, of Waterloo, Iowa, and Grand Forks, N. D., make an announcement on page 6 regarding thrashing machinery that should interest every thrasher. This company now are prepared to supply every style of machine at the lowest prices. If you want a brand new outfit they have it. Rebuilt outfits practically as good as new are on hand also. Engines to correspond, and of the proper horse power efficiency are also in stock. These engines may be equipped to do road or field work, thus insuring a great deal of work for the owner. All this large stock of thrashing machinery has been made possible by the unequalled manufacturing facilities which the Cascaden Manufacturing Company control. Besides a complete line of these machines,

## Traction Engines For Sale.

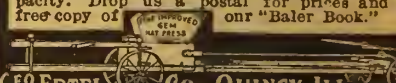

We have on hand ready for delivery several 15 Horse-power Traction Engines, new and second hand, also one 8-horse-power Traction Engine second hand, that we will sell very cheap in order to close them out within the next few months. A great opportunity to buy a good engine at practically cost price.

**THE O. S. KELLY MFG. CO.,**  
IOWA CITY, IOWA.

**BALES 15 TONS HAY A DAY**

—frequently 18 and 20 tons. Such wonderful records are possible because our Gem Ball Circle Steel Baler has a 30 inch feed opening, making it easy to charge and quick rebounding plunger allowing two charges to each circle of team. The patent power-head with its 9 inch trip lever arms enables us to realize the greatest baling pressure ever produced in a similar machine. We will save you \$5 or more in first cost and much more every year in repairs and because of greater capacity. Drop us a postal for prices and a free copy of our "Baler Book."

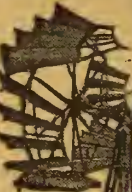

**GEO ERTEL & CO., QUINCY, ILL.**

**\$1000 REWARD FOR THEIR EQUAL.**

No slide head. Oil only twice a year. Ask about our two wheel power mills and our arm saver buckers. Get book 104. It's free. Write for it today.

**DOUBLE POWER MILL CO.**  
Appleton, Wis., U. S. A.

they are prepared to supply the trade with gasoline engines, Alfalfa King rakes and stackers, hay presses, feed mills, corn drills and other farm implements and machines. The proposition which they offer to prospective buyers is a good one and should be investigated by every user of machinery who wants to save some money. Send for their complete catalog and ask for their proposition. Kindly mention The Homestead and see page 6 for the formal announcement. Address Cascaden Manufacturing Company, Waterloo, Iowa, or Grand Forks, N. D.

#### HOW APPENDICITIS HAPPENS.

The first symptom of appendicitis is a swelling in the lower right half of the intestinal cavity. This point is located probably a hand width from the anterior point of the hip bone and toward the median line of the body. The swelling takes place in the beginning of the colon, the largest intestine of the body, which ends on the exterior part of the body. It is right at this point in the beginning of the colon where the swelling is first noticed, that the small intestines dump the refused portions of the food. This refuse is in just the right condition to begin decaying. When the large intestine becomes crowded or overtaken this refuse is liable to accumulate in the end of the large intestine. It soon decays and inflames the tissues whence follows the symptoms of this fatal disease. Surgical operation is the usual resort and it falls in a great majority of cases. A new remedy is now available. It should come as a blessing to those liable to this dread disease. The remedy is known as Appen-D-Form and has absorbent properties which act with immediate benefit on all cases of inflammation. Everyone who suffers from attacks of appendicitis should investigate Appen-D-Form. It is sold at nearly all druggists, but can be obtained by sending the required remittance to the Appen-D-Form Company, 501 1/2 N. Main St., Elkhart, Ind. See page 3.

strong I never like to try it myself, but recommend it to others as a pleasing exercise.

Police-men will soon be ornamental altogether. In one large city they have been ordered to have their suits pressed every month.

Where the frost has heaved the fence posts nearly out of the ground the proper thing to do is to heave them back with a post maul.

The secret of crop growing is very simply told. Keep the fields fertile and plant good seed. It is another thing to put it in practice.

The boy who is naturally mechanical should be allowed to cultivate that side of his nature. A good trades craft is not to be sneezed at these days.

To nibble or not to nibble is the hard question for some people to decide as they read of fortunes being made "while you wait" on the board of trade.

Some railroads in the West have planned to seed their right of way to alfalfa and allow farmers adjoining to harvest the crop. Success to the plan.

When food doesn't agree with a man it is the general rule that the man disagrees with everything and everybody in particular. Even himself included.

People can talk all they please about the strawberry crop being ruined with frost, it's nothing compared to the way it is being ruined with cream and sugar.

The best moving picture show I ever saw was once when a rambunctious old cow led a newly-arrived subject of the Kaiser down the lane at the end of a halter rope.

Next time you meet one of your friends ask him why the year 1907 is like a lumber wagon. Let him think a while, then explain the fact that neither has a spring.

Since the advent of motor cars the breeding of good horses has increased to a large extent. It is good horses, mind you, either roadsters or drafters. Ordinary horses suffer.

Of course potatoes will "run out" if their propagation each year is dependent on the degenerate tubers. By always planting the best potatoes there will be no lessening in vigor.

The wonder is that there are not more sorghum mills in the country. An acre of cane will keep a family supplied with the best of eating and cooking sirup. The candied sorghum is superfine.

I have heard painters say that it is very easy to clear the odor of paint and oils from a room by leaving a pail of water in which several onions have been sliced in the room over night.

The man who whistles at his work may be all right and doing a good job, but if you have to holler your throat hoarse to get his attention, the musical qualities of the whistle disappear.

It may be some consolation to think that among the fifty or one hundred railroad employes soon to be discharged by one road, there may be a few of those dreadfully grouchy depot agents included.

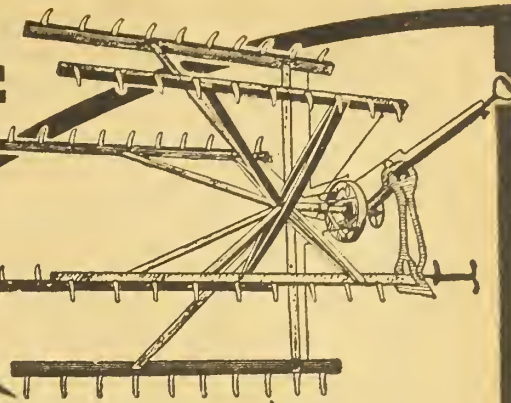

The county fair manager is going to be a pretty hard worked individual from now on if he attempts to find some new "attraction" for the season. It's just about time there was a new generation of fair goers.

The remarkable progress which is being made in the development of artificial building material is merely a proof that "necessity is the mother of invention." The latest is a cement block with a glazed surface.

When it was announced by a recent scientist that men lived longer now than in former times, a Kansas man remarked: "Why shouldn't they live longer with the cold storage weather we are having this spring?"

Drain tiles, from three to six inches in diameter, may be used to good advantage in the garden for protecting transplanted cabbage, tomatoes, etc.,

**GET ALL YOUR GRAIN**  
*See Those Points!*

**BRETT GRAIN SAVER**  
It saves you money on every field you cut. Those points swing into place at your command and positively cannot let one single stalk go through. This illustration shows the Brett Grain Saver attached to a Milwaukee Reel, it is easily attached to ANY binder and by a simple twist it falls into place to do its work. It's a sure cure for lost grain, an immense money saver.  
"I have tried the Brett Grain Saver and know it will pay for itself in every way. I saved as badly a lodged field of grain as was ever seen in our country and I wouldn't take ten times its cost for my grain saver if I couldn't get another. No farmer can afford to be without a Brett Grain Saver."

*SEE THOSE POINTS!*

from the sun for a day or so. Squares of roofing paper, especially the tar kinds, make good shades and repel insects to a degree as well.

There's hardly any place left in the industries for the booze-fighter any more. When you hire a man nowadays you expect that you are employing his wits as well as his muscle. The dangerous glass is the first one.

A set of stock and dies will save as many minutes and swear words as anything not usually found on an average farm. A set that cuts ten, twelve, fourteen and sixteen threads to the inch will meet all ordinary wants.

The post that is used for hanging a heavy gate should not be used as an end post for stretching wire fence. The side motion of the gate in opening and closing, together with the pulling of the wire, will loosen the post in time.

After all has been said about the expense of equipping a farm with up-to-date machinery, it would suit most farmers better to get along with a little less profit if necessary than to farm as in the days of the cradle and the scythe.

Speaking of turkeys, they say that the real blue-blooded, double-extra Mammoth Bronze kind do not stray away. I would like to see the color of some of those birds. The fighting weight of our old turkey tom is forty-five pounds, though there must be a streak of razorback in him which accounts for the wildness of his progeny.

**Iowa Seed Dealers' Association Formed.**

On Wednesday of last week eighteen prominent Iowa seedsmen met in Des Moines and organized what is known as the Iowa Seed Dealers' Association. The object of this association shall be the development of friendly relations between members and the united effort to improve the purity and quality of all seeds sold and to promote firmer business relations between those engaged in the trade.

One of the important points brought out in the discussions was that relating to the large demand that exists for low-grade seeds. The new state law can in no way affect the character of the seed sold to Iowa farmers by seedsmen of other states; hence the conclusion arrived at that a strong educational campaign should be waged against the use of cheap seeds of any description. Cases were cited where

quack grass has been brought to the state under a misleading name, resulting in actually depreciating the value of the lands on which the seed was sown. The state law as applied to dealers within the state prevents the recurrence of this but, as said before, in no way interferes with its purchase outside of the state.

At the close of the session the following officers were elected: President, Chas. N. Page, of the Iowa Seed Co., Des Moines; vice president, Henry Field, Shenandoah; secretary, W. C. Adams, Decorah; treasurer, J. T. Hamilton, Cedar Rapids. The executive committee is composed of the president, secretary and treasurer, together with H. A. Johns, of Sioux City, and J. W. Ratekin, of Shenandoah.

**THREE ESSENTIALS IN GOOD SHOES.**

In buying shoes everybody wants to get the best bargain for their money. To do this it is necessary that the shoe you buy possesses the three essential points of a good shoe, namely, style, service and comfort. Some people would leave off the first-named consideration. Everyone, however, is always desirous of securing service and comfort. While comparisons are odious, it is safe to say that Kirkendall's Electric Welt shoes come as near fulfilling the requisites of these three essential points as any make of shoes on the market. We believe that anyone who has become acquainted with this brand of shoes will become a regular purchaser of them. It will, no doubt, interest our readers to know how the good points in this shoe are secured by the maker. The style, which is distinctly a new departure in the art of shoe making, we are informed is secured by the use of durable materials put together by the most expert and careful workmen. This makes it possible for one shoe to be as uniform as the other shoe of its kind. There is no guess work about the cutting and sewing. Every shoe is made by the same pattern and the style is bound to be preserved in every pair that goes on the market. Comfort is one of the points which is given particular attention in these shoes. The old idea in making shoes was to make them firm and stiff. This resulted in a shoe of a very unyielding nature which soon tired the feet. In Kirkendall's Electric Welt Shoes every attention is given to produce an elastic and flexible last. The sole is of medium thickness, which soon conforms to the contour of the foot. The upper leathers are of the highest quality and they, too, soon conform to the arch and instep. These two points, combined with the durability for which these shoes are noted, makes them in strong demand by all those who desire high quality in footwear. If you want to get the most satisfaction from a pair of shoes order a pair of Kirkendall's Electric Welt brand. If you can't get them from your dealer write directly to the manufacturer. Address E. P. Kirkendall & Co., Omaha, Neb. See page 13.

**\$5,000 IN PRIZES.**

The Portland Commercial Club is offering the sum of \$5,000 in prizes for the best descriptive articles on Portland. The first prize is \$1,000 and the seventieth prize \$10. The articles must be in the hands of the judges not later than February 1, 1908. For further particulars of this contest write Mr. Tom Richardson, manager, Portland Commercial Club, Portland, Ore.

# THE HOMESTEAD

A Practical Journal for the Farmer,  
Stockman, Fruit Grower, Poultryman,  
Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

**SUBSCRIPTION RATES**—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to get up of club. In clubs of fifty or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance \$5. Subscription price in Canada, \$1.50 a year. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send your old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to  
**THE HOMESTEAD COMPANY,**  
Des Moines, Iowa.

## POPULATION AND LAND VALUES.

In 1790, the date of the first census, the population of the United States was 3,929,214. In 1890 that population had grown to 62,622,250. Up to 1870 the population of the nation doubled in about every twenty-one years. From 1870 to 1900 it doubled again, being a little over thirty-eight million in 1870 and over seventy-six million in 1900. The doubling process required thirty years. In 1880 the population was 50,155,783. The thirty-year period required to double that population will carry us to 1910, at which time the next census will be taken. That census will in all probability show the population of the United States to be one hundred million souls.

This unparalleled growth in population explains the increase in value of lands. That increase in value has only been felt in the corn belt in the last twenty years, because, up to that time, there had been such vast areas of public land to give away that land was held as of low and cheap value. But by the time the population of the country had come to sixty-five million people, all the best and most favorably situated public land had been taken up. From that very moment values began to quicken as if animated by live electric wires. From that time the only way to get a farm was to buy it of some owner. The growing, rushing, crowding population was stopped short with the startling knowledge that there was no more land in America to give away, except in the arid and semi-arid regions. For a few years the eager, hungry crowd ran frantically to and fro. A part of Indian Territory was thrown open to settlement, and an army of land-seekers camped along the border waiting for the day when they might go in. The same scenes were enacted at the Rosebud reservation opening, and not one in twenty of the land-seekers was able to secure a claim. Then, as if with a shock, all the people began to realize what value there was in land, and how enviable was the position of those who had already secured a slice of the earth's surface.

But the process of increasing population goes steadily on with a progress that is sublime. Before 1950 is reached the soil of America will teem with a population of nearly, if not quite, two hundred million people. Even now there must be dealt out to the inhabitants of the United States three hundred millions of rations of food every day in the year, and in that line there are no holidays. All of this food must come from the soil. As the time rapidly rolls around when the call will be for six hundred million rations every day, it can well be imagined what the pressure on that soil will be.

Fortunately, and perhaps providentially, the enormous output of the mines of the world has so increased the volume of money that means are provided to meet this increased value in lands. Our business system of liberal credits makes it possible for men of determination and industry to secure what they want. The prosperity of the nation is assured for at least a considerable period ahead. We see nothing in the future but brightest hope for the fortunate owners of land, and also encouragement for those who are ambitious to become land owners.

## A WESTERN FARM MANUAL.

Campbell's 1907 Soil Culture Manual; 320 pages, cloth bound, handsomely illustrated, \$2.50 by mail; published by H. W. Campbell, Lincoln, Neb.

A good many farmers of the west have grown measurably familiar with what is often called the Campbell system, or as Mr. Campbell prefers to call it, scientific soil culture; but not until the present time has it been possible to secure in any one volume an exhaustive treatise on the subject by the originator of the method. Mr. Campbell has published some previous manuals in which he has given some of the information he has gained by long years of study and experiment in the dry country. Now he has revised these manuals and has given what appears to be a complete story of his work.

The substance of it is that Mr. Campbell, unlike many others, refused to give up when the drouth cut him out of a series of crops in the Dakotas, and he went at it to find out what was necessary to carry on general agriculture where the rainfall is scant and uncertain. For more than twenty-five years he has been engaged in this work, conducting experiments all over the west and having charge of farms in many states. He has made practical demonstration of the fact that the older writers and specialists all went far wide of the mark in assuming that no general farming could be conducted without at least twenty inches of annual precipitation. He has applied himself to the physical conditions of the soil. He has held that the soil is capable of treatment that will make or unmake it. He has shown that by proper cultivation, not alone during the growing season, but at other periods, the water which falls can be stored deep within these fine western soils so that it can be made use of when needed; that not only can there be storing of the water, but in so doing the soil can be improved and built up so that there is more available soil fertility and more plant food, and this process can be carried on from year to year to the great advantage of the farmer. He contends and perhaps wisely that there is no place on earth better suited to intensive farming than on the dry prairies of the west. And best of all he has done it and thousands of others who have learned something of his achievements have also done it. Mr. Campbell has been called by his admirers the father of dry farming. He has certainly been a pioneer. He has been at work showing what could be done while others were saying that nothing was possible. Today there are many great farms in the west on which fine crops are grown each year just because of the improvement in farm methods made under the leadership of Campbell. His new manual is therefore a timely and valuable work and especially

## ELECTRIC HANDY WAGONS IN RHODESIA, SOUTH AFRICA.

There is a valuable suggestion to wagon buyers in the accompanying reproduced photograph. Readers have become convinced of the excellence for all farm uses in this country of the Electric Handy Wagons, manufactured at Quincy, Ill., and regularly advertised in this paper. Few, however, know that their reputation as wagons that can be depended upon to stand up in all climates is such that they are being imported in large numbers for use in various foreign countries. The scene here reproduced is in Rhodesia, South Africa. The wagon is an Electric Handy Wagon, fitted with the broad tread stanch Electric Steel Wheels. The load it is carrying can be imagined from its three story, house-like appearance and the fact that an eight bull team is required to draw it. Perhaps no country is harder on a wagon than South Africa. The cry has long been

for "something that will stand the climate." The problem seems to be solved in the Electric Handy Wagon. Happily the chief thing which has caused the immigrants and others in South Africa to settle upon the Electric Handy Wagon, is the thing which commends it most strongly at home. That is the superb character of the wheels. The wheels are always the first part of a wagon to give way. All climates affect wooden wheels to a great extent. Climate can have no effect on the Electric Steel Wheels, which are practically one solid piece. There are no separate boxings. The spokes are not riveted in the broad tires and cast solidly in the hub. There can be no drying apart, nothing working loose. With nothing to start, there doesn't seem to be any "weakest spot" and a breakdown is one of the remote possibilities. These Electric Steel Wheels are made to fit any wagon. Old running gears are often used. By buying a set of Electric Steel Wheels many farmers make handy wagons out of their old ones upon which they get more service than if those running gears with their wooden wheels were bought new. Anyone wanting detailed information on the Electric Wagons and Wheels should get in touch with the manufacturers. Write for catalog, addressing the Electric Wheel Company, Box 43, Quincy, Ill. See advertisement on page 2.

## For All Leaf-Eating Insects—

Codling Moth, Bud, Gypsy, Brown-tail and Tussock Moths, Tent Caterpillar, Canker Worm, Pear and Cherry Slug, Vanessa Butterfly, Maple Worm, Potato Bug, Currant Worm, Asparagus Beetle, Cranberry Insects, etc.

## Swift's Arsenate of Lead is the Perfect Insecticide

Cannot burn or scorch the most delicate foliage; rain will not wash it off; it gives absolute and constant protection without the necessity of frequent respraying. Being white, foliage sprayed with it is readily distinguished and you can see that it is there. Highly endorsed by leading growers and Government Agricultural Stations. Write for booklet.

MERRIMAC CHEMICAL CO., - - 41 Broad St., Boston, Mass.

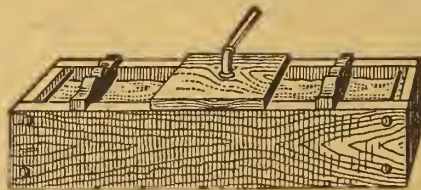

## WANTED 100,000 FARMERS

to buy a postal card. Address it to me and write on it: "Send me your Manure Spreader Proposition." Get the proposition before you buy a spreader of any make or kind or at any price. I then leave it entirely to you to be the judge if it's not a little bit the most interesting manure spreader proposition you ever heard of. It's away out of the ordinary. I not only make you a price of \$59.50

on the best manure spreader built, which can be put on any wagon gear, but I give you a chance to get it for nothing, if you accept my proposition. Buy a postal and send it to me before you lay this paper down. Write me personally. WILLIAM GALLOWAY, Pres.

THE WILLIAM GALLOWAY COMPANY, 109 Jefferson St., Waterloo, Iowa.

## The "ONLY" Waterer \$100 REWARD \$100

The "ONLY" will not run over or clog. It will run all winter. If you try our waterer and don't find this true the \$100.00 is yours. Used everywhere. Will last forever. Write today. Send ten cents for book on raising 1,000 hogs a year.

ONLY MFG. CO., - - Hawarden, Iowa

to be commended to all who are interested in western farming.

As the result of a four weeks' trip taken recently through Old Mexico, Col. W. A. Harris believes that there is a good field offered in that country for pure bred Short-horn cattle. The cattle found there were very inferior in quality and the only good meat is that which comes from the States and this is only canned and cured kinds. Butchering there is done in a very crude manner and the

methods practiced are not conducive to a good quality of meat. Fresh meat is eaten as soon as killed. Dairy cattle are being imported and are found principally near cities. The cattle men mostly favor the Short-horns, however, and about the only means by which they can improve their herds is to import good bulls to cross on native cows. The prices which cattle owners will pay would not be up to that paid by Argentine buyers, but in time if treated right a very extensive trade can no doubt be built up. Colonel Harris believes the country offers great opportunity for development along agricultural lines.

That the hog is cleanly by nature and needs only opportunity for culture to uplift him to a plane of refinement is the belief of an Ohio man who proposes to place five pigs in scrupulously clean quarters for six months and then tempt them with their pristine filthy quarters to prove his belief.

## BABY GIRL'S ECZEMA

Covered with Yellow Sores--Sight of Eye Destroyed--Doctors Fail.

## CURED IN A WEEK BY CUTICURA

"Our little girl, one year and a half old, was taken with eczema. We took her to three doctors, but by this time she was nothing but a yellow, greenish sore. One morning we discovered a little yellow pimple on one of her eyes. Doctor No. 3 said that we had better take her to some eye specialist, since it was an ulcer. So we went to Oswego to doctor No. 4, and he said the eyesight was gone, but that he could help it. Well, we were nearly discouraged. I thought we would try the Cuticura Treatment, so I purchased a set of Cuticura Remedies, which cost me \$1, and in three days our daughter, who had been sick about eight months, showed great improvement, and in one week all sores had disappeared. Mr. and Mrs. Frank Abbott, R. F. D. No. 9, Fulton, Oswego Co., N. Y., Aug. 17, 1906."

eases. Alcohol or Op-  
ium addiction. Home treatment if you cannot come.  
Write, The Victor Sanitarium, Box 387, Atlanta, Ga.  
ADJUSTABLE display racks, hang china-ware on wall. Agents  
wanted. Zimmerman Sons, Braddock, Md.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer,  
who has had years of experience at the bar. He  
will give accurate and reliable answers to all legal  
questions when they are of sufficient importance to  
be of practical interest to any considerable number  
of our readers. Subscribers who desire questions  
answered in this department should base them upon  
a brief, plain, concise statement of the actual facts.  
To insure immediate attention inquiries should be  
addressed to "The Legal Department," in care of  
this paper; but as the inquiries sent are at times  
very numerous, thus delaying printed answers,  
those to whom it is important to receive an im-  
mediate reply by mail should remit \$1.00, addressed as  
above.

LAW QUESTIONS CONSIDERED.

EXECUTOR—GUARDIAN.

An Iowa Subscriber.—Where property is  
willed to a person for and during his or  
her natural life, does the word "executor"  
in the will make such executor the guardian  
of the person to whom the property is willed?  
Answer.—It does not. If it be neces-  
sary for the person who is legatee to  
have a guardian, such guardian must be  
appointed by the district court or judge.

HOMESTEAD ENTRY.

Mr. J. C. Harrington, Bellevue, Iowa.—If  
a man owns a farm in Iowa, can he enter a  
homestead on government land in another  
state?  
Answer.—If the man does not own  
more than 160 acres of land, he may enter  
a homestead in any state or terri-  
tory where there is public land. If he  
owns more than that, he can acquire no  
land under the homestead law.

BUNCO BUSINESS.

An Iowa Subscriber.—About two months  
ago a man came to my house and tried to  
sell me some stock food. I declined to pur-  
chase, telling him I had no use for it, but  
he left a pail of it at my place. I never  
opened it, and it remains where he left it.  
He has recently written dunning letters to  
me, and says he will put a claim for the  
price into the hands of an attorney for col-  
lection. Can he collect the price of the pail  
of stock food by law?  
Answer.—He cannot. He is most like-  
ly trying to bluff you into paying the  
bill.

TERMS OF LEASE.

A Subscriber, Britt, Iowa.—A rented a  
farm from B for one year for two-fifths of  
all grain raised thereon, to be hauled by A  
free of charge to —, or — as B might  
direct. The lease expired on the first day  
of March, 1907, but before that day it was  
renewed by the parties indorsing on it the  
following: "For value received we hereby  
agree that this lease shall be extended upon  
the same terms for another year, ending  
March 1, 1908." Is the tenant obliged to  
haul off the landlord's share of last year's  
crop after March 1, 1907?  
Answer.—Yes. If not done before that  
time he should do it within a reason-  
able time thereafter.

STALLION SERVICE.

A Subscriber, Schuyler, Neb.—A sold a  
team of mares to B after having bred them  
to a stallion owned by C. B sold the team  
to D with the understanding that D was  
not to pay for the services of the stallion.  
The mares are with foal. Who is liable  
for the services of the stallion?  
Answer.—A is liable to C for the ser-  
vices of the stallion, but D may obtain  
a lien on the colts by filing with the  
clerk of the county where they are  
owned a claim containing a description  
of the colts with dates of their births.  
This must be filed within 100 days after  
their births.

MAKING A WILL.

A Subscriber, Bellevue, Iowa.—Is it neces-  
sary to employ a lawyer to write one's will,  
in order that it may be legal? Please direct  
the procedure of making a last will and  
testament and state the expense thereof.  
Answer.—A lawyer is not necessary.  
Any person of ordinary intelligence can  
prepare a will, if the testator knows ex-  
actly how he wishes to leave his prop-  
erty. It must be in writing, stating that  
it is the will of the person making it.  
He must sign it in the presence of two  
witnesses, stating to them that it is his  
will, and request them to sign it as wit-  
nesses, and they must then sign as wit-  
nesses under a statement on the will,  
stating that the testator acknowledged  
it in their presence, and that they as  
witnesses signed it as such in his pres-  
ence and at his request.

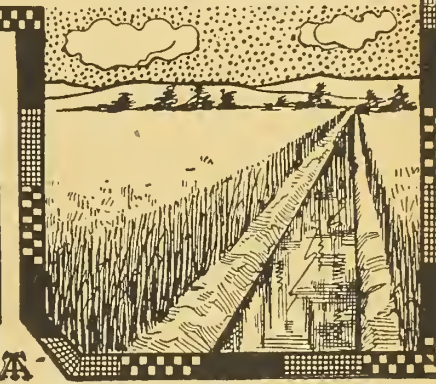

SETTLEMENT OF ESTATE.

A Subscriber, Sumner, Iowa.—(1) A farm  
of 280 acres in this vicinity has been as-  
sessed at full value like neighboring farms,  
but the owner is indebted \$6,000 on it. Can  
this debt be deducted from the value of the  
farm as fixed by the assessor? The debt  
is secured by mortgage on the farm. (2)  
My father died in Illinois about a year ago  
leaving a will by which he bequeathed \$1,200  
to his children, share and share alike, as  
they came of age. Four of the children are  
now of age, and nothing has been done. My  
youngest brother is the administrator. What  
steps must be taken to collect the money?  
Answer.—(1) The debt cannot be de-  
ducted from the value of the farm as  
fixed by the assessor. The \$6,000 debt  
can be deducted from the value of mon-  
ey and credits held and owned by the  
land owner which are liable to assess-  
ment, but not from the land value. (2)

Too Much Water

OW many times have you seen your fields flooded with moisture after a heavy  
rain, to the ruination of your crops?  
The loss of crops by flooding is a thing unknown on irrigated lands,  
because where irrigation is practiced drainage is perfect, and all the excess  
water which falls is promptly carried off where it will do no harm. The irri-  
gation ditches act as drainage ditches in case of overflow.  
On the great irrigated tract of the Canadian Pacific Railway in Sunny  
Southern Alberta is to be found some of the richest land on the American  
continent, where almost any kind of grain and root crops can be raised.  
Alfalfa thrives, and with the natural conditions and constant water  
supply, which makes Southern Alberta a perfect live stock raising country, the  
farmer is assured of reaping large and certain profits from the sale of his cattle,  
hogs and sheep.  
The native grasses that grow on the plains of Alberta furnish fine feed during the  
summer months, and the alfalfa can be depended upon to bring the live stock through the  
winter in fine condition.  
Sugar beet raising is one of the most profitable industries in Southern Alberta,  
under irrigation. Larger crops of beets can be raised here than in most of the states, and  
a better market is right at the door of the farmer. Beets bring \$5 per ton. The price is  
guaranteed, and the demand constant, so that the farmer takes no chances of having a  
drug on his hands when his crop is harvested.  
Everyone who studies farming conditions knows that Southern Alberta is the  
greatest wheat raising country on earth, and oats and other cereal crops thrive and pro-  
duce enormous crops.  
Poultry of all kinds does well in Southern Alberta, and a good market is always  
ready for the lucky man who has chickens, turkeys, ducks, geese or other fowls to offer.  
Quit trying to make high-priced land in the Central or Eastern States pay, and come  
out to Alberta where you can get five to ten acres for every one you now own, which will  
produce from three to five times as much under irrigation as your acres produce.  
Farming conditions are perfect in Alberta, good markets prevail, school facilities  
are of the best, and neighbors are Americans. Then why not come to a place where  
money-making is easy, and where you can be out of debt, independent of the world?  
Write and let us tell you how to see Alberta at very small cost. Let us tell you  
how to get a farm that will make you and your children rich.  
CANADIAN PACIFIC IRRIGATION COLONIZATION CO., Ltd.  
71 NINTH AVE., WEST II CALGARY, ALBERTA, CANADA.

Employ a competent attorney to compel  
a settlement and distribution of the es-  
tate going to the four children, who are  
of age, in case the administrator will not  
do this voluntarily.

OUTLAWED CLAIMS.  
Mr. L. S. Alfred, Metz, Mo.—A man died  
in Iowa in 1853, leaving an estate there  
which should have descended to his heirs,  
but his widow married again about 1857,  
and without any proper settlement of her  
first husband's estate, allowed it to be trans-  
ferred and disposed of by her second hus-  
band, and the heirs of the first husband got  
nothing. Is there any legal way by which  
the estate can be recovered by the heirs of  
the first husband?  
Answer.—There is not. The claims of  
the heirs have been barred by the  
statute of limitations for many years.

KANSAS TAXES.  
A Subscriber, Peabody, Kan.—I left Ne-  
braska on the second day of March, and ar-  
rived in Kansas with my personal property  
about the 5th of March. Will this enable  
me to escape taxation altogether in both  
states?  
Answer.—In Nebraska personal prop-  
erty is assessed as of the 1st day of  
April in each year. In Kansas it is  
assessed as of the 1st day of March in  
each year. See 8248 of the General  
Statutes of Kansas provides "When any  
personal property shall be located in any  
county in this state after the first day  
of March of any year, which shall ac-  
quire an actual situs therein, before the  
first day of September, such property  
is taxable therein," etc. This law will  
require you to pay taxes in Kansas.

WIDOWS AND WIDOWERS—PROPERTY.  
Mrs. G. D., Sterling, Iowa.—(1) Several  
years ago my mother married a widower  
who had four children. He claimed to own  
a farm of 100 acres, but in fact the title stood  
equally in his name and that of his deceased  
wife, and was subject to a mortgage of \$800  
given by them, and after her death he mort-  
gaged twenty acres of it for \$400. My mother  
loaned him \$1,000 and took his four prom-  
issory notes for it. How can she recover  
the amount from him, and do the two mort-  
gages take priority over her debt as a claim  
against the land? (2) My mother had a lot  
of household goods when she married him.  
What portion of them can she lawfully keep?  
(3) My sister married a widower with sev-  
eral children. She had property when she  
married. She is now dead. What portion of  
her property is her husband entitled to by  
law, and will his children get any of it?  
(4) My mother deeded a piece of land to  
me and my first husband in common. Can  
the court make that deed over to me and my  
second husband?  
Answer.—(1) The only way if he re-  
fuses to pay, is to bring a suit against  
him on the notes in the district court,  
get judgment and have execution levied  
on the land. The first mortgage will

have to be paid before the notes, and  
perhaps the second mortgage also, but  
there is some doubt whether the second  
mortgage is valid, but it may be and it  
so it would have to be paid before the  
notes. The execution could only be  
levied on the main share or interest in  
the land. (2) Your mother can lawfully  
keep all of her household goods. (3)  
Your sister's husband is entitled to one-  
half of her estate if she had no children,  
but if she had children, he is entitled to  
only one-third of it; his children are not  
entitled to any of it. (4) It cannot.

LEGAL INTEREST.  
Mr. T. T., Starkweather, N. Dak.—(1)  
What are the rates of legal interest in North  
Dakota and Minnesota? Does it make any  
difference whether the loan or debt is rep-  
resented by a note or a chattel mortgage?

Answer.—(1) In North Dakota the  
legal rate of interest is 7 per cent  
per annum, but parties may contract in  
writing for 12 per cent. In Minne-  
sota the legal rate of interest is 6 per  
cent, but parties may contract in writing  
for 10 per cent per annum.

TRUSTEES FOR CHURCH.  
Mr. O. M., Ettrick, Wis.—About 1870 A  
and his wife B, sold forty acres of land to  
C. D. a Lutheran church congregation, which  
was not then incorporated, and is not yet  
incorporated. The deed was made to the  
trustees of the C. D. congregation, as trust-  
ees for it. Do the trustees hold good title  
to the land?  
Answer.—The trustees hold a good leg-  
al title to the land in trust for the con-  
gregation. In case the congregation  
should become incorporated, the trustees  
should, and lawfully could, convey the  
legal title to the corporation.

HUSBAND AND WIFE.  
A Subscriber, LaValle, Wis.—A and B are  
husband and wife. At the time of their  
marriage A owned 120 acres of land, and  
B had \$900. A used B's money in building  
a house on the land, and gave her no se-  
curity for it. They have three children. (1)  
In case A should die first, what portion of  
the land would his wife be entitled to by  
law? (2) Could the wife recover for the  
money she had which was used in building  
the house? (3) If A should sell the land  
could his wife demand and recover her  
share? (4) Could the wife leave her money  
to her children by will?

Answer.—(1) One third part of it for  
her lifetime. If the land and house con-  
stituted their homestead, the wife would  
be entitled to all of it during her life-  
time, or until she would marry again.  
(2) It is very doubtful. The wife had  
a lawful right to keep her money separ-  
ate from her husband's property, but  
most likely she gave it to him with no  
promise that it should be returned. (3)

Not until his death, when she would be entitled to dower. (4) She could leave her money to her children by will.

RENTERS—HAY ROPE.

A Subscriber, Castalla, Iowa.—Last fall I rented a farm that has a large hay barn on it, and took possession. The man who moved away, took the hay rope with him. Will I have to furnish the rope to be used in the barn, or will the landlord have to furnish it?

Answer.—Under the circumstances stated, we think that you could not, by law, compel the land owner to furnish the rope, so you will have to furnish it yourself.

BREACH OF CONTRACT.

A Subscriber, Parkwood, Iowa.—B bought a cow from R to be delivered at B's residence in good shape. R drove the cow to a place within three-fourths of a mile of B's place, where being overheated, she lay down, and R could not get her up. R then went on to B's house and represented to B's wife that the cow was all right, and obtained a check for \$35, the price, and hurried to the tank and cashed the check. The cow died in a short time. Did R render himself liable to a criminal prosecution for obtaining money under false pretenses?

Answer.—We think not, but R is liable for the money he received on the check and perhaps for more than that. He is liable to B for breach of his contract, for whatever sum B is damaged thereby.

FENCE OF PRIVATE ROAD.

An Iowa Subscriber.—In the settlement of an estate A received his share of land next to the public road, B and C received their shares adjoining A's land, but without access to the road, so A decided to them for a private right of way, an acre strip through his land to the road, the strip being two rods wide and eighty rods long. (1) Whose duty is it to fence this private roadway? (2) In case either B or C should convey his undivided half in the roadway to A would A have to maintain part of the fence? (3) In case A should become owner of an undivided half of the roadway, could it be left open to the public road, but not to the public, without A's consent?

Answer.—(1) A should make and keep up half the fence and B and C together the other half. (2) He would. (3) It could not.

SALE OF HORSE—REPRESENTATION.

A Subscriber, Clarion, Iowa.—I bought a horse at an annual stock sale held in a nearby town. At the time I bought the horse, there was a card tied to his halter, reading as follows: "Horse nine years old, serviceably sound. Broke to all harness." The next morning he proved to have the heaves and to be badly wind broken. I complained to the seller and demanded that he take the horse and return my money. He refused to do so, or to pay back anything. Can I compel him by law to return my money and take the horse, or to pay me damages?

Answer.—We do not think you can rescind the bargain and get your money back, nor recover damages from the seller. When an animal is purchased at a sale the buyer buys at his risk, unless there is a warranty or representation which is false. In your case there was no warranty, but only a representation, which was so vague and dim in its terms that it would hardly constitute the basis of an action at law.

PATENT RIGHT SCHEME.

A Subscriber, Emporia, Kan.—A is the inventor and patentee of a certain article. He falsely represented himself as the president of a company, and sold to B the privilege and right to sell the article, and the patent within certain territory, and agreed to travel with him in the business. After A got the money from B, he skipped out to some other state, and left B with the contract. (1) Can B recover the money he paid to A. (2) Can B cause A's patent right to be cancelled? (3) Can B prevent A from selling his patent right in other states, and so beating people out of their money?

Answer.—(1) If A is financially responsible, and can be found, B can recover in an action for damages on account of A's failure to perform his contract. (2)

He cannot. (3) We know of no way in which B can accomplish this object.

JOINT TENANCY—LIMITATIONS.

A Subscriber, Neosho, Mo.—A and B are husband and wife. The wife had money of her own, and she invested it with her husband's in a home for them, also in other property, such as notes and securities, taking joint deeds and other evidences of title,—that is, in the names of both. There were no children of the marriage, but the husband had children by a former wife. (1) In case the husband should die, to whom would the property belong? (2) Could the children of the former wife dispossess the second wife? (3) If a man holds peaceable possession of real estate for twenty-one years, and three years of grace, does it "outwind heirs?"

Answer.—(1) The property would belong to the wife. (2) They could not. (3) We do not quite understand what you mean by "three years of grace," but will say that if a man holds adverse possession of real estate for twenty-four years, even heirs, whose cause of action accrued prior to the beginning of that period, are barred by the statute of limitations.

On page 4 of this issue our readers will find an advertisement of the Galloway Wagon Box Manure Spreader, manufactured at Waterloo, Iowa. This machine is in use already by many of our readers and is giving splendid satisfaction, the chief merits of the machine being that it can be used with any ordinary farm wagon truck, thus effecting a saving of a number of dollars on the price of a truck alone. The machine is also so constructed that it is very light in draft and can easily be handled by two horses. We would urge readers of The Homestead to look into this matter if at all interested and we can assure them of fair treatment at the hands of the William Galloway Company. Address 109 Jefferson St., Waterloo, Iowa.

Mr. Silas C. Sweet, patent lawyer, whose advertisement appears on page 5, says he has just secured the allowance of U. S. Patent for Mr. W. H. Faulkner, of Delta, Colo., for an effective nut lock. This patent was secured under the Guarantee Plan. If you have an invention, ask Mr. Sweet about this plan.

NORTH DAKOTA FOR HOMESSEEKER AND INVESTOR.

An opportunity to buy good farming land in North Dakota should never be neglected by either the homeseeker or the investor. There are a great many people scattered over that state who are quietly making fortunes by placing their money in some of the choice farms that are now offered. A few of these farms are advertised on page 15 and they will be sold at farmers' prices and on terms that are in keeping with the chances for a

good investment. For full particulars address Mr. John I. Hempstead, cashier Farmers' Bank, Emerald, N. D.

NEW AND SECOND-HAND TRACTION ENGINES.

The O. S. Kelly Manufacturing Company, of Iowa City, Iowa, who have been advertising traction engines in our columns for several issues, are still prepared to supply the trade with several fifteen-horse power traction engines, some of which are new and others second hand. They also have one eight-horse power traction engine and any of these will be sold at a bargain. See their advertisement on page 2 and kindly mention The Homestead when writing.

LAWN AND FARM FENCE.

For lawn and farm fence catalog quoting manufacturers' prices write to the Up-to-Date Manufacturing Company, 927 Tenth St., Terre Haute, Ind. Their catalog is their only salesman and they ship direct to users

## INVEST TWO CENTS

# One Thousand Dollars Profit

### Winneshiak Threshing Machinery

That is what we save you on a big rig. THINK OF IT—more than you save in three average years' hard work. We make the largest grain separator in the world and have traction engines to correspond; also the smaller sizes, and special big engines with plow gears; we have on hand rebuilt outfits of the leading makes which are practically good as new and at unheard of prices. COME RIGHT HERE AND LOOK AT THE GOODS. We can convince any man of experience. We pay your railroad fare and hotel bill if you buy. You will get a square deal. Our unequalled facilities for manufacturing and shipping enable us to supply the best line of threshing machinery ever offered at prices that insure a saving for our customers of almost one-third in first cost. WE CAN AND WILL SAVE YOU JUST AS MUCH IN PROPORTION ON YOUR OTHER GOODS. Get our catalog of famous DAVIS frost-proof gasoline engines, Alfalfa King rakes and stackers, Cascaden hay press, Giant Killer sweep feed mill, corn drills, farm boilers, tank heaters, Northwestern steam feed cooker and all styles and sizes of Progressive steel ranges, cook stoves, Oak and Hot Blast heaters. Send for catalog and proposition covering the article you want.

### CASCADEN MANUFACTURING CO.,

WATERLOO, IOWA.

GRAND FORKS, N. D.

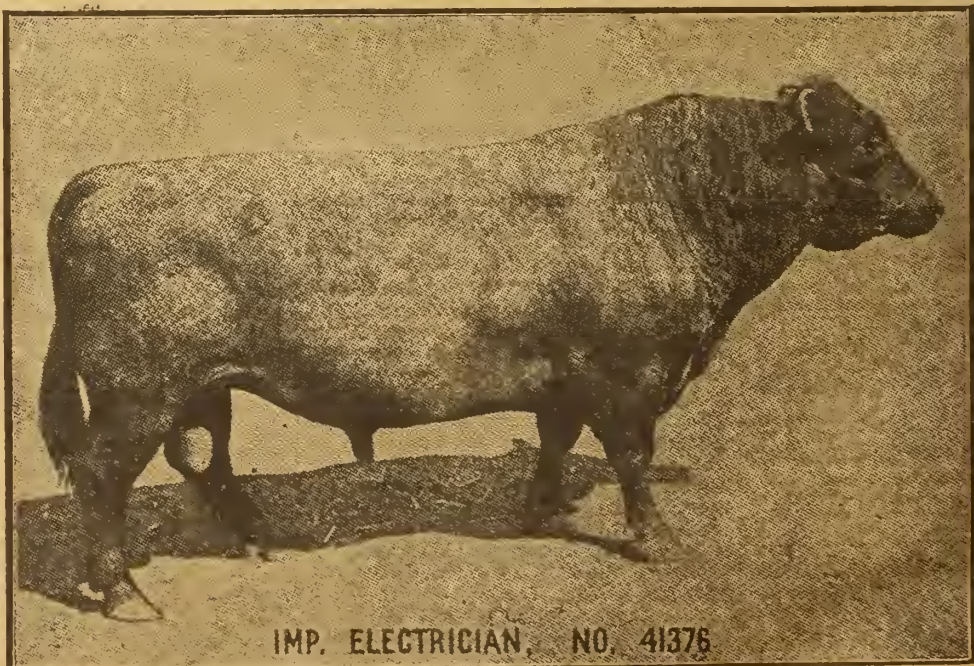

only. Write today as per offer on page 3.

#### ROUND TRIP PACIFIC COAST EXCURSION.

Daily to September 15th, the Minneapolis & St. Louis R. R. will sell round trip excursion tickets to Portland, Tacoma, Seattle and Vancouver for \$64.80. On account of the Christian Endeavor Convention at Seattle the rate will be \$54.00 to Puget Sound points. Tickets on sale June 20 to July 12; return limit September 15. Slightly higher rate to return through California. For further information write W. K. Adams, D. P. A., 512 Walnut St., Des Moines, Iowa.

#### HOMESSEEKER EXCURSION RATES.

The Minneapolis & St. Louis R. R. will sell, on the first and third Tuesdays of each month, round trip Homeseeker excursion tickets to points in Minnesota, North and South Dakota and the Canadian Northwest. For full information write W. K. Adams, D. P. A., 512 Walnut St., Des Moines, Iowa.

We present to our readers a very good photograph of the imported Erica bull, Imp. Electrician, used with much success in the Angus herd of Mr. H. A. Cole, and included in the dispersion sale to be held at Des Moines, Iowa, June 18. We quote from the catalog what Mr. Cole says regarding this noted sire: "This magnificent imported Erica bull has never been in the show ring is the only reason he has not gotten champion honors. Erica herd bulls have sired the champions on both sides of the water for years. Almost every famous herd in America today is headed by an Erica bull, and the opportunity to get a magnificent imported Erica bull in the prime of his breeding career under the hammer is rare indeed. It is my earnest hope that the Angus breeders who attend this sale will put a valuation on this bull that his individual merit justifies. He weighs 2,100 pounds and could easily be made to weigh 2,400 pounds. He has been used on the herd right up to sale time, and no effort has been made to put him in show ring condition. Electrician was sold as a youngster for \$735.00 at the Escher sale before his breeding characteristics were known. He was put in service on Mr. Blumie's herd. He has now proven one of the best sires in service today." See advertisement on page 19.

**EUREKA HARNESS OIL**  
Makes harness proof against heat and moisture. Gives a glossy black finish. Prevents rot. Imparts pliability, strength and durability to leather. Saves bills and mishaps. Keeps a few harness looking new and makes an old harness look like new. Contains nothing rough to cut and chafe. For axle troubles use

#### BOSTON COACH AXLE OIL

Better and more economical than castor oil. Will not gum or corrode. Lasting, reliable, satisfactory. Highest Award World's Columbian Exposition. Sold everywhere—all sizes.

MADE BY

Incorporated

# CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 100,000, reaching a farm population of at least 950,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

POST CARDS—For 10 cents we send you biggest and best pack. John Henderson, Medford, Okla.

## Milton E. Jones Holds Successful Short-horn Sale.

Another successful Short-horn sale was held at Cherry Grove Farm by Mr. Milton E. Jones, of Williamsville, Ill., on Tuesday, June 4th. Breeders were present or represented from Michigan, Wisconsin, Minnesota, Iowa, Kansas, Missouri, Illinois and Indiana. Colonel Woods conducted the selling and in opening the sale called attention to the past history and what has been accomplished by Cherry Grove herd in the show ring. The get of Imp. Lord Banff, the present herd bull in use at Cherry Grove, found ready sale and were widely distributed, a number going to Iowa. The top of the sale was the yearling bull, Scotch Goods, a son of Choice Goods, and out of the noted show cow, Cicely, at \$2,520. Mr. E. W. Bowen, of Delphi, Ind., was the buyer and Mr. John W. Shaw, of Harrisburg, Ill., was the contesting bidder. Mr. Bowen will show this calf this year and no doubt will meet with much success. The female offering was topped by Mr. D. E. Reber, of Morrill, Kan., who secured Good Lassie and bull calf at foot for \$980. This cow is one of the good daughters of Choice Goods, and her bull calf was by Prince of Tebo Lawn. Mr. Geo. Bonewell, of Grinnell, Iowa, secured Fancy 26th with bull calf at foot by Lord Banff at \$650. Mr. H. G. Bowers, of Elmwood, Ill., secured a bargain in May Violet 2d and bull calf at foot by Lord Banff at \$550. Mr. H. F. Brown, of Minneapolis, Minn., was a liberal bidder throughout the sale and among others bought Imp. Scottish Rose and heifer calf at foot by Lord Banff at \$510. Colonel Woods was ably assisted in the ring by Colonels Belows, Jones and Merriam. A list of animals selling for \$100 or over is given below:

FEMALES.  
May Violet 2d, nine years, sire Velvetten Prince, and b. c., H. G. Bowers, Elmwood, Ill. \$550

## REQUIREMENTS FOR SANITATION.

Many requirements for sanitation have been laid down by writers, but all that has been written would be invaluable to any stock raiser unless he provided himself with some good disinfectant, such as may be obtained

in the dipping fluids offered on the market. One of these is known as the Camo Fluid. It is manufactured by the Armstrong-Munson Mfg. Co., Des Moines, Iowa. There are hundreds of purposes on the farm for which this dip is exactly suited. It is a very concentrated solution and one gallon makes one hundred gallons of the very best disinfectant. As a sheep dip it is very superior. For dipping thirty-five or forty sheep not more than a half to three-quarters of a gallon of dip is required. This much may be diluted with fifty or sixty gallons of water and in that proportion the dip is guaranteed to destroy ticks, lice or maggots and promote the growth of wool and a healthy condition of the skin. Another splendid use of this dip is to mix with whitewash and paint the mangers and rubbing posts in any shed or stock barn. It is also invaluable in cases of chicken cholera, and when sprayed about the pens and roosts it produces a very sanitary condition and destroys lice and small vermin. Nothing is so handy to have on hand in cases of barb wire cuts as a bottle of Camo Fluid. If it is applied at once to the fresh wound it prevents all infection by germs and makes a healthy wound which will soon heal. As a dip for hogs it is recognized as a thorough eradicator of lice, mange or scurf. Its cheapness recommends it to the use of every farmer and stockman. Any of our readers who are looking for a good dipping fluid should write for descriptive pamphlet and place an order for some of this Camo Fluid. Address, Armstrong-Munson Mfg. Co., Des Moines, Iowa.

## THIS FIRM SELL FARMS.

If you have a farm to sell or any other kind of real estate and are anxious to get the same off your hands at the earliest moment and at the same time realize a good price for it, you should interest yourself in a plan offered for consideration on page 15. The firm which make this offer are one that buy and exchange all kinds of property and are fully equipped to do business of this kind on short order. Write them stating your wants and address Farmers Real Estate & Loan Co., 464 Unity Bldg., Chicago, Ill.

## VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

### SYMPTOMS AND TREATMENT.

#### PERIODIC OPHTHALMIA.

I have a brown mule about fifteen years old which gets blind after full moon. His eyes become covered with a white film and discharge water. I bought him last spring and the trouble began to show a few days afterward. I have done nothing except to bathe the eyes with salt water. Can you tell me what to do?

The disease is incurable (periodic ophthalmia or moon blindness), but mule should be kept in darkened stable and painting eyeballs with a solution of two grains of nitrate of silver in an ounce of distilled water at times when they appear milky, may give some temporary relief.

#### SCOURS.

Will you please tell me what to do with my calves? They are about five weeks old. They had the scours, and I lost two. I think it came from separated milk. Have you a recipe to put in the milk?

You cannot have read this department carefully of late, as we have several times given instructions for use of formaldehyde in milk for scouring calves. Mix half an ounce of formaldehyde in fifteen and one-half ounces of distilled water and put in amber-colored bottle. Of this solution mix one teaspoonful in each pound or pint of factory milk or other milk fed to calves and increase to a tablespoonful three times daily if improvement does not promptly occur. Milk should be fed sweet and clean; avoid sour, dirty much-diluted factory milk. Clean up, disinfect and white-wash pens used by calves and see that they are sunny. Always isolate a scouring calf.

#### QUITTOR.

Last fall in October one of my horses kicked into a nail. After it healed the place was a little enlarged just above the hoof. Last winter while using him on frozen roads this enlargement got inflamed. After applying something to draw out the inflammation it broke open at the extreme end where the nail reached, and matter has been flowing ever since. I have tried numerous remedies, but failed. I thought he was catching cold while using him, so I let him stay in the barn for three weeks without results. I consulted a horse doctor two weeks ago, but it is steadily getting worse. The whole leg is swollen. The hoof is a little enlarged just below sore.

A fee of one dollar must accompany an inquiry to which answer by mail is desired. Remove hair from hoof head; cleanse parts thoroughly. Then scrape out the discharging pipe and inject a saturated solution of corrosive sublimate, after which apply a flaxseed meal poultice, renewed night and morning, for a week. Then inject again, after washing and drying parts, and when dry rub in a mixture of one dram of biniodid of mercury and two ounces of cerate of cantharides. Wash blister off in three days; then apply lard daily. Alternate these two treatments until he is sound. It is a bad case to handle and as a rule it would be best to intrust it to the care of a qualified surgeon.

#### BRAIN TROUBLE.

(1) I would like to know what is the trouble with my heifer one year old. She has been running in the pasture with a lot of steers I am feeding. I am feeding the steers all meal along with snapped and shelled corn. A few days ago I found the heifer wandering around the yard. Her neck was stretched out to the right and slightly upward and bleeding from right nostril. In the evening of the same day her head was turned to the left side and when she walked she went around in a circle to the left. I put her in the barn in a box stall and now I think she is blind. She eats and drinks well. Was quite greedy for the oil meal. Would too much of the oil meal cause her condition? What can I do for her? (2) I also have a pig about eight weeks old. Three weeks ago its mother got too much oil meal and got sick. I weaned the pig away from her. Have been feeding pigs in a trough and giving them separator milk. Have fed sows same. I don't think this pig sucked sows any. This morning he had his front feet spread apart and kept turning his head to the left and I put him in a box and in a short time he seemed to be having a fit, and squealing and shaking. Also would too much meal cause such a condition?

(1) Feed has nothing to do with the trouble, but it seems likely that heifer sustained a blow or other injury of the head causing bleeding and other symptoms noted. Treatment will not be likely to benefit the case. Feed lightly and possibly time may lead to improvement. (2) Over-feeding on any rich food will

NOTICE.—For a limited time we will give to any stockman an injector free with his first purchase of 100 vaccinations.

cause such fits. Put on a light diet without rich food after physicking with castor oil or epsom salts.

#### HAIRLESS SCAR.

I have a horse that was sweened last spring, for which she was blistered with some sharp medicine which caused the hair to come off on her right shoulder. Now, there is a big bald spot there. Do you know of a treatment that will make the hair grow?

Nothing that can be done will cause the hair to grow again, as the hair roots have been killed. The blister was not suitable for the purpose, else sloughing of hair and skin would not have occurred. Blisters such as we have prescribed here will not cause such trouble.

#### DETERMINING AGE OF SHEEP.

(1) How may the age of sheep be told? (2) What is the cause of some of the lambs coming dead at birth and some are very weak?

(1) The age of a sheep is determined from appearance of incisor teeth in front. Up to about one to one and a half years of age the teeth are "milk" teeth, but at that time the middle pair are replaced by permanent incisors which are larger and broader than milk teeth; at two years the next pair come in; in another year to a year and a half the next pair come in and at four to four and a half years the eighth permanent incisors are in place. According to breed and manner of care and feeding teething may be somewhat hastened or retarded. (2) Lack of proper feed or feeding injurious foods and constipation from coarse dry fodder cause weak or dead lambs at birth. If you had described your methods of managing and feeding ewes we could have pointed out the probable error.

#### YEAST TREATMENT.

I would like to receive some information as to the preparation and use of the yeast treatment for breeding purposes. Will any form of yeast answer the purpose?

It is usual to make the mixture from compressed yeast, but we see no reason why a yeast preparation of any sort suitable for making bread should not prove equally effective. The mixture is prepared as follows: Stir to a paste with a little warm water one cake of compressed yeast and allow to stand in moderately warm room for twelve hours; then stir in a pint of luke-warm, freshly-boiled water and allow to stand as before for eight to twelve hours when mixture will be ready for use and simply has to be injected into vagina of cow or

mare with a large syringe or hose and funnel after flushing out the passage with warm water. Use the mixture at once on any barren cow or mare and have her bred when first she is seen to be in heat. If she does not conceive, open mouth of womb at next period of heat, as soon as period is noticed; then inject the yeast mixture and have her bred just when period of heat is ending. Repeat the treatment each period of heat until animal conceives. We trust our readers will clip this answer out and preserve it for future reference.

#### CAPPED KNEE.

I have a cow seven years old which has had a swelled knee for the last year or two. The cow did not go lame until last November. When I noticed her going lame I shut her up in a hog stall about eight days; then she was all right again, but the swelling had not disappeared. I have not used any medicine on her. The swelling feels soft under the skin. What can I do for her?

Cow bruised her knee and a serious cyst has formed which may safely be treated by inserting a tape seton through it from top to bottom for removal of liquid. It would be better still to have a qualified veterinarian open the sac freely from below, evacuate the liquid, inject full strength tincture of iodine and then pack once daily with oakum after repeating the injection.

#### TAIL RUBBING.

I have a roan mare nine years old that is losing her tail. She is in good flesh and with foal. There are stiff, short hairs about an inch long coming in. Will you kindly tell me through the columns of your paper what is the trouble and what to do for her?

She is rubbing her tail on account of over-feeding and lack of exercise and possibly from collection of sebaceous irritative substance between teats or between thighs and udder. Wash latter parts and apply Fuller's earth freely. Reduce grain ration, especially corn, and increase exercise. She should have a roomy box stall when in stable and a wide plank should be fixed on each wall of stall, like a shelf on brackets set just high enough to strike quarters well below tail, so that tail root cannot be rubbed on boards. Wash tail once with soap and hot water; then saturate skin down to hair roots with a creamy mixture of flowers of sulphur and raw linseed oil, to each pint of which has been added an ounce of coal tar dip and half an ounce of oil of tar. Repeat the application every three days and without washing.

## OUR DAIRY DEPARTMENT

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

### THE SILO MORE POPULAR.

It requires volumes of advertising and of editorials to introduce new methods and ideas on the farm. Perhaps no one subject has received so much attention of late as the silo. Every farmer is, or at least should be, fully acquainted with the merits of silage. More hesitancy, however, is shown throughout the corn belt in building silos than seems justifiable in view of the success which has resulted from the use of silage on representative farms throughout the country.

As an indication of the attention that is being given the subject throughout the corn belt we call to mind an instance where at one of the state fairs last year 10,000 farmers signified their intention of building in the near future. Practically every farmer or stockman is converted to the merits of silage. His public confession takes the form of a tall circular structure behind the substantial red barn.

Silo manufacturers have been kept unusually active the past winter answering questions and inquiries from prospective builders. As a source of information, these individuals are pretty reliable advisors. Many firms offer booklets and descriptive literature for the asking that contain very desirable information for those about to build. We suspect there are a good many farmers, and good ones too, throughout the corn belt, that would have a silo if they could buy it as they do a corn binder or a wagon box, that is, ready to use as soon as it reached the farm. The ever engrossing farm work and the bother of building seems the

principal barrier in the way of getting a silo on many farms.

The idea of building a silo in a night should be dispelled. Whoever erects a silo should do it with the intention of making it a permanent feature of the farm management. With this idea in mind it will certainly be no waste of time to give the matter plenty of consideration. That, however, does not mean a lifetime of considering, for some men never get any further than the consideration of a problem.

The advice that we would give every prospective builder is to get next to the situation as close as possible. Study the needs of the farm and the types, cost and management of a silo. No farmer of persistent mind need be afraid of making a failure. The storing and feeding of silage is far beyond the experimental stage, and eventually every stock farm will be equipped with some form of silo.

Possibly there may be a failure but what can it amount to in comparison to the possible gains. This year promises to afford a good opportunity for the building of a silo. The forage crop will be short. Grain is and will remain up in price, and economical feed such as silage may be a saving means before the next season's food supply is available. Study the situation. It is a good thing to keep posted, at any event.

### The Difficulty of Finding Good Cows.

To the Editor of The Homestead:

I have been greatly interested in some of the contributions that have appeared in the dairy department of your paper, especially those from college men in which they point out to farmers the folly of keeping a dairy cow that will only make 125 or 150 pounds of butter a year. You would think to read some of the statements made by those men that it had only recently been discovered that a so-called 300-pound cow is incomparably more profitable in a dairy than one making only half this amount of butter.

I would like to know how it helps a farmer any to tell him to get rid of his loafers and substitute in their place the good kind of cows. The facts in the case are there are not enough good ones to go around, and if all the poor ones were sent to the shambles, dairy products would be so high in price that they would be a luxury, entirely out of the reach of the working people.

I have been in the dairy business for more than twenty years, and believe that I know a good dairy cow when I see her about as well as the other fellow. I appreciate the fact that there is immensely more profit in a good cow than in a poor one, and because of this I buy a good one whenever the opportunity is presented. From this kind I try to increase my herd by raising my own stock, and of course use a pure-bred male of the dairy breeds.

What is the outcome of my efforts to raise the good kind? Well, I find that about one heifer in five will make a 300-pound butter cow. Some of those with the most promising kind of sire and dam will grow up to be boarders only, and of course I have to keep them at least a year to find out just what is in them. I therefore have a considerable number of the so-called unprofitable cows on my farm all the time, and am utterly unable to prevent this from occurring.

I would suggest that the college men who are investigating dairy problems should say less about the importance of discarding the poor cows and coming into possession of the good ones and do more along the line of establishing principles as to how farmers can fix the dairy type when they find it in their herds. I have visited more than one experiment station and have found some very good dairy herds, but upon inquiry I generally find that most of the cows have been purchased. With their long purse, which of course belongs to the state, these men are on the constant outlook for good dairy cows and when they buy one they ship her home no matter what the price is. If the records of their dairy herds, considering the cost of cows, were looked into I doubt if they would show a balance on the right side of the ledger. A dairyman who is in the business for profit cannot spend his whole time looking for cows, and even when he sees the right kind he is of necessity obliged to keep within bounds when he purchases, otherwise he will have so much capital tied up in his business as to make it impossible to realize a profit.

The production of a dairy animal is a

## Lost Strayed or Stolen—One Cow

That is about what happens each year for the man who owns five cows and does not use a Tubular cream separator. He loses in cream more than the price of a good cow. The more cows he owns the greater the loss. This is a fact on which Agricultural Colleges, Dairy Experts and the best Dairymen all agree, and so do you if you use a Tubular. If not, it's high time you

did. You can't afford to lose the price of one or more cows each year—there's no reason why you should. Get a Tubular and get more and better cream out of the milk; save time and labor and have warm sweet skimmed milk for the calves. Don't buy some cheap rattle-trap thing called a separator; that won't do any good. You need a real skimmer that does perfect work, skims clean, thick or thin, hot or cold; runs easy; simple in construction; easily understood. That's the Tubular and there is but one Tubular, the Sharples Tubular. Don't you want our little book "Business Dairymen," and our Catalog A. 12 both free? A postal will bring them.

# IMPORTANT CROP FACTS

Farmers generally are very "blue" over the unfavorable grain crop outlook at this time, but there is one crop that they need not feel doubtful about and which becomes of even more than usual importance to them by reason of the uncertain prospect as to other crops, and this is the MILK CROP, which continues month in and month out, regardless of good or bad weather, and of which it has been said "the harvest never ends."

There is nothing doubtful about the outlook for the MILK CROP. Dairy product prices have been high and are sure to continue so. The uncertainty about other crops makes it all the more important to make the MOST of the one that is sure. There is only one way to make the MOST of it, to be certain of recovering all the butter-fat with the least effort and under the most favorable conditions, and that is with the help of

## A DE LAVAL CREAM SEPARATOR

Every farmer with milk to separate needs a separator, and there never was a better time to make the purchase of one. There can hardly be good reason to defer putting in a machine or replacing a poor one with a DE LAVAL. Machines are made in all sizes to meet all conditions, and may either be bought for cash or on such liberal terms that they will actually save their own cost while you are paying for them. Catalogue with full particulars is to be had for the asking.

# FRUIT GROWING

The rich irrigated lands of the Arkansas, Grand, North Fork and Uncompahgre Valleys of Colorado, and the Farmington District of New Mexico, offer exceptional opportunities for the fruit grower. Pears, Peaches, Apples, Grapes, Apricots, Plums, Melons of all kinds and small fruit of every variety are raised with a greater average yield per acre—and a finer quality—than in any other section of the United States. Markets are close at hand and the demand exceeds the supply.

## The Denver & Rio Grande R. R.

"Scenic Line of the World"

reaches all the above districts and offers special inducements to those seeking locations.

Write to-day for free descriptive booklets.

S. K. HOOPER, GENERAL PASSENGER AND TICKET AGENT, Denver, Colo.

matter of guesswork largely, because I find that some of the most unprofitable cows I have ever owned were pure-breds of the dairy breeds. I say again let the colleges fix a dairy type that will reproduce itself and encourage farmers then to use this kind of stock. If they will keep from going outside of their own herd in the buying of females they will find that in a very few years they are just where the farmer is, owning, as he does, a few good cows with a rather thick sprinkling of loafers among them.

Scott county, Kan. Subscriber.

### KEEP YOUR CHICKENS HAPPY.

Don't allow your poultry to become a prey to vermin. That is poor management when such an efficient lice killer as Zenoleum can be had so readily and so cheaply. This famous disinfectant is not poisonous, it does not saturate the house as kerosene does and make it dangerous and likely to burn up at any time, and there is nothing explosive about Zenoleum. Spray the houses, nests and roosts and dip the chicks and fowls themselves. There will be better feeling and more thrift among the grown fowls. There will be more industry and singing among the laying hens, and there will be more eggs than when they stand around fighting lice a good part of the time. It does not cost much. Most every dealer carries Zenoleum in stock and you can get a can for twenty-

five cents. You can get a whole gallon for \$1.50, and that will make one hundred gallons of disinfectant for spraying purposes. Just think how far one hundred gallons of disinfectant will go in the average poultry house. Why it will last you a whole year. Besides Zenoleum is a mighty good remedy for other things besides lice and fleas, for instance, cholera, roup, scaly leg, etc. You could not think of a single investment around the chicken house that would make more money for you than a can of Zenoleum. Have you a copy of that little booklet called "Chicken Chat?" You can have one free for the asking, if you drop a line to the Zeuner Disinfectant Company, 128 Lafayette Ave., Detroit, Mich.

### UNITED STATES JUDGE WHO SPEAKS FROM POSITIVE KNOWLEDGE OF THE TREATMENT.

Judge Louis Sulzbacher, United States Judge for western district of Indian Territory, Okmulgee, I. T., says: "Drs. Thornton & Minor, Kansas City, Mo. My intimate relations with the head of your faculty and his gentle treatment of myself and other members of my family make it possible for me to give absolute assurances of fair and skillful treatment to all who seek your services." The above is certainly a splendid endorsement for Drs. Thornton & Minor, of Kansas City, Mo., specialists in piles and other rectal diseases. No comment is necessary. Anyone suffering with such troubles will be sent particulars free if they will address Drs. Thornton & Minor, 1010 Oak St., Kansas City, Mo., and mention this paper.

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

## How to Rid Sitting Hens of Lice.

To the Editor of The Homestead:

A chatty little Kansas woman one day found herself talking in a circle of friends, where a free exchange of poultry experiences was going on. All agreed that her success in an unfavorable season had been remarkable, and she was urged to give some of her methods for the benefit of others. The women present had been complaining much about the sitting hens literally dying on the nest from mites, and as Mrs. Brown had not suffered loss in this way, she told her way of proceeding as follows: "I don't want to claim superior wisdom, for I am no wiser than my neighbors. All that is needed is care and forethought; I reasoned the matter out for myself why the hens die in this way, and I set myself to finding a method of prevention. I never set a hen in a stationary nest box. Right here is one cause why so many hens throw up their jobs in disgust. I want a box that can

be turned upside down if necessary. I hang mine on screws. Select your place for the box, put in two large screws about a foot apart, make two holes about five inches from top of box, also a foot apart. I make these holes a trifle larger than the screw-heads, and then cut a slot in the top of the hole long and wide enough to drop down over the screws easily. Then I hang my box on the screws and it is as tight and secure as possible. Soap boxes are as good for this purpose as anything.

"Then I begin to whitewash. Mites cannot live in lime, and so I use it freely. I whitewash my poultry houses, and I also whitewash my nest boxes. Of course I put in clean litter, and am careful in everything. As soon as the hen hatches, I take the box down off the screws, carry it out doors, and make a bonfire of all its contents. Then I whitewash the box again, and it is ready for another sitting."

"My," interrupted one of her listeners, "I can't find time to fuss so much. It must be you don't have as much to do as most farmers' wives."

The wise little woman smiled. She had five small children, a large dairy, and several hands to cook for. But she answered serenely:

"I am too busy not to make every effort successful the first time. It would take more time to 'fuss' over hens dying with the mites, and losing whole hatches of eggs right in the hurrying season, than to prevent such troubles in the first place. One coat of white-wash saves me numberless steps and many hours of time, to say nothing of the increased profit in successful hatches. After the boxes are once fixed, it really takes little time to keep them going."

"Well," exclaimed another woman, "I've surely learned something today. I'm going home to revolutionize things on my place, especially among the fowls. My hens have been dying, and I thought it was a sort of fate that came some seasons, but if what my neighbor here has said is true, it's downright neglect and laziness on our part."

A sort of chorus of approval followed her little speech, and the fruits of this little experience meeting appeared in more than one poultry yard in later days.

Mrs. S. B. Titterington.

## Depluming Mites.

To the Editor of The Homestead:

Mrs. Ida M. Green writes:

Could you or some readers of this department kindly give me a remedy for what is called depluming mites or lice on chickens. They eat off the feathers around the neck and back, making them look all fuzzy and ragged. I have read somewhere that the ordinary louse remedies do not reach them, as they eat in the quill.

It has been commonly supposed that feather-eating was a vice arising from idleness or lack of exercise, indigestion, etc. This is a fallacious idea, although it still has its advocates. Not long ago the Great Britain Board of Agriculture issued a leaflet reviewing parasite insects which attack fowls, thus described this ailment and pest:

"Feather-pulling in poultry is due to a minute parasite mite at the roots of the feathers, instead of being, as is generally supposed, a vicious habit, or being caused by any other of the numerous absurd theories, usually put forward in accounting for it. These mites are at the base of the quill in the powdery matter. They live upon and irritate the base of the quills of the feathers until the fowls pluck out the feathers to destroy the irritation caused by these pests. There are two kinds of feather-eating, viz.: Self-feather-eating and the plucking of other birds' feathers."

To cure the trouble, says Alma Cole Pickering in Commercial Poultry, remove the fowls, then disinfect and thoroughly clean the poultry house. Burn all nesting and scratching material. If possible, replace with new all roosts, dropping boards and nest-boxes. If this cannot be done, carry those that have been in use to a safe distance from all buildings, pour kerosene over them, ignite the oil and the fire will usually run over the surface so rapidly that none of the wood will burn to injure. Take the precaution to have water handy to puff out the fire. Dust each fowl carefully and grease all bare spots with carbolated vaseline before allowing them to enter the freshly renovated building. It may be well to grease every third day until the stubs of the new feathers begin to appear. Mrs. S. B. Titterington.

## POINTERS.

—Messrs. Henry Schlatter & Son, of Law-

## PLYMOUTH ROCKS.

**SOME FINE** Cockerels at \$1.50 each up to \$2.50 each. Twenty years breeder Barred Rocks. Exhibition birds and heavy layers have won their share of the prizes wherever shown. Four grand yards mated, 3 for chicks. 1 for pullets. Eggs, \$2 to \$3 for 15. Mrs. Eva E. Girard, R. F. D. 2, Schleswig, Ia.

## Barred Plymouth Rock Eggs

FROM the leading strains and from extra large birds at \$1.00 per sitting or \$4.00 per 100. Address, J. E. Wehr, - Portsmouth, Ia.

**BARRED** Plymouth Rocks exclusively, Bradley and Russell strains; are large bone, well barred to the skin, extra heavy weight. Hens from cockerels that won 1st at State Fair, and cockerels scoring 91 to 91½ points. 15 for \$1.00; 30 for \$1.75; 45 for \$2.50; 100 eggs for \$4.50. Guarantee reasonable hatch. Address, Geo. Bonewell, Grinnell, Iowa.

## BARRED P. ROCK EGGS

FROM high-scoring stock of the best strains known to the breed and are excellent layers, \$1.50 per 15 eggs. Twenty years a breeder. J. L. SLICK, - LANARK, ILL.

**B. P. ROCK EGGS** From extra large boned stock, straight barring to the skin. Yards headed by cks. and cks. weighing 11 to 13 lbs.; scoring 91 to 93, are 1st prize winners, sired by state show prize winners; females 7 to 11 lbs. Reduced prices, \$1 per 15 eggs; \$1.50 per 30. Eggs guaranteed fertile. J. W. Wagner, Monroe, Ia.

## Barred Plymouth Rock Eggs For Sale

**BRADLEY BROS.**, the leading breeders of Barred Plymouth Rocks, from which my stock is from, sell their eggs \$5.00 and \$10.00 a setting. You can buy that strain at much less by writing, Geo. H. Lawshe, Route No. 3, Harlan, Iowa.

**BARRED P. ROCK** Eggs for hatching from stock scoring 90 to 92½, 75c per 15, \$1.25 per 30; per \$2.00. C. G. Good, Ogden, Ia.

**EGGS** FROM PURE BRED Barred Plymouth Rocks for hatching. Prices right. Address, Mrs. R. Van Der Wert, Route No. 2, Lacey, Iowa

**BUFF** P. Rocks exclusively. Eggs for hatching, guaranteed fertile, at \$1 per sitting or \$5 per 100. Address, O. N. Woody, R. 3, Newton, Iowa

**BARRED** Plymouth Rocks exclusively. Large, thrifty birds. Eggs, eighteen for 60c; 36 for \$1.00; 100 for \$2.65. J. M. Reeder, Earlville, Iowa

**BARRED ROCK** EGGS, 15 eggs, \$1.50, \$2.00, \$2.50. Blue Barred Ringlet strain with scores to 92. Henry Schlatter & Sons, Lawler, Iowa.

**BARRED** Plymouth Rock eggs of Bradley and Thompson strains, \$1.00 per 15 or \$4.00 per 100. Mrs. J. A. Campbell, Route 5, Manning, Ia.

## BRAHMAS.

**OTTUMWA** Poultry Yards—Light Brahma eggs for sale. Pen 1, eggs \$3.00 per 15; pen 2, eggs \$2.00 per 15. R. T. Cameron, Ottumwa, Iowa.

**LIGHT BRAHMAS** Eggs at 50cts. a sitting. \$1.75 for 50 and \$3.00 per hundred. Address: Mrs. J. M. Dries, Ashton, Ia.

## RHODE ISLAND REDS.

**RHODE ISLAND REDS.** CHICKS from standard S. C. Rhode Island Reds \$3 per doz. Mrs. F. W. McIntyre, Red Oak, Iowa.

## ORPINGTONS.

**GOLDEN** S. C. Buff Orpingtons exclusively; have had them eight years and have the best. \$1.00 for 13; \$1.25 for 26. A. LaFevre, Earlville, Iowa

## DOGS.

**DOGS FOR SALE** AND ALL kinds of pet and live stock. Send 10 cents for sixty-page descriptive illustrated catalog. MOUNT PENN KENNELS, Reading, - Pa.

**FOX TERRIERS.** Pups from registered parents, excellent workers on all kinds of vermin. Will guarantee pups to make good ratters. Males \$10, females \$7.50. C. H. Drake, Hazelton, Iowa.

ler, Iowa, send us prices on their stock of Barred Rock eggs which are to be found on this page. This strain is the Blue Barred Ringlet and the flock records birds that score 92. Write your wants to this advertiser and kindly mention The Homestead when so doing.

## RHODE ISLAND REDS.

On this page of this week's issue will be found the advertisement of Mrs. F. W. McIntyre, Red Oak, Iowa, who is offering Rhode Island Red chicks from standard strains at \$3 per dozen. She writes: "My red fowls are extra good layers, large and well colored, scored breeders, from 91 to 93½. I will have eggs and chicks for sale all summer." Any of our readers who want Rhode Island Red chicks or eggs should write Mrs. McIntyre, and kindly mention The Homestead.

## ALL IN ONE SECTION.

One square section of Kansas farm land is priced on page 15. As to location the tract is but a mile from railroad station and is in a good farming region. Nearly one-fourth is under plow, however, practically all is tillable. Improvements consist of a five room house, water supply and out buildings. Percheron or Shire stallion will be taken in trade as part price. Address for fuller particulars, A. J. Palmer, El Dorado, Kansas. Mention this paper when you write.

## MONTANA LANDS.

Land at ten cents an acre is advertised on page 15. We are not able to give particulars regarding this offer further than to state that it is situated along the line of the Great Northern Railway in Montana. This land is fine rolling prairie, covered with good grazing grasses, and no doubt this offer opens a good opportunity for investment in cheap western lands. For further particulars address Mr. Leo B. Coleman, Glasco, Mont., secretary Commercial Club. Kindly mention this paper when you write.

## LEGHORNS.

## S. C. White Leghorn Eggs

I WILL MAKE SPECIAL PRICES ON EGGS for hatching during the month of June. All eggs carefully selected. Write for prices. R. E. BROWN, - RICHLAND, IA.

## S. C. WHITE LEGHORN EGGS

\$1 Per Sitting, \$2.50 per 50, \$4 per 100 FROM CHOICE STOCK.

JOHN C. MILLER, ROUTE 2, HARLAN, IA.

**ROSE COMB** BROWN Leghorns exclusively. Eggs for hatching, single sitting of 15, \$1.25; two or more sittings, \$1.00 each; \$5.00 per 100. T. A. Daveuport, Belmond, Iowa.

## PRICES REDUCED.

**ROSE** Comb Brown Leghorn eggs, 25, \$1; 50, \$2; 100, \$3. Address, Ella Tharp, Mt. Sterling, Iowa.

**SINGLE** Comb Brown Leghorns, Kulp strain, pure bred, scoring to 93½, by Pedrick, farm range, prize winners. Eggs 60 cents per 15, \$3.00 per 100. Orlando Jacobs, Mediapolis, Iowa.

**S. C. B. LEGHORN EGGS** Thirty eggs for 60 cents or \$2.50 for one hundred. Mrs. H. C. Lambert, Authon, Iowa

**ROSE COMB** Brown Leghorn eggs, 15, \$1.00; 30, \$1.50; 50, \$2.00; 100, \$3.00. 1 pay express charges. D. W. Nickerson, Marble Rock, Ia.

**ROSE COMB WHITE LEGHORNS** Eggs, thirty for \$1.50; \$4.00 per hundred. M. T. McEvoy, Emmetsburg, Iowa

**ROSE COMB** White Leghorns. State Fair prize winners, eggs 75c per 13; \$2 per 40; \$4 per 100. Mrs. Grant Davidson, Manson, Iowa

**ROSE COMB** Brown Leghorns exclusively. Eggs for hatching. Balance of season \$4.00 per hundred. Write, F. Bowman, Eldora, Iowa.

**Rose Comb Brown Leghorn** eggs, 30 for \$1.00 on incubator lots. Mrs. Laura Dwyer, Clarksville, Ia.

## WYANDOTTES.

**WHITE** WYANDOTTE EGGS, \$1.25 per 15, \$2 per 30, \$5 per 100. Hens score 95 to 98½. Address, Mrs. L. M. Estes, R. 2, Audubon, Ia.

**WHITE** WYANDOTTE EGGS REDUCED TO 75c per fifteen, \$3.50 per 100, remainder of season. W. S. Gregory, Roselawn Farm, Keota, Ia.

**SILVER LACED WYANDOTTE EGGS** For \$1, 40 for \$2, 100 for \$4. Twenty years a breeder. O. M. Healy, Bedford, Iowa.

## LANGSHANS.

## Black Langshan Eggs.

I WILL sell choice Black Langshan eggs from pen No. 1, scoring from 92 to 95 points at \$1.50 per 15. Pen No. 2 at \$1.00 per 15; \$5.00 per hundred. Mrs. J. H. Allen, New Sharon, Iowa

**BLACK LANGSHAN** eggs, \$1.00 per 15, \$1.75 per 30, \$2.25 per 45. Fresh eggs from farm raised stock. J. M. Cameron, Oskaloosa, Ia.

## DUCKS.

**COLOR**ED Muscovy duck eggs, \$1.25 for eleven. Mrs. T. W. Glass, Route 4, Sac City, Iowa.

## OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

### Docking and Castration of Lambs.

To the Editor of The Homestead:

With beginners in sheep management, and oftentimes with those who have handled sheep more or less, there is always some apprehension as to docking and castration. It is a simple thing to perform either of these operations and yet certain things are demanded if success is to follow them.

First, do not allow the lambs to become too large. Lambs, if properly handled, grow rapidly and docking or emasculation is quite proportional in severity and in checking of growth to the age of the lamb after about two weeks. The lamb should therefore be about two weeks old and in a healthy and vigorous condition. If these conditions prevail, the ram lambs will undergo both operations at the same time with little harm.

There are many methods of docking that are quite successful, each of the better methods being advocated generally by experienced shepherds who have become accustomed to their own ways. One of the very best authorities we know of advocates the use of hot pincers. These are shaped like large shoeing pincers, only with wider jaws, a wider opening, and they are much heavier. The edges should be thin, not overly sharp, and thick back from the edge to hold the heat. Any blacksmith will be able to fashion such pincers. To use them, first prepare a board with a hole in it of sufficient size to admit the tail, this being to protect the buttocks from the heat. Heat the pincers to redness and pinch off the tail. The heat sears the part, and prevents much bleeding.

Another method, and one which we have always used with success, is simply the use of a sharp knife. Have an attendant hold the lamb, the best way being to hold it with the feet upward and outward, grasping a fore and hind leg with either hand and allowing the

lamb to rest its buttocks on the attendant's knees, with its back towards him. The operator then grasps the tail with the left hand, extends it, and with the right hand severs it at a single stroke of the knife. Always cut the tail from the under side, also make one stroke do the work. Bleeding will rarely be profuse, but should it be so a cord may be tied about the stump to check the flow. In all docking, no matter what the method used, an antiseptic should be applied afterward, as a preventive of infection. Any weak astringent will do, or lard and turpentine is quite good, and usually at hand. Late March and April lambs must be noticed daily after docking to see that flies do not attack the stump.

Castration of the young lamb is just as simple a matter as the docking. Have the lamb held in the same manner. With a sharp, clean knife cut off the end of the scrotum, removing about one-third of it. With the left hand force the testicles to emerge, and then they may be pulled out one at a time by grasping firmly between the thumb and forefinger of the other hand. Draw out the adhering cord with the testicles and then apply a little of the antiseptic ointment. Do the castrating first and then dock afterwards just before letting the lamb down. If any lamb swells about the scrotum, it should be examined and the wound opened to let the pus escape. In all these operations use clean tools, and you will have a minimum amount of trouble.

Story county.

Ellis Rail.

### Establishing a Flock of Sheep.

To the Editor of The Homestead:

"Breed straight and breed up" should be the motto of every live stock farmer. It is a rule especially good to follow in sheep raising. There is good reason to believe that the present high prices for wool and mutton will continue for some years, and many farmers are acting accordingly. They should decide on a certain breed and a certain type and stick to their ideal.

The flock on this farm was founded nearly twenty years ago and the value of consistent breeding is now apparent. The first ewes were "Westerns," ranging in type from almost pure merino to the long-wooled, white-faced kind. Year after year good Shropshire rams were used, and year after year the wrinkles disappeared, the white faces grew dark, and today nothing but a flock of pure-bred Shropshires can equal this one as a combination of wool and mutton.

I have observed several cases of disappointment in farmers who would be sheep raisers, but who sell their flocks in disgust after two or three years. The trouble has been usually too many sheep, since so few have had experience with them. This animal is one hard to know. His wants are not numerous, but unusual. His tastes are human-like; his ways are to be learned. So let no one think that with an equipment of yards, sheds, etc., sufficient for cattle, hogs and horses he can at once introduce sheep in such numbers as the farm will profitably keep.

Twenty-five ewes on a quarter section farm are quite enough as a beginning for one inexperienced with sheep. His sheep lore will grow with the flock, and

The above is a photograph of Mr. A. E. Martz, of Liberty, Neb., who made a winner of the great Duroc boar, Junior Jim.

## \$79.00 Solves Your Power Problem

Seventy-nine dollars will bring to you—free from jobber's, dealer's or agent's profit—a two horse-power

## ELI Two Cycle GASOLENE ENGINE

The ELI is not an experiment. Ask the man who owns one. His word is better than any talk from us. On top of this as a guarantee add our forty-four years of increasingly successful business and you must know that the ELI is all we claim for it.

991 ELI'S in Iowa alone to date are endorsing our guarantee by running day in and day out, week in and week out, without a stop for repairs. Isn't that a record to be proud of? Then bear in mind not one of these engines has had to be returned for the purpose of reboring the cylinder—no, not even to replace a worn piston or cross head. And the first ELI is still running just as it did the day it left our shops.

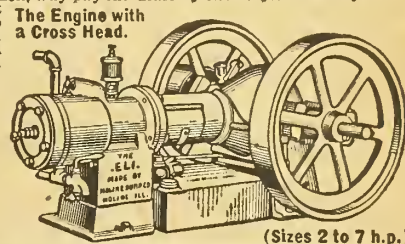

These are facts—facts proven by years of experience. They prove the ELI to be dependable under any and all conditions. If this was not true, the manufacturers of four-cycle, yes, and of other two-cycle engines would not fight us so hard. Only successful men or manufacturers who have a good thing are fought in the business world.

Yet another point. You believe your dealer being near and will repair or adjust your engine for you if anything should go wrong. The ELI gives no trouble. Nevertheless, should anything happen, experience proves that nine times out of ten the dealer knows little or nothing of what is needed and takes your troubles directly to the manufacturer. Then, why pay the dealer \$20.00 to \$75.00 merely for the privilege of trading with him? Why not go direct to the manufacturer in the first place? We believe this is the only successful policy for both of us, and therefore have adopted it. Why shouldn't you? Send for our free catalogue and investigate for yourself. You cannot afford to pay for your dealer's mistakes.

## BINDER TWINE FACTORY TO FARM at Lower Prices than Dealers Must Pay the Trust. Farmers wanted as Agents.

AUGUST POST, MOULTON, IOWA.

it may easily be that other stock are found less profitable.

As to the breed of sheep, it is generally admitted that the Shropshire offers the best combination of wool and mutton producers. It is a hardy breed and a flock of Shropshire sheep is especially handsome. But the foundation flock will be an expensive one if high-grade ewes are bought. Merino blood fixes the tendency to heavy wooling, the ewes make good mothers, and so it is an excellent plan to obtain the first crop of lambs from a bunch of ewes, probably of western raising, that have the wrinkles and the short legs. On such ewes one may use a strong, upstanding ram with good body, fleece receiving secondary attention, but after the first few generations the sire must be of that dual-purpose kind for which the breed of Shropshires is noted.

The most valuable advice to give is, "get experience." A hint that is especially good, however, as lambing time approaches is, be prepared to give special care to some of the new arrivals. It is surprising to observe how much heat a chilled lamb will absorb and be better for it. Some lambs will be orphaned by the death or desertion of the dam; some ewes too nervous or some lambs too "thick-headed" for the first suck, and if this is missed the second assuredly will be.

L. E. Kelsey.

Hardin county, Iowa.

Buy the Ram Now.

To the Editor of The Homestead:

There is one fact that can never be impressed too strongly upon any flock owner, and that is that the ram is half the flock. Moreover, he is the important half. It is through him that improvement in the flock is brought about, whether it be in form, wool, breed, type, or what not. In the older sheep breeding countries this is a well recognized fact by the raiser of market sheep, as well as by the breeder of fancy animals. The English flock master does not hesitate to use rams costing perhaps \$100 to produce lambs for market purposes, and it is only by the income from his flock that he is able to pay the high rent he must give for the land. And he has found that it is only by the use of the best rams obtainable that sheep farming will pay under such conditions.

But here in this section of the West, and not only here either, the farmer has been slow, very slow, to recognize this fact. "What," says he, "is the use of paying more for a ram, when my neighbor will sell me one for five or ten dollars?" The least amount of calculation will convince any business-like person that there is money in the better sire. An increase of one pound of wool, and quality and better form such that the lamb sells for fifty cents more per head means an increase in the value of the lamb of seventy-five cents. Multiply this by forty or fifty lambs and you

## VARICOCELE Cured Free

Positively and permanently in from 7 to 10 days. No money accepted until the cure is completed.

DRS. FELLOWS & FELLOWS CO.,  
323 Rollins Block, Des Moines, Iowa.

have the price of a good ram in one year, as directly returned in dollars and cents. But the ram is serviceable for from two to four years. Again the larger value of his offspring for breeding purposes, we mean the ewe lambs, and the better lambs that may be raised from them must also be considered in the result of using a good sire. Directly said, the use of the high-class sire is progression; the use of the inferior ram is retrogression. Much more there is that could be and should be said on this question, but we wish to get at the aim of this article, namely, buy the ram now.

Good rams are not the most plentiful things in the world, and the progressive shepherd knows it; hence he is looking early in the season for a ram such as should head his flock. Get in the game early, my friend, you who have just begun handling sheep, or you, friend, who have made a mediocre success with sheep for some time. Select your ram when the whole bunch is there, and don't be forced to take what the others have left. It is simply a case of getting ahead of the other fellow. We have tried to point out briefly the advantages some of them, of the superior ram, but it is up to you to make your selection early enough so that you have practically first choice. Do this and you will not be disappointed.

There are some other advantages in this early purchasing other than the mere getting of the best animal. While all precaution should be used to secure animals free from disease and parasites, yet there is always some danger. Early buying gives time for a month, two months or more of quarantine, time to see to your satisfaction that your purchase is entirely healthy. He has also time to accustom himself to his changed surroundings, feed, etc., and if from any unfortunate cause in transferring him from seller to buyer he becomes sick, crippled temporarily, or put out of condition in any way, there is ample time for complete recuperation before the breeding time. In fact, there are reasons ten to one why the early selection and purchase of the ram should be the rules the flockman should adopt and adhere to.

## WITH THE EDITOR.

Tuesday is Mrs. d'Alton McArthy's "At Home" day and a goodly number of friends are usually to be met in her spacious parlors between the hours of three and five. A few intimates sometimes remain later than that.

Last Tuesday little groups of women were chatting and drinking tea when, above the clatter of cups and the clink of spoons, the high-keyed clear, treble of Mrs. Thompson made itself heard saying:

"My private opinion, publicly expressed, is, that love stories are responsible for a great deal of unhappiness."

"No one can deny that they give young girls unreal views of life," replied a thoughtful-looking woman, as she put down her tea cup. "My daughter shall never read them, with my consent, at least until she is old enough to know that love—in the story book sense—is only a small part of living."

"Why, Mrs. Morton," interrupted a merry-looking girl, "don't you know, 'tis love, 'tis love, they say, that makes the world go round?"

"It's not nearly so pretty, but I believe it's a good deal nearer the truth to say, 'tis money makes the world go round," said Mrs. Thompson, she adding as an afterthought, "at least nowadays."

"Love is such an intangible, evanescent thing!"

"Especially evanescent," interjected the merry-looking girl sotto voce.

"And the things money can buy are so real and lasting, it is easy to see how it should seem the one thing needful in this eminently material age," said Miss Sinclair. "I'm a material person myself," said the merry-looking girl, "and I'll take the dollars every time, if you please"—not that I at all object to love thrown in—Oh, no. Luxuries are always acceptable."

Miss Sinclair is something of an heiress and a good deal sought after, though her personal charms are sufficient to account for that.

"One would think Nello was quite mercenary to hear her," said Mrs. Morton, whose guest she had been for several weeks. "She isn't, though."

"Oh! but I am. I'll shock you all awfully, but, as I'm going home in a day or two, I don't mind, so I'll tell you a secret. She lowered her voice and continued, "Whenever a thoroughly nice young man, with a good income, falls in love with your humble servant and says, in the words of the poet, 'Fall into my arms, you bundle of charms,' metaphorically speaking she will fall."

"Nello, dear, you really ought not to say such things even in fun. Some one might think you in earnest."

"And so I am," sweetly responded Miss Nello, a dimple playing about the corners of her pretty mouth, though her eyes were quite grave.

"The girl who meant to do such a thing would not publish her intentions quite so frankly, Mrs. Morton, so Miss Nello is not likely to be misjudged."

"Miss Sinclair is right, I think," said Mrs. Thompson. "But I don't know that there would be much wrong with a girl

The Clipper will do it. Ask your dealer for them. If they have not got them, below is the price: No. 1—12 in. Mower, \$5; No. 2—16 in. Mower, \$6; No. 3—18 in. Mower, \$7; No. 4—21 in. Mower, \$8. Send draft, money order or registered letter. Mention The Homestead when writing.

## This is Huttig

Yes, sir, — I can afford to stand back of my roofing because, it stands back of me, and makes my word good as gold. I want you to read every word of this advertisement. I wrote it myself, and you can take it from me that whatever Huttig tells you about roofing is so.

*H. W. Huttig*

## I Stand back of Huttig's Rubber Roofing

With a Written and Personally Signed, Legally Binding Guarantee

MY roofing,—known far and wide as HUTTIG'S RUBBER ROOFING—is a "money-back" roofing in FACT as well as in NAME. I give you a written guarantee that this roofing will do what I claim—not a mere VERBAL PROMISE, through your dealer, but an ironclad, legally binding guarantee, signed by the HUTTIG MFG. CO., capitalized at \$1,000,000, and responsible for every promise it makes.

No other roofing gives you a personally signed guarantee as strong as this. No other roofing can AFFORD to do so. Why can I do it?

Simply because my roofing is the only roofing on the market, made from pure, natural, imported Asphalt. That's why! That's the secret of my success with roofing.

Asphalt comes from the famous Asphalt Lake in the Island of Trinidad. About 100,000 tons are brought to this country every year, and a large part of this is used in the exclusive manufacture of HUTTIG'S RUBBER ROOFING.

My roofing is made of long-fibered wool felt, densely compressed and heavily saturated with this specially prepared Natural Trinidad Asphalt, which protects every particle of the fiber.

Now, mark this carefully: The saturation of Felt with Asphalt in HUTTIG'S RUBBER ROOFING is 150 per cent as against 104 per cent, the highest saturation of ANY of the roofings with the crazy names.

That's the principal reason why my roofing will not "stick" in the hottest, nor crack in the coldest weather.

Other rubber roofings, which have to de-

pend on Texas and California Asphalts (products of petroleum oil), crack in the winter and "run" in summer.

Test it for yourself. Send for sample of HUTTIG'S RUBBER ROOFING and the others: then do this—Get a small quantity of sulphuric acid from your druggist. Put in the sample of HUTTIG'S and the other roofings. Let 'em soak for 24 hours, and note results.

Remember, that the very gases that constitute sulphuric acid are found in the atmosphere, and it is their chemical action that causes roofings to decay.

HUTTIG'S RUBBER ROOFING requires no skilled labor to lay it. Every roll contains enough liquid cement, nails, caps, etc., to lay it.

It can be laid on a flat or sloping roof, across or with the slant of the roof; or on the sides of a building it makes an excellent storm protection.

It will not run, rust, rot, crack, leak, blow off, require frequent repairs, and is not a fire trap.

Now, here's how I feel about it. If you have use for roofing this season, you want the best, which is the cheapest in the long run.

You don't want to fool with a doubtful article, when you can get HUTTIG'S with a guarantee that means absolute protection, both to your roof and your pocketbook.

Just put the burden on HUTTIG. My shoulders are broad, I will take care of all your roofing troubles, if you will trust me.

Ask your dealer for HUTTIG'S RUBBER ROOFING. If you can't get it of him, ask ME, and I'll see that you do get it

Anyway, write for a big, free sample of my roofing and let me send you Booklet B, and special Iron-clad Roofing Guarantee. Write me personally, and do it to-day.

President Huttig Manufacturing Co., 707 East Second St., Muscatine, Ia.

who did as Miss Nello says. You noticed, perhaps, that she made three provisos. The man in the case must not only be well off and in love with her, but he must be thoroughly nice. She proposes having something worth while in the man himself, in case the money and the love take unto themselves wings, as both have an uncomfortable fashion of doing, the latter especially."

"There it is again! That dreadful skepticism about love," cried Miss Nello tragically. "It's enough to kill all the sentiment in a girl to hear married women talk."

"I've thought that sometimes," Miss Sinclair said quite gravely, "and wondered about it."

"Perhaps it's because real love and the imitation of it unfortunately have a fatal resemblance to each other."

Mrs. Thompson made the remark a little bitterly, Miss Sinclair thought.

"Yes, one must admit that," she said.

"People go right on fearlessly taking the risk, though. They can't be mistaken; their love is the real thing. And so often after awhile, anyone may see it was only imitation, not the real thing at all. To me it is quite pathetic and whenever I see lovers together I find myself wondering, 'Is the vision which you see real or only a beautiful mirage?'"

"Did you ever hear of the man who wanted to know how he could tell the difference between toadstools and mushrooms?" asked Miss Nello, innocently. No one replied and she continued:

"They told him there was only one infallible test. If he ate them and died they were toadstools. If he ate them and lived they were mushrooms. Under the circumstances he decided that perhaps he had better not go gathering mushrooms. Don't you think he was a wise man?"

Without waiting for an answer to this apparently irrelevant question, Miss Nello moved toward a group of women, who were animatedly discussing the "pros and cons" of women's clubs.

(To be concluded in our next issue.)

## HOME AND HOMEMAKING.

## LITTLE HELPS BY THE WAY.

A word, and all a heart  
With joy unspeakable is filled.  
A word, and there's no art  
Can hild the throbs of pain be stilled.  
—Frances Courtenay Baylor.

A little bit of hope  
Makes a rainy day look gay.

And a little bit of charity  
Makes glad a weary way.  
—League Calendar.

To bear is to conquer our fate—Thomas Campbell.  
Nothing happens to anybody which he is not fitted by nature to bear.—Marcus Aurelius.

## BYLO-LAND.

'Tis time we went to Bylo-land,  
The needed guide is mother's hand.  
The car we take is a cradle white,  
The song we sing is a soft "goodnight."

Heigh-O  
Swing slow,  
We've started now to Bylo-land.

Bylo-land is behind a hill;  
There it lieth quiet and still,  
And white-robed angels guard all night  
Over my babe till morning light.

Heigh-O  
Swing slow,  
A quiet place is Bylo-land.

Birds and blossoms are gone to rest,  
Baby sleeps in her wee white nest.  
Father of all, hy thy strong arm,  
Keep my little one safe from harm.

By-lo  
Swing slow,  
Baby is safe in Bylo-land.  
—Nelle Kelsey.

## POINTERS ON HOUSEKEEPING—THE DINING ROOM.

If a woman finds pleasure in her housework signs of skill are sure to be found in her dining room. A woman who enjoys housekeeping is careful of the little things about her table.

Her table linen may be of the cheapest, but it will be clean and smoothly ironed. The creases will run straight with the table and the cloth will hang evenly from the table ends.

The knives and forks will be laid evenly, not helterskelter. The spoons, if laid, will be in order and if in a holder the handles will be all up or all down—and where originated the habit of stuffing the spoons into a spoon holder with their handles down? It means that the spoons can not be taken out without the howls being handled.

The plates, if piled up, are set with care. If laid, each is placed like every other. The napkins are neatly ironed and uniformly placed.

The chairs are set evenly.  
The silver is clean.  
The salt is light in the shakers.  
The pepper box is filled.  
The butter is on a clean plate.  
The sugar is never caked in the bowl.  
The vinegar pours freely.  
The soup is served hot and perhaps with a bit of green parsley sprinkled over it.  
The potatoes are mashed and heated until they are fluffy and white.

The biscuits are well cut, and light, without a coating of flour.  
There is something green in the dining room, even if it is only a struggling sprout of Jacob's ladder in a glass bottle hung in the window.

When the meal is over there are no crumbs on the table. The linen is smooth, the foods are removed and the silver and china remaining are covered with a clean dust protector, or the table is cleared and has a dolly in its center, and china remaining are

covered with a clean dust protector, or the table is cleared and has a dolly in its center.

These little things determine the housekeeper's reputation.

## HOUSE FLIES.

The buzzing swarms of house flies that frequent our kitchens and dining rooms in the summer, are bad agents of infection. They should be considered a serious menace to health. Typhoid fever, especially, may be spread through the agency of contaminated flies alighting upon food supplies. Here comes in my ounce of prevention again. Prevent the hatching of flies as much as possible. Their favorite place is the manure heaps of the stable. A single insect will lay as many as 130 eggs, and the number that will be hatched from one pair is simply inestimable. It is a good plan all through the summer, from the beginning of June, to apply a quantity of chloride of lime to all manure heaps. I suppose that, of course, the spring cleaning has been thorough in barns and out-buildings, and plenty of whitewash administered. The barnyard and stableyard refuse cleaned up; then with the chloride of lime in use every week, everything outdoors should be kept sweet and clean, and to keep out the flies that will, with all our preventives, find a chance to breed and lurk around, have all your doors and windows well screened. If your good man is too busy to make the window screens, just tack on two thicknesses of white mosquito netting. It will serve the purpose just as well and look fresh and clean for a whole summer, then it will have served its little day. Being cheap you can afford to get new every summer and use the old pieces after they are washed as covers to victuals and in various other useful ways.—Mrs. T. C. Cummings.

## SEASONABLE RECIPES.

Canned Strawberries.—Fill a quart jar with large, ripe berries, from which the hulls have been taken; fill the jar with cold water; then pour it out again into a measure. For every twelve jars to be put up use thirteen of these measures of water and in it dissolve six pounds of sugar. Pack the jar with berries as closely as possible without mashing them. Fill each jar up to the shoulder with sirup, cover it loosely with the lid and set it in a large holler, which should have a loosely fitting wooden bottom pierced with holes. If set on the metal bottom the jars are liable to crack. When the boiler is full of jars pour in cold water up to their shoulders; cover it and set it on the fire. At the same time put the surplus sirup in a saucepan and allow it to become hot. As soon as the water in the boiler begins to boil note the time, and when it has hollered for eight minutes remove the boiler from the fire. Take out one jar at a time, fill it even with the hot sirup in the saucepan, fasten it airtight and stand it back in the boiler until all are filled and covered; let them stand there until cold, and then store in a cool place.

Strawberry and Currant Jam.—To every pound of fruit allow three-quarters of a pound of sugar, also one pint of red currant juice to every four pounds of the berries. Boil the currant juice with the strawberries for half an hour, stirring all the time, then add the sugar and boil twenty minutes longer, skimming carefully. Put in small jars or tumblers with paraffin on top. The currant juice may be omitted.

Canned Cherries.—This fruit is one which

a young housekeeper can safely select when just beginning to learn how to can fruit. While peaches, plums and berries with the best of care will often spoil, the cherry always behaves itself, a great relief to a busy woman. After pitting the cherries weigh them, allowing one-fourth pound of granulated sugar to every pound of fruit. First heat the cherries until juicy, then add the sugar which has been heated in the oven. Cook gently until the sugar is dissolved. Then boil for five minutes, and can.

#### FOR THE CHILDREN—THE SOFT-HEARTED FAMILY.

They've moved beside us up the lane,  
So all they do we see,  
And I just wonder how they came  
So very soft to be.  
They can't be putting it all on  
To show off, for you know,  
We live so near we'd found 'em out  
Fore this, if that was so.

You'd ought to see 'em pet their horse;  
And their old dog and cat,—  
They treat 'em jest like they was folks,  
And visitors at that!  
Of course they pet each other, too,—  
They even like us boys,  
And never tell us to keep out,  
And stop our "orful noise."

I'll tell you something else that's queer  
If you won't tell it (fer  
I'd rather hite my tongue than make  
The leastest fun of her!);  
Their little girl—her name is Kate—  
When she cleans up a room,  
She gently brings the spiders out  
And shakes them off her broom!

And afternoons, when they would like  
To sit on porch and talk,  
Or maybe up and down the path  
To take a little walk,  
They go way round to their side steps  
(It's too soft, I declare!),  
Just bullied by the humming bird  
That's huilt his wee nest there!

—Mary H. Field.

#### AMONG OURSELVES.

Laid away among my papers are some charming lines on May inspired by a bit of verse given in Home and Home-making corner. They come too late for use this year, but we are not to wait until next May to hear the voice of this new singer Among Ourselves. M. A. W., brings us something for June:

JUNE.

With a tear for May that has passed away,  
We turn with a smile to thee.  
Whose coming to us is a royal boon  
Oh, queenly month of June.

Thy crown is the rose, the queen of flowers,  
Thy sceptre the long bright hours,  
Thy throne our hearts, where thou reign'st  
supreme,  
Oh, royal month of June.

Thy days are so long and thy skies so fair,  
Thy treasures so rich and rare.  
No other month can with thee compare  
Oh! lovely month of June.

April is bright with her pearly showers,  
And May with her sweet wild flowers,  
But perfection is reached in the sweet perfume  
Of the glorious month of June.

Only one who was in tune with the harmonies of nature's various moods could have written that verse. I trust its music will waken echoes in all our hearts and lead us to open eyes and ears. That of prohibition is the first in order; it will be presented by Uncle Josh:

As the men have been requested to state their views on the subject of prohibition, I trust "Uncle Josh" will be allowed to say a few words. In discussing the subject of prohibition we at once enter an endless controversy. I recall to memory the time when Iowa voted for prohibition some twenty years ago. In my heart I rejoiced that the liquor traffic would be controlled, but found that the border towns were run wide open, but innocently believed that in the interior

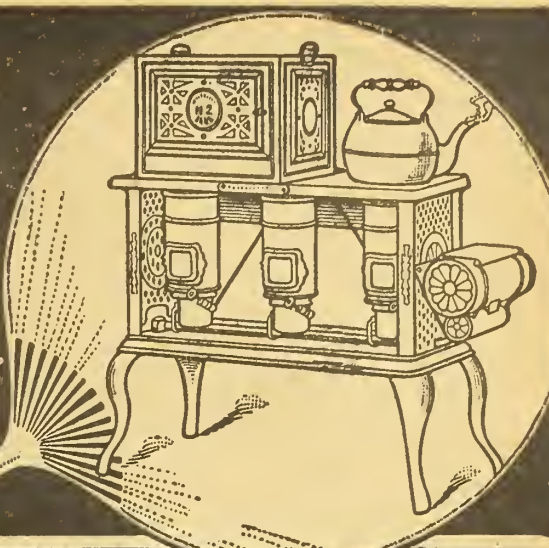

the law was strictly enforced; a visit to the beautiful town of Maquoketa soon dispelled the illusion, as sweet cider (beer) and hard cider (whisky) could be obtained upon presentation of proper credentials with the goddess of liberty on one side. But surely somewhere, the sale of intoxicants were prohibited and the law enforced. In 1886 I tried Ontario, here in one of the loveliest towns in the garden spot of Canada, I found the prohibition law practically a failure. I believe the manufacture and sale of intoxicants should be prohibited by national legislation, and the youth of our land taught in the public schools the evils of intoxicants and tobacco. Mothers! Your influence has much to do in molding your child's future; teach your darling ones to neither touch, taste, nor handle, and to shun them as a viper. Agitate women's rights and use your influence and vote for the uplifting of mankind. Only a few months ago on a bitter cold evening while on my homeward way from daily toil, I overtook a woman in an advanced stage of intoxication, unable to proceed to her home in the suburb. No other help being at hand I assisted her to her home a half-mile distant. Is it a greater sin for women to drink? Should a man do things which he would be ashamed to have his wife share in? I believe it is written that "No drunkard shall enter the Kingdom of Heaven." If a person steal a small sum of money, that person is a thief, so also that one who steals a greater sum. A person who drinks to excess and becomes intoxicated is a drunkard. Liquor! Cursed product of the stills of Satan, a har to heaven, a door to hell, and the hall room, the ante-room of the last mentioned resort. Ever hear in mind that the first glass and the first dance precede the second. Shun them as you would a contagious evil, for sooner or later you may fall, a victim to their destroying blight.

There is a considerable number of persons who believe, with Uncle Josh, that the manufacture and sale of intoxicants should be prevented by national legislation, but I have never met anyone who believed that such legislation is likely to come about. With America's large foreign population, coming from lands where beer and wine are drunk as freely as tea or coffee are here, the securing of such legislation would be extremely difficult; the enforcing of it would be even more so. I fear we must seek some other method of counteracting the drink evil.

Mrs. S. Congrove, of Dixieland, Texas, is with us this week. She is one of the many who love "Among the Hills" and enjoyed the recent reviewing of it in our Home:

Several times I have started to say a few words Among Ourselves this spring, but have failed to finish my letter, but now I want to tell how much I have enjoyed the fine talk Mrs. Christie has given us concerning "Among the Hills." I had been waiting to see if she responded to the editor's call and lo, when I turned to the Home Department last week, as I always do the first thing, and began to read, my waiting was ended. Of all Whittier's poems which I have ever read, "Among the Hills," has always seemed to me the sweetest and best, the one I could read and reread and never grow tired of reading. Let me say to all Home Department friends that if they heed Mrs. Walker's advice and read it they will never be sorry and they will find therein a good definition or description of true love, for "Love scarce is love that does not know the beauty of forgiving." The poem can be purchased in booklet form for a few cents and every lover of good poetry should have a copy in some form or other. Quite a while back, someone, I have forgotten the name given, asked for advice concerning trying to make a home for herself and daughter with a capital of three hundred dollars and spoke of the garden city project. Now, I would say if she is tired of living among strangers and has reasonably good health, there are plenty of ways and means to one who wills to have a home of their own, but if she is thinking of buying in some irrigated section of which she knows little only from advertisements then she ought to thorough-

# Keep Cool; Save Money

## NEW PERFECTION Wick Blue Flame Oil Cook-Stove

—the ideal stove for summer. Does everything that any other kind of stove will do. Any degree of heat instantly. Made in three sizes and fully warranted. At your dealer's, or write our nearest agency for descriptive circular.

The **Rayo Lamp** is the best lamp for all-round household use. Made of brass throughout and beautifully nicked. Perfectly constructed; absolutely safe; unexcelled in light-giving power; an ornament to any room. Every lamp warranted. If not at your dealer's, write to our nearest agency.

**STANDARD OIL COMPANY**  
(Incorporated)

ly investigate conditions before buying, as there are many drawbacks nearly everywhere. And, too, it requires more capital to go among strangers to build a home than among friends who usually are or ought to be willing to lend a hand. Cut off from association, with old and dear friends only as I write and receive letters, our Home Department is so much help to me and all the writers seem like friends and neighbors.

The wisdom of making most careful inquiries before investing one's all cannot be too strongly insisted upon. Overcaution is bad sometimes, but lack of caution is bad always. And women who have not had business experiences are the natural prey of promoters, who are everywhere floating schemes which promise big returns from small investments.

"A Grown-up Girl" comes to give us her views and experiences on the matter of confidence between mothers and daughters:

I am a constant reader of your letters so will try and say a word about daughters giving their mothers their confidence. There are two sides to this story as well as to most others. Don't always blame the girl if she keeps things from her mother, for sometimes it's the mother's fault. I remember a girl friend I used to have who, when I was at her home, no matter what we did, always said: "Don't tell mamma, she will scold." My mother was always my confidant. To her I went with all my secrets. She was always jolly and kind, and she never "made fun" of my little troubles as so many mothers do. If I went to a party or was with young people, I always came home and talked to her about it as though she were my dearest girl friend, instead of a woman of fifty. So, mothers, if you want your girls to confide in you, you must be a girl yourself. Before you scold put yourself in her place at her age and see what a difference it makes and instead of lectures, give friendly advice. Don't imagine she can see and reason like you do, for she can't; let her know you trust her; be interested in what she is and she will be a queer girl indeed, if she ever keeps things from you. How well I remember my first love affair. Of course I went to mother and told her all about it. (I was a school-girl of fifteen, while my boy ideal was eighteen.) She simply said, "Very well, dear, but don't neglect your lessons and in five years if you both think the same it will be all right with mamma." In two months he was sent to college. Letters went back and forth every few weeks, all of which mother read if she wanted to. But long before those two years were over I had forgotten to write and so had he. How much better than the usual way of keeping things secret. It is natural for young people to want to do something they can't and I have found the quickest way to break them is to let them have their way. My youngest brother had a longing to "go West." Instead of telling him he could not go, and having him run away, my father paid his way to a certain point in Montana, where he secured work on a ranch, then told him he must not look to him for more money. He only worked long enough to get money to come home, a sadder and wiser boy. But I am getting away from my subject. If you want to know whom your girl associates with let

her bring her company to your home. In no other way can you find out so well and when they come, be one of them and see how much better your girl will be and how much harder she will try to please you.

A talk like this should have far-reaching effects. It will and the consciousness that she has helped in promoting relations in the home circle will amply repay a "Grown-up Girl" for coming to us.

Sunday visiting is on the tapis; it will be discussed by "Jimson."

Sunday visiting is something that is nowadays practised to a very great extent and why should it not be? All week we work and worry in order to earn our daily bread and then on Sunday, which is to be a day of rest, I see no reason why we should not take our rest in changing our weekly work for a pleasant Sunday visit. Understand, I do not say this without a condition. If the visits consist of rough, rowdy and noisy conduct, which is more liable to occur among the young folks, it is radically wrong. But if the visit consists of nice, clean, conversation or harmless amusements I don't see what should be against it. I don't think that conditions being normal that any visit or visitor should keep one away from church. If the visit is of great importance the church going may be harmlessly dropped. If your visitor is in the least able you should take him to church with you instead of missing church yourself.

We should have numerous contributions to this debate in order to cover the ground thoroughly. Please don't let the busy season interfere with the interest of our meetings.

Miss Hazy has a word on the subject introduced by Illinois Bachelor No. 2:

Our bachelors from Illinois have the ability to start discussions. No. 1 was somewhat conceited when he first wrote, but that condition was speedily removed. No. 2 is a trifle pessimistic, due to eating his own cooking so long, but he has given us a good subject for discussion. I can not say that it is wrong for a spendthrift to propose marriage to a woman if he gets a chance, but I do say that it is wrong for anyone to say yes to him. One of my decided opinions is that everyone who has an income, no difference how small, should save something for the proverbial rainy day. Another one is that girls who stay at home and work should be paid wages. Boys never stay at home and work for years for nothing. Why should girls? As for the question of love in a cottage or a mansion, without it, I can only remind you that "women are curious critters." What pleases one does not suit another. Let each one decide what she wants and have it stipulated in the (ante-nuptial) contract and then live up to the contract. After this subject is well thrashed over I would be pleased to have your opinions on which affects us most, heredity or environment.

Heredity and environment as character factors have been the subject of debate upon the platform for a long time, but we have had nothing about them in

## Comparisons are Odious

points of our shoes stand out like the features of the human face.

### Kirkendall's Electric Welt Shoes

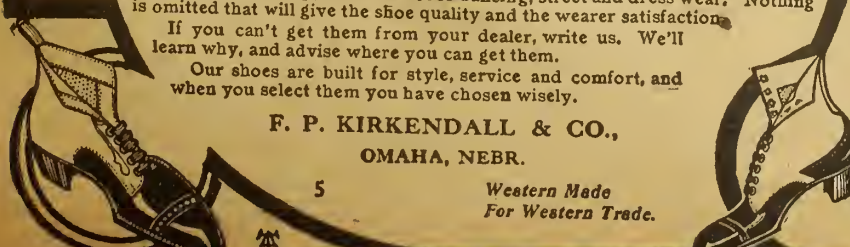

are distinctly a new departure in the art of shoe-making. They are decidedly the most comfortable shoes made, bending with the foot and conforming to every joint. They are as flexible as any hand-turned shoe, and decidedly more serviceable. Our Electric Welt Shoes are by no means an experiment. We have manufactured them long enough to fully test their merits, and they are guaranteed to give satisfaction. So flexible are they that they may be bent double when new, and may be worn with perfect comfort the first time. They will prevent the tired, aching feet caused by other shoes. Where the old idea in making shoes was to make them firm and stiff, our Electric Welt Shoes are found both an improvement and a departure from such ancient methods. The sole is of walking thickness, and where feet have been tortured with stiff, hard, unyielding soles these soles will restore normal conditions. Upper leathers are of highest quality; patterns and lasts unexcelled. These shoes being made of the finest obtainable material, and by the most expert and careful workmanship, are suitable for dancing, street and dress wear. Nothing is omitted that will give the shoe quality and the wearer satisfaction.

If you can't get them from your dealer, write us. We'll learn why, and advise where you can get them.

Our shoes are built for style, service and comfort, and when you select them you have chosen wisely.

our meetings and might profitably take them up if the friends will try to take one point and treat it briefly and brightly—these two B's are the secret of good circle discussion.

And now a few moments for the special benefit of the housewife. Mrs. A. E. Fletcher brings us a recipe for rhubarb wine, given her by a doctor who recommended it to his patients, and Mrs. Wickham brings us a raspberry hint which those who are able to secure raspberries will do well to avail themselves of:

Peel and slice as for pies, put a small quantity of water on it and boil gently; strain; add an equal quantity of water. To each gallon of juice add five (5) pounds of sugar. Let it ferment four or five weeks, then strain off in keg or bottles.

Many people think red raspberries are suitable only for jam and are not good canned. This is so if water is used. My way is to take the juice of cherries or red currants, add the required amount of sugar and when it boils put in the raspberries, let cook a few moments and can as usual. If, when seeding cherries, care is taken to save all the juice, there is usually some left after the cherries are canned which is just right for raspberries. If cherries are to be cooked, especially for the juice, they should be very ripe. They are then sweeter and more juicy. The cherries freed from the juice may be eaten with cream. If juice cannot be procured the raspberries may be canned alone by pressing a few to extract some juice, add the sugar and boil before putting in the raspberries. This is good, but not as nice as when cherry or red currant juice is used.

Dressmaking and Millinery. No. 573.

Sylvia Silvertborne, Muscatine, Iowa.  
(All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silvertborne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.)  
A form of trimming that is having an extended vogue, and that is very especially adapted to the sheer materials that enter into many garments, whether waists or entire costumes, is simply a revival of what is easily recognized when called by its form-

er name of "darned net," but in "print" is termed fllet lace. Many of you will recall some of the simple patterns that were used in preparing this trimming at home, for it is such simple needle-work that one readily picks up ideas in fashioning it. The material used for the foundation is net or as we formerly called it "wasb blonde," and

[5616 Over Blouse or Jumper 32 to 42 bust.]

one may purchase this by the yard at small expense, in either the square or the round mesh, then darn in the threads in any desired pattern. Insertions, edge laces and

[5651 Girl's Jumper Dress with Guimpe, 4 to 10 years.]

yokings are home-made with the most pleasing results. I cannot here enter into the details of its manufacture, but if you will see some that is in stock you will get the idea, and it will pay you to purchase a small piece for a pattern, and work out the design on your own material.

The over blouse or jumper still comes to us in varied forms, and each new one has some feature to recommend it. 5616 is one of the newest, and it may be developed in one of several modes. One need only consider the purpose of the garment to enable her to decide which mode she will adopt. The pattern provides for a separate lining, and this enables one to make the waist entire as a whole garment, or to make it in such a way that the yoke may be worn at will. Also the lining may be cut off below the yoke and the latter so arranged that the waist is unlined even when the yoke is worn. The advantage of making the jumper portion of the waist separate is that then it may be worn with any suitable guimpe or a lingerie waist. The jumper consists of the front and the backs, and the closing is made at the center back. At the top the full portions are tucked in groups, and banded in scalloped outline. Straps over the shoulders show the skeleton effect, and while these are shown of velvet ribbon, they may be of any banding used in trimming the waist. The sleeves are in three-quarter length, and the finish is similar to that of the top of the waist, so that when one varies the finish in one the change in the other should correspond. A drawstring adjusts the jumper at the waistline. 5616 is cut in sizes for a 32, 34, 36, 38, 40 and 42 inch bust measure. Give size when ordering pattern, and avoid delay.

The little ones too, have their "jumper" modes, and a very simple design that may be very much elaborated is shown in 5651. As illustrated the lines are straight and the development simple, striped material being used for the garment and all the edges finished

with bias bands of the same piped with a color that matches the stripe in the fabric. The guimpe is separately made and has yoke and sleeve bands of simplest embroidery, but when for dressy wear the transparent fabrics with dainty laces may combine to form a charming dress. Frills of the material or of lace or embroidery may finish the outline of the yoke, and the edges of the sleeve caps. Insertions may be let in the pleats at front and back or only at front. A dash of some dainty ribbon so much in vogue for the purpose will add a pleasing touch when the garment is for dressy wear. Pattern 5651 is cut in sizes for girls of 4, 6, 8 and 10 years of age.  
Send eleven cents in money (not stamps,) for any pattern wanted, these or others. Address all orders to Sylvia Silvertborne, Muscatine, Iowa.

**LODGED GRAIN CAN BE SAVED.**  
Below we present a picture of the J. T. Brett Grain Saver attached to one of the binder reels commonly used in harvest fields. Close inspection of the picture will reveal a regulating rod attached to the reel lever. This regulating rod connects with the rakes on the sweeps by means of arms from the shaft. Thus it is possible to operate the rakes without loss of time. The idea of the Grain Saver is that when a section of lodged grain is reached the rakes are thrown into position on the sweeps and they pick up every stalk of grain which would otherwise be passed over. As soon as the section of lodged grain is passed the rakes may be thrown back into their original position. By the use of this Grain Saver it is possible to

cut around a field regardless of the direction in which the grain is lodged. It is a common practice to secure lodged grain by cutting one way of the field. This doubles the amount of labor required and is very inconvenient. This device is made so that it may be evenly adjusted to any reel. It is practically unbreakable and adds but little to the draft of the machine. It looks like a good thing and as it has been tried out on a good many farms and has proved to be as good as it looks, it should certainly be worth the time of every grain raiser to investigate its merits. Those who have tried it highly recommend it as an economical, common-sense and up-to-date device for picking up grain that has been lodged by storm or otherwise. Those of our readers who are interested in this Grain Saver should write for descriptive pamphlet to the J. T. Brett Manufacturing Company, 141 Second St., Milwaukee, Wis.

**THE ONLY HOG WATERER.**  
Every reader of The Homestead who raises hogs should have one of those Only Hog Waterers advertised on page 4 of this week's issue. It saves time and money and is one of the best hog waterers on the market. Write The Only Manufacturing Company, Hawarden, Iowa, for free illustrated circular and their special offer which will be sent to every reader of The Homestead providing they mention this paper.

**MEDICINE CHEST IN EVERY BOTTLE.**  
Oleo Equiline, an indispensable remedy in every barn and stable, is said to be as good in cases of emergency as a whole medicine chest of remedies. This prescription is made

from an old and tested formula a century old. It is guaranteed under the pure food and drug law. Stockmen have need of a good remedy at all times, and if they will send their name to the Oleo Remedy Company, 132 East Twenty-third St., New York City, the nature of the remedy will be fully explained. See page 8 for the advertisement.

**STOCK DIP OFFICIALLY RECOGNIZED.**  
In a recent communication from the manager of the Standard Stock Food Company, of Omaha, Neb., we are advised of the recognition of the Standard Stock Dip by the bureau of animal industry. This dip is now to be used officially by the government under the provision of Regulation 33, Order 143. A part of the letter follows: "This ruling of the bureau of animal industry is based on a result of a laboratory examination, made at Washington, of Standard Stock Dip, and includes permission for the use of Standard Stock Dip in official dipping for sheep scab. Standard Stock Dip has been used very largely the past year throughout the West, giving most satisfactory results on hogs, sheep, cattle, horses and all domestic animals. It is prepared full strength and is exceedingly uniform in its composition. It is also put up full measure; every claimed gallon is a full gallon. The manufacturers claim it to be the most economical dip on the market and have recently issued an offer of \$1,000 reward to any person who shall first prove that every statement they make concerning their dip is not absolutely correct. We know our readers will be interested in the Standard Stock Dip booklet which will be sent free if you mention this paper and address the Standard Stock Food Company, Omaha, Neb.

**OPPORTUNITY TO MAKE MONEY.**  
No business, trade or profession in the world today offers better opportunities to the man without capital than the real estate business. It is a business that has assisted thousands to become independent for life. The Kansas City School of Real Estate teaches this business successfully by mail. Mr. Jas. T. Larkin, the president of this institution, is one of Kansas City's leading real estate men. Read the advertisement on page 16 and write Mr. Jas. T. Larkin, president, Kansas City School of Real Estate, Kansas City, Mo.

**THE VETERINARY PROFESSION.**  
The veterinary profession offers a good opportunity to young men for a paying profession. The best of preparation may now be secured, and at moderate cost, in schools now devoted to the teaching of this science. The day of the "boss doctor" is no more. Bright, clean young veterinarians are now making the profession one to be respected. A good veterinary college advertises its course on page 8. Every young man should secure their catalog, which fully explains the course and requirements. Address, Veterinary College, Department E, Grand Rapids, Mich.

**CONGO ROOFING**  
Congo costs little and lasts long, it keeps out the dampness and never leaks. The man who notices how his different roofs wear and how they protect the roof boards--the man who remembers or keeps records of costs and service, buys Congo. Congo is easy to lay. Nails and cement free. Every roll perfect.  
Sample free on request.

538 West End Trust Bldg., Philadelphia, Chicago and San Francisco.

**Howe Scales**  
The Standard for 60 Years  
DO you know actual points of difference between good scales and poor scales? Do you know why some scales bind and why the old reliable Howe Scales never do? Do you know why Howe Scales are accurate ten-twenty-thirty years after they are set up, and why other scales cannot be depended on after a few months' use? Write for illustrated catalogue today. It tells you why you save money in buying the Howe. If you wish a **PITLESS SCALE** of the better grade we can furnish it.  
**The Howe Scale Company of Illinois,**  
1321 Wabash Avenue, Chicago.

**A Beautiful New Rich-in-Tone PIANO**  
from the world's largest music house. Is this what you really would like to own? Splendid **MUSICAL QUALITY** as well as the best value for the money beyond the shadow of a doubt. Write for copy of "A Piano Book" (Free) which describes twenty leading makes of pianos, illustrates all the latest one designs and quotes the lowest net New York and Chicago prices. Easy monthly payments accepted. Write for the book.  
**20-37 LYON & HEALY, Adams St., CHICAGO**  
We ship pianos everywhere on approval.

**SILKS & SATINS!**  
REMNANTS for fancy works, beautiful pieces, corners and squares, new bright colors. Large Package 50 choice pieces with embroidery silk and 5 yards pretty Silk Rib. Paid only 10 cents, 3 lots for 25c; 12 lots for \$1.00. Address Seville Lace Co., Orange, New Jersey.

# LANDS AND HOMES FOR SALE

**GOOD**
**TEXAS LAND READY TO PLOW \$8 to \$18 an acre**

If you move now to the Eastern Pan Handle of Texas, just across from Oklahoma, and get one of the good, low priced Mendota Colony Farms, you won't have to work hard clearing the land and getting it ready to plow. IT'S ALL READY TO PLOW NOW. No timber or brush to clear. No stones. No swamps. Just a deep, rich, dark loam. Abundant rainfall. Pure water. No irrigating. No fertilizing.

The Colony Farm Homes Association is selling 25,000 acres in the fertile Washita and Red Deer Valleys, all within six miles of the new townsite of Mendota, on the main line of the Atchison, Topeka & Santa Fe Railway. This land has never been cultivated because it has been held by ranchmen. Now changing conditions in the cattle business have thrown it on the market. NOW is the time to get some of this splendid land, because it's an opportunity that will be snapped up quickly. Those who buy first will get the best locations and make the most money by the sure increase in land values.

The same soil on adjoining tracts is producing bountiful crops. Oats, 60 bushels to the acre. Wheat, 30 bushels. Alfalfa, 5 crops a year.

Prices of Mendota Colony Farms today, \$8 to \$18 an acre and terms very easy. Payments extend over four years, thus allowing farms to pay for themselves, probably before payments are due. Others get a good crop the very first year there. You can, too.

We employ very few agents. By selling direct to you we save

you the agent's commission, which in some cases would amount to several hundred dollars. You might as well have this money as anybody else. It is just as good in your pocket as in the agent's. The Mendota Colony Farms and this Association will stand the most thorough investigation on your part. Send today for big illustrated free book, "MENDOTA COLONY FARMS," telling all about your opportunity in Northern Texas. Then plan to go to Mendota on one of the low rate Homeseekers' Excursions, see for yourself just how good this land is and talk with people who have farmed successfully in that locality for years. They will be only too glad to tell you how well they are prospering there.

Don't hesitate to write us even though you may not be able to make this trip now. It costs you nothing to get our literature; but it will be worth a good deal to have this information handy. If you have even the slightest idea of moving at some time to a pleasanter and more healthful climate and getting a cheaper and better farm, we want to get in touch with you. We will be pleased to keep you informed of opportunities. You needn't feel that you are obligating yourself in any way by writing us, but you may get information which will prove of the greatest value to you. So don't put this off.

Just drop us a postal card today with your name and address on it and we will send you full information about the Mendota Colony Farms and the excursions to Mendota. Do it now.

The Colony Farm Homes Association, 21 Equitable Bldg., St. Louis, Mo.

## A GUIDE TO THE LAST WEST

**CROP CONDITIONS ARE FINE THIS YEAR ON OUR LANDS**

Copyright 1907 by J. F. LUSE.

Our booklet "A Guide To The Last West" is a complete description of the finest wheat lands in the world.

**Let Us Send It To You FREE**

It is published by our Company, owners by direct selection and early purchase!

**Choicest Western Canada Lands.**

**OUR FAMOUS GUARANTEE OF \$10.00 PER DAY AND EXPENSES.**

**DON'T LOCATE ANYWHERE; DON'T BUY A FOOT OF LAND FROM ANYBODY,** till you have read about these things, and seen what we are in position to do for you. Send your address to

**THE LUSE LAND CO., LTD.,**

ST. PAUL, MINN.

Call on or write their representative

Birt Amick, 220 Fifth Street, Des Moines, Ia.

CORNING—LUSE

## WESTERN CANADA PRAIRIE LANDS

Today WESTERN CANADA is a country of substantial homes, profitable farms, growing cities and villages; in all this magnificent country there is no land equal to that in the districts of The Famous Saskatchewan Valley, The Great Quill Lake Plains, The Goose Lake District, The Yorkton District. In these Districts we own and control Over 500,000 Acres from which you can make your own selections.

These lands will produce 30 to 50 Bushels of A No. 1 Hard Wheat to the Acre, in fact the actual average for the past few years has been more than double that of Minnesota the greatest wheat producing State in the Union. With wheat selling at present prices, it is not much of a mathematical problem for the farmer to figure the enormous profits to be made from this land that will produce more wheat and of higher grade than land costing five to ten times as much per acre.

History Will Repeat Itself and these lands will in a few years be worth as much as they are today in Minnesota, Iowa and other States. The saying is "Opportunity Knocks But Once at Every Man's Door." It is knocking at yours now. Will you take advantage of it?

Send for Free Maps, descriptive matter, etc.

**STEWART & MATHEWS CO., LTD.,**

187 Water St., WINNIPEG, CANADA.

305 Jackson St., ST. PAUL, MINN.

## A SNAP

ONE square section of prairie land located in S. E. Kan. 147 acres in N. W. 1/4 under plow. 625 acres tillable, good 5 roomed house. Cellar, splendid well, wind mill, 2 steel tanks, stable, 80-foot shed and granary. 480 acres in pasture and hay land, one mile to R. R. station. Price \$40 per acre. Would take good draft horse as part pay, Percheron or Shire stallion.

A. J. PALMER, El Dorado, Kansas.

## TEN : CENTS : AN : ACRE

FOR the best farming land on the continent. A 160 acre farm for \$16.00 (the government filing fee) in GOD'S COUNTRY, its rolling prairie covered with velvet verdure, and it's yours if you will come and get it. It's less than five miles from the Great Northern Rly. in the land of opportunity—Montana. Don't pay any more rent. You can get a round trip ticket from St. Paul for \$25.00, and if you come and see it you'll throw away the return trip stub. For further particulars address

Leo B. Coleman, Glasgow, Montana, Secy. Commercial Club.

## SURE THING IN FARMING!

Colony Lands and Stock Farms in S. W. Kansas, 2,000 acres irrigated and improved and 10,000 acres grazing and wheat land in settled districts; land that pays for itself by big certain crops. 2,000 acre Stock Ranch part irrigated at \$25 acre—splendid improvements, near good R. R. town. Farms all sizes partly irrigated and improved \$20 acre and up. Good schools. Sure crops by irrigation. Sure large profit in sugar beets, live stock and other crops. Good market for all products. We sell 20 acres to 2,000 acres to anyone. Better bring a crowd with you. Special excursion rates twice a month. Write,

**KANSAS HOME AND LAND CO.,**

Room 503, Ft. Dearborn Bldg., Chicago, Ill.

**WE WILL SELL YOUR FARM OR OTHER PROPERTY**

QUICKLY at highest prices obtainable for cash or on time. Property bought or exchanged for you in any location at prices to suit. Send today full description of property for sale or exchange, or state plainly your wants for a purchase.

**FARMERS' REAL ESTATE & LOAN CO.,**

44 UNITY BLDG. CHICAGO.

**IOWA**

**THE GREATEST CORN STATE.**

IOWA beats all other states. Illinois included, in corn, oats, and live stock. It is much like Illinois in soil, climate and surroundings, and is full of Illinois people. Coming here you merely change neighborhoods. Our new catalog gives a fine list of bargains in improved farms, also some to exchange. Send for it early.

Northern Iowa Land Co., Independence, Iowa.

## INVESTIGATE BELTRAMI & CLEARWATER COUNTIES, MINN.

A grand dairy, sheep and general farming country. We own 35,000 acres CUT-OVER lands never before on market, with rich, creamy soil, clay sub-soil, natural grasses, timber, lakes, close to good towns, saw mills, railroads, highways, schools, churches, with Duluth, St. Paul and Minneapolis markets competing for our products. To actual settlers we offer choicest lands at from \$10 per acre up, on easy terms, and in such compact bodies that whole communities can locate together if desired. Of this section, Prof. Thomas Shaw says: "Its possibilities are away beyond the popular estimate." Good farmers who want homes will be given every encouragement. Colored map and illustrated folder free. Don't locate till you have seen this country. For full information address Roger C. Spooner, Pres., Donald Land & Lumber Co., Drawer N., Bemidji, Minnesota.

## AN INVITATION.

YOU are of course coming to the Jamestown Exposition, at Norfolk, Va. When you do, you are invited to visit and inspect the splendid farming and timber lands offered for sale cheap along the lines of the Norfolk & Southern Railway. No such lands to be had anywhere else for the price. Now is the time to get a home in a good climate, where the soil is virgin and fertile, on easy terms. Write for farm list and descriptive pamphlets. F. L. Merritt, Land and Industrial Agent, Norfolk & Southern Ry., 302 Citizens' Bank Bldg., Norfolk, Va.

## FREE TRIP TO TEXAS.

WE offer a free trip to the Panhandle of Texas to one reliable farmer of any township in the state. Always state township and county. For particulars write: Ben I. Tanner Land Co., Cedar Rapids, Iowa.

**CORN** Write for State Map. Book let and Weather Report. **LANDS** Sent free. Hazel J. Meek, Chillicothe, Missouri.

## I WILL HELP YOU TO MAKE MONEY

I WILL teach you the Real Estate Abstract, Loan, Insurance and General Brokerage Business by mail, and assist you to establish a prosperous business of your own or secure you a paying position. Many make \$3,000 to \$5,000 annually. The real estate business has assisted many without capital to become independent for life. Write me today.

**JAS. T. LARKIN, PRES.,**

Kansas City School of Real Estate, KANSAS CITY, MO.

## REWARD!!

I WILL pay \$100 in gold to any person who will furnish me the name of a person who will buy 160 acres of good farm land in southeastern North Dakota, the most famous wheat belt in the world. Canada is frozen out and the Southwest has failed. But Dakota, the choicest of all the country, has a bumper crop coming. Fine people, good towns, churches and schools, in fact, everything as you have it at home. Write me for particulars.

**John Mueller, - Lisbon, N. D.**

(Agents wanted in every town.)

**FOR SALE:** Two fine farms adjoining the village of New Richmond, Minn. One contains 240 acres, other 110. Improvements on each farm and on the larger buildings are exceptionally good. Every foot of ground available for diversified farming and under high state of cultivation. Farms adjoin. Death of owner reason for selling. Terms given. Village maintains high school. C. W. Wagner, Litchfield, Minn.

**FOR FARMS AND EXCHANGES,** write in your first letter what you want to buy, or have to exchange. Fraley & Graham, Ulrich, Missouri.

**CORN** and Alfalfa farms for sale; good improvements. Write for prices. Jas. S. Sheeran, Solomon, Kansas.

## ONE CROP PAYS FOR THE LAND

IN southeast Wyoming, where we have 75,000 acres of fine farming land that has just been opened up for settlement. Don't delay, but write today for circulars and other information.

**ARCADE LAND CO.,**

7 Arcade Bldg., Des Moines, Iowa.

## LASHBURN, SASKATCHEWAN, CANADA.

GOOD farms and wild lands for sale—town property. Apply to

**J. MORISON BRUCE,**

Real Estate and Insurance Agent, Lashburn, Saskatchewan.

## LAND ADVERTISING.

**A BARGAIN**—313 acres, 8 miles from the growing city of Memphis. Also tools. 60 head of Jersey cows. Cheap terms. H. M. Anderson, R. F. D. No. 1, Capleville, Tennessee.

## IN THE GREAT SOUTHWEST.

The Oklahoma watermelon crop has had a backset in the unfavorable weather, but a large acreage is in and the crop eventually harvested promises to be large. Farmers are taking interest in peanut culture and fields of from two to ten acres are not uncommon in certain parts.

Prof. C. K. McClelland, M. Sc., newly-elected superintendent of the Fort Hays Branch Experiment Station, was graduated from Ohio State University in 1893, and then became assistant in agronomy at North Carolina Agricultural College. He will undoubtedly make the Branch Experiment Station a success, though it may take him some time to learn of all the capabilities and the many pranks of the Kansas prairie climate.

Enterprising farmers who converted homesteads in the "big pasture" in Oklahoma into town-sites stand a good show of losing their farms, states an Oklahoma editor. The general land commissioner has notified the authorities at the Lawton land office to cancel all entries where attempts were made to start a town on a homestead. In case of cancellation the entryman loses all he has paid down on the land and the people who buy lots of him are out their money also.

Another large Texas ranch has been sold, and will go out of the hands of the cattle raiser into the hands of the man with the hoe. The land includes the Bush & Tillar ranch in Scurry, Borden, Mitchell and Howard counties, containing 50,000 acres; the Bob Pryon ranch in Scurry county, 10,000 acres, and the Bob Pryon Panhandle ranch in Wheeler and Gray counties, which contains some 30,000 acres. Eastern capitalists are the purchasers.

The annual convention of the National Live Stock Exchange will meet in Kansas City, July 18, 19 and 20. Two hundred delegates from fifteen cities will be present. If the present trouble with the packers is not settled when the convention meets, the principal subject to be discussed will be the packers' attitude in determining to buy live stock subject to post-mortem examination. Few people realize that the large commission firms all do seven or eight million dollars' worth of business every year. The July convention will represent an enormous volume of business.

Curious reports come from certain sections of Missouri to the effect that the hogs have been almost wholly subsisting on the larvae of the seventeen-year locust this spring. The larvae which was to develop into a full-grown singing locust has been working its way up through the ground, where it has laid dormant, close to the surface of the soil. It was readily found and devoured by the hungry hogs of the farmer, who is now reaping a crop which he never planted.

Chicago Italians have adopted a plan to divert the influx of Italian immigrants from Chicago and other large cities and establish them in agricultural communities. This will be part of the work of the Chicago Italian Chamber of Commerce, which is to be established. A good number of these immigrants have found homes in the Southwest on fruit farms and it is probable that many will follow, now that the pioneers have become well settled.

N. E. Darby, of Springfield, Mo., has been appointed state bee inspector. The State Bee Keepers' Association obtained the passage of a law at the last session of the legislature, creating the office of a state inspector, whose duty it is to visit different parts of the state and inspect bees to determine whether contagious diseases exist. The bee keepers have

been having some trouble on account of diseases among bees. An effort is to be made to stop the spread of this disease.

The largest known tree in Kansas was felled a couple of weeks ago near Williamstown. It was a cottonwood and was purchased by the Topeka Barrel and Box Factory, and four and one-half days were consumed by two men in cutting it down. It measured twenty-three feet, six inches in circumference. The body was sound and when sawed up made 2,500 feet of first-class lumber and about the same amount of second-class.

Thomas J. Wornall, of Liberty, Mo., secretary of the American Royal Live Stock Show, is visiting England and Scotland to inspect the herds of fine cattle in those countries. He will visit the fine cattle farms of King Edward, Lord Rothschild and other large breeders of fine cattle, returning home August 15th. In his absence, R. I. Bruce, of Liberty, Mo., is acting as secretary of the American Royal Live Stock Show.

A few days ago a load of hogs was received at the stock yards from South Missouri, according to a Kansas City paper and refused to eat corn put in the pen. A man familiar with the habits of hogs from different localities was standing near. "I'll tell you how to make them eat," he said. "Those hogs are accustomed to eating acorns. Throw the corn into the air, and when it falls they will think it dropped from the trees, and eat it." His advice was followed and the hogs immediately began to eat. Perhaps they were locust hogs, as well as acorn hogs!

Recent shipments of cattle from the ranges of the West and south Texas to the northern pastures have been exceedingly heavy, according to reports received from inspectors of the Texas Cattle Raisers' Association. The few reports which have already arrived, show that a total of over 700 cars have been shipped since last week. More than 400 cars left San Angelo during a recent week and the total number of cattle from various points will amount to about 20,000 head. The ranges are said to be dry and badly in need of rain. This is one reason why so many cattle have been hurried north lately.

There are now about two million pounds of twine at the Kansas penitentiary ready for distribution, and about one million pounds of sisal is on hand to be made into twine if the crop conditions continue favorable. The 100 convicts who work in the twine plant are now working on the prison farm and in the stone quarry.

The Texas legislature has passed an act creating the office of commissioner of agriculture. The new law requires that the new office be on an equality with the state offices and that it shall be similarly filled by election by the people. The duties of such commissioner are clearly and plainly stated, as is also the requirement that he be an experienced and practical farmer. His duty is directed entirely toward the interest of agriculture, and it is intended that his office shall further the cause of farming in any and all ways possible.

The Kansas harvest hands probably will be allowed to ride to the harvest fields for one cent a mile again this year. T. P. Gerow, employment agent, made application to the railroads some time ago for a one-cent a mile rate from the Missouri river. The railroads have decided to grant this rate and have asked the interstate commerce commission for the necessary permission to put the rate into effect about the middle of the month. On account of the new interstate commerce law this is necessary before a rate can be granted.

The concentrated feeding stuffs law, passed by the Kansas legislature last winter, goes into effect the first of July, and many of the millers of the state are showing a commendable promptness in complying with its provisions. All feeds sold in the state must bear a label showing among other data, the percentages of fat and of protein in them, and it is the duty of the chemical department to make the analyses necessary in this connection. The experiment station mail is burdened at present by inquiries concerning the scope and application of the law.

A model dairy and milking machines

will be one of the many features of the Interstate Fair and Exposition in September. The management of the fair has decided to divide the live stock exhibits into two classifications. From September 23d to 28th, the first week of the interstate fair, the light horses, such as standard thoroughbreds, saddle and carriage horses, and ponies will be exhibited. In addition to this will be exhibits of swine, sheep, poultry, dairy cattle and dairy products. From September 30th to October 5th, inclusive, there will be exhibits of all breeding and fat classes of beef cattle, including grades and cross-breeds, and all draft and coach horses. In the heavy classes of horses will be grade drafters and two, four and six-horse teams of draft horses in harness.

Oklahoma, from its admission to statehood, means to have full control of its railroads. In its proposed constitution it has inserted no less than forty-eight different sections dealing with the subject. No other matter receives so much attention, showing that in the opinion of the drafters of the constitution the railroad problem is the paramount question of the hour. Care is taken to prevent the roads attempting to influence the course of legislation by the granting of undue favors. The issue of free passes, except in exceptional well-defined cases, is prohibited absolutely. The constitution creates a corporation commission, the duties of which are described in elaborate detail, so that there may be no mistaking its powers. The commission is endowed with power to prescribe rates, charges and classification of freight. Should the roads be dissatisfied with its decisions on any of these questions, they are given the privilege of taking their case direct to the supreme court and obtaining its decision with the least possible delay. Passenger rates are limited to two cents a mile, but this provision may be suspended by the state commission, provided satisfactory evidence is furnished that such rate is not reasonably remunerative.

## The Week in Kansas.

## To the Editor of The Homestead:

This week has passed into history with a record a trifle better than those that went before. All that has been bad has not vanished, but those features have been modified slightly. It has not been quite so cold, not quite so dry and has not frosted, but it has been summer by no means.

The 30th of May a drizzling rain fell from early in the morning until well towards nightfall. There is a belief that it always rains on Decoration day, and we cannot remember when it has not. Even the dry year of 1901, the driest Kansas had in a long life-time, Memorial day was a rainy one. Though better than an inch of water has fallen in the past week, the soil quickly drank it up. Thursday and Friday no one worked in the fields, but work was commenced again on Saturday. All so far this week has been good weather for work, better, in fact, for that than for a growth of crops. Tuesday and Wednesday forenoon it was very cool again, much too cool for a good growth to be made by any crop.

The time is rapidly approaching when there must be a change in this infernal program of occasional cold days and always cold nights. Corn is not only small, but it is yellow and spindling. Much of the corn that has been above ground for over a month has a stalk that looks more like a slender spear of grass than it does like corn. It is barely large enough to be cultivated the first time. The only crop that is making anything like a satisfactory growth is the prairie grass. The pastures are now very good, except where over-stocked, and there we cannot expect to find good pastures. Alfalfa will be cut short at least one cutting and then the first will not be a large crop. Clover and timothy will be very short. The clover on this farm is all out in bloom, but is short and scantily leaved. The tame hay crop will again be a short one.

All work is well in hand. No one is rushed, as corn cultivation is rushing no one. Not even the weeds have been making their usual growth. Harvesting will be late; probably there will be none of it to do until well after the 4th of July. Wheat is only well out in head. The weather is cool again this morning, though the wind is in the south. A light shower fell during the night and there

## A Simple Prescription For Stomach Troubles

One That Can be Mixed at Home.

Here is a simple prescription that will tone your stomach and put it in condition to digest your food:

Compound Tincture of Cinchona, one ounce; Prosene Compound, one ounce; and Sherry Wine, half a pint; mix together and take one teaspoonful before meals and at bed time in a wine glass full of water.

This prescription can be put up by any druggist.

The Prosene Compound in this prescription is a compound of digestive ferments and the best vegetable tonics known to medical science; they increase the secretions of the gastric juices and increase their digestive power.

We advise that if you are troubled with your stomach you get this prescription filled at your drug store and give it a trial.

are still a few "rain clouds" around about. Henry Hatch.

Coffey county, Kan., June 6, 1907.

## THE PROFIT IS YOURS

by removing blemishes from your horses. Absorbine will help you. No blister, no hair gone. Mr. John F. Bruner, R. F. D. No. 40, Dale, Ind., writes March 15, 1907: "Absorbine removed two thoroughbreds, larger than a hen's egg, nice and smooth from a colt, and I sold him sound for a good price." Absorbine is made to give results, and satisfied customers are constantly recommending it to others. Absorbine removes any soft bunch, cures lameness, allays pain and inflammation. Descriptive pamphlet free if you want it. Absorbine \$2.00 per bottle at dealers or delivered express prepaid. Manufactured only by W. F. Young, P. D. F., 40 Monmouth St., Springfield, Mass.

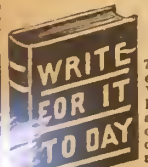

## "A GUIDE TO THE LAST WEST."

Under the above topic is issued a very complete descriptive pamphlet of the farm lands now available to homesteaders in the West. It will be sent to any address free of charge. The company issuing this handy booklet are owners by first selection of much of the best and choicest western Canada lands. Until homesteaders have read this little descriptive work they should not locate, as it contains much information that may make all the difference between a profitable and an unprofitable investment. The guide explains all about the new method of selling these lands. Write for the guide mentioning this paper. Send your address to the Luse Land Co., Ltd., St. Paul, Minn., or call or write their representative, Mr. Birt Amick, 220 Fifth St., Des Moines, Iowa.

## A GOOD HOG RANCH FOR SALE.

One of the finest suburban homes, and one of the best hog farms, containing fourteen acres, with a nine-room house, hog houses, chicken houses, corn cribs, all kinds of fruit and shrubbery, three acres of alfalfa, fenced and cross fenced, in fact everything that a man will need, is being offered for sale by Mr. Sol. Frank, of Sioux City, Iowa. He must give his attention to his other business, therefore must sell. It is a great place for some retired farmer, or a man who wants to devote his attention to hog growing and fruit growing. Write Mr. Sol. Frank, of Sioux City, Iowa, for further particulars.

## FREE BOOK For Men

We have just published new book of 76 pages which tells about Men's Diseases, such as Blood Poison, Nerve Weakness, Varicocele, Hydrocele, Kidney and Bladder Troubles, Etc., and how any of these diseases can be cured quickly and permanently by our simple and inexpensive new method.

Send your name and address today for free book. We will send it in a sealed wrapper. It contains valuable information for every man.

DR. FELLOWS & FELLOWS CO.,  
Rollins Bldg., Des Moines, Iowa.

# PILES

## FISTULA--NO MONEY TILL CURED

H. S. Price, The Golden Eagle Mercantile Co., Neosho, Mo., writes: "I was afflicted with piles for fifteen or eighteen months before going to you for treatment. I have now been cured just seven years, and can cheerfully say your treatment was satisfactory to me in every respect, and I have not suffered a minute's pain since. Your treatment in my case was entirely painless. I was not confined to my room five minutes from its effects during my two weeks' stay in Kansas City."

All diseases of the rectum treated on a positive guarantee and no money accepted until patient is cured. Send for free 352 page book, a treatise on rectal diseases and hundreds of testimonial letters, valuable to anyone afflicted. Also our 132 page book for women. Both sent free. Address either our St. Louis office or

DRS. THORNTON & MINOR, 1010 Oak St., KANSAS CITY, MO.

## Cut Out and Send This!

DRS. THORNTON & MINOR,  
1010 OAK STREET, KANSAS CITY, MO.  
Send prepaid and free of cost to me, your new 352-page illustrated treatise on Piles, Fistula and Diseases of the Rectum.

## PLEASANT FIELDS OF HOLY WRIT

SAVE for my daily range  
Among the pleasant fields of Holy Writ  
I might despair.  
—Tennyson.

### The International Sunday-School Lesson.

Second Quarter. Lesson XI. Exodus xiv, 13-27. June 16, 1907.

#### Israel's Escape from Egypt.

Israel made no hasty or clandestine departure from Egypt. Theirs was no attempted escape of fugitives from justice. They had a royal firman. The Egyptians fairly loaded them with gifts in hopes of placating the wrath of their offended Deity. The store of raw materials and metals they carried with them enabled them to make in the wilderness the tabernacle and its furniture, and all their armor, offensive and defensive.

Theirs was an orderly march. They advanced in tribes, each under its respective commander, Moses in the van, wonder-working rod in hand. In the midst, as a veritable palladium, Joseph's mummied form, enclosed in its hieroglyphic-covered casket, was carried according to his dying request. For sake of pasturage by the way for the myriad flocks and herds, the advance hosts must needs help deploy widely to right and left. To direct a general course for these somewhat widely-sundered detachments, God unfurled His pennon in the sky. That banner served a three-fold purpose—signal, shield and lantern.

To Israel's dismay, Jehovah's ensign moved in the very opposite direction from that which would have been expected. Instead of indicating a course toward Suez, the bridge between the continents, it moved southward along the western shore of the Red Sea, thus

placing an ever-widening barrier between the pilgrim caravan and the country which they sought.

When the ever-alert Pharaoh saw this tactic blunder, this march into a cul de sac, the hope of recovering lost power revived in the despot's heart. Or possibly it was the hope of revenge for the death of his son and heir, whose recently-discovered epitaph he was even then conning. He believed that the hapless Hebrews had unwittingly strayed beyond the jurisdiction of their God, who at best was only a local dignity, and would fall an easy prey.

At sight and sound of pursuing chariots, Israel was completely panic-stricken. They raised a querulous cry about there being plenty of graveyards in Egypt, and no need of coming to the wilderness to find one. On the dark background of this faithless and irascible conduct of the multitude the noble bearing of Moses shines with augmented luster. His "Stand still and see the salvation of God!" is an incomparable, inspiring bugle-note that has kept ringing through the ages.

A moment later and the captain of the Lord's hosts stands on the edge of the comparatively shallow western arm of the sea. He waves his oft-tried rod. In response there comes from the east a violent wind, which, in conjunction with the ebbing tide, leaves the bed of the sea uncovered. Deep pools to right and

### TOO LATE TO CLASSIFY.

## M. S. MOATS & SON'S DUROC JERSEYS

125 CHOICE pigs, sired by such noted boars as Crimson Critic, 2d prize boar at Nebraska state fair, Duroc Challenger's Wonder, Jumbo Critic, Ohio Chief, John D. Rockefeller and Mo. Gold Finch. We have herd challengers for the future. Write us at once.

M. S. MOATS & SON, - - - RANDOLPH, NEB.

left formed a perfect defense (wall), rendering a flank movement on the part of the enemy impracticable. In the meantime the pillar of cloud went to the rear and, spreading out and hanging low like a curtain, completely screened Israel from the observation of his foes. The same cloud cast its powerful searchlight forward, revealing the way through the sea in its entire length.

"Forward, march!" was now the inspiring command that rang along the whole column. Across the bridge which Jehovah had provided, the host, a thousand abreast, marched, and no little child, not even a lamb, was lost.

The temerity of sinners has no more striking illustration than in the rash boldness which the Egyptians essayed to use in pursuing them to the very bridge which God had made for His people. Pharaoh soon found he, not Moses, was in the cul de sac. God thundered and lightened out of His cloud, phenomena so rare in Egypt, as to strike terror to man and beast. Progress of the Egyptian host was delayed until flood-tide, when the wind abated, and the conditions which had favored Israel being exactly reversed, the Egyptians were whelmed in the deep.

#### Analysis and Key.

1. Israel's exit from Egypt. Not flight of criminals. They traveled by a special royal edict which gave them authority. Loaded with gifts.
2. An orderly march. By tribes. God's banner in the sky.
3. Pharaoh tempted to reclaim the Israelites by sight of their apparent entrance upon a blind alley.
4. Israel panic-stricken. Moses unmoved. Sea divided by wind. Israel crosses dry shod.
5. Pharaoh's attempted pursuit and destruction.

#### The Teacher's Lantern.

The inveterate character of sin is exemplified in Pharaoh. Ten plagues were not enough to kill it. The sight of Israel once more apparently within his grasp made the despot forget all his sufferings. Like the sinner who supposed the restitution of certain things, but added, "Remember, Lord, this don't count if I get well!" so Pharaoh's consent to let Israel go was given under the supposition that their departure was inevitable.

Lapse in faith disgraced Israel in his very exodus from Egypt. Sea to front and chariots to rear outweighed all the signs and wonders God had wrought in Egypt. A timid and querulous spirit took possession of him. The church of today and individual Christians need to pray to be saved from a similar lapse. The wonder-paved way God has led us should confirm our faith that He will still lead us on, though He divides seas to do it. David argues well when he says: "The Lord hath been mindful of us; He will bless us."

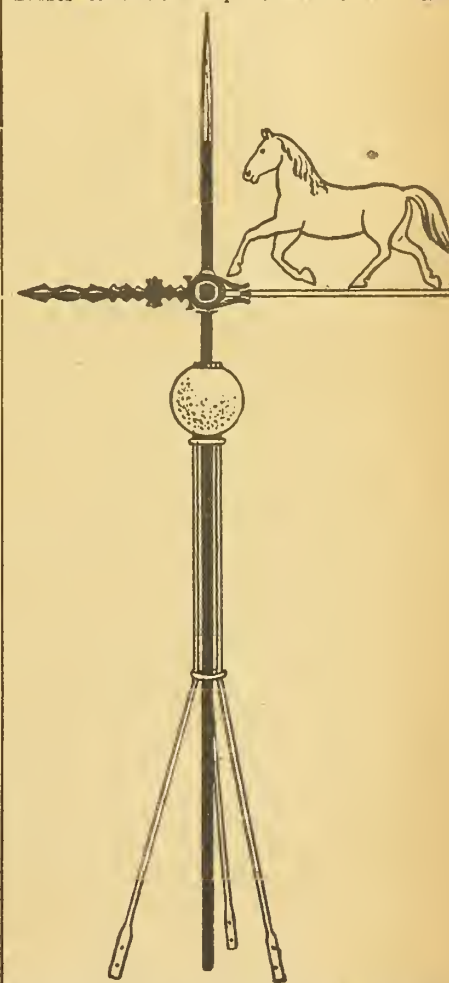

Shriving the Bible of the miraculous is a gratuitous task. The Bible is shot all through with the supernatural. One miracle, more or less, cuts a small figure. But the very terms of the Scripture account, in this instance, lead us to believe that the means used to make a way for Israel through the sea were largely natural. Moses' rod did not divide the flood. It evoked a strong wind; that, in conjunction with the ebb-tide, did the rest.

Pharaoh's mummy is a most inconvenient find for strictly literal interpreters of Scripture. Does the record force the conclusion that Pharaoh himself was drowned? It is not the custom for commanding officers to put themselves in positions of peril, but the contrary. When Pharaoh's host was overthrown in the Red Sea, Pharaoh's self was over-

thrown practically, though not literally.

#### HIGH-GRADE LIGHTNING RODS.

Those of our readers who have been investigating the subject of lightning rods are no doubt acquainted with the firm of Jos. H. Barnett & Co., Riverside, Iowa. This company puts out a fine line of goods and the copper cable which they use is high-grade material, being practically 98 per cent pure. This is one of the important points to be considered in buying lightning rods, and the superior grade of material used by this firm in making their rods places them right at the head of the list of the best makers of lightning rods. The company has been doing a very prosperous business with the readers of this paper for some time, and those who intend soon to install rods and fixtures on their houses or barns can place their order with

this firm with confidence that they will be treated honorably in every respect. The patronage of Jos. H. Barnett & Co., extends to all parts of the country, which is largely due, no doubt, to the high quality of their products and the honorable methods pursued in the management of their business. We would advise all persons interested in protecting their lives and buildings from loss during the coming summer, through lightning, to address a letter to this firm asking for full particulars regarding their line of goods. Address, Jos. H. Barnett & Co., Riverside, Iowa. Kindly mention this paper when you write. See page 5.

#### HAVE YOU SEEN THESE LANDS?

Good farmers who want homes will be given every encouragement to see farms that are now offered in 35,000 acres of cut-over lands in Minnesota. Situated in Beltrami and Clearwater counties, this section is right in the best dairy, sheep and general farming region of the state. Three markets, namely, St. Paul, Minneapolis and Duluth, compete for the produce from this section. Tracts of land suitable for large or small farms may now be secured. Professor Shaw is quoted as saying that the possibilities of this region are far beyond popular estimate. Now is the time to investigate this land and make selections of farms before it is cut up. Colored maps and illustrated folders will be sent to anyone looking for a home by writing to Mr. Roger C. Spooner, president Donald Land and Lumher Company, Drawer N., Bemidji, Minn. See page 15.

Every foot of ground available for diversified farming and under high state of cultivation, is a part of the description of the two Minnesota farms offered for sale on account of the death of the owner, and found in the advertisement on page 15. One of the farms is 240 acres; the other 110 acres. They adjoin New Richland, a good school and market place. Terms may be obtained by writing to Mr. C. W. Wagner, Litchfield, Minn. Kindly say you saw the notice in The Homestead.

### OUR RED LETTER

# Combination Offer

AGAIN OPEN TO THE FARMERS OF THE MIDDLE WEST

**FIVE SPLENDID PAPERS and MAGAZINES for \$1.25 A YEAR. SEND US YOUR SUBSCRIPTION TODAY.**

The Homestead has never made an offer to its subscribers which proved so widely and immediately popular as did our famous "Red Letter Combination" last season. Thousands upon thousands of farmers throughout the corn belt took advantage of it to supply their families with an abundance of wholesome, instructive and entertaining periodical literature, and we have been asked many times if the offer would again be open to renewals and new subscriptions. Although the profit on such an offer is necessarily small, we have decided to repeat the offer during the present season and have secured the consent of the other publishers interested to advertise it again for a limited time, subject at any time to revocation without notice.

## THESE FIVE PUBLICATIONS FOR \$1.25 A YEAR.

The Homestead, the world's greatest farm paper, published weekly at the heart of the corn belt and dealing with agricultural problems from the middle-western point of view; edited by farmers residing upon and operating their own farms; not a one-man paper, but the embodiment of the combined wisdom and experience of a large staff of editors and contributors; with departments covering the whole range of farm life in this section.

The Chicago Weekly Inter Ocean, a grand general family newspaper, giving an abundance of news, literature, poetry, humor, market reports, reading matter for women and children—something for every member of the family.

The Kansas City Weekly Star, an able, fearless, independent newspaper, dealing with the problems of the day from an independent point of view. Literary contents very attractive and uplifting.

The Homemaking, a delightful monthly for the women and children of the farm, readable and valuable from first page to last—brightening and broadening the life of every member of the farm.

The Farm Gazette, a beautiful magazine of profitable agriculture, printed on fine paper, with elegant illustrations and a cover in colors.

If already a subscriber for any of them, your time will be extended for one year.

To secure this great bargain, clip and fill out the following coupon:

## FIELD NOTES.

A car load of Hereford bulls are offered for sale by Mr. A. Spooner, Mondamin, Ia. Some splendid young Hereford bulls are offered for sale by Messrs. Hood & Baker, Dunlap, Iowa.

Mr. Geo. M. McMurry, of Maryville, Mo., has a number of Duroc Jersey boars of fair size that should be in service where good, strong, useful boars are needed. See

page 23 for Mr. McMurry's advertisement and the sires of the boars offered.

A good Bates bull, bred in the purest of Bates blood, is offered for sale by Messrs. Clark & Tryon, of Wausa, Neb.

Two yearling Meddler boars are offered for sale by the well-known Poland China breeders, Messrs. Wm. Ray & Son, Defiance, Iowa.

Mr. N. A. Lind, Rolfe, Iowa, is offering some nicely bred Scotch bulls for sale, sired by his former herd bull Imp. Fancy's Pride.

A few good Scotch bulls are offered for sale by Mr. C. C. Norton, Corning, Iowa. These are sired by Imp. Bapton Admiral and Banker's Victor.

For Durocs write Messrs. McNeil Bros., of Bowen, Ill., owners of Buddy K. IV, the highest priced Duroc Jersey boar ever sold at public auction. See page 23.

A few good young Scotch bulls are offered for sale by Messrs. C. W. Daws & Son, Harlan, Iowa. These are herd headers and it will pay any of our readers to go and see them.

Some splendid fall Duroc Jersey boars are offered for sale by Mr. August Voge, Portsmouth, Iowa. These are sired by Red Knight Again, a son of the sweepstakes boar, Red Knight.

Mr. Ernest L. Mear, of Neponset, Ill., is making attractive prices on Chester White swine from prize-winning ancestry in his advertisement on page 22. Write for full particulars.

Mr. H. L. Ackerman, of Clearfield, Iowa, places the date for his fall sale of Poland Chinas on October 17th. Kindly bear this sale in mind and favor this breeder with your patronage if possible.

Three Ohio Chief boars are offered for sale by Mr. C. F. Kirk, Ponca, Neb. Two of these are fall boars and one is a yearling. Write Mr. Kirk about these at once and mention The Homestead.

Mr. W. B. Porter, of Cameron, Mo., can furnish O. I. C. pigs rich in the blood of Jackson Chief, the boar that won more money at the St. Louis World's Fair than any boar of the breed.

Mr. H. S. Allen, Russell, Iowa, is offering some good fall boars by his sweepstakes boar Crimmon Wonder Again, out of dams by the World's Fair boar Top Notcher Again. Write Mr. Allen about these.

Mr. Carl Hansen, Herman, Neb., offers four fall Duroc Jersey boars for sale, sired by old Bar None, his well-known herd boar. He needs the room and \$20 will get any one if ordered shipped right away.

Mr. H. B. Griffiths, of Bowen, Ill., is the proprietor of one of the best herds of Durocs to be found anywhere. He has an extra good lot of spring pigs which he is offering for sale at reasonable prices. See page 23.

Three splendid fall Duroc Jersey boars, sired by I Am A Wonder, and out of the \$1,500 sow Ruberta, are offered for sale by Mr. F. E. Garrett, Lohrville, Iowa. Write Mr. Garrett about these or go and see them.

Among the recent dates listed for Duroc Jersey fall sales is that of Messrs. A. W. H. and Albert H. Orr, of Lorimer, Iowa. Kindly remember this sale and honor it with your presence if possible. Watch for future announcements.

Messrs. H. W. Goff & Son, of Darlington, Mo., offer Young Mary Short-horn bulls on page 20. These breeders solicit your patronage, which they will make every attempt to please. Write them for what they have to offer, mentioning The Homestead.

Fox terrier rat dogs will get rid of farm vermin quicker than any other known means of extermination. One of our advertisers, Mr. C. H. Drake, of Hazelton, Iowa, writes us that he has two fine litters of these pretty and useful dogs and prices them in his advertisement on page 10. The dogs are guaranteed to be good workers. Write him your order, mentioning The Homestead.

On page 20 of this week's issue will be found the advertisement of Mr. F. P. Healy, of Bedford, Iowa, the veteran breeder of Short-horn cattle. He also breeds Shetland ponies and has a good, high-class herd of these. He also compiles and prints all kinds of sale catalogs at reasonable rates. If you want a sale catalog printed write him for prices and further information. When Mr. Healy does it it will be sure to be right. Kindly mention The Homestead when writing.

Hereford bulls, six to fourteen months old, also old and young females, are for sale at the well-known farm of Messrs. G. W. Way & Son, of New Sharon, Iowa. The bulls are sired by the noted Beau Brummel 4th and are well-formed animals of an age to satisfy critical buyers. Those who are interested in this offering will be taken to the farm at no expense to themselves. Call at the Way Hardware Store when you land. If you can't see the stuff, write for descriptions, mentioning The Homestead. See page 20.

Messrs. Mack Stevens & Son, of Iowa City, Iowa, are offering a superb Double Standard Polled Durham two-year-old bull for sale at a bargain price. This bull was bred by themselves, and has been used some, in fact all that he could be. He is so closely related to the major portion of the herd that it is not advisable to breed so close. He is straight and true in his lines, both top and bottom. He has a splendid head, beautifully polled. He is masculine in character generally. This firm will be glad to quote a close price on this bull to some appreciative buyer. The announcement may be found on page 22.

Mr. C. F. Shaffer, of Wellman, Iowa, breeder of Poland China swine and Short-horn cattle, writes us that he has on hand 175 head of little Poland Chinas and they are doing well. They represent his spring crop, and are sired by five different herd boars of the best lines of breeding. Mr. Shaffer thinks they are the finest lot of pigs he has ever raised. They are already showing growthy qualities and conform in every way to the highest type of the breed. Old customers will no doubt find some choice selections among his new crop, and as the pigs are ready to ship they had better send in their orders at once. The attention of bull buyers is called to a choice lot of youngsters sired by his splendid herd bull, Scotland's Pride. These bulls are red in color and are low-down, thick, early-maturing animals. You should write him at once for prices

regarding any of this breed of stock. Kindly mention The Homestead when writing.

Mr. Austin Renshaw, of Blair, Neb., starts in this week with a new Duroc Jersey advertisement in which he offers two fall boars and a few sows for fall farrow. His crop of pigs numbers something like 125 head of March and April farrow. They are sired by Long Alix, Arion and Redwood Chief. As the litters were nearly all from mature sows they have done exceedingly well and offer a fine chance for making selections. Write your wants, mentioning The Homestead. See page 23.

Mr. D. H. Lewis, of Geneseo, Ill., the well-known breeder of Chester White swine, reports the sale of one of his boars which he was offering for sale in these columns. He writes as follows: "I sold my boar, The Winner, to Mr. Frank Little, of Erie, Ill. He is one of the largest breeders in this section of the country." The Winner was a winner in one of the strongest shows at the Illinois State Fair last year and was the sire of several litters of spring farrow. Mr. Lewis will be pleased to furnish prices and particulars of the stock which he is offering for sale. Look up the advertisement on page 22 of this issue, and kindly mention The Homestead when writing.

Mr. A. V. Lock, of Remington, Ind., the well-known live stock artist intends to make a trip through the central west within the next two weeks. There are a large number of breeders who are fitting their stock for show this coming fall, and Mr. Lock would be pleased to hear from any who wish drawings made. It is important to communicate with him at once, for if he can find a number in one locality the expense may be reduced. Mr. Lock has been doing work for many of the leading breeders of the country, and guarantees his work to give satisfaction. If any breeder intends to have sketches made he will find it to his advantage to write Mr. Lock at once. See advertisement on page 22.

Hereford bulls got by St. Elmo 13th and Keep On 23d, are advertised by Messrs. Kater & Smith, of Grant City, Mo. These bulls are of such quality and breeding as to commend them to the most critical buyers. They are out of cows as well bred as the sires, and all are cows that Messrs. Kater & Smith have either bought on account of their individual excellence or are cows of their own raising that have been retained to increase the herd. These gentlemen have not grown a haphazard herd, as the weeding out process has been indulged in to such an extent that they have no stock for which an apology is necessary. Few better places to buy bulls are to be found. See page 21.

Spencer Jones, Carroll, Neb., is one of the younger breeders of Short-horn cattle and Poland China hogs that is building up good herds of both breeds. He recently purchased the young bull, Orangeman, a son of Imp. Lord Mount Stephen out of Imp. Orange Lily by Imp. Mountain Archer to head his herd. He is a Cruickshank Orange Blossom and will make him a good herd bull. Mr. Jones has a lot of good American bred cows in the herd, of the Rose of Sharon, Young Mary and Rosemary tribes. Mr. Jones has been breeding the good sized Polands and has had the 1,000 pound boar, Long Ring, at the head of his herd. Many of his spring pigs are sired by him, and the rest are by On Line Perfection, a son of Online, a boar of considerable reputation. He has a nice crop of spring pigs which he expects to grow out for the fall trade.

Two Nebraska Duroc Jersey breeders, namely, Messrs. W. A. Kirkpatrick, of Lincoln, and A. W. Wilson, of Bethany, advertise jointly some six head of good fall boars for sale, as well as some sows bred to Lincoln's Wonder. They write regarding their success in the pens as follows: "Our pigs are doing fine and are the growthiest we ever had. One litter by Crimmon Model and out of a sister to the sow that topped our sale at \$700 is very fine. Lincoln Girl's litter by Crimmon's Wonder's Brother are of special note. Morrison's Peach has a spanking good litter by Kan't Be Beat. Lady Newton's litter takes the eye on short notice. We have a fall boar out of Nancy D. II., two by Fancy Crimmon Wonder and four by Crimmon Wonder's Brother that are very heavy boned and extra good individuals. Some of these are getting ready for the fairs. But above all and best of all is Lincoln Wonder out of Morrison's Peach and by Ohio Chief. The best breeders say he is very large for his age and he pleases us exceedingly well." Write your wants to these breeders. See page 20. Kindly mention The Homestead.

## OHIO CHIEF BOARS.

Anyone wanting a good Ohio Chief boar should write to Mr. W. A. Rankin, Carson, Iowa. He has several splendid fall boars, also a good yearling. Read his advertisement on page 23 and write him, mentioning The Homestead.

## BRETT'S SHORT-HORN SALE POSTPONED.

Owing to certain unfavorable conditions, Mr. A. H. Brett, of Mason City, Iowa, has postponed his sale which was to have been held June 27th to July 11th. Some fifty head of Short-horn cattle and several mares and stallions were listed for this sale. The offering which will take place July 11th will be practically the same as has already been advertised. Remember this date and attend the sale if possible.

## NOVINGER &amp; SONS OFFER CRUICKSHANK HERD BULLS.

Messrs. Isaac A. Novinger & Sons, of Kirksville, Mo., are offering five Short-horn bulls, among which is some herd bull material of such breeding and individual merit as to command the attention of men hunting this class of stock. A rich red roan past one year of age is a bull that should please some critical buyer. He is even in all his lines, a well-balanced fellow with good quarters and is a low-set, easy-keeping bull. He was got by Lavender Viscount 2d, a son of the two-time champion, Lavender Viscount. His dam, Sweet Lavender, was got by Golden Crest and out of Imp. Lavender Thyme 2d by Prince of Fashion; second dam Lavender Thyme by Gondoller; third dam Lavender 28th by Lord of the Isles. Then follow dams got by Lord Lansdowne, Count Bickerstaffe 2d, etc. A straight Victoria, a Secret, a Mary Anne, and a Secret are also offered. All are well grown and are bulls that Messrs. Novinger & Sons are proud to put out. See

page 24 for their advertisement and kindly mention this paper when writing them.

## MCINTYRE'S FALL BOARS.

Those of our readers who want a good fall Poland China boar with plenty of size and ample bone, should read the advertisement of Mr. F. W. McIntyre, of Red Oak, Iowa, on page 22 of this week's issue and write him an order. He is also offering a number of good fall sows bred to his well-known boar, P. W. Glant, for fall farrow. It will pay any of our readers to go and see these fall boars and sows. He is pricing them within the reach of everybody. Mention The Homestead when writing.

## SHORT-HORN HERD BULLS FROM HEAVY-MILKING DAMS.

The man hunting a Short-horn herd bull from a heavy-milking dam and got by a two-time champion bull that was out of a heavy-milking cow, can do no better than at Hughesdale Farm, owned by Mr. H. J. Hughes, of Trenton, Mo. Viscount of Anoka heads Mr. Hughes' herd and this is the home of the great Rowena 2d. Mr. Hughes has several cows that produce as much milk and butter as does Rowena 2d. See page 23 for Mr. Hughes' advertisement.

## ANGUS BULLS FOR SALE.

If you wish to buy a good Angus herd header write or go and see Mr. W. H. Jones, of Quimby, Iowa. He has one Erica, twenty-two months old, which was sired by Edward R. and out of an imported dam; one Pride, twelve months old, sired by Cherokee Black Hawk, and out of an imported dam; one Blackbird and one Jannet for sale. All four of these bulls are extra good individuals, and can be bought at the right price if taken soon. See advertisement on page 21 and mention The Homestead when writing.

## JOSEPH MILLER &amp; SONS TO SELL SHORT-HORNS.

Among the successful breeders of Short-horns in northeast Missouri is the firm of Messrs. Joseph Miller & Sons, of Granger. These gentlemen have bred the Short-horn for some years and their herd is of such size that they will, on November 29th, make a draft sale of about forty head. Both the Scotch and Scotch-topped sorts will be drawn on and a number will be the get of their chief stock bull, Imp. Craibstone, got by the Duthie-bred bull, Mystic Archer, and out of Craibstone Shepherdess by Craibstone, he by the celebrated Wm. of Orange. Remember Messrs. Miller & Sons' date and watch for future announcements of the sale.

## ABERDEEN ANGUS BULLS.

Parties wanting Angus bulls will do well to write Mr. W. F. Eckles, of Green City, Mo. He is offering very attractive young fellows at prices that will move them. These young doddies are sired by Pride of Albion 5th 53114, a double Pride bull, of great scale and of fine individual merit, and a sire of good ones. Mr. Eckles makes a specialty of selling bulls on mail orders, and parties buying will need have no hesitancy in ordering of him, though he asks everyone who can to come and see these cattle. Young bulls from this herd are giving good satisfaction wherever sent and everything is guaranteed as represented. You will be pleased with the animal you receive from Paradise Stock Farm should you give them your order. Berkshire swine are another one of the first-class articles found on the farm, and they are booking orders for fall. Write for price and catalog or call and see Mr. Eckles at his farm. The farm adjoins city.

## TAYLOR'S DUROCS.

The writer representing The Homestead spent a very pleasant day at the home of Messrs. J. W. & Earl Taylor, of Kokomo, Ind., recently and found one of the best herds he has seen in the past few weeks. These gentlemen have at the head of their herd a yearling son of Hanley, called Hanley's Perfection, that more closely resembles his sire than any boar that has passed our observation. His dam, Helen R., was bred by Messrs. McNeil Bros. and is one of the good sows of the herd. Last winter Mr. J. W. Taylor, the senior member of the firm, secured from the well-known breeder, Mr. Ed. A. Baxter, a fall boar by Buddy K. IV, and out of Tip Top Notcher's Baby, a daughter of Tip Top Notcher. This young boar is coming along nicely and a large number of the females in the brood sow sale will be bred to him. It can readily be seen that this firm have the blood lines represented in their herd which will produce much good stock for them. Their fall sale will be held on Monday, October 21st, full particulars of which will be given in these columns. If any of our readers are in search of good spring boars these gentlemen can furnish them at very reasonable prices. A large number of them are sired by Hanley's Perfection, and among the number will be found a large percentage that are fit to head herds. Plan to visit this herd and if this is not possible, write for particulars regarding their herd. We take pleasure in recommending this firm to our readers who may be in search of Duroc Jerseys. Kindly mention The Homestead when writing.

## RODDEWIG'S CHESTER WHITES.

On page 20 of this week's issue will be found the Chester White advertisement of Mr. E. J. Roddewig, Newcastle, Neb., who has started a splendid herd of Chester Whites. He has about fifty spring pigs this year sired by Dandy Boy 12791, a son of Nashua Boy 12563. He is a good boar and a good sire, and he is also a full brother to the great prize winning hog, Modeller. These pigs are mostly sired by Dandy Boy, and are as good as you will find anywhere; in fact some of these pigs are extra good and will certainly develop into good herd boars. Lady C., a daughter of Perfection 11705, and a first prize winner as a yearling at the Nebraska State Fair in 1904, and a second prize winner at the same fair in 1905, is in the herd, and she has seven right-up, first-class pigs by Dandy Boy. This sow is not only a good individual when in form, but she is an excellent breeder. Another good sow is Podd, by Monarch Jr. (the latter boar being a well-known prize winner in the J. L. Barber herd). She farrowed eleven pigs and is rearing five corking good ones. The balance of the sows are daughters of Prosperity and Ak-Sar-Ben, boar used at the head of the Robertson herd at Lyons, Neb. Mr. Roddewig has a good bunch of pigs; they are good in head and ear, have good bodies, and good deep hams. Mr. Roddewig

# DISPERSION SALE OF THE ENTIRE HERD OF ABERDEEN ANGUS CATTLE

Belonging to H. A. Cole at Iowa State Fair Grounds, Des Moines, Iowa, June 18, 1907.

**"A CROP THAT NEVER FAILS" viz. "CROP OF FULL BLOODED CALVES" and  
"A CROP THAT PAYS ON \$100 LAND IS A CROP OF FULL BLOODED CALVES"**

THERE will be 65 head in the sale. Among these will be 18 bulls, including my herd bull Imp. Electrician, a richly bred Erica bull, weighing 2,200 lbs. The rest will be two-year-old bulls. There will be 47 head of cows and heifers in the sale, 15 of which will have calf at foot. Among these are several Imported Cows of the Pride, Queen Mother and Drumin Lucy families. There is also an excellent representation of Ericas, Blackbirds, Barbaras, Heatherblooms, Easter Tulloch Duchess, Georgianas, Kinochtry Blue Bells, Rose of Skeen and Lady Fern families. There never was a better opportunity offered to buy good Angus cattle, as we only bought the best for foundation stock. There will be a splendid lot of young heifers in the sale and some excellent young bulls. A change in business and having sold my farm necessitates my disposing of the herd. If you want to buy Angus cattle here will be the greatest opportunity of the year to buy right. Write me for catalog at once. Address,

H. A. COLE,

3211 S. WESTERN AVE.,

CHICAGO, ILLINOIS.

COLS. F. M. WOODS AND ICO, AUCTIONEERS.

will book orders for boars at any time, and if any of our readers want one, and want the best, they should write him and have him select one of these pigs. The first come will be first served in this case, and the man that gets there with his orders first will have an opportunity to get the best pig. His prices are very reasonable, considering the quality of the pigs offered for sale. Kindly mention The Homestead when writing.

## LESSMAN'S DUROC JERSEYS.

Mr. W. M. Lessman, of Wayne, Neb., well known as one of the leading Short-horn men in the state, is now out with a full-fledged Duroc Jersey herd, and has seventy spring pigs this season. Much of the foundation stock comes from the Manley herd, and three of his best brood sows are daughters of Orion, and he has over twenty granddaughters of old Orion in the herd. His former herd boar was Red Jim, a son of the boar, Victor, that was first in his class at the Interstate Fair in 1904. He is the sire of many of the pigs now cavorting around the Lessman farm. His present boar is Jumbo John, a son of Young John, out of a Jumbo red dam. He is a decidedly large hog for his age, with a good arched back and plenty of bone, and he is a pig getter from the word go. One of the best young sows is a daughter of Duroc Challenger's Wonder, with a nice litter of pigs by Crimson Critic, the second-prize Nebraska State Fair boar. Another nice litter is out of a daughter of Morrison's Bell Top, the pigs being sired by Nordyke's Top, a son of Trone's Oom Paul. Pride of Wayne, a granddaughter of Proud Advance, is one of his old, reliable brood sows and she has a litter of pigs by a son of Junior Jim. Mr. Lessman is a practical stockman and he has made a good reputation for himself in northeast Nebraska. He intends building up one of the best Duroc Jersey herds in the state. He will have some good boar pigs to offer later in the season and will book orders at any time. He will also make a brood sow sale in January, at which time he will offer a good lot of brood sows. His advertisement begins in The Homestead a little later in the season, at which time we will have more to say about his herd.

## E. Z. RUSSELL'S DUROCS.

Among the many good Duroc Jersey herds today in Nebraska, one that stands out prominently among the rest, is that of Mr. E. Z. Russell, of Blair, Neb. The Russell herd is one of the oldest in the state and no other herd today in Iowa or Nebraska has given better results to buyers than has the Glendale herd of Mr. E. Z. Russell. This is a broad assertion, but it has been proven time and again by those who have purchased stock of him. Everybody, and especially every Duroc Jersey man, knows Mr. E. Z. Russell. He has been president of the National Duroc Jersey Association, and is now one of its directors. No man living has done more to put the association where it belongs than Mr. E. Z. Russell. He has advanced the association's every interest until he has seen her grow into one of the strongest organizations of any breed of swine. He put the same enthusiasm into his hog breeding, and he has today a herd that is recognized by every breeder in the land. At the head of the herd is the great boar, Glendale Critic, a son of the noted Crimson Wonder. As a show boar he has won his share of the honors at the Iowa and Nebraska State Fairs, as well as at the Interstate Fair, and as a sire he stands today as one of the greatest of the breed. Two years ago he had the honor of siring the first-prize boar pig, the first-prize sow pig and the first-prize litter at the Iowa and Nebraska State Fairs, as well as at the Interstate Fair, Sioux City, Iowa. Last year he was placed third at Des Moines and second at Lincoln, and his two sons, Crimson Critic and Critic's Echo, won second and third at Lincoln and this year he will have the best lot of Critics that has ever been shown. Here is a boar that has few if any equals as a sire, and his get show as much quality and finish as any boar in the West today. He will show Jumbo Critic, a two-year-old son of his this year. He will weigh right at 1,000 pounds and is one of the smoothest big boars that has ever been seen at the fairs. He will also show a good yearling called Critic's Banker, that shows much promise. Mr. Russell has been very fortunate in having herd boars. Old Malcolm's Model is still doing service in the herd, and this grand old son of Top Notcher has proven a splendid sire. Daughters of his have been much sought after by other breeders, and have always proven good brood sows. He has also used Glendale Jim, a boar that he has won on at both the Iowa and Nebraska State Fairs. His present crop of 175 pigs are sired by Glendale Critic, Jumbo Critic, Malcolm's Model, Glendale Jim, Crimson Critic and Radiator, and are as good a lot as he has ever raised. He has five Critic litters on the place. Lady Bob 2d, a daughter of his noted old brood sow, Lady Bob, by Gold Dust Jim, has a good litter, also Bob's Nancy, the mother of Critic's Echo, has seven good

ones by the same boar. Another one of his best brood sows, a daughter of old Surprise, a boar that has done splendid service in the herd, has four boars and one sow by Critic, and Nancy's Top, a line-bred Nancy sow, has nine pigs by Critic. Queen B. by Perfection, dam by Higgins' Model, has six pigs by Critic, and he also has a number of extra good litters by Jumbo Critic and Crimson Critic. Mr. Russell does not say much, but keeps sawing wood all the time. When the fair season comes round he always has something to uncover, and he will line up again with the boys this fall. He will have the best lot of Critic boars for sale this fall that he has ever been able to get together, and they will not all be spring pigs, either. We cannot do our Duroc Jersey breeders a better turn than to advise them to secure one of these before the fall season goes by. Behind these is a line of breeding that breeds on, and many of the most prominent show winners of late years are closely related to the boars at the head of the Russell herd. This is true of Crimson Wonder I Am and Crimson Wonder Again, both sweepstakes boars at the Iowa State Fair, both being sired by Crimson Wonder, the sire of Glendale Critic. Mr. Russell will be pleased to hear from any of the boys from now on and he will book orders for anything they may want. When writing him kindly mention The Homestead.

## THOMAS & HOGSETT'S DUROCS.

There are a great many good herds of Duroc Jerseys in Illinois, but it is a question in the mind of the writer representing The Homestead, if there is a better one than that owned by Mr. L. E. Thomas, of Golden, Ill., and Mr. R. E. Hogsett, of LaPrairie, Ill. The best blood that could be had was secured in laying the foundation for this herd. The first boar of prominence that was used was Big I Am, first-prize boar under six months at Illinois State Fair, 1904. This boar was one of the best sons of Buddy K. IV, and was the sire of much good stock. He died the property of Messrs. Manlove Bros. & Norris, who secured him from this firm. The next boar that Messrs. Thomas & Hogsett used was Ambition, the first-prize boar pig under six months at the Illinois State Fair in 1905, and second-prize yearling at the same fair in 1906, and the choice of the breeders present for first place. This boar is the sire of many prize winners. At the Illinois State Fair last year the get of Ambition won more ribbons than the get of any other boar, and the first sixteen gilts that this boar sired sold for \$1,677.50. Ambition has long since proven his worth as a breeder, and the pigs sired by him this year are coming along in excellent shape. This firm are also the owners of one-half interest in the World's Fair champion boar, Tip Top Notcher, and have a large number of pigs for the season's trade sired by him. In later issues we will have more to say regarding this herd, but would advise those of our readers who are in the market for good Durocs of the most fashionable blood lines to visit these gentlemen and inspect the herds. They will be pleased to furnish particulars and prices to all who are interested in Durocs. Look up the advertisement on page 23 and write for further information, kindly mentioning The Homestead.

## THE KERRICK DISPERSION.

The opportunities offered to breeders and farmers in the dispersion of the Angus herd of the late Hon. L. H. Kerrick, of Bloomington, Ill., are numerous. The Angus breed and cattle interests of this country in general, owe much to the efforts made by Mr. Kerrick in the breeding of Angus cattle. Through him, and the stock exhibited by him, much of the popularity of the Angus breed in this country may rightly be ascribed. He gave to the American people the best and highest priced lots of steers that were ever exhibited or sold in the Chicago market. He maintained one of the best and largest herds of thoroughbred cattle in this country, and it is of the dispersion of this herd that we wish to speak. The most fashionable and profitable families are represented in this offering. Mr. Kerrick was a lover of individual merit as well as breeding. In the offering is included the Ballindaloch Lady Fanny bull, Imp. Lord Fretful, one of the two bulls, (the other being his grandsire, Imp. Prince Ito) now in service in this country, that was bred at Ballindaloch and kept in service in that noted herd. There are in this sale a large number of the Ballindaloch Lady Fanny family. It should be remembered that from Ballindaloch herd have come some of the best and most noted Angus bulls, and in this family breeders may secure the blood which has given to the breed some of its most noted sires. Ericas, Prides, Blackbirds, Queen Mothers, Antelopes, Minas and other noted families are represented in large numbers. It is impossible to speak of the offering individually, as there are 255 lots cataloged and over three hundred head to be sold. The large number to be sold assures buyers of good bargains. The cattle are sent forward in good breeding condition, and will do well for their future owners. The

breeder or farmer who is interested in Angus cattle should plan to be present at this noted dispersion. Never in the history of this country has there been offered to the public at auction such a large number of cattle, the property of one man, and the opportunity given should not be overlooked. This sale marks the passing of one of the best herds of the breed, which has taken years to build up to the prominent place it now occupies. Mr. W. C. McGavock, of Springfield, Ill., has charge of this sale, and the catalogs are out and will be sent to all who apply for same as per the announcement on page 24 of this issue. Further particulars regarding this noted herd will be given in later issues. Kindly mention The Homestead when writing for catalog.

## MARTZ HAS ONE HUNDRED GOOD PIGS.

On a recent visit to the Oakdale stock farm, owned by Mr. A. E. Martz, of Liberty, Neb., we found him busily engaged in caring for 100 good Duroc Jersey pigs that are among the very best that we have had the pleasure of looking at this year. Mr. Martz has been breeding good Durocs for a number of years and has produced some of the very best animals that have been exhibited at the leading state fairs. It will be remembered that Mr. Martz is the man that exhibited the great boar, Junior Jim, that won first in his class at the Nebraska State Fair and was sold by him to the well-known firm of Manley & Co., of Lyons, Neb. Junior Jim is too well-known among Duroc men to need any further comment, as his produce have been among the most sought for of the Duroc Jersey breed. A half interest in this great hog was sold by this firm for \$2,500, making him one of the most valuable Duroc boars of the breed. Most of the sows now in the herd of Mr. A. E. Martz are daughters of this great hog, and the crop of pigs that are the descendants of him show much of that same type and smoothness as did their grandsire. Most of this year's crop are from his herd boar, Billy M., he by the great show boar, Billy K., and having for his dam Betsy Maid, the first prize sow at the Nebraska State Fair in 1903, she being a daughter of the great show boar, Van's Perfection, the sire of a great many of the highest-priced Durocs that have been sold this year. With this great combination of prize-winning blood in most every animal on the place it looks as if individuals could be selected in this herd that ought to be prospective show animals. Mr. Martz is now booking orders for September delivery, and we will have you know that he is the man that ships subject to your examination, and if they are not just as he represents them they may be returned at his expense. Write him your wants and we will assure you proper treatment. When writing please mention this paper. See page 23.

## PRITCHARD'S DUROCS.

A representative of The Homestead recently called on Mr. Robert Pritchard, of Carroll, Neb., and found him with the best lot of Duroc Jersey spring pigs we have ever seen him have. These are sired by Welsh Vanderbilt 40567, a son of Combination, and he is the boar that topped the Kirkpatrick sale two years ago, and by Frankfort K. 51345, the boar that won first at the Nebraska State Fair and the interstate fair last year in the six months class. Mr. Pritchard also has pigs by the great Kan't Be Beat as well as by other well-known boars. Mr. Pritchard has bought the best of boars and sows for his herd and if nothing happens he will come out to the fairs this fall with a nice string of Durocs. Last fall he showed Frankfort K. at Sioux City, and got first place, also got first on a spring gilt. He will show a litter this fall out of this same sow, and they are sired by Frankfort K., a commingling of blood lines that should mean considerable if prize winning blood means anything. He certainly has a good growth on these, and in fact he has a splendid growth on all of his pigs. He also has a good litter sired by Pat Crowe, out of a daughter of Glendale Critic, dam by Gold Dust Jim. Mr. Pritchard also has some good litters by Welsh Vanderhilt, and an April litter by Kan't Be Beat, out of an Ohio Chief sow. Two of the good Welsh Vanderhilt litters are out of Royal Plummer and Pericles H. dams, its later being a winner of second prize at Sioux City two years in succession. Frankfort K., this great son of Improver II, has done well in Mr. Pritchard's hands and he may be seen at the fairs this fall. Breeders will be interested in taking a second look at him because he has developed into splendid form. Here are a few of the good litters now on the farm: Carroll Beauty, the first prize gilt at Sioux City, 1906, by Carroll, Lady 121376, sire Welsh Vanderhilt 40567, now has a litter of seven, farrowed March 4th by Frankfort K.; Miss V. W. by Victor 30013 by Chief Luther 25155, dam Lodes 93772, has a litter of eight, farrowed March 24th by Frankfort K.; Miss N. B. 121368, by Pericles H. 29733, dam Rosebud C. 51790, raising litter of eight by Welsh Vanderhilt; Fancy Belle K. 121372, by Royal Plummer 21015, dam Fancy Zoo 50562, raised a litter of six by Welsh Vanderhilt;

Critic's Fancy by Glendale Critic 33293 dam Sunshine II. 71502, raised a litter of seven by Pat Crowe 48695, Little Girl, by Griff's Banner 38555, by Suburban Chief 21847, dam Uneeda Top Notcher 95688, by Tip Top Notcher 20729, raised a litter of eight by Top Notcher Chief 29247. Mr. Pritchard's advertisement begins in this week's issue and he will hook orders for spring boars at any time. Anyone wanting a Kan't Be Beat pig should write him and he will have some good ones by Welsh Vanderhilt and Frankfort K. Kindly mention The Homestead when writing. See page 23.

## CLARK & TRYON'S DUROCS.

A representative of The Homestead recently paid a visit to the herd of Messrs. Clark & Tryon, of Wausa, Neb., and found them caring for a splendid crop of pigs. Each succeeding year these men have raised the standard of their herd, until today they have one of the best herds in northern Nebraska. This year they have 100 spring pigs and about twenty-five fall boars and gilts. Their spring pigs are sired by Peter Pericles 57059, a son of Pericles H. 29733, the Bevington boar that won three times in succession at the Interstate Fair. The other boar that has sired them a lot of good pigs this year is Sam Patch 50973, a son of Sam Patch (a Nebraska State Fair winner and also second-prize boar at St. Louis). The dam of this boar is Royal Lass by Nathan, the latter boar being one of the good ones used in earlier days in Nebraska. They have about twenty-five spring pigs by him. They have also used a son of Proud Advance, but sold all their sows bred to him. They have a good litter by Glendale Critic I Am, a full brother to Crimson Critic, the Nebraska State Fair winner. One litter by Clovercroft Orion out of a Top Notcher sow, and one litter by Jumbo Critic out of a Malcolm's Model sow. They also have a litter by Advance Lad, a full brother to Proud Advance, out of an Orion sow. In fact these gentlemen have the best lot of pigs they have ever raised, and as to the blood lines it is diversified enough to fill the requirements of any of the boys. Messrs. Clark & Tryon have endeavored to keep in the front of the procession, and have therefore bought liberally this winter, and are in a position to fill orders for all their old customers, as well as the new ones. They are reliable breeders, and do not sell anything that is not strictly all right, and if it should prove to not be right, they will make it right. That is their motto and they live up to it. They have eighteen fall and winter boars for sale, and these are ready to do service at any time. Their advertisement will begin in The Homestead in July, but if any of our readers should want a pig they should write Messrs. Clark & Tryon at once. Kindly mention The Homestead when writing.

## THE LAST CALL FOR THE COLE DISPERSION SALE.

On Tuesday, June 18th, Mr. H. A. Cole, of Chicago, Ill., will make a dispersion sale of his "Tenderloin" Aberdeen Angus herd at the fair grounds, Des Moines, Iowa, at which time he will sell his herd bull, Imp. Electrician, several imported cows and their descendants. There will be sixty-five head in the sale, eighteen of which will be bulls. Many of the cows and heifers will have calf at foot, and all old enough will be in calf to Imp. Electrician or to a young Queen Mother bull that has been used in the herd. There will be three Blackbird females in the offering. One of these is Blackbird of Glen Lea, a three-year-old, with a bull calf at foot by Imp. Electrician. Another is the four-year-old double Gay Dolly Blackbird, with calf at foot by Imp. Electrician, and she will also have a daughter in the sale. Imp. Sherbert of Southgate will have a bull calf at foot by Imp. Electrician, and Imp. Queen of Kirkridge, a three-year-old, will be due to have a calf at sale time by the same bull. Imp. Christie Pride is a three-year-old Pride with a yearling heifer in the sale, and she will be bred back to Imp. Electrician. There will be four Prides in the sale, two females and two young bulls. There will be three Queen Mother females in the sale and one Queen Mother bull. There will be one three-year-old Erica with calf at foot by Imp. Electrician, besides a lot of Georgianas, Easter Tulloch Duchess, Barbaras, Drumin Lucys, Heatherblooms and other well-known families. Imp. Electrician, the herd bull, will be sold with the rest and he should be looked after by some of the best breeders. He will not be loaded with fat, but will be in good breeding condition, and he is right to do good service. Mr. Cole formerly owned Imp. Marmion's Eric, his full brother, and lost him, and he thought so much of him that he purchased his full brother, and he has been his main herd bull. He formerly owned 2d Lad of Emerson, a son of old Gay Lad, and some of the females in the sale will be daughters of his. Among the young bulls will be two Prides, one Queen Mother, one Barbara and one Heatherbloom. When laying the founda-

# 70 Head of Scotch and Scotch Topped Short-horn Cattle 70

From the Herds of A. B. Clark and Wm. Lessman, at

..... WAYNE, : NEBRASKA, : WEDNESDAY, : JUNE : 26, : 1907.....

The Best Lot of Short-horns ever offered for sale in Northern Nebraska.

## 16 BULLS, 54 FEMALES, 25 CHOICE HEIFERS. 10 COWS WITH CALF AT FOOT

**W**E are selling some of the very best cattle we have in our herds, and this offering is largely a draft from one of the largest and best herds in the west. The Scotch families represented in the sale are Queen of Beauty, Mary Ann of Lancaster, Daybreak, Dorothy and Evangeline tribes. The American sorts are represented by Young Marys, Young Phyllis, Sanspareil, Arabella and other well-known tribes. We are offering a grand lot of bulls, ranging in age from 9 months to two years. The cattle that go into our sale are splendid individuals, having lots of scale and plenty of bone. Cows not having calf at foot and old enough will be bred to our well-known herd bulls. There will be sons and daughters in the sale of the \$1,000 bull Merry Marshall, King Champion (now at the head of the C. A. Saunders herd) Lord Banff 20th, Gwendoline Lad 2d, Star of Morning, Golden Champion, Scottish Butterfly, Comamnder and Cumberland. We are contributing twenty very choice heifers, the pick of our herds. We are doing this to give the young breeders an opportunity to get a bunch for foundation stock. The cows are splendid milkers and raise their own calves, always. Write for catalog and come to the sale. Address

### AUCTIONEERS:

Col. Cunningham, Wayne, Neb. Col. Baird, Hartington, Neb.  
Col. Walker, Newman, Iowa. Col. Dennis, Laurel, Neb.  
(Please mention Iowa Homestead when writing for catalog.)

**A. B. CLARK, Wayne, Neb.**  
**W. M. LESSMAN, Wayne, Neb.**

tion for his herd Mr. Cole secured some of the best females in the Chas. Escher dispersion sale at Chicago, as well as many other good things from other leading Angus herds. Recently he sold his 400-acre farm at Belgrade, Neb., where his herd was located, and it was therefore necessary to dispose of the herd. It will be an absolute dispersion sale, and it will be an opportunity for Angus men to buy some choice cattle. Read the advertisement on page 19 of this week's issue and write Mr. Cole for catalog. Please mention The Homestead when writing.

### SHORT-HORN BARGAINS OFFERED BY J. W. McDERMOTT.

Some years ago Mr. J. W. McDermott, of Kahoka, Mo., founded a herd of Short-horns, buying a number of females got by the two great breeding bulls, Grand Victor and Imp. Nonpareil Victor, the bulls that made the herd of Mr. Geo. Bothwell, of Nettleton, Mo., so popular. Some of these were show cattle that were shown by Mr. Bothwell; others were good breeding cows selected by Mr. McDermott for foundation stock. To these were added cows from other herds and a good-sized working herd was established. All were rich in Scotch blood, as well as being choice individuals. To head the herd Mr. McDermott secured at a long price Imp. Cypress 2d 191756, a bull that traces in all his lines to Cruickshank's best productions. He was got by Cypress, he by Wm. of Orange by Roan Gauntlet and out of Orange Blossom 21st. Cypress dam, Clarita, was got by Gondolier by Cumberland, he by Pride of the Isles. The dam of Cypress 2d, Imp. Merry Beauty, was got by Merry Mason, he by Wm. of Orange by Roan Gauntlet. Better-bred bulls are not found and Cypress 2d grew to a 2,400-pound bull, thick fleshed and low down. Mr. McDermott used him for several years and then sold him to go to Illinois, where he is still in service. His get are thick from end to end, with good fronts, well-sprung ribs, full rear quarters and are the easy-keeping, smooth-fleshed kind, so much in demand. Wild Scottish Crown, got by Imp. Nonpareil Victor and out of a daughter of Grand Victor, has also been in service. He is an all red bull with two good ends and a good middle. At the Tebo Lawn dispersion Mr. McDermott secured Fair Goods, got by the champion Choice Goods, and out of the great show cow, Ruberta. As Fair Goods is developing he promises to be one of the great bulls of the breed. At twenty-three months of age he weighs right at 1,500 pounds and in just nice breeding condition. Mr. McDermott could not have made a better selection of the Choice Goods bulls, as Fair Goods is one of the best ever sired by that great sire of high-class bulls. To describe Fair Goods would be describing a hull with so few faults that our readers would question the description, hence we will simply say he is a show bull from the tip of nose to setting on of tail. If all goes well he will be out at the fall shows prepared to stand the criticisms of the best judges. Fair Goods

FOR SALE—Extra good individuals. Priced right if taken at once. Sired by Fancy Crimson Wonder. Limited number sows bred to Lincoln's Wonder for September farrow. W. A. Kirkpatrick, Lincoln, Neb., A. W. Wilson, Bethany, Neb.

### G. W. Way & Son, New Sharon, Iowa.

YOUNG bulls, 6 to 14 months old sired by Benj. Young Mary. Your patronage solicited. H. W. & Son Burlington, Missouri.

Fifty Chester White Boars and Gilts. BOOKING orders for boars and gilts at any time. These are sired by Dandy Boy 12791, a full brother to Modeller, and out of my best sows. Address, J. J. Roddewig, Newcastle, Nebraska.

SHORT-HORN bulls. Breeding traces to Imp. Young Mary. Your patronage solicited. H. W. & Son Burlington, Missouri.

has been in hard service all winter and many fine cows and heifers are being offered that are safe in calf to his service. It may also be interesting to our readers to know that the great show cow, Golden Abbotsburn, purchased by Mr. McDermott at the Tebo Lawn sale, has given birth to a heifer calf by Choice Goods. The calf is now four months old, is a beautiful roan and a great prospect for a fine cow. That Mr. McDermott is pleased to get a heifer is a certainty and especially so as he has the only female got by the greatest show bull of recent times and out of unquestionably the greatest show cow shown in recent years. Just now Mr. McDermott is making a drive on some fifteen yearling bulls, sons of Imp. Cypress. They are all reds, are good, growthy fellows ready for service. They are being priced within the reach of any farmer, as Mr. McDermott wants to close them out. Anyone wanting the bunch can get them at such a price as will enable them to make a nice profit. See page 24 for Mr. McDermott's advertisement and if wanting either Short-horn bulls or cows and heifers write him, saying you saw his advertisement in this paper.

### MAUPIN & APPLIGATE'S DUROCS.

A representative of this paper last week visited with Messrs. Maupin & Applegate, of Shelbina, Mo., saw their herd of Durocs and is pleased at the progress these gentlemen are making in breeding up-to-date Duroc Jerseys. These gentlemen believe that it is by the use of good sires that breeding herds are brought to their highest state of perfection and last year they bought boars that can claim as their sires as great boars as the breed has yet produced. One of these and one Messrs. Maupin & Applegate have every reason to be proud of is Belle's Chief 51323, a son of the \$6,000 Ohio Chief and out of Savannah Belle. He is a litter brother to the \$2,000 gilt sold in Mr. Murphy's bred sow sale and was Messrs. Maupin & Applegate's choice of the boars of that litter after Mr. Murphy had made his selection. Belle's Chief has in no way proved a disappointment to these gentlemen and they are better pleased with him now than ever before, as he has grown out well and is proving an exceptionally good sire. Buddy O. 2d 48597, got by the \$5,000 Buddy K. 4th, and out of a daughter of Tip Top Notcher, was also bought at a long price. He, too, is a good one, having plenty of size, well-sprung ribs, two good ends and a fine head. Queen's Advance 50257, by Proud Advance and out of a daughter of Parnell Banner completes the array of herd boars heading the herd. Queen's Advance is the best Proud Advance boar the writer knows of. Three such royally-bred boars heading a single herd are rarely found and all are contributing toward the upbuilding of one of the best herds in east Missouri. The sows in the Messrs. Maupin & Applegate herd are fully as well bred as are the boars. We find daughters of Proud Advance, Tip Top Notcher, Leader, Goldie's Top Notcher and other sows by good boars raising fine litters by the various herd boars. A former herd boar, Missouri Chief 28141, that was sold to Mr. H. E. Browning, of Illinois, left many fine things in the herd. A crop of fall pigs by him were raised last fall. Among these are a lot of gilts that can only be appreciated when seen. A boar of October farrow by Missouri Chief has been held in reserve, but as they have three boars that are entirely satisfactory as sires the pigs will be priced to some appreciative buyer. He is an evenly-balanced fellow with a fine hack, extra good hams, a set of feet and legs that are good and a fine head. Could his ears be made a trifle lighter he would make a phenomenal show in over six and under twelve months class this fall. Messrs. Maupin & Applegate do not ask a fancy price for him and he should go to some good herd. The crop of sprug pigs are coming on nicely and a number of good prospects were seen. The boar pigs from the herd will be sold at private treaty and the gilts will go in the bred sow sale next winter. Messrs. Maupin & Applegate solicit a share of the patronage of our readers and promise each and every customer an honest square deal. See page 23 for their advertisement and when writing kindly mention this paper.

### MOATS & SON'S DUROC JERSEYS.

Among the good Duroc Jersey herds in northern Nebraska none stand higher in the estimation of the breeders than does that of Messrs. M. S. Moats & Son, of Randolph, Neb. The writer has known this herd since it was first started, and has watched the marked progress that has been made since it was founded. At the beginning, the senior Mr. Moats came over to the Manley sale a number of years ago and made them all go

.... SALE OF ....

## SHORT-HORN CATTLE

On June 19th, at my Farm 4 miles South of Vinton, Ia.

I will sell 47 head of Short-horn cattle, consisting of

## 47 34 FEMALES AND 13 BULLS 47

Fully twelve or 15 calves will be sold with dams. My Scotch herd bull, Prince Royal, will be included in the sale. About half the offering is sired by Prince Royal and those sired by him are bred to the Scotch hull, Scottish Fancy. Note the following pedigrees:

### PRINCE ROYAL 175494.

Dark red, calved October 19, 1900. Owned by Mr. N. P. Halgren.	Sires.	Breeders.
Dams.	Got by Imp. Prince Odeic 136398	W. S. Marr
Sunnyside	Sir Charming 2d 123972	C. C. Norton
Delicacy	Imp. Ducal Crown 97149	A. Cruickshank
Imp. Daybreak 4th	Lorne (45178)	J. Wilson

### SCOTTISH FANCY 278303

Red; calved Dec. 14, 1905. Bred by A. L. Ames, Buckingham, Iowa.	Sires.	Breeders.
Dams.	Got by Royal Rosewood 173629	Thompson & Sons
Imp. Louise 2d	Golden Fancy 234248	J. Black
Imp. Louise	Watchman 144676	J. D. Fletcher
Lily 2d	Gladiator (62650)	M. S. E. Macrae

### ROYAL PRIDE 278302

Red, calved Nov. 20, 1906. Bred by A. L. Ames, Buckingham, Iowa.	Sires.	Breeders.
Dams.	Got by Royal Banner 164584	Owens Bros.
Imp. Louise 2d	Golden Fancy 234248	J. Black
Imp. Louise	Watchman 144676	J. D. Fletcher

### IMP. LOUISE 2d.

Red, calved Jan. 1, 1903. Bred by Wm. Wilson, Banffshire, Scotland.	Sires.	Breeders.
Dams.	Got by Golden Fancy 234248	J. Black
Imp. Louise	Watchman 144676	J. D. Fletcher

This will be a splendid opportunity to buy practical, useful Short-horns. There will be some Scotch cattle included in the sale, among which will be Imp. Louisa 2d, the Butterfly cow, Royal Lassie and the Cruickshank herd bull, Prince Royal 175494 and Royal Pride 278302. The first named is a Miss Ramsden and the last is a Cruickshank Jessie or Louise. These cattle are in the pink of breeding condition, but are not overladen with fat. Vinton is on both lines of the Rock Island road. Parties coming on the Milwaukee should leave the train at New hall. Free conveyance to the sale.

**N. P. HALCREN, Owner**

Auctioneers: Cols. Carey M. Jones, J. W. Hite and David Wilson  
Write at once for catalog, mentioning Homestead.

by buying several of the best things in that sale. The following year he was back again and repeated the performance. This marked the beginning of the Moats herd and from that time until the present this herd has steadily gone forward. Last year they made their initial appearance at the Nebraska State Fair where they landed second prize on their yearling boar, Crimson Critic, a son of the noted Glendale Critic, and he also got third on him at the Interstate Fair. He was also a winner at both fairs on Duroc Challenger's Wonder, their other boar that has done good service at the head of their herd. This year they have 160 spring pigs and we don't remember of their ever having a better bunch, and certainly they never had a better-bred lot. The major portion of these is sired by Crimson Critic, today recognized as one of the greatest boars in Nebraska, and for which a very tempting offer has been refused from several of the best-known and most widely-advertised Duroc Jersey breeders in the West. The pigs they have are sired by him and a number of these will be seen at the fairs this fall. They also own Chimes Advance, a son of Proud Advance, and he has proven a great breeder, and has developed into a splendid hog. They have some good litters sired by him and some of the highest-priced gilts in their last sale were daughters of this boar. They also have a couple of litters by Jumbo Critic, the great big two-year-old that Mr. E. Z. Russell will

show at the fair this fall. One of these litters is out of Moats' Choice, the dam of Crimson Critic, and they expect great things out of this litter. There are two litters by Mo. Gold Finch, one litter by Jim Jr., one litter by Masterpiece and one litter by old Kan't Be Beat out of an Ohio Chief sow. They also have two litters by a son of Ohio Chief, as well as litters by Critic's Echo and T. C.'s Orion. Their old brood sow, Hawthorne by Red Boy, has a good litter by Crimson Critic. She is a granddaughter to old Duroc King and she has been one of the best mothers in the herd. Another good litter is out of Chitwood Lady by Chitwood, Surprise, her dam being sired by Jim. This is the sire of the noted boar, Junior Jim. This litter is also by Crimson Critic. Kruger's Profit by Radiator also has a nice litter by Crimson Critic, and there are two good Reed's Banker sows with litter by Mo. Gold Finch, the boar that now heads the Geo. Blessing herd. Lady Bob 3d, a daughter of old Malcolm's Model, out of a Gold Dust Jim dam, has a splendid litter by Jumbo Critic. If variety of breeding, coupled with show-yard blood, cuts any figure they certainly have it in the Moats herd. They will be out to the fairs this fall when they will be pleased to show the boys the kind of stuff they are producing. This firm have just started in the Short-horn business and have about eighteen head, several of which are Scotch cows. Several of these are nursing

good, lusty calves and they will have some nice young bulls for the trade later on. They also breed Percheron horses, and no firm in the state have put out so many good, serviceable horses as have this firm during the past few years. Messrs. Moats & Son will be pleased to hear from any of our readers at any time and will book orders for boar pigs from now on. If you want a Crimson Critic or a Kan't Be Beat boar write them about it. Kindly mention The Homestead when doing so.

## POUSH'S DUROCS.

A representative of The Homestead recently visited the herd of Mr. A. E. Poush, of Charlton, Iowa, and found him caring for about eighty spring pigs. These are sired by Ohio Chief, Savannah Belle's Chief, Junior Jim, Daisy's Advance, Proud Advance Jr., Orion's Advance and a son of Crimson Wonder 1 Am. Mr. Poush will be remembered as one of the men who paid \$2,000 for the great Ohio Belle, and he now has her on his farm. She is bred again to Crimson Wonder Again, the sweetstakes boar, and Mr. Poush will grow her out for the fall shows. Savannah Belle's Chief, her litter brother, is one of the boars at the head of the Poush herd, and he is also fitting him for the falls this fall, together with his other yearling boar, Daisy's Advance, a son of old Proud Advance. Mr. Poush will have some choice things to offer the boys later in the season, at which time we will take pleasure in telling our readers about them.

## A SPLENDID OFFERING OF NEBRASKA SHORT-HORNS.

An offering of Short-horn cattle that should attract the attention of western farmers and breeders will be the breeders' sale at Wayne, Neb., on Wednesday, June 26th, when seventy head will be offered at public auction. Mr. A. B. Clark and Mr. W. M. Lessman, two of the best-known breeders in northeast Nebraska, are the contributors. The most of the cattle, however, are from the Clark herd. There will be sixteen bulls in the sale, ranging in age from nine months to two years, and the most of these are ready to do active service. There will be fifty-four females, ten cows with calves at foot, and twenty-five very choice heifers. There will be a liberal number of Scotch cattle in the sale of the Queen of Beauty, Mary Ann of Lancaster, Daybreak, Dorothy and Evangeline tribes, together with sons and daughters of such well-known sires as the \$1,000 bull, Merry Marshall, King Champion, Lord Banff 20th, Star of Morning, Gwendoline Lad 2d, Golden Champion, Scottish Butterfly, Commander and Cumberland. The cattle are in nice condition, having had range of the best pastures on a 640-acre farm. We desire to call our readers' special attention to the Clark cattle and the Clark herd. We have known Mr. A. B. Clark since he first bought his foundation Short-horn herd. For twenty-five or thirty years he has been the leading stockman in northeast Nebraska. During that time he has bought bulls for the range and he has purchased and fed out range cattle by the thousands. For years he was the leading buyer in the Sioux City Stock Yards, and therefore knows the cattle business from beginning to end. During those years he learned to love the Short-horn because he could make more money out of them than any other breed of cattle, and when he concluded to found his pure-bred herd he naturally stayed with the cattle that did so much for him. However, there were three things that he always demanded when buying, and these were plenty of scale, good bone and good milkers. He liked a good pedigree, but he insisted on having the individual with it, and today no herd in the West can show as many broad-backed, big, roomy milking Short-horns as will be seen in a half day's drive through the Clark pastures. We never saw Mr. Clark buy a pony cow, but on the other hand when an animal filling his requirements as above referred to came into a sale ring he was always the foremost bidder. The cattle that he will offer in this sale are of this type and are the practical milking, money-making kind of Short-horns that are now in such demand by western farmers. This is essentially a breeder's sale, and not a combination sale. In fact these gentlemen have always sold their own cattle and have never been in what may be termed a combination sale. Mr. Clark will sell fourteen bulls in the sale. Six of these are two-year-olds, all big, lusty fellows, and ready to do the hardest kind of service. One of these is Marshall Gloster, a son of Merry Marshall, and out of Seraphina of Rocky Run by Duke of Gloster. He is a strapping big fellow and will make as large a bull as his sire. Another one of these is Harbinger by Scotch Cup, and one of the best two-year-olds in the sale. Another particularly smooth bull is Cumberland Wild Eyes by Cumberland Hero by old Cumberland, on a Wild Eyes foundation, and he will please many a man on sale day. Mr. Clark will offer four yearling bulls that are ready to do service. One of these is Banff's Hero by Gauntlet's Hero, dam Lucy Banff by Imp. Lord Banff. Another is sired by Gwendoline Lad 2d, a grandson of Imp. Lavender Lad, and another nice roan is by Scotch Cup on a Young Phyllis foundation. He is also selling a few very choice bred October bull calves. One of these is Wayne Banff by Lord Banff 20th and out of the pure Scotch cow, Daybreak's Maid 2d by Gold Bug 57894. Another one of these is Earl Banff by Lord Banff 20th out of Maid of Lancaster 3d by Commander. Both of these are excellent young bulls, and both of their dams will also be sold in the sale. There will be fifty-five head of females, twenty-five of which are young heifers. About ten of these will have calf at foot, while a great many will be right at calving. These have been bred to Cumberland of Wayne, a son of old Cumberland, and Red Gauntlet 2d, a son of the Harris-bred bull, Red Gauntlet. Among the Scotch cows to be sold is Pride B, of Elm Creek, a daughter of Scottish Butterfly and a well-bred Queen of Beauty. She is well along in calf to Lord Banff 20th. Maid of Lancaster 3d is another well-bred Scotch cow, a daughter of the noted bull, Commander, and belongs to the noted Mary Ann of Lancaster tribe. She will also have a daughter in the sale sired by Gold Bug 57894. Rose Champion is a daughter of King Champion out of a Merry Marshall dam. She is one of those well-known Dorothys, of which there are but a very few in the West. Daphne 2d is a

## BERKSHIRE HOGS.

## 1907 Crop of Berkshires at Chapel Hill.

THE spring crop of big-boned English Berkshire pigs, has been arriving at Chapel Hill for some time, and to my Homestead patrons and others who wrote for boars and brood sows bred, only to find me entirely sold out, I would say "get your orders in early for the present crop." Address, W. D. McTavish, Coggon, Iowa

daughter of Lord of Wildwood, a most excellent milker, with a nice bull calf at foot by Lord Banff 20th. Florette is a four-year-old daughter of Golden Champion, the bull that formerly headed the Funke herd at Greenfield, Iowa. She has a good bull calf at foot. There is a splendid lot of these Scotch-topped cows in the sale and many of them are splendid milkers. Among the good heifers is a nice roan October calf called Lady Gauntlet by Roan Gauntlet, a Scotch-topped Buttercup. Another nice three-year-old heifer is a daughter of Star of Morning, a bull that was well-known in the show rings of Canada and was afterwards brought to Nebraska. She has a bull calf at foot. There will be a nice bunch of heifers in the sale and a man could easily get enough here to found a herd. Mr. Lessman sells a three-year-old heifer sired by his former herd bull, Scotch Fashion, and two yearling bulls, one sired by Scotch Fashion and one by Gold Coin. In this sale will be a splendid lot of bulls and some excellent cows and heifers. There will be a grand good lot of milkers in the offering and both farmers and breeders can well afford to attend this sale and buy some of these cattle. Write Mr. A. B. Clark, Wayne, Neb., for catalog and mention The Homestead, and then be sure to attend the sale.

## LAST CALL FOR N. P. HALGREN'S SALE OF SHORT-HORNS.

The farmers and breeders of eastern Iowa will have an opportunity to attend a Short-horn feast at the farm of Mr. N. P. Halgren, four miles from Vinton, Iowa, on June 19th. On that date Mr. Halgren will offer the breeders and farmers of the middle West an opportunity to buy his herd of Short-horns without reserve. The herd has been built up on practical lines until it now numbers better than fifty head. All of the desirable or salable cattle will be contributed to the sale. Certainly the time of year is propitious for a successful sale, as buyers can take their new purchases home and place them in their pastures at very little expense for keeping during the next six or seven months. As evidence that this herd is a business one and that the female portion are prolific, we will state that there will be fourteen calves sell with dams, making sixty-one head of cattle in the sale, with but forty-seven catalog lots; in fact, practically everything that is of sufficient age have calves at foot or are bred to calve at early date. While the offering of Scotch cattle is not large, the north country Short-horns are, however, represented not only through the two Scotch herd bulls, but Lot 2 of the sale catalog is a splendid imported cow called Louise 2d. She is a massive red cow, four years old, and belongs to Mr. Cruickshank's Jessie or Jealousy Pride. Imp. Louise 2d is one of those very useful, breezy looking matrons that will appeal to any lover of Short-horns at first glance as being a profitable investment. She has a bull calf, red, that is the making of a show calf if properly developed. He now gives every promise of being a most excellent prospect. Another good Scotch cow will be found in Lot 3 of the catalog, Royal Lassie. She is a red cow of Mr. Cruickshank's famous Butterfly family, tracing to Imp. Butterfly 45th and she out of Butterfly 37th by Champion of England. Royal Lassie was sired by Royal Rosewood. Royal Rosewood was a Scotch bull got by Imp. Royal Archer, while her dam Lassie was by Master of this Mint 4th and he by the imported Scotch bull, Master of the Mint. The Cruickshank Butterflies are admitted to be one of the old staple families that assisted in making Sittytown history. The great bull, Cupbearer, was of this famous family. Mr. Halgren has been rearing these Short-horns in a way to develop their milking qualities, and in this herd will be found a goodly number of very heavy milkers, a point of vantage not to be overlooked by any Short-horn breeder who is endeavoring to build up a business herd. It is conceded by our most successful breeders that in their experience their best breeding cows have been their heaviest milkers. Only a few years ago when Professor Curtis was visiting the Hon. Wm. Duthie, at Collynie, Scotland, he asked that sage of Collynie what type of cows were his best breeders. The quick response came forth, "A' maun, the heaviest milkers, sure." Many of the cows at the Halgren farm have been milked by hand and the quantity and quality of the flow is readily known to the proprietor. At the present time, with land selling at \$100 and upward per acre, it behooves every farmer who keeps a cow at all to keep a good one. The mediocre sort scarcely ever paid their way when land was worth \$50 per acre, and with our farms at present prices, only the best "double deckers" can be made profitable. There will be thirteen good bulls listed in this sale, including the two Scotch bulls previously referred to, and among this number are several farmers' bulls that will likely sell at a price that any farmer can well afford to own them. For the sake of those who may be tenacious for color, we will state that practically the entire offering are deep reds. While this may not add anything of importance to the lover of good cattle who is not tenacious for color, it will insure to those who are looking for reds alone that they can find them at this sale. Mr. Halgren has made ample arrangement for the free conveyance of all his visitors from a distance from Newhall, Iowa, which is south of his farm on the C. M. & St. P. road, as well as from the town of Vinton. Vinton is only some thirty miles from Cedar Rapids and very easy of access from every direction. Mr. Halgren will be pleased to send one of his catalogs to every Homestead reader who makes application for the same. They are from the press of Mr. F. P. Healy, of Bedford, Iowa, who perhaps prints more sale catalogs of the Short-horn breed than any other concern in the middle West. The date should be kept prominently in mind, Wednesday, June 19th.

## ABERDEEN ANGUS CATTLE.

## Holbrook Aberdeen Angus Breeders.

COMPRISING the allied herds of P. J., M. H. and Mike Donohoe and John and Michael Cash of Holbrook, Iowa. 200 head of choice Daddies within a radius of two miles of Holbrook. # ADMINISTRATOR'S SALE OF THE GREAT .....ABERDEEN ANGUS HERD.....

The property of the estate of the late Hon. L. H. Herrick

\*\*\*\*\*  
**ON THE  
FARM  
BLOOMINGTON,  
ILLINOIS.**  
\*\*\*\*\*

\*\*\*\*\*  
**Tuesday,  
Wednesday,  
Thursday,  
June 25-26-27**  
\*\*\*\*\*

Following the instructions Mr. C. A. Ewing, administrator of the above estate, this entire famous herd numbering 253 head besides calves at foot will be auctioned. Thirty-seven bulls and 216 cows and heifers are cataloged, constituting the largest dispersion sale that has occurred in the history of the breed. They represent the blood with which Mr. Kerrick succeeded in producing more champion market topping steers than any other man and the blood which has given him the honor of having done more for American breeding interests than any man engaged in the business. The offering includes the great \$5,000 stock bull Imp. Lord Fretful, and numerous of his get and thirty other representatives of the same family; the Trojan-Erica bull Eric 9th of Keillor Park; the double Blackbird bull Black Boy of the Wells; the Blackbird topped Pride bull, Afton Jam; and other high class herd headers. It is a great list of females cataloged including members of the Blackbird, Erica, Pride, Lady Fanny, Queen Mother, Heather Bloom, Antelope, Mina, Pearl, Maid of Orleans and other noted strains all of which have produced animals of the excellent type for which the herd is famed. Purchasers to the amount of \$300 will have railroad fare refunded. The sale will be held on the farm some twelve miles south of Bloomington, and the catalog, which contains full information concerning how to reach the farm and interesting details concerning the herd and the auction, will be mailed on application to

**W. C. McGAVOCK, SALE MANAGER, - - - SPRINGFIELD, ILLINOIS.**

27 High-grade heifers will also be auctioned some time during the three days of the sale.

## SHORT-HORN CATTLE.

### CRUICKSHANK ....Herd Bulls....

FIVE Top Notchers, four reds and one dark roan, one Lavender, one Victoria, one Dorothy, one Mary Anne and one Spleenwort or Secret. These bulls will compare favorably with the best. If you have any doubt, say, just come and we will take pleasure in showing you. We are from Missouri.

**ISAAC A. NOVINGER & SONS,**  
Kirksville, Adair Co., Missouri.

WHOLE NO. 2605

### PEDIGREE AND INDIVIDUAL MERIT.

Men will never come to an agreement in their practice concerning the relative importance of pedigree and individuality in the raising of pure-bred animals. The reason for this is that all men who handle the same breed of live stock do not aim at the same thing. Some like to follow the fad of using only popular blood lines when new blood is infused into the herd; others emphasize in the main a particular color cast; still others keep shifting their position by infusing into their herds the blood of animals that become popularized in the show ring from year to year, while only a comparatively few aim at the right type of animal irrespective of where the blood comes from within the breed that produces the results sought. If men could unite in their aim, and that aim be to produce the most useful type, it would mean the rapid raising of the standard.

Concerning the relative importance of individuality and pedigree, Mr. S. F. Lockridge, in a paper prepared for the Short-horn Breeders' Association on the subject, "On What Lines Will the Best Short-horns of the Future be Bred," says:

The successful breeder of the future will, in my humble judgment, be a firm believer in the value of pedigree, but he will insist that it be accompanied by unquestionable proof that the characteristics of the ancestors were such as to insure the perpetuation of the good qualities in the offspring. He will not refuse to introduce into the herd sires bred from close affinities, provided they possess in an unqualified degree the qualities already referred to, but he will resolutely reject all that do not measure up to that standard. On the other hand, I believe that the breeder of the future will not be hampered by the fact that the material he selects is not line bred, but that he will unhesitatingly make use of miscellaneous bred animals, always conditioned upon the fact, however, that the converging strains are from the herds of men known and acknowledged to have been distinguished and reputable as breeders in their several ways. And in so doing he will but follow the precedents left him by the greatest breeders of the past. I have used the term "miscellaneous bred" because it is the common way of expressing the mating of animals of different families or strains of blood; but to my mind it is a misnomer, and in its general application has been given too broad an interpretation altogether, conveying the impression of the crossing of distinct breeds, rather than of animals having a common origin and carrying more or less percentage of the same blood, either in the direct or through collateral lines. All our families of Short-horns were of miscellaneous bred origin and after they had been subjected to a course of close breeding long enough to establish a type and become known as a distinct family were reinforced and renewed by the infusion of extraneous or new blood, as I have endeavored to show. Not one of the great families, by whomsoever bred, but was subjected to this treatment to a greater or less degree. The fact that the cross of new blood was made by the hand of the master breeder was all that was necessary to make it acceptable to the votaries of fashion. Yet when the supervising hand and brain were gone, and some disciple of the departed great one, seeing the necessity of reinforcement, goes for a change of blood, although the wisdom of the course is seen in better individuality, better vigor and constitution, he is met at once with the charge of treason, and the market value of the offspring is lowered two-thirds. We have all witnessed to what extent the fashion craze may go, whether in color or blood lines, and we shall not soon forget the wild tempest of speculation that swept over the land a quarter of a century ago, when pedigree on paper, regardless of merit in the animal, ruled the hour; when the great army of breeders resolved themselves into hostile camps, hurling anathemas against each other and trafficking

and conjuring with the magic of a name. Happily for the breed and for the breeders those conditions are passing away, it is to be hoped never to return. The breeders of the present generation are becoming less and less subject to the craze infatuations, and it is morally certain that the man of the future will be altogether independent of them. He will breed for the best results, always keeping in mind the ultimate purpose to be accomplished, namely, the production of beef and milk; and with better material from which to select better conditions, both economic and sanitary, better knowledge of foods and manner of feeding, better prices and quicker sales, there is no reason to fear for the future of the breed we love so well.

It is devoutly to be wished that the prophecy made by Mr. Lockridge will gradually be fulfilled during the days of the present as well as during the times of the rising generation. Of course there will always be much in a name, whether it be the name of a famous animal or the name of a breeder who stands out among his fellows because of his ability to so intermingle blood lines as to fix or tend to fix the desirable characteristics. It is proper that men should follow these leaders, and it will always be the case that the blood of the notable animal will be held at a premium. It seems, however, as though we have been placing a little too much stress upon the possibilities of winning animals reproducing themselves and upon the virtue of even faint traces of popular blood lines in an animal.

Mr. Lockridge enunciates a safe rule to go by when he says that the breeder of the future will not be hampered by the fact that the material he selects is not line-bred; that he will use miscellaneous bred animals, but that he will see to it that the converging strains are from the herds of reputable breeders. The results of line breeding, when intelligently practiced, are altogether too cer-

tain to justify discarding the practice, but in keeping up the constitutional powers of the individual, out-crosses must be made, and if these are violent so far as blood lines are concerned they should be as close as possible in the matter of conformation and constitutional powers.

### COST OF FILLING THE SILO.

We believe there is more interest being taken in the silo question today than ever before in the past. This is no doubt due to the fact that the experimental stations, as well as successful farmers who have used the silos properly, pronounce them a success as a means of keeping fodder in the best possible condition for winter feeding.

The department of agriculture at Washington has recently made a study of the cost of filling the silo, and the result of that study is contained in Farmer's Bulletin No. 292. The department found that under average conditions it required from six to ten men to do the work satisfactorily and from two to four teams, depending on the distance to haul. Labor was reckoned at 15 cents an hour and labor for two horses placed on the same basis. Engine hire, including the engineer, was placed at \$4.50 per day; twine cost eleven and one-half cents a pound; coal \$5 a ton and gasoline thirteen cents a gallon. The charge for an engine, engineer, silage cutter and one man to feed was placed at \$10 and ten hours was considered a day's work.

On thirty-one farms where methods were examined and the cost of everything inquired into, the cost per ton averaged sixty-four cents, the variation running from forty-six to eighty-six cents

per ton. On these farms the average yield of silage per acre was 9.01 tons, so that the average cost per acre for putting the corn into the silo was \$5.94.

The three principal plans of handling the fodder in vogue are described in the bulletin referred to, as follows:

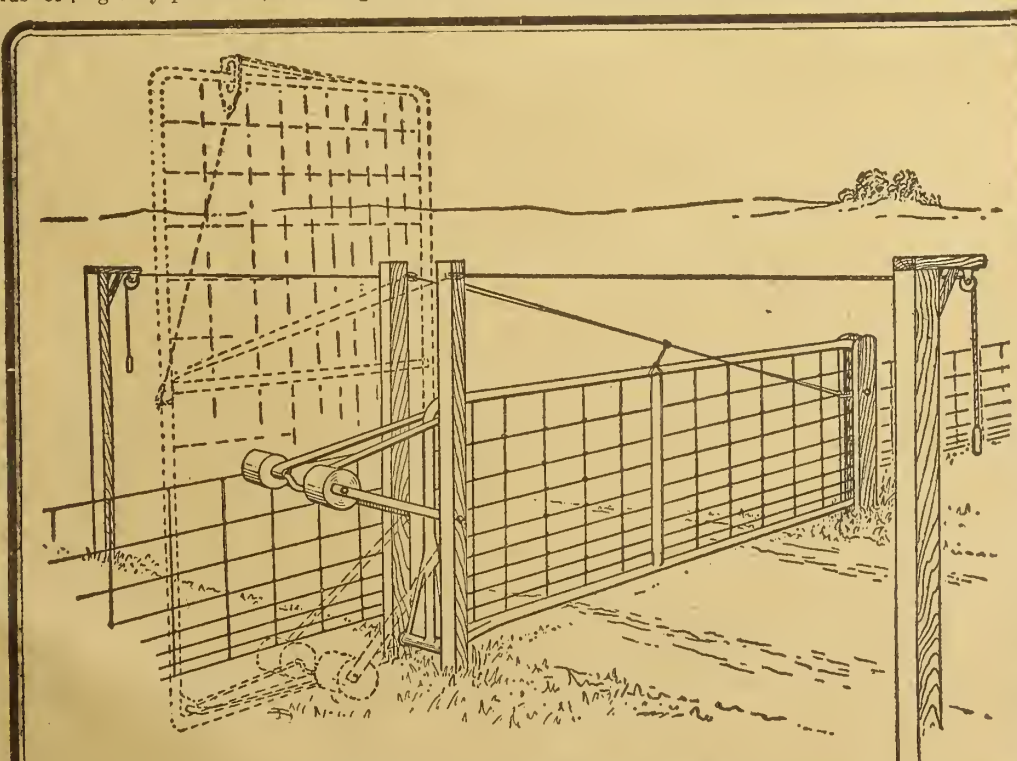

(1) The most common practice was to have one man with three horses on a corn harvester cutting corn in the field; two men to load the wagons in the field; three or four men with teams, depending on the distance from the field to the silo, to haul the corn to the cutter; one man to run the engine when steam was used for power, and, occasionally, when gasoline engines were used, one man to feed the cutter and one man in the silo to spread and tramp the silage. Each teamster pitched off his own load. This makes a crew of eight or nine men, exclusive of the man who tends the engine.

(2) In cases where there is a shortage of teams the following method is generally practiced: One man, with three horses, cuts the corn; two men load the wagons in the field; two men, or boys, with teams, haul the corn to the cutter; one man unloads the wagons; one man feeds and one man works in the silo. As soon as a load arrives at the cutter the teamster changes his team for an empty wagon and goes back to the field after another load. When a wagon is unloaded it is run out of the way by hand. With this method boys who are not strong enough to handle the green corn can be utilized to drive the teams. This method requires a crew of six men and two boys, exclusive of the engine tender.

(3) When enough horses are available and help is scarce, the following arrangement of men and teams is a good one. One man, with three horses, runs the harvester in the field; four men with teams haul the corn to the silo; one man feeds and one spreads the corn in the silo. Low trucks or wagons with racks suspended below the axles should be used, so that the teamsters can put on their own loads. This requires a crew of seven men, besides the engineer.

It was formerly thought necessary to cut corn for ensilage in an immature state, but at the present time the consensus of opinion favors letting the grain mature. This means that the crop must be cut after the grain dents, but before the leaves become perceptibly dry. If, for any reason, cutting is not done until the lower leaves begin to dry, water should be added to the ensilage before it is blown into the silo. In allowing the crop to mature the ensilage will contain less acid and it will also be more nutritious, as the food materials in the corn plant continue to increase until the plant approaches maturity. By cutting too early there is an actual loss of plant food in addition to the fact, as said before, that the ensilage becomes too acid.

Many of our readers have not forgotten the inconvenience that was caused in certain parts of the central West last year by a lack of fuel supply. In some cases it was absolutely impossible for railroads to transport coal. In order to prevent the same situation from arising again, the railroads are advising the storage of coal now while cars are available. We pass along this advice to our readers on the farm, knowing that it is a much safer practice to store a goodly part of the coal supply now than it is to wait until cold weather. Coal is cheaper now than it will be next November. The wagon roads are better now for hauling purposes, and those who put in their supply at the present time will have no reason to regret their action.

THE RICE AUTOMATIC TILT GATE.

The Rice Automatic Tilt gate, of which the above is an illustration, should appeal to every farmer who is looking for an absolutely automatic and practical gate. It is offered by the manufacturers as one of the latest and best improved automatic gates on the market. It was patented in May, 1907, which accounts for this fact. The construction is entirely of steel, and guaranteed throughout. In operation the principle is very simple and the gate can be opened from any vehicle. This same firm manufactures the Nebraska Automatic Swing gate which they sell at a lower price, as advertised on page 13. The cost of either of these gates makes it possible for any farmer to invest in one or several. Those who are interested in better gates and more convenient ones should write today for prices and literature to the Rice Bros. Manufacturing Co., Harvard, Neb.

# THE HOMESTEAD

A Practical Journal for the Farmer, Stockman, Fruit Grower, Poultryman, Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

**SUBSCRIPTION RATES**—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to getter up of club. In clubs of fifty or more, 30 cents a year; in clubs of one hundred or more, 25 cents a year. Single subscription three years in advance \$25, five years in advance \$35, ten years in advance \$55. Subscription price in Canada, \$1.50 a year. Remit by draft, registered letter, post-office or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send your old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to  
**THE HOMESTEAD COMPANY,**  
Des Moines, Iowa.

## RULING OF AMERICAN MEAT PACKERS' ASSOCIATION.

The following communication has been recently addressed to live stock shippers signed by the American Meat Packers' Association, of which Michael Ryan is president and Geo. L. McCarthy is secretary:

In order that shippers of live stock may clearly and correctly understand the position of this association in respect to the purchase of female cattle subject to post mortem inspection by the United States Meat Inspection Department of the Bureau of Animal Industry, we beg leave to state the case as follows:

The packers of the United States, as represented by this association, should not longer pay for such animals condemned as unfit for food by government inspectors. No change has been made in the method of paying for such stock when purchased. We contend, however, that the purchase price of condemned animals bought subject to inspection shall be refunded by the seller, less the full market value to be allowed for hide and offal, claim to be made within forty-eight hours after purchase.

One reason for applying this rule to female cattle only is that tuberculosis is largely confined to dairy cows and from them the disease is communicated to other classes of cattle and hogs. We are assured by the best authorities that if the disease in cows is stamped out the result will be its final disappearance in all live stock.

For these reasons we ask the co-operation of live stock breeders and shippers in an earnest effort to wipe out the disease, feeling sure the justice of our position merits its approval, in addition to the fact that shippers of sound animals should no longer contribute to the carelessness and negligence of breeders and shippers of diseased animals, as evidenced by the increase in the price paid for healthy animals as a result of our stand against the payment of those diseased.

As we interpret this ruling it means that packers will pay commission men for everything purchased as heretofore, thereby placing the responsibility of withholding purchase price from original seller with these firms until the result of post-mortem examination is known.

## FINISHING STEERS ON GRASS.

The following communication has been received from a subscriber at Wilton Junction, Iowa:

I have twenty-two steers that I have been feeding since last December and I am undecided whether to finish these steers in a dry lot or turn them to grass and feed a ration of grass and grain for two or three months more. If they are turned to grass, would you advise feeding corn and linseed meal? I have seventy hogs to follow these cattle.

Without knowing just how fat these cattle are it is difficult to give advice that will be sound. If they have been well fed since last December they ought to be getting rather thick in flesh, and in that case it might be advisable to finish them up in the dry lot during the next two or three weeks and market them. By handling them in this way they will command a much better price than grass cattle and will possibly be as heavy by the end of May in a dry lot as they will be by the end of June if they are now turned to grass. We have known instances where it has taken a full month after cattle are turned to grass to make them as heavy as when they were turned on. This is liable to be the case where they were grained somewhat heavily before being grassed.

The advice given above applies, as stated in the outset, if the cattle are nearly finished. However, if they were very thin last December and have not been fed heavily during the winter it might pay, and pay well, to turn them to grass now. keep up the grain ration, allow the

hogs to follow and plan to finish them up about the time hot weather begins. We would not feed oil meal while they are on grass, but would be somewhat liberal in the use of corn. It is difficult to improve on a ration composed of grass and corn. If the pasture is good these steers will make extra good gains if fed

grain once a day—say in the evenings. By feeding only once daily they make cheaper gains because they are more largely made from grass. There is also an immense advantage in feeding at night compared with morning, as the steers will graze much better during the day.

## Iowa Swine Breeders Meeting.

With 100 breeders from all sections of the state, including a few prominent ones from Nebraska, the Iowa Swine Breeders' Association opened their meeting Tuesday, June 11th, with an address by President Wm. D. McTavish, of Coggon, Iowa, in which was expressed the opinion that the hog is truly making Iowa famous as well as wealthy, and that there is just reason for thankfulness and felicitation over the prevailing conditions of the swine industry throughout the state. The text of the talk was:

"Iowa has practically twice the number of swine of any other state, and produces more than one-seventh the number raised in the entire country. A great cause for gratification is the new swine pavilion on the state fair grounds which is being erected at a cost of \$75,000. This will be a great stimulant to the swine industry of the state. By the continuation of the present progress and improvement of the swine industry the success of the future will be assured."

PRES. M'TAVISH.

Mr. Harvey Johnson, of Logan, Iowa, followed with an address on "Piggy's Troubles," and while it is an old subject he presented it in a very interesting and instructive manner. In part Mr. Johnson said:

"It has been said that 'man is born to trouble,' and this applies very aptly to little pigs, and it does not make any difference to what breed they belong; nor whether they were sired by a hog that sold for \$25 or one that pretends to sell for \$25,000; nor whether they have for their dam the sow that holds the world's record for a high-priced sow, or whether it is the good, but homely old sow that we keep in the back lot out of sight. They are all subject to the same troubles, and require the greatest watchfulness to avoid them, or to successfully treat them."

"Among the first troubles to appear will be sore mouths. This can often be avoided by removing the eight large teeth soon after farrowing. It is a form of blood poisoning and is usually started by lacerating each other's mouths in the struggle for location at the dinner table. When started and in bad form the proud flesh should be removed and then thoroughly cleansed with a dip or carbolic solution."

"Next will be thumps—that trouble that always takes the prettiest and best, and the ones that we fancy are headed for the show ring. This trouble can better be avoided than treated when once acquired. I have tried a number of so-called remedies, but there is not one of them that I would recommend. Continual watchfulness is what counts here. Every pig that shows a tendency to get too fat should be made to exercise, and if this cannot be done sufficiently it should be removed from the sow and kept away at least a part of each day. Treated in this way they will be reduced in flesh and when that is done the danger will be past."

"Next will be scours, the most common and the most destructive of all the pig disorders. There are various causes for it, and fully as many remedies. Among the causes are: a sudden change to damp weather; wet and foul nests; over-feeding the sow; a sudden change of feed; or feeding something sour. Among the remedies are: reduce the sow's feed. If an old sow, feed less slops and more dry feeds. Feed her some parched corn, burnt flour, some soda, copperas or lime water. In our own work when a pronounced case appears, we first clean the nest thoroughly, then apply air-slacked lime and give fresh bedding. Then reduce the sow's feed and give her a teaspoonful of lime or copperas. In cases where the trouble seems to originate with the sow, we feed her soda or burnt

flour or parched corn. In obstinate cases, those that will not yield to the usual treatment, we administer direct to the pig a dose of from three to five drops of laudanum."

"The young pig will not live long before it will be troubled with worms. Some are not troubled to the extent that it is noticeable, and others so badly that it is very noticeable, in the loss of appetite, dead appearance of the coat and in the general unthrifty condition. The diarrhea that often appears in pigs of from six to twelve weeks old is almost always caused by worms, and when they are destroyed, the trouble disappears at once. Worms are the cause of more troubles in pigs and young hogs than is often supposed. They get sick and die and we call it something else, when the truth is that worms did it. For treatment we have found nothing better than santonin. Take one ounce, dissolve in warm water, mix with slop and feed to seventy-five to a hundred head of pigs, depending on the age of the pigs. Feed it the first thing in the morning and repeat the dose in three or four days."

"These are the principal troubles that will come to the pig while he is small. When he has more age he will become eligible to hog cholera, swine fever, and kindred ills, and opens up a proposition that is fraught with deep mysteries, where the more we see of it the less we know about it; where a cloud seems to come into our lives and fortunes are lost. We will not touch upon it, for we dislike to think of it unless compelled to do so."

"On every farm where hogs are raised to any extent there should be a dipping vat and it should be used regularly during the summer and fall; at least once in two weeks for pigs and young hogs and once in four weeks for older ones. I know of no one thing that will do as much toward eradicating disease and all the ills that pigs are heir to as will the intelligent use of the dipping tank."

"Raising pigs can very truthfully be called detail work. He who would make it a success must enjoy the work and must be willing to look after the many details that demand attention and it will pay and pay well. Some think the occupation is crowded. But for the careful, honest young man who likes stock there is now and always will be a place, whether he breed pedigreed animals or raise them for the market."

In handling the subject of caring for the litter, Mr. J. M. Stewart, Jr., of Ainsworth, Iowa, stated that no definite rules could be laid down for two reasons. First, because no two sows could be handled alike; and second, that no two litters required the same care to produce the desired results."

"One of the most essential things," said Mr. Stewart, "is proper condition at breeding time, and keeping the sow in good condition until the time of farrowing. You want to be very careful to not overload the sow with fat, for it will make her sluggish, causing her to overlay her pigs. You must see that the sow takes plenty of exercise, and it is a good idea to have her go at least twenty rods from her bed, for feed and water. If you have her properly fed and if she takes plenty of exercise, you will have but very little trouble at the time of farrowing. A sow in the proper condition, given a dry warm bed, and furnished with plenty of bedding, will generally take care of her own litter."

"If you do not spend a reasonable amount of time with your sows to gain their confidence, there are very few that will peacefully allow you to handle their pigs. Sows which are easily disturbed and jump up every time you come near them, are better off if you stay entirely away."

"After farrowing, leave the sow as quiet as possible, giving her plenty of water. Place it near so that she may have it as often as she desires. I feed dry oats and bran mixed, as the sow's ration, for the first few days after farrowing. I gradually mix a little chop-feed in her water, and feed her a little corn along with oats and bran, until I

## 10 Points to Consider When You Buy A Buggy.

Buy direct from the factory. My \$45 Knox Special Top Buggy is sold that way. No dealer's profit for you to pay. No salesmen or jobbers for me to pay to sell my buggies. I sell direct to you. Get my Knox Buggy on 30 days' trial. Use it a month, test it in every possible way, and send it back if not satisfied. And I will pay the freight both ways.

Be sure your buggy is guaranteed by a reliable maker. I guarantee the Knox for two years. That is another advantage of dealing directly with me.

My \$45 Knox Top Buggy is a comfortable rider. It has a wide, roomy seat. That very same buggy at your

local store sells from \$75 to \$90. So you easily save \$30 in jobber's and dealer's profit.

The body is 24 inches by 54 inches. The gear is oil tempered. Long distance, full clipped axles. Easy riding spring. Full plated reaches.

The shafts and wheels are guaranteed to be split hickory. Oval edge tires.

My Knox buggy is handsomely painted and tastily upholstered.

It has a four bow leather top. In short, it's the leader of my big line of buggies, carriages and vehicles of all kinds. Remember, I sell them all straight from shop to buyer, guaranteed, and a big saving to you.

Send for my big buggy book. It's free. Tells more about my line. But order my \$45 Knox Buggy now, right from this advertisement. You are safe. Address

R. M. Knox, President,  
Western Harness & Supply Co.,  
613 Commercial St., Waterloo, Iowa.  
P. S. Have been advertising in The Iowa Home stead for six years.

get her on feed, which should be when the pigs are about ten days old. Here no rule can be definitely laid down, as it all depends on the size of the litter and the amount of milk given by the sow. It is better by far to underfeed than to overfeed for the first few days, but you must feed enough to keep the sow quiet. After the second day, if the weather will permit, you want to coax her from her litter and see that she takes a little exercise each day. I generally call the sow out by the use of a little feed, and if I have not thoroughly cleaned out the pen, would shut her out and put in fresh bedding.

"You must watch the pigs and if they begin to get too fat, feed the sow less. If the pigs are not getting enough, increase the feed."

"I keep the litters separate until they are at least four weeks old and then there is not much danger of the pigs cheating one another. As soon as the pigs are old enough, I make them a feed-pen where they can eat by themselves. Then I gradually quit the feed on the sows. A good clover pasture is one of the most essential things we Iowa farmers can have for our pigs, as it gives us the protein in the cheapest way. You should be careful about feeding the pigs too much corn. We find the best feed is sweet milk, oats, mill-feed, some dry corn and if possible a good clover pasture. Too much corn makes the pigs fat, and they do not grow the bone that they should have to make a good, desirable hog."

Dr. J. H. McNeil, veterinarian at the Iowa station, addressed the meeting on the disease of swine and the sanitary aspect of such, as known up to the present day. He expressed his belief that within a few years many new and important discoveries will be made for the prevention of many of the common and fatal diseases. Instead of allowing diseases to develop and expecting to apply curative measures, which are generally impractical, Dr. McNeil advised that much more attention should be given to hygiene and preventive medicine. In other words, to get busy with coal tar disinfectants and institute a general cleaning up. The substance of his paper is as follows:

"Nothing permanent is gained in raising

DR. J. H. McNEIL.

ing a fine lot of animals and then by neglect allowing them to become infected and die from some preventable infectious disease," was the text of Dr. McNeill's address. "Why not pay more attention to the few principles that underlie the important subject of sanitation and not devote all the time to selection, pedigree and performance of individuals? We have been twenty centuries in reaching the present condition of sanitary intelligence, but even at this day some of the most important and simple sanitary measures are neglected by intelligent people, or are opposed for financial reasons. It is a significant fact that almost every attempt made on the part of sanitarians to prevent the spread of disease among animals has met with the greatest opposition among stock holders. It is a painful, penny-wise and pound-foolish policy. If stockmen could only see how much more economical it is to isolate or destroy all diseased animals than to allow them to remain as distributing centers for disease, much greater care would be exercised in this capacity.

"The causes of disease are simple or complicated and are so often impossible to locate that the importance of preventive measures cannot be overemphasized. For example, heat, if excessive and prolonged, exerts a very deleterious effect on the animal. Cold is equally detrimental, and when proper housing is not provided chilling occurs and pneumonia or pleurisy results. This is especially true where a large number of hogs are kept together.

"The condition of the atmosphere when charged with offensive gases from manure pits or other foul places is often the direct cause of disease. Some people foolishly believe that the ammonia arising from heated manure is healthy, which, however, is a fallacy. Bad air reduces the resistant properties of the body. It induces a state in which the natural defenses are weakened and an avenue for infection established. Foul air and overcrowding are perhaps the prime factors in the production of swine troubles. Darkness also deteriorates the general health, and makes it possible to have corners accumulate with filth, where if plenty of light were allowed such would not be the case.

"It is not easy to imagine the amount of disease caused by the use of impure water, but we are sure that it is not conducive to good health. It is certain that such diseases as cholera, swine plague, anthrax and tuberculosis may be transmitted through the medium of streams. The water trough, the puddle and the polluted well in the feed lot are all chief sources of infection.

"The parasitic diseases which occasion such great losses in young animals are largely spread by water. The results of recent experiments have proven that contagious abortion in cows may be transmitted to cows through various mediums, which should make it highly important to establish sanitary conditions in the cattle barn.

"For a long time it has been known that pork contains the egg of many parasites which infest the human body. Trichina is one of the most important of these, and prevention lies in the thorough cooking of flesh food. The extermination of parasites must largely depend on preventive measures. We must exterminate the infesting agent in order to prevent the infection of future generations. Parasite eggs are transmitted from mature hogs to young through the medium of the excreta; hence to prevent the infection of the young it will be necessary to either remove this source of infection or remove the pigs. This is not saying that either way is practicable or possible. There are also parasites of the respiratory system which are expelled by coughing. The majority of these are destroyed by drying and the possibility of infection is not so great in this class of parasites. The eggs of certain parasites develop most rapidly in a moist soil, which accounts for the more frequent deaths among pigs during wet seasons on account of worms than in dry times. Strong animals are less predisposed to suffering from internal parasites than those which are affected with mange, lice or other annoyances. Intestinal parasites exert their most detrimental effect by either mechanically obstructing the intestines, which impairs digestion, or by perforating and rupturing the same.

"Of the external parasites of hogs perhaps the most commonly met with is the louse. As is generally known, these are mostly found about the ears and the root of the tail, also in wrinkles. Because of the fact that they pierce the skin in order to secure the blood, they cause great irritation. The free use of some one of the good dips will destroy these parasites. Mange or scabies is frequently met with, and while the financial loss is not great as a rule, the vitality of the animal is much reduced. Violent itching is often caused by a parasite which burrows under the skin. Scabies is transmitted by direct contact and will spread to the entire herd. Frequent dipping is a preventive. The bodies of rats and mice contain a certain parasite which, when eaten by the pigs, develops in their bodies. The affection of the lungs caused by parasites is not uncommon in young and growing pigs. It is caused by a fine worm, the eggs of which are coughed out of the lungs by the animal and secure entrance to the lungs of other animals in the herd.

"One of the most important of swine diseases of germ origin is tuberculosis. It occasions great loss to the packers as well as breeders. Infection usually takes place from feeding milk coming from cattle suffering from tuberculosis. Infection is aggravated by the feeding of skim milk from creameries where milk from a number of herds is thrown together and is not sterilized before being returned to the farm. Tuberculosis germs may also be transmitted by the eating of the droppings of cattle suffering from intestinal tuberculosis. As there are no means by which we can determine when cattle or their offal becomes dangerous to the health of people and animals, every cow should be tested with tuberculin and the disease eradicated. It must be kept in mind, therefore, that swine may be given tuberculosis, not only through the medium of skim milk, but through the droppings of infected cattle.

"Another important affliction is the acute inflammation of the mouth which affects pigs. It is characterized by the formation of ulcers about the mouth and face. In some of the worst forms blindness results. All this is caused by the fighting of the pigs for a place at the lunch table.

"When pigs are kept up too long after farrowing in a small, close, dry pen the toes, tail and ears may rot and drop off as a result of a certain germ infection. Prevention lies in keeping the pen in good, sanitary condition. Regarding cholera and swine plague, very little can be added to what has been known for some time. No vaccinating serum has yet been established on a practical basis.

## The Water is Measured

THE Canadian government very carefully measures the flow of water in every stream from which water is taken for irrigation purposes—No one can secure a permit to build an irrigation ditch unless the water is there to supply it, and it must be of sufficient quantity to supply it at the season when the flow is least.

That prevents shortage of water at all times and in all places where irrigation flourishes—The result of this policy is that there is no litigation over water rights for everyone who farms has all the water he wants.

Just think of this combination:

All the water you can use for your crops and live stock right in your field at any season of the year, fine soil that will produce almost anything that will grow in the temperate zone, good climate, which assists in producing enormous crops and good health, as good markets as are to be found in America.

All these and more we have in

### SUNNY SOUTHERN ALBERTA.

We have as good land as 'lies out' of doors at very low prices, both irrigated and non-irrigated. We are selling this land on terms that anyone can stand.

You will prosper in Alberta—You can't help it if you are willing to work as hard as you now work, because there is everything here to assist you and no draw backs.

If you are laboring under a mortgage—if you are tired of trying to make high priced land pay—if you want to make money easier than you ever made it before—if you want to raise the largest crops you ever saw grow—if you want to live in a good neighborhood, among good people—if you want to enjoy one of the best climates on the American continent—if you want to enjoy the best health you ever had—if you want to educate your children in as good schools as you now have write us and let us tell you how you can see this glorious country at very small expense, and judge for yourself that what we say about it is true.

Now is the time to come, for land is going higher every day—The sooner you buy the larger your profits.

### CANADIAN PACIFIC

IRRIGATION COLONIZATION CO., Ltd.

71 Ninth Avenue, West,

Calgary, Alberta, Canada. 12

It is a waste of time and money to fool with hog cholera cures. The only sensible way to deal with an affected herd is to quarantine and destroy affected and exposed animals.

"There is but one way to combat infectious diseases, and that is by absolute destruction of the germs. We may close our eyes to the fact, but if we persist in being blind we will eventually find ourselves working at such a disadvantage as to result in certain failure. I would urge that more facts be presented along the line of preventive medicine than there is. Only by a close harmony among live stock breeders for the prevention and eradication of disease can a brilliant future be insured for the live stock interests of the country."

Superintendent R. S. Johnson, Columbus Junction, Iowa, of the swine department, spoke on the object of the Iowa State Fair, more particularly from the standpoint of the swine exhibitor. A part of his talk was taken up with the historical side of the fair by way of comparison, and he cited the report of the swine department of the first fair fifty-three years ago. At that time the fair was held in Fairfield and the first premium list numbered something over 400 items and offered \$1,100 in premiums. There were but eleven entries of swine at that time. Later the fair was held at Keokuk, then Cedar Rapids, from whence it moved to West Des Moines and finally to its present location on the beautiful slope of timbered land on the east side of the river. With this preface Mr. Johnson continued:

"Preparations are now being made for the holding of the fifty-third annual Iowa State Fair. Never in its history was there so many improvements under way in one year as at the present time. Something over \$100,000 will be expended in permanent improvements this year. Of this amount \$75,000 was granted by the last Iowa legislature for the swine building, and nearly \$6,000 by the same legislature for the purchase of the ground upon which the swine building is being erected. The balance that is being expended is the surplus of the fair itself, which

SUPT. R. S. JOHNSON.

will amount to perhaps \$30,000. In addition to this the fair will have its \$15,000 surplus fund, which will not be used.

"A complete system of waterworks has been purchased and is now installed, the same to connect with the city mains. This not only insures an ample supply of water during the fair, but is a great protection in case of fire all during the year. The contract has been let for an additional electric light plant, which will be a vast improvement. One of a series of large horse barns will also be built this year.

"The object of the Iowa State Fair has as its fundamental principle the education of the people. Many an exhibitor views the fair merely as a market place, or as a means of winning a little prize money. Hundreds of fair goers see only a frolic in the event. These people being blind, see not; but thinking men who keep their eyes and the avenues to their brains open, understand that education of the farm folk is the underlying idea of the agricultural fair. The state fair is as much an educational factor for the farmer and breeder as is the agricultural college. As an educational force the state fair is as properly the subject of state aid as any other educational factor which deals with the enlightenment of the farmer and breeder. A serious mistake in the management of state fairs has been the temporary appearance of its buildings. While the actual use of these buildings is but a short time each year, yet they should be permanently constructed and of fire-proof material. Practically all fair managements are now adopting the above plan.

"That the object of the Iowa State Fair is the improvement of our stock and agricultural products we believe to be true, for in no other way would Iowa ever have achieved the high standard upon which she now rests. It is generally conceded that in no place in the world can such a swine show be seen as we annually find at the Iowa State Fair, both as to numbers and quality. It has been a very interesting subject with me, both to study the exhibit and the exhibitor. I have had young breeders suggest to me that his stock looked pretty good to him at home, but when he got to the show ring he was outclassed. I suppose some give up in disgust and quit, but most of them go home resolved to do better next year, and often in one year's time they are able to produce a prize winner.

"The object of all fairs and exposi-

## THE OTTAWA DUSTLESS CYLINDER CORN SHELLER

will shell corn in any condition—wet, dry, dirty or rotten. It is by far the simplest corn sheller ever manufactured—has fewer belts and less gears. Strong and durably constructed of only highest grade materials. It does not crush the cobs, but leaves them in a nice clean condition for fuel. We have manufactured the Ottawa Sheller for 50 years. Time has proven its superiority. Absolutely dustless. Only machine that shells popcorn perfectly.

It will shell more corn, in less time and at less cost, than any sheller on the market and we can prove it. Our illustrated catalog contains the proof. Write for a copy now and be convinced.

Manufactured by  
**KING & HAMILTON CO.,**

### OMER KINSEY, of Minier, Ill., Says:

I never found any corn I could not shell from the cob. I have operated an Ottawa "C" Sheller less than four (4) years and shelled 397,000 bushels of corn and these are the first repairs I have ever ordered, amounting to \$14.45, so let the good work go on.

Catalogue upon Request

tions should be self supporting except in the building of permanent fire-proof buildings. It should be the endeavor of the management to offer as liberal premiums as possible and to give the people the best entertainment possible. The exhibits in all departments should be of the best. The show in every way should be of a clean, moral character, a place where we can take our families in absolute safety. Such I believe the Iowa State Fair to be. There we should find the finest type of the various breeds of horses, cattle, swine and sheep; the best manufactured products, and the best of agricultural products. It is said that "Of all that is good Iowa affords the best." I believe this to be true. I also believe that the cream of what Iowa raises and produces can be found at the Iowa State Fair. May its object be ever thus.

"I believe it to be the duty of exhibitors to bring nothing but worthy exhibits to the fair. There has been a little tendency in the swine department, among a few exhibitors, to bring inferior animals, with the sole idea of making sales at a price below good stuff. This, to my mind, should be discouraged among breeders.

"It is the duty of exhibitors to properly prepare their exhibits before starting for the fair, and to bring nothing but meritorious animals. The start from home should be made in plenty of time to get to the grounds and in quarters by Saturday evening before the fair opens. Entries of all stock should be made with the secretary by letter before leaving home. Likewise pens should be arranged for in the same way.

"It is the duty of the exhibitor to keep his exhibit in the best of shape, as well as the surroundings near him, all during the fair. Thousands of visitors will pass his quarters during the week, and it is human to admire seeing a neat and clean exhibit. He should be prompt in having his exhibit in the ring when they are being judged. During the day there should constantly be an attendant at or near the exhibit.

"I believe it is the duty of exhibitors to follow the rules and instructions as laid down by the fair management. These rules are made for the best interests of all concerned. I consider it the duty of the superintendent and his assistants to look carefully after the wants and welfare of the exhibitor.

"It is the privilege of the exhibitor to have such information furnished him as he may wish as regards the department in which he is showing. He also has the privilege of disposing of his stock to the best advantage possible. We would deem it his duty to boost the fair, for he must remember that it is the fair that brings him the buyer. Again we come to the inferior sale stuff. The fair management from a financial point of view cannot furnish even the old pens at \$1 each. The strong feature of the fair is the improvement of live stock; if nothing but sale stuff was brought to the fair we would retrograde.

"The 200 swine exhibitors who come annually to the Iowa State Fair, I consider a fine representative body of men, and I assure you that it has been a pleasure for me to serve as superintendent of the department."

In the evening session Secretary Simpson, of the Iowa State Board of Agriculture, gave some interesting figures on the new swine pens and show pavilion. The new quarters will result in the increase of 2,000 square feet of floor space over the pen room in the old build-

ing. There will be 1,154 pens 6x7 feet in all, and these will form three sides of the building, leaving a hollow square. Particular attention has been given to the arrangement so as to avoid congestion of crowds in any particular part. The outside of the pens will be of perforated steel and the partitions will be of wood. The construction otherwise is of brick and steel with the exception of the roof. The total ground space in this building covers three acres, exclusive of the show pavilion, which is 113x290 feet. The plans for the accommodation of exhibitors have been considered at every point, and a nice strip of ground has been reserved for camping purposes just east of the grounds. Their high and well drained location will make them particularly suited for this purpose. The swine exhibitors of the Iowa State Fair will have every reason to be proud of their new accommodations, which will satisfy a need long felt by every progressive swine breeder.

Mr. J. A. Benson, of Primghar, Iowa, discussed at length the detrimental effects of the practice of under-selling and booming, and among other things said that the detriment of under-selling brings discredit to any breed by showing a loss of legitimate profit even in good times. On the other hand, financial and moral relapse is as sure to follow the practice of booming and high-selling. It is indeed a great blessing to be able to deliver full and satisfactory value in every sale. If every breeder would fully realize the importance of this the complaints of over or under-selling would soon vanish. In substance, Mr. Benson said:

"Among breeders we find all sorts and conditions of men. There is the lagging, indifferent, timid or disheartened breeder who under-sells. His opposite is the nervous, prancing or plunging boomer, while the man who does the business the most good is he who with high-class intelligence is able to produce the best for which the highest prices are not exorbitant. He produces animals which prove their worth. There is no danger of him ever being a boomer.

"There is not a great deal of danger from the man who under-sells. The limitations of capital and the lack of attractiveness of his stock tend to turn buyers to other sources for their purchases. Most of the men who under-sell do not place much value on the pleasure which a thing gives to the eye. True, it is a fleeting and immeasurable quality. The man, however, who can get no pleasure from pure-bred swine through his eyes will never be a successful breeder. He never gets away from the pound and the price per pound in buying and selling breeding animals. Thus he is a drawback to progressive breeding.

"Another breeder who under-sells is he who sees things at a distance with more or less enchantment, or, in other words, sees all the good points in the other fellow's stock and the poor points in his own. He lacks the proper capacity to balance things; hence he sells his own stock at much lower prices than he could buy the same from other breeders. Such a man should be pitied rather than blamed, and his only hope is to get out and mix with breeders and get all the experience possible. Such men are not included with those who sell inferior, runty or ill-fed stock.

Mr. Benson contended that the average breeder of swine should so conduct his business that he can sell his product on

Wall Flashing—Roof Hook, page 13, tells how to make it.

Over Old Shingles—Roof Hook, page 6, makes it easy.

Chimney Flashing—Roof Hook, page 15, tells how to do it.

## No-Tar Roofing

Defies Time, Water, Sparks, Cinders, Wind

"No-Tar" Roofing has a surface as hard as flint—it is flint! Can't catch fire from sparks or cinders. It's as flexible as rubber—and absolutely waterproof. It's tougher than leather. Costs less and lasts longer than shingles, iron or steel. Won't run in the hot sun. The building that has a "No-Tar" Roof protection will last longest.

Accepted by all Fire Insurance Companies, who charge 25 per cent less for insuring buildings protected by "No-Tar" Roofing than for buildings with shingle roofs.

**For Store Buildings and Factories** "No-Tar" Roofing is far more durable and satisfactory for flat or steep roofs than tin or gravel roofing. Will not rot, rust or run.

**For Barns and Outbuildings** "No-Tar" Roofing is made in various weights, for all sorts of buildings. Nothing better or cheaper for aiding houses, outbuildings, etc. All joints water tight. "No-Tar" Roofing keeps stock and poultry safe and warm in coldest weather. Quick and easy to lay. Exceedingly popular among farmers, stock raisers and poultrymen.

**For Houses** "No-Tar" Roofing will add immensely to the appearance of your residence. Use it on your new house or cover the old, leaky shingle roof with "No-Tar" Roofing and avoid disaster from water or fire. "No-Tar" Roofing is a non-conductor of heat or cold. Keeps your house warm in the winter and cool in the summer. Try it on your porch or kitchen.

**Free Samples to Test** When we send you the Free Sample of "No-Tar" Roofing we will tell you ten ways to test it and prove its superiority to any other roofing.

**Free Roof Book** This book tells "How to Do Your Own Roofing." Tells how to make Valleys, Gutters, Flashings, etc. How to Measure a Roof. Explains the whole roofing operation. We send the book FREE, postpaid, on request. Get "No-Tar" Roofing from your local dealer. Special nails and cement FREE.

**The Heppes Co., 2483 Fillmore Street, Chicago**

Dealers, Attention—Write for FREE PLAN, by which you can quickly build up a profitable Roofing Department.

the market at meat prices and show a good profit on the cost of production up to the point of selling them for breeders. It is misleading for any breeder to make it appear that there is a great expense in producing pure-bred stock.

The man who pays a good price for a sire, thereby enabling him to sell the product to his fellow breeders for more money because of reputation of ancestry or winnings, should see to it that the buyer pays for the product that is sold. This is no more than fair because the buyer gets his full money's worth with the properly advertised animal. The winner is worth more than before he won, even though he will get no better offspring. The better the product the more urgent the demand among those who buy.

As to the boomer, Mr. Benson thought he was a man of mystery. The dictionary did not contain a description of him. However, it is safe to say that he details only those qualities which judgment can measure, and the age, weight and color and often pedigree of his pigs are so beautifully indefinite that two buyers at different times would never, by comparing notes, tell whether they were offered the same thing. The quintessence of the boomer's business is "the pure blood of the greatest individuals of the breed." This is not necessarily an unreasonable measure of value. However, it is a more common one with the boomer than any other.

The boomer is a detriment to a breed because he keeps inferior animals in the herd on points of merit that are hard to define. Boom sales are hard to conduct, and cautious buyers hesitate to attend. Many honest breeders pass up a good animal of a popular family just because some one has boomed the family. Confidence is a fundamental basis of swine breeding; it should never be destroyed. We must not think that all high prices are not legitimate ones. It is no more than right that a premium should be placed on the best animals in existence, and who is going to say what the limit of this price is? The more high-priced animals of actual superior excellence in any breed the better for that breed and its supporters. We need the high seller to set the mark of excellence in achievement. He well deserves to win by his honest effort and valuable contributions to the breeding work of his day.

"Feeding a Crop of Pigs for the Greatest Profit" was discussed in detail by Mr. R. J. Harding, of Macedonia, Iowa. His experience included the production of both the market and breeding animal and contained valuable advice from start to finish. At the outset the importance of selecting strong, vigorous, roomy sows was emphasized if good litters were to be secured. The paper continued:

"Mate the sows to males that are especially strong where these sows might be weak. The common practice of breeding one male to the entire herd of sows regardless of their fitness is too common amongst the average swine raisers for the general market. In the hog crop of the country every year I find there is a greater difference in the development of young pigs. If the dam is fed on bone and muscle making foods instead of fat producing food during the period from breeding until farrowing time, it means one-fourth better fu-

ture development as pigs from sows fed as I have stated are stronger and will grow faster and have more vitality than the pigs from equally as good a sire and dam on an exclusive corn diet. At farrowing time great care should be taken to provide dry, clean, separate quarters for each sow and if the weather is cold the bedding should be changed every twenty-four hours after she farrows as damp bedding in cold weather will chill the little fellows, and is the cause of the most of the bowel trouble so common in young pigs.

"One week before farrowing I would feed sow on moist bran and one ear of corn morning and evening with just a little oil meal in each feed. Would give nothing but cold water for first twenty-four hours after farrowing and then a light feed of bran. Watch your sows and increase feed gradually, giving a little more corn as the pigs grow. At three weeks old the sow should be on full feed with one-half of her feed corn or corn meal to keep up flesh.

"One of the most essential things for the well-being and thrift of a crop of young pigs in the first few weeks of their life is plenty of sunshine and exercise. If the sunshine is lacking, the exercise is all the more necessary and if not exercised all kinds of trouble may be expected. Thumps is one of the worst of all ailments in the pigs, but can generally be avoided if the little fellows are forced to exercise freely every day. At three weeks old provide a separate feeding place for them and feed them soaked oats. After they commence eating well, mix corn meal, shorts, bran, oil meal and alfalfa, and place in feeder where the little fellows can have free access to it.

"Have a trough for the pigs separate from their dam. If you have milk, give them liberal allowance, if not clean water with the above ration. As the little fellows grow and you are feeding for the market increase the corn from one-fifth to one-half and the last month feed three parts corn, keeping up the other feeds, only reducing them as you increase the corn. By this method I produced a carload of hogs that averaged 320 lbs. at ten months of age and topped the Chicago market with 40,000 on sale. This is the most successful method I have tried, and yielded the greatest profit. The only difference in feeding for breeding stock or pork production is the amount of corn fed, using less corn for breeding stock and plenty of grass for all."

The present officers of the Iowa Swine Breeders' Association are; President, Wm. D. McTavish, Coggon, Iowa; Vice Presidents, John M. Cox, Jr., Harlan, Iowa, and J. A. Benson, Primghar, Iowa; Executive Committee, B. R. Vale, Bonaparte, Iowa, W. Z. Swallow, Wauke, Iowa, and Harvey Johnson, Logan, Iowa; Secretary and Treasurer, C. C. Carlin, Des Moines, Iowa.

The annual business meeting, at which is transacted such business as may come up and at which the election of officers takes place, is held on Wednesday evening of the Iowa State Fair week.

## Hay Makers Implements

*Load from Swath or Windrow.*

**The 16 Years Success**

**Clean Sweep Loader**

The business hay loader, but not the kicking kind. Does not bunch, wad, tangle nor thresh hay, and does not elevate manure nor trash. Divides a swath—the only machine for satisfactory clover seed gathering. Works on hillside or level, in wind or calm. Carrier raises as load increases. Detach without getting off load. Light draft, strong and durable.

**SANDWICH Side-RAKE**

**TEDDER AND RAKE IN ONE—BETTER THAN EITHER**

Does not rope the hay, but teds it into light, fluffy windrows so it air cures perfectly. No need for second stirring, which breaks up stems and leaves. It rakes clean and it requires no dumping. The easiest of all rakes to operate, a boy old enough to drive can do it.

Best Pair Hay Making and Saving Tools on the Market. Send for catalog and get all particulars.

## OUR DAIRY DEPARTMENT

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

## When the Cows Come Home.

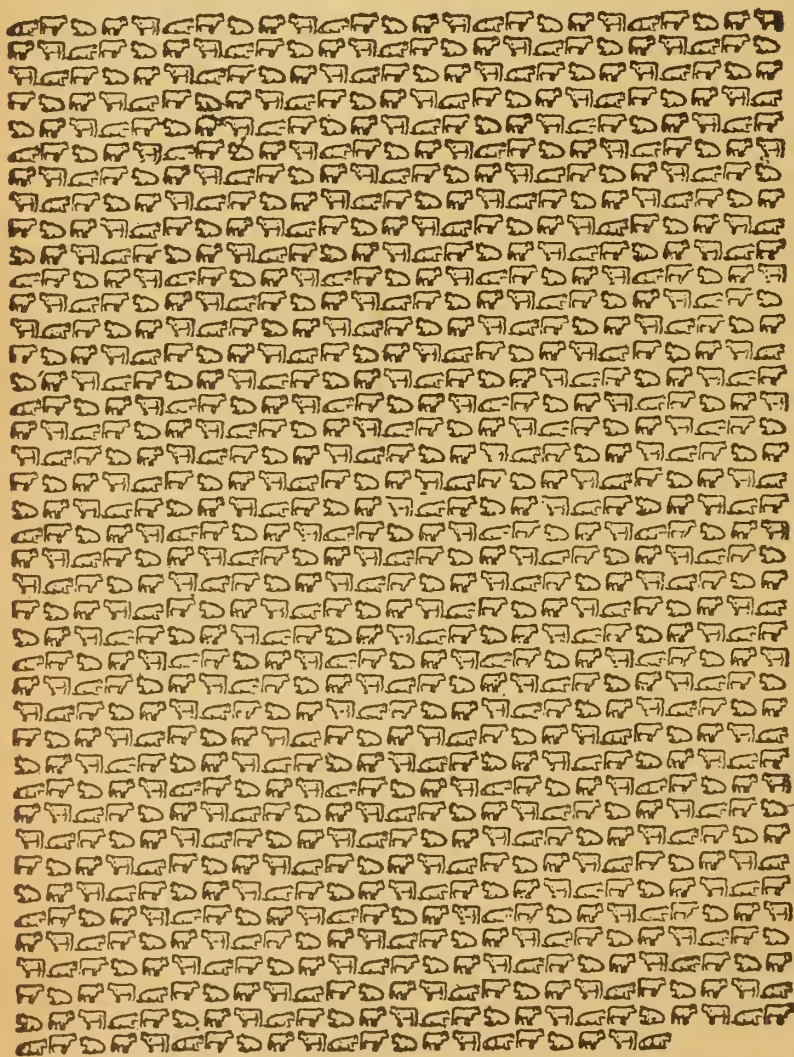

Here are 1,021 cows brought home to the dairyman. He may not at first recognize any of them as having strayed from his farm, and he may not be pleased with the herd as a whole, but for all that they are common cattle in Illinois, and he is an exceptional dairyman who cannot claim a number of them as his own. This type of dairy animal cannot be recommended without some reserve, but it must be admitted that it is holding its own, and the owner, remarkably well—holding him back from prosperity. This is not exactly the dual-purpose cow, but her pur-

the Illinois Station are the individual records for a full year of 554 cows in thirty-six Illinois herds. To make a large and fair comparison, take the lowest fourth and the highest fourth of all these cows. This is 278 head, or half of the entire number. The lowest 139 cows (one-fourth of all) yielded an average of 133½ pounds of butter-fat during the year, and the highest 139 cows produced an average of 301 pounds butter-fat.

The Elgin price of butter the past five years averages twenty-three cents per pound, and this is the usual price the dairyman gets for the butter-fat in his milk, it costing the over-run to make the butter. At twenty-three cents per pound for butter-fat, the poor cows make an average return of \$30.77. At the low estimate of \$30 per year for feed, this would leave seventy-seven cents profit per cow for the whole year's work and investment. But the best 139 made au-

Twenty-five cows, each producing 301 pounds of butter-fat per year, return a profit of \$783.

The illustration below shows exactly how many cows of the poor kind (1021) it takes to return identically the same profit (\$783) as the 25 good cows.

pose is far from that of the owner in keeping her. These cows do not usually stray away from the farm in such numbers as this (more's the pity!) and the writer's reason for bringing them home in this way is not so much to restore property as to assist them to deliver an unwilling message, which, however, may be of more value to the dairyman than the cows are themselves.

Included in the dairy investigations of

The best summer investment  
any dairy farmer ever made  
is a

THE DE LAVAL SEPARATOR CO.

Deland & Canal Sts. CHICAGO 74 Cortlandt Street NEW YORK

average income of \$69.32. Allowing these better cows \$38 per year for feed (\$8 better than the poor producers), the clear profit is \$31.32 per cow. These calculations allow the skim-milk, calf and manure to pay for the labor and interest on the investment.

The profit from the whole 139 cows is only \$107, but the clear money from the best 139 cows amounts to more than \$4,000. Every one of these good cows averages as much clear profit as forty-one cows of the poorer kind. Herds of these two kinds would have to be kept in the following comparative numbers to produce exactly the same profit for the owner: One of the good cows would produce as much profit as forty of the poor ones; fifteen of the best cows would produce as much profit as 612 of the poor cows; twenty-five of the good cows would equal 1,021 of the poor cows.

These figures sound big, but in their abstract form they are too weak to tell the full story. The accompanying illustrations show the exact relative sizes of the two herds that would make the same amount of profit for the owner. The one contains twenty-five cows and the other 1,021 cows. They are all present to represent their value. In four and a half days each one of them earns one cent profit! It is only necessary to have enough of these earners to make a large amount of money! Thirty of them

would produce the value of one acre of corn—if the ground isn't too rich and the price doesn't exceed fifty cents per bushel.

Twenty-five cows of the better kind would return the dairyman a clear profit of \$783 per year. They could be kept on an eighty-acre farm; they would require a barn 32x45 feet and a 100-ton silo, and the cows themselves, at \$79 per head, would cost only \$1,750—a very good little business.

But the dairyman could make just as much money (and no more) from the 1,021 cows of the other kind. However, the investment would be somewhat different; and here are some of the details for the benefit of anyone who might prefer to handle the 1,021 cows to make \$783, as in effect many of the Illinois dairymen are now doing with at least a portion of the herd.

To stock up for full business the first year, Mr. Dairyman puts \$40,000 to \$50,000 in his pocket and goes to market. It will require only two trains of thirty cars each to bring home the 1,021 cows. Walking as closely together as possible, single file (each cow occupying but eight feet in the line), they will string out more than a mile and a half in driving up from the station. It will take the biggest part of an hour for them to pass through the gate at a steady walk. Standing as closely together as they can be crowded, they would fill two and one-half acres of yard, but a five-acre yard would be too small to accommodate them properly. A barn thirty-two feet wide, for two rows of cows, and with stalls, three feet three inches wide, would have to be 103 rods long to house this herd. It would extend nearly around the four sides of a five-acre lot and would cost a matter of \$40,000—but it would save fencing. If the cows were to run loose in a covered barn lot, three acres would have to be covered. Eighty-five good milkers could handle this herd easily. Fifteen hundred acres of pasture ought to be plenty for grazing. To feed these cows a ton and a quarter of hay per cow would require a rick twelve feet wide and twelve feet high and nearly a mile long, or almost three times around the five-acre lot—providing a great wind-break. Eight hundred acres of meadow should produce this hay. Forty 100-ton silos would be sufficient.

One would certainly realize that he was in big business driving up these 1,021 cows and milking them on a sweltering night in fly-time—yet this is the size of the business as to profit that one-fourth of the million cows in Illinois are doing today.

All this to equal twenty-five really good cows and get \$783 profit! This herd could be very well managed on a 3,000-acre farm of good land. A dairyman having a bank account of \$100,000 or so could keep these cows, but they would be a bit dangerous for the common dairyman to handle. But he is handling them in smaller numbers, and doesn't see the danger, because their worthlessness is hidden behind the high production of the good cows in the herd.

Many dairymen of Illinois have accommodations for eighty cows. To equal that number of good cows averaging 301 pounds of butter-fat would require a herd of 3,266 cows, and accommodations about three times as large as here indicated!

All of the cows of the poorest producing herd of these thirty-six herds averaged a profit of but \$1.74 per cow. The average cow of the best herd is worth more than twenty-four cows of the kind that forms the poorest three herds. The writer knows three other dairy herds whose milk returns show a profit of but sixty-two cents per cow for the year; while in the same neighborhood are three herds whose milk averaged a profit of \$60.94 per cow. The average cow in the three good herds equals ninety-six cows of the kind that make up the poorest three herds. And in another dairy locality the same kind of a contrast came to the writer's attention.

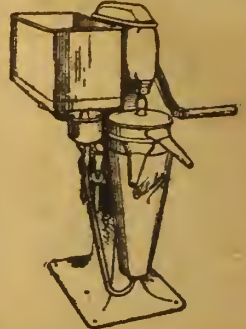

Just think of the poor souls that sweat every night and were belted in the face each morning all the past summer milking one-fourth the cows in this great state of Illinois and making no profit, when they might just as well have been milking cows that would make \$2.50 to \$5 profit per cow per month.—(Prof. N. J. Fraser, of Illinois Experiment Station, in Kansas Biennial Report.)

The F. O. Lowden Notable Short-horn Sale.

Several times during the last few weeks The Homestead has predicted that on June 11th one of the most notable sales of Short-

## Because You Need The Money

It's your business and if you don't attend to it, who will? You cannot afford to keep cows for fun. That isn't business, and, furthermore, it isn't necessary. There is money in cow keeping if you go at it right, and besides there is more fun in going at it right than there is in staying wrong.

You need a Tubular Cream Separator because it will make money for you; because it saves labor; because it saves time; because it means all the difference between cow profits and cow losses.

Look into this matter; see what a Tubular will do for you and buy one because you need it.

How would you like our book "Business Dairying" and our catalog B. 12 both free. Write for them.

Low Down Supply Tank We Pay Freight Fully Guaranteed

horn cattle ever held in this country would take place. Reference was made to the sale of Mr. F. O. Lowden, to be held in Chicago. The date has passed, the event has happened, and the tale alone remains to be told. When we predicted that there would be a \$600 average our judgment was based on two things, namely, the merit of the Sinissippi Short-horns and the demand there exists for the right kind. That the average exceeded the estimate given demonstrates better than any words of ours the real merit of the cattle in this noted herd. Colonel Woods, who occupied the block throughout the entire sale, fully measured up to the importance of the occasion and said some good things about Short-horn cattle and paid his respects to the retiring manager, Mr. Thomas Stanton, who has recently formed a partnership with Dr. Earls, of Milwaukee, which firm made many purchases from the Sinissippi offering. Mr. Lowden was called on for a few remarks at the opening of the sale, and among other things explained why the noted bull, Cumberland's Last, was being sold. His explanation, briefly stated, was this: He has used Ceremonious Archer, a bull that breeds very many light roans and whites, and he has also used Cumberland's Last, a pure white bull, consequently he felt that it was a necessity while keeping many daughters of Ceremonious Archer that he should have a red bull to cross on them in order to produce roan cattle. He made this explanation in order that it might be understood that he was not relinquishing his interest in the Short-horn business. In his own words: "I expect to continue the breeding of good Short-horns until I 'go broke,' but never expect to have that experience when breeding the kind of Short-horns that I have been handling the last few years." There remains at Sinissippi Farm seventy good ones, most of these having been bred by Colonel Lowden himself. Although Sinissippi Short-horns made some new history June 11th, it would not surprise us, considering the enthusiasm and ability that Colonel Lowden is putting into this work, if this selfsame herd should break even its own record at some future date. We desire to go on record as stating that the average of this sale was made without any attempt to break records or to bolster prices in any way. The public set its own pace and placed upon the animals sold its own value. When Cumberland's Last was led into the ring a battle royal ensued between the breeder of this noted bull, Mr. C. A. Saunders, of Man-

Ill., Iowa, and the firm of Earls & Stanton, of Milwaukee, Wis. Mr. Saunders' last bid was \$2,900 and at \$3,000 he became the property of the new breeding establishment of Earls & Stanton, of Milwaukee. The splendid roan bull, Lavender Archer, went to Messrs. Eno Bros., of Luana, Iowa, at \$525 and was a rare bargain at that figure. Gladstone, a roan son of Whitehall Sultan, was sold to Messrs. Rapp Bros., of St. Edwards, Neb., at \$410. These were the only bulls sold. The \$1,000 mark was reached and passed many times, and \$260 was the minimum price on the entire sale. One gratifying feature of the sale was that the only two animals offered that were not Scotch sold at an average of \$300 over and above the general average of the sale. One of these, a yearling daughter of Ceremonious Archer, belonging to the Lady Elizabeth family, was bought by the Hon. Thos. Johnson, mayor of Columbus, Ohio, at \$925, and the other, a four-year-old Kirklevington cow and heifer calf, sold to Mr. F. W. Harding, of Waukesha, Wis., at the same price. Messrs. Bellows Bros., of Maryville, Mo., were persistent bidders on many of the best individuals and obtained some of the choice ones. Included in the list of bidders were Messrs. Thos. Johnson, Columbus, Ohio; R. T. Reeber, Morrill, Kan.; F. W. Ayers, Athens, Ill.; Elmendorf Farm, Lexington, Ky.; F. W. Harding, Waukesha, Wis.; N. A. Lind, Rolfe, Iowa; Flynn Farm Company, Des Moines, Iowa; John Rasmess, Lake City, Iowa; Walpole Bros., Rock Valley, Iowa; H. E. Hayes, Olathe, Kan.; D. R. Hanna, Ravenna, Ohio; A. Chrystal, Marshall, Mich.; Hector Cowan, Paulina, Iowa; F. A. Edwards, Webster City, Iowa; W. S. Hart, Indianola, Iowa; N. P. Clark, St. Cloud, Minn.; Frank Prather, Williamsville, Ill.; L. E. Suprenaut, Kankakee, Ill., and H. H. Powell & Son, Linn Grove, Iowa. Mr. Lowden made liberal offers for several of the calves that were sold with dams, but only succeeded in procuring two or three. He paid \$1,000 for the bull calf out of Lavina 2d, purchased by Messrs. Earls & Stanton. Those who assisted Colonel Woods at this notable sale were Cols. Geo. P. Bellows, Carey M. Jones, G. W. Brown and Clarence Gardner. If any Short-horn breeders faith needs strengthening concerning future prospects or the demand there exists for good cattle, a perusal of the following list of prices is recommended:

## A FINE BUNCH OF FARMS.

Elsewhere will be found a list of fine productive farms in the Southwest. Most of these are in Kansas and are plainly described on page 15. Some will be exchanged for real estate in other parts. We would earnestly advise those in the market for good farm land to investigate the list. A good profitable hay business and outfit is offered in eastern Kansas. Some of these chances should appeal to the landseeker. Look over the list as advertised and if you have a desire to know more regarding any of the farms write to Mr. Frank Gee, of Lawrence, Kan., mentioning this paper, if you please.

## CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 190,000, reaching a farm population of at least 850,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

## REAL ESTATE.

HARPER COUNTY, KANSAS, where they raise winter wheat, corn, alfalfa, fine cattle and hogs every year. 320 acres sub-irrigated second bottom land, gently undulating, dark, sandy, loam soil, one year from the soil, 100 acres winter wheat, 100 acres corn, 100 acres kaffir corn now growing, 20 acres fine pasture fenced, good well and pump. 1/2 rent delivered at elevators in good town on two railroads. A great bargain at \$20 per acre; \$4,500 cash, balance three years at six percent interest. Must be sold at once. Write or see Theo. B. Marsh, Anthony, Kan.

ARE YOU looking for a home? If so, don't buy before seeing copy of the Real Estate Journal. It has nearly 4,000 farms, city property and stocks of goods advertised in it, and reaches 45,000 readers each issue. Advertising rates 2 cents per word. Send 10c. in silver for two months' trial subscription. Farm and Real Estate Journal, Traer, Iowa.

FOR SALE BY OWNER, ranch, 6,000 acres, all fenced, some under cultivation, house, grove, orchard, wells, windmills, springs, 85 per cent first class farm land, Wheeler Co., Texas. Four miles from Denver & Gulf railroad. Bargain price, easy terms. W. L. Welsh, Kearney, Neb.

FINE FARM NEAR CITY—73 acre farm 2 miles from city of Marinette 18,000 inhabitants. Joins farms. 50 acres cleared, fine frame house and fine barns, nice creek crosses farm, good soil. R. F. D. Excellent roads. The best of markets. Price, \$2,100.00. Elmer Grimmer, Marinette, Wisconsin.

480 ACRES in Phillips county, Kansas, a model home, must sell and go to the mountains. New house cost \$2,500, with phone and mail route. Good grazing and corn land. Good alfalfa, good water. Price \$15,000. Buy of owner, C. H. Gray, Selden, Kan.

WE sell farms anywhere in the United States. If you buy or sell through us, owner and purchaser deal direct. Write for lists and terms for selling. No commission charged. Globe Realty Co., 824 Kansas Avenue, Topeka, Kansas.

## OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

## LAW QUESTIONS CONSIDERED.

## DISTURBING RELIGIOUS MEETING.

A Subscriber, Hartington, Neb.—If persons engage in boisterous conduct for the purpose of disturbing a religious meeting, are they liable to criminal prosecution, and what is the penalty?

Answer.—Such persons are liable to criminal prosecution and may be fined in any sum not exceeding \$20, for such conduct.

## OBSTRUCTIONS—ROAD OVERSEER.

Mr. B. C. Wineland, Cabool, Mo.—There is a public road in this vicinity that is on a section line, and has been a road and used as such for at least forty years. A man owning adjacent land has closed up a quarter of a mile of this road. (1) Had he a lawful right to do so? (2) How soon can he be compelled to open said road?

Answer.—(1) The man had no right to close any part of the road. (2) That depends upon the overseer of roads in the district. It is his duty to remove all obstructions in a public road. Apply to him for relief.

## INNOCENT PURCHASER.

A Missouri Subscriber.—I own seventy acres of land. The railroad cuts off a small corner in the southwest part of it as shown by diagram. A's land adjoins mine on the north. My abstract of title calls for all the land east of the railroad in a certain tract, containing seventy acres more or less.

A does not live on his land, and the railroad company allows him to go to and from it over its right of way. A former owner of my land told me that when he owned it, he deeded a strip along the west side, sixteen feet wide, to A for a passway. A does not use this strip because the railroad company allows him to go over its land, but he claims the strip. There is nothing on record showing that he owns the strip. Can he hold it by law?

Answer.—He cannot hold the strip, there being nothing on record to show that he owned it when you bought your land. You are an innocent purchaser without notice and entitled to all the

land described in your deed, including the strip.

## SCHOOL AND ROAD LAWS.

Mr. W. R. McCoy, Foxboro, Wis.—Where can I get the school laws, and the road laws of Wisconsin.

Answer.—Write to the secretary of state or the superintendent of public property at Madison, Wisconsin.

## AGE FOR MARRIAGE.

A Subscriber, Henderson, Ill.—How old must a boy be in order to get married in Illinois, provided his parents are willing? (2) Answer the same question for Missouri?

Answer.—(1) In Illinois eighteen years. (2) In Missouri the state does not specify the age, except to provide that a male under the age of twenty-one and a female under the age of eighteen years, must have the consent of parent or guardian.

## PARTITION LINE—ROAD.

An Iowa Subscriber.—(1) S and R join fences. S has his forty acres surveyed out of a section. Can S compel R to move his fence without having the whole section surveyed? (2) A road has been kept up and used for hauling wood by R, B and M for forty years. They have no way to get to their timber land except by this road. Can it be lawfully closed by S?

Answer.—(1) Both questions are vague and dim and hardly intelligible. As to the first, S cannot compel R or any one else to move a partition fence, unless it is in the wrong place, and then only by means of a lawsuit, if the owner of the fence is stubborn. (2) Not unless he owns the land over which the road runs, and then he cannot if R, B and M have claimed the right to use, and have used it for forty years.

## HOW THINGS ARE ASSESSED.

A Subscriber, Pella, Iowa.—(1) Are automobiles taxable in Iowa? (2) Is a shop which is used for experimental work and inventions taxable? (3) If an assessor assesses one man's property higher than the property of another, is there any redress? (4) If an assessor assesses property of a man, and neglects to assess property of the same kind owned by another man, what is the penalty? (5) If an assessor is prejudiced against a taxpayer, how is he to get a just assessment? (6) Give a list of property that is not taxable. (7) How is a machine shop assessed? (8) Is all taxable property to be put on the assessment roll?

Answer.—(1) They are. (2) It is. (3) Complain to the board of review. (4) Complain to the board of review. (5) Complain to the board of review. (6) To publish a list of property exempt from taxation would require more space than can be spared for that purpose. See Section 1304, Supplement to the Iowa code, page 115. (7) Like any other personal property, at its value. (8) It is.

## PARENTS AND CHILDREN.

A Kansas Subscriber.—A and B were husband and wife. A the husband had money. B, the wife bought a small farm, and had it deeded to her in her own name. They had a son who is still living. A died without a will. B sold the farm and executed a deed to the purchaser without the signature of the son. (1) Is the deed good? (2) Has the son any interest in the land?

Answer.—(1) The deed is good. (2) A had no interest whatever in the land at the time of his death, the title being entirely in B, the wife. After A's death she sold the land which she had a perfect right to do. The son had no interest in it while his mother lived. If she had died without a will the son would have become the owner of the land, as the heir of his mother, but while she lived the land was entirely hers to do what she liked with it. She could even have made a will giving it to a stranger and cutting off her own son without a penny.

## ADMINISTRATION OF ESTATE.

A Nebraska Subscriber.—A and B were husband and wife. A owned 240 acres of land in Nebraska and considerable personal property such as cattle, horses and other property. Some time ago A died owning this property. He left four sons, three of whom are of age, one being a minor, but he will soon be of age. There has been no probate of the estate of A. Three of the sons are content to let the estate go without probating, but one of the sons got married, and he has taken possession of cattle, horses and other personal property of the estate. (1) What share of the real and personal property is A's widow entitled to by the laws of Nebraska? (2) What steps should be taken about the matter to protect the rights of all concerned?

Answer.—(1) The widow is entitled to dower in the land, that is one-third part of it, for her lifetime. Then she is entitled to all the wearing apparel and ornaments and household furniture, and all other personal property that was exempt from execution in the hands of her husband as head of the family, and to additional personal property of the value of \$200, and to necessary support for one year. (2) There is only one way, and that is to have an adminis-

## Sacrifices His Farm.

## 480 ACRE STOCK AND GRAIN FARM, \$45 PER ACRE, MONT-CALM COUNTY, MICHIGAN.

BUILDINGS worth \$10,000, insured for \$8,000. Corn and clover soil. Fine home. This land is adapted to the raising of corn, oats, wheat, rye, timothy, clover, peas, beans, potatoes and all the great variety grown in the southern half of Michigan. The markets are unexcelled. The winter climate is mild and summers delightful. Price of farm \$45 per acre. Terms about \$7,000 down and 10 years on the balance if desired, with privilege of making partial payments of \$100 or more at any time or all at any time. Interest 6 per cent. If the size should be too large we can cut it down to 380 or 240, or if more land is desired we can add enough to bring it up to 620 for \$42 per acre.

S. V. R. HAYES, 53 IONIA ST., GRAND RAPIDS, MICH.

trator appointed by the probate court for A's estate just as soon as it can be done.

## MORTGAGED PROPERTY.

A Subscriber, Avoca, Iowa.—I bought two small colts from my neighbor for \$50. He said that there was no mortgage on them. I did not pay for them at the time, but took them and kept them all winter, and then found that three different parties held mortgages on my neighbor's property, and took all he had. Can they take the colts from me?

Answer.—If the colts were described in the mortgage and the debts so secured were not paid, the parties holding the mortgage can take the colts.

## BANKRUPTCY—EXEMPTIONS.

A Subscriber, Redfield, Iowa.—A deeded part of his land to his wife, and then took advantage of the bankrupt law. (1) Can he hold any of his land? (2) Can his creditors take his wife's property to satisfy their claims against him?

Answer.—(1) He is entitled to hold exempt the homestead and all other property which the law of Iowa exempts from execution and attachment, in the hands of the head of a family. (3) They cannot.

## DAMAGE BY FOWLS.

Mr. R. F. Dowd, Ferris, Ill.—A and B own adjoining farms. A's house and other buildings are situated near the division line, close to B's fields. A's chickens and ducks trespass upon B's fields and get their living there. The partition fence belongs to A. Can B compel A to make his fence chicken tight?

Answer.—He cannot, but it is the legal duty of A to keep his chickens and ducks off B's premises, and if he fails to do so B can sue him and recover damages from him.

## LIFE ESTATE—PENSION.

A Subscriber, Waucoma, Iowa.—(1) A husband and wife lived in Wisconsin. The husband died giving his wife by will the use of his property during her lifetime. The property consists of town property and real estate. The rents of the property are insufficient to support the widow and pay the taxes. Can she sell any of it to get money for her support? (2) A soldier's widow who was drawing a pension, got married, and her pension ceased. Her second husband was not a soldier. He died. Can she have the pension renewed? (3) Can women vote at school elections in Iowa?

Answer.—(1) She can sell only her interest in the property, which is a life estate. (2) She cannot. (3) They can.

## TWO SETS OF CHILDREN.

A Subscriber, Marcelline, Mo.—(1) A man has children living, born of his first wife, and also children by his second wife. In case he should die without making a will, would there be any difference between the two sets of children as to the distribution of his estate? (2) Suppose that either or both of the wives had property, how would it be divided among the children?

Answer.—(1) No difference whatever. All the children are heirs of their father in an equal degree without regard to which wife bore them. (2) The property belonging to each wife would go to her own children as heirs upon her death, if she made no will. The children of one wife could not inherit property owned by the other wife.

## ADJOINING FARMS—DRAINAGE.

A Subscriber, Mt. Vernon, Iowa.—A and B own adjoining farms. A's farm being on lower ground than B's farm. A's land has been tiled for a number of years. A public road runs between the two farms. B has just tiled his land, ending at the road and discharging his drainage water there. A offered to allow B to connect tiles with him, and even to make the connection at the middle of the road, but B refused to make such connection. There is a small ditch through A's land, but it could be closed if the tiles were connected. Can A lawfully

prevent B from discharging his drainage water at the public road, whence it runs through A's land?

Answer.—If the point where B outlets his drainage is a natural depression whereby the water is carried into a natural water course, then A cannot prevent B from outletting his tile drainage on his own land at the road, or on B's side of the road, but if there be no such natural depression, A can prevent such outlet by injunction and recover damages from B.

## DISEASED CATTLE—SALE.

A Subscriber, Greene County, Iowa.—In January, 1907, I bought some cattle at a public sale. There was nothing said at the time as to whether or not the cattle were all right. As a matter of fact the cattle had the Texas itch at the time, but I did not know it, and turned them in with my other cattle, and my entire herd has contracted the disease. Can I recover damages from the man who sold the cattle to me?

Answer.—We think not. You had the right when the purchase was made to require the seller to warranty the cattle to be sound, or to represent them to be sound and free from disease. He did neither. You had also an opportunity to inspect the cattle. The general rule of law is that where neither representation nor warranty is made by the seller and the buyer has an opportunity to inspect the property, the purchaser buys at his own risk.

## SCHOOL DISTRICTS—BOUNDARIES.

A Subscriber, Pilot Mound, Iowa.—A town has been incorporated for years, with one section as school district. Can territory be added to it from another district against the wishes of persons living within said territory, and also against the wishes of the residents of said district?

Answer.—Section 2791 of the code of Iowa provides that where, by reason of natural obstacles, any portion of the inhabitants of a district cannot readily attend school in their own district, the county superintendent may attach such part to another district. And Section 2793 provides that the boundaries of school districts may be changed by the concurrent action of the boards of directors, who represent such districts. The matter of adding territory and also the matter of changing boundaries are not subject to the votes of the people directly.

## WILL—STEP-CHILDREN.

A Subscriber, Prairie View, Kan.—A married a widow who had three children, and three children were born of this marriage. (1) If A should die without making a will, would his step-children be entitled to any of his property under the laws of Kansas? (2) These people live in Kansas. In case A should die leaving a will by which he gave all his property to his own children, wholly ignoring his step-children, would the will be valid? (3) If a will be made out by a private person, and the seal of a notary is obtained afterwards, is the will valid?

Answer.—(1) The step-children would not be entitled to any of his property. A has a perfect legal right to make a will wholly ignoring his step-children. (2) The will would not be valid. This is true, not because the testator ignores his step-children by so doing, but because he ignores his wife. By the law of Kansas, he cannot will more than half his property to legatees other than his wife. She is entitled to one-half by law. (3) Neither a notary's seal nor any other kind of a seal is necessary to a will. A private person can prepare a will if he knows how, just as well as a lawyer or a notary public.

**Direct from the Mills to You**

**BEACON-ITE**  
LONG LIFE ROOFING

**We Pay the Freight**

When you buy roofing you expect it to last, don't you? You don't want to be incessantly patching little leaks after every rain. Isn't this just what you are doing now? You have had some experience with tin and shingle roofing. Are you satisfied with their lasting qualities? BEACON-ITE is a long wool fibre thoroughly saturated with a secret preparation that makes it absolutely water-tight.

It will not rot or rust. By buying direct from the mills and putting it on yourself (we furnish all necessary nails and cement free), Beacon-ite is the most inexpensive roofing you can buy. If you want a roofing that will last and need no patching, write to-day for FREE samples of BEACON-ITE.

BEACON-ITE MILLS, Dept. 4, St. Louis.

## Gem City Business College

D. L. MUSSELMAN, President

Lock Box 105 Quincy, Illinois

## ADVERTISING NOTES.

## WHERE LARGE PROFITS GROW.

Investments in Colorado lands return large profits when made under the advice of reputable real estate firms. The Campbell system of dry farming is producing great changes in the methods and results of farming. Many nice farms are advertised on page 15 by the Home Investment Company, 604 Mack Bldg., Denver, Colo. For much valuable information on investment opportunities write, mentioning The Homestead.

## PREPARATION FOR WINTER WHEAT.

In many parts of the country the wheat harvest is starting. It is not too soon to prepare for the next crop. The secret of a good stand is a reliable drill. A bumper crop cannot be grown unless it is in the ground properly. An independent factory advertises grain drills on page 16. See what they have to say to you on wheat growing. Circulars describing their drill will be mailed on request. Address Peoria Drill and Seeder Company, 258 N. Perry St., Peoria, Ill.

## HINTS ON FARM DRAINAGE.

This is the title of a book published by the Pella Drain Tile Company. It is an education to anyone who reads it, for it is full of useful facts and figures. The Pella Drain Tile Company have done business in the state for twenty-two years and their product always gives universal satisfaction. If you are interested in farm drainage you will do well to write the Pella Drain Tile Company, at Pella, Iowa, for their booklet. See their advertisement on page 17 of this issue.

## SPRING TONIC.

Liquid extract of malt is practically a liquid food. It is made from choice malted grains and the juice of hops. Practically all the starch of the grain is converted into solution which has proved a valuable food for many people. The tonic effects of a good malt beverage are mild and have a most desirable effect on tired stomachs. A wine glass of malt before meals has a very beneficial effect on the digestion. Try it and see for yourself. The T. M. Roberts Co-operative Supply Company, Dept. F. W. 77, Minneapolis, Minn., are selling this tonic in large amounts. See page 13.

## TO PILE SUFFERERS.

On this page appears the advertisement of the Phelps Chemical Company, in which they advertise their "Yellow Pile Cure." We can assure our readers that this is a very worthy and efficient remedy. The relief is complete and rapid and will be so gratifying to you that you will be glad to tell your fellow sufferers. The Phelps Chemical Company will send you a dollar treatment free if you will send enough stamps to pay postage. If it cures you, you may remit the dollar; if it does not cure you, you need not remit. Write the Phelps Chemical Company, Lynnville, Iowa, for the free treatment advertised in The Homestead.

## ABSORBINE FOR LAME, BLEMIISHED HORSES.

Mr. L. A. Osborn, of Jacksontown, Ohio, writes under date of March 26, 1907: "My horse had a collar bruise and I had it lanced. A neighbor told me I had ruined my mare by lancing it, as the muscle in healing would become thick, and would always become sore when worked with a collar. I doctored the shoulder carefully, according to doctor's orders, but found as my neighbor said, the sore in healing was leaving a lump. I read about Absorbine and concluded to try it. Today that shoulder is as smooth as the other one, and I am sure that the bottle that I used was worth \$25 to me. I also had a yearling colt which strained one of its hind legs. It became lame and a bog spavin formed; used Absorbine and it seems to be all right at present." Many customers write of the satisfactory results Ab-

sorbine gives in removing blemishes; curing lameness, etc. You try a bottle. Price \$2.00 at druggists or delivered. Mfg'd by W. F. Young, P. D. F., 40 Monmouth St., Springfield, Mass. See advertisement on page 11.

## IOWA'S OLDEST TILE FACTORY.

Messrs. Raney Bros., of Fairfield, Iowa, are the proud owners of a tile factory at that place that has been in operation over thirty years. The product turned out by them is of such a high class that the business has grown to such an extent that now they are putting out from 130 to 150 car loads of tile, aside from their local business, each year. Their tile are hard burned, smooth, square cut and first class in every respect. Their prices are very reasonable and will be gladly quoted to you on application. They make tile in all sizes from three to twelve inches and guarantee satisfaction. Address Messrs. Raney Bros., Fairfield, Iowa, for prices. Their advertisement appears on page 17 of this issue of The Homestead.

## RICE BROS. OFFER BARGAINS IN GATES.

Messrs. Rice Bros., of Harvard, Neb., are offering some bargains in the gate line that should be looked up by every farmer in the land. This gate is one of the most simple to operate and most durable that has ever been put upon the market by any gate company. It is made entirely of the best steel, can be hung on any gate post and can be easily operated from wagon or carriage. They also make any model of steel yard fencing which can be bought so cheap that you can not afford to be without it. They have two kinds of gates, the swinging and the tilt gate. It is made any size and sells at \$10 per foot will be added. They have just finished their new illustrated catalog, which they will gladly send to anyone requesting the same. When writing please mention this paper.

## HOT WEATHER HARD ON HOGS.

Unless hogs have plenty of water in hot weather they suffer much. This condition precludes profitable growth or well-doing. Insure the herd a plentiful supply of water at all times by putting in a Hawkeye Automatic Hog Waterer. This waterer is made at Newton, Iowa, and has gained much in popularity throughout the corn belt. It is now in use on many of the best hog ranches in the country. Colleges also highly recommend it. It is made substantial in all parts and has a valve guaranteed for five years. This is one of the most important points, and is where the Hawkeye waterer differs from others. A booklet explaining all about it will be mailed to any address free. Write for it and prepare to keep your herd of swine in healthy, comfortable condition this summer. Address Parsons Hawkeye Manufacturing Company, Newton, Iowa, and kindly mention The Homestead. See page 16 for illustration of the waterer.

## A PRACTICAL BUSINESS COLLEGE.

The Gem City Business College has been in successful operation under the same principalship for more than a third of a century. It owns and occupies its own \$100,000 college building; has a faculty of twenty teachers; a most thorough course of instruction in shorthand, bookkeeping, business practice, banking, mathematics, etc., with an annual enrolment of 1,200 to 1,400 students and it is now the leading commercial school in America. The school is well and favorably known throughout the western half of the United States; in fact, they have applications for their graduates from every section of the union. As many as nine graduates have been placed in one bank in St. Louis in the past year, and twelve more have secured employment in the National Bank of Commerce of Kansas City, Mo., within the past twelve months. The school has been in operation so many years that it is not difficult to place its graduates. With such a record behind an institution of this kind no young man need fear for his future success if he has the right stuff in him. Those expecting to take courses of this kind in the near future should write for the Gem City Business College catalog which explains all about the course and the college requirements. Address D. L. Musselman, president, Lock Box 105, Quincy, Ill. See page 8.

## HOW TO SAVE FIRE INSURANCE.

As is well known, fire insurance companies hesitate in insuring buildings of faulty construction. Naturally, there is more danger of loss in buildings that are constructed with inflammable material than those where the material used is more or less of a protective nature against fire. For this reason "No-Tar" Roofing has become very popular with builders. All structures on which "No-Tar" is used as roofing are now insured for 25 per cent less premium than where shingles or inflammable kinds of roofing are used.

Besides being fire proof, "No-Tar" roofing defies all the wearing elements of time and nature. It has a surface which is as hard as flint, yet it is so pliable as to be proof against cracking. Besides all this, it stands up well under the hot weather and is guaranteed not to "run" under the hottest of skies. The appearance of "No-Tar" roofing rather adds to the beauty of a building, and it is now frequently used on houses in preference to tin or shingles. If you are interested in making a test of "No-Tar" to prove all the good things which we have stated, write for free samples to the manufacturers and they will supply you with the same and also ten ways to test it. This is certainly a straightforward offer and may be of great value to you in selecting a good roofing material for buildings which you may erect in the near future. We would advise you to make the test. For the materials to do this with, address The Ileppe Company, 2483 Fillmore St., Chicago, Ill. See page 4.

## YOU WILL PROSPER IN ALBERTA.

What other men have accomplished you may accomplish. Every day men are building homes and making comfortable provisions for life in sunny southern Alberta. It is the land where large profits are possible. It offers the opportunity for securing a valuable farm home to rich and poor alike. There are hundreds and thousands of farmers on high-priced land who could make no better move than to locate in Alberta, Canada. The finest kind of people are now taking up their abode on the virgin soils of this region, and before many years will be enjoying all the blessing of the most advantageously situated region in any part of the farm lands of the country. You can't help but prosper in Alberta if you are willing to work as other men are working; in fact, the opportunities for enjoying life will be increased in many cases since it is possible to purchase farms without taking on the burden of a mortgage. Sunny southern Alberta is a country noted for its lack of mortgage farms. With all the advantages which it possesses it is certain that the price of farms in this region will advance rapidly. The time to investigate the country and its crops is now. The Canadian government offers many inducements to the settler. This is a valuable consideration indeed and is only one of the many to attract the land seekers to this region. We would invite our readers to post themselves better on the possibilities for taking up homes in Alberta. To this end they should write for the literature offered by the Canadian Pacific Irrigation Colonization Company, Ltd., 71 Ninth Ave., West, Calgary, Alberta, Can. On page 3 is the advertisement.

## USE REASON IN BUYING PAINT.

There is nothing mysterious about mixing paint. With a little practice anyone of ordinary intelligence can do it. No heavy mixing machinery or the aid of a chemist is necessary if the paint is pure. The mystery begins when substitutes for pure lead and linseed oil are introduced. A chemist is very necessary when water and benzine must take the place of pure oil and turpentine or when whitening and silica masquerade as pure white lead. The base of all good paint is pure white lead. There is no successful substitute for it, though imitation and adulteration are often attempted and practiced, for no other purpose than to swell the profits of the manufacturer. The best-known white lead, one that is known to be absolutely free from any adulteration whatever, is the Carter strictly pure white lead, more of which is used than any other brand in the world. Given Carter strictly pure white lead and pure linseed oil any competent painter can do the mixing, and will invariably produce a perfect paint, better adapted to the work in hand than could possibly be found in ready-mixed form. Carter strictly pure white lead is made by a peculiar process that produces every atom paint. It is finely ground by heavy machinery—so very finely ground that it is guaranteed to cover 25 per cent more surface than any other paint. It wears long and evenly, and never cracks, scales or fades. By its use, the paint buyer not only avoids the possibility of adulteration, but actually saves on the cost of the paint. Everyone who intends to paint, or who owns a building, should write the Carter White Lead Company, Department D, Chicago, Ill., for their new book, "Pure Paint." It gives valuable information on the selection and use of paint, and the detection of adulterations. It shows six beautiful color schemes, and is sent free. Write today.

## SPECIALISTS WITH CHARACTER AND ABILITY.

Drs. J. T. and R. F. Fellows, organizers and owners of the Drs. Fellows and Fellows Company, Rollins Block, Des Moines, Iowa, make a specialty of men's diseases. In this

## A HOME REMEDY

Endorsed by Leading Druggists as Excellent for Stomach Troubles.

The Manager for a prescription drug store in Chicago, a store that fills more prescriptions than any other drug store in the country, says, that the following prescription is positively the best that they ever filled for stomach trouble.

Compound Tincture of Cinchona, one ounce; Prosepe Compound, one ounce, and Sherry Wine, half a pint; mix and take in teaspoonful doses before each meal and at bed time in a wine glass of water.

He states that it is the Prosepe Compound that does the work. This preparation supplies the stomach with Pancreateic Juice, and this is what digests what you eat, and with the help of the greatest vegetable tonics known to science the results are marvelous.

Any druggist can fill this simple prescription.

## MONEY WITH BEES

KRETCHMER, from his 45 years' practical experience, can tell you how. Write for his Hints to Beginners, and his illustrated catalog. It is FREE for the asking; it describes the BEST, practical, up-to-date goods, required to make MONEY with BEES.

KRETCHMER MFG. COMPANY  
COUNCIL BLUFFS, : : IOWA

Capital \$500,000.00, 1200 acres. Largest Nursery in Northwest. Established 1883. Hardy seeds, trees and plants. Agents wanted—Good pay.

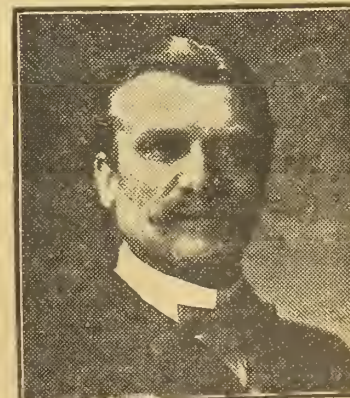

## PILES CURED OR NO PAY

WE trust to your HONESTY and GRATITUDE to pay us after you have used our great discovery that has cured thousands. DON'T SUFFER, but enclose three two cent stamps, postage, for our \$1 treatment. Phelps Chemical Co., Lynnville, Ia.

special branch of medicine they have had wonderful success. Their reputation for cures and for honesty and fair dealing extends all over Iowa and the middle West. Any of the readers of this paper who are sick or ailing from any diseases peculiar to the male sex can write to or personally

consult this pair of specialists with perfect safety and with the assurance that their case will be handled intelligently and a cure performed in every case where a cure is promised. If they cannot cure you they will tell you so. If they can benefit you, but not cure, they will be just as frank. During the twenty years that they have been practicing in Des Moines and the number of years they have been steady advertisers in this paper we have never heard of one instance where they failed to keep their promise and deliver the results that would sat-

isfy their patients. In conclusion we might add that their system of treating diseases of men is, as far as our knowledge goes, entirely different from that employed by any other specialists and any of our readers desiring the truth about their condition should write to these specialists as per address below. They will send, on receipt of your name and address, free of charge in plain wrapper, a handsome book which tells the absolute truth and many important facts about men's diseases. Write for it today. Address Drs. Fellows & Fellows Co., 323 Rollins Block, Des Moines, Iowa.

## Mica Axle Grease

Best lubricant for axles in the world—long wearing and very adhesive.

Makes a heavy load draw like a light one. Saves half the wear on wagon and team, and increases the earning capacity of your outfit.

Ask your dealer for Mica Axle Grease.

Incorporated

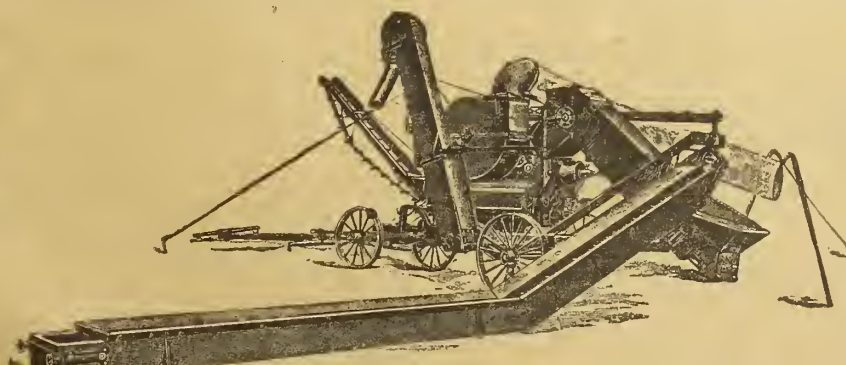

## FREE BOOK For Men

WRITE FOR IT TO DAY

We have just published new book of 76 pages which tells about Men's Diseases, such as Blood Poison, Nerve Weakness, Verrucae, Hydrocele, Kidney and Bladder Troubles, Etc., and how any of these diseases can be cured quickly and permanently by our simple and inexpensive new method.

Send your name and address today for free book. We will send it in plain sealed wrapper. It contains valuable information for every man.

DRS. FELLOWS & FELLOWS CO.,  
323 Rollins Bldg., Des Moines, Iowa.

So much interest is being shown in the Ottawa Dustless Cylinder Corn Sheller that we take it that our readers will be very much interested in the accompanying illustration, which is an exact reproduction of this sheller. It is probably one of the simplest machines of this kind ever manufactured. Belts and gears are few and far between and strength and durability are aimed at in the construction of shafts, cogs, elevators, and in fact every part throughout. In operation the sheller does not crush the cobs, but leaves them comparatively whole, which makes them much nicer to handle. Wet, dry, dirty or rotten corn is shelled with the same thoroughness. Popcorn is also shelled perfectly, which is a valuable feature. To these merits already described is added the dustless feature which can be appreciated only by those who are experienced shellers. We refer our readers to the advertisement on page 3, and for further particulars address Kling & Hamilton Co., Ottawa, Ill. Kindly mention The Homestead in your inquiry.

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

## Poor Hatches.

To the Editor of The Homestead:

A Lacona, Iowa, subscriber sends the following communication:

I bought two incubators some time ago and set 429 eggs in the two. I kept the heat as near 103 degrees for the first two weeks as I could and the last week from 104 to 105. On the sixteenth day they tested 288 eggs, and only seventy live chicks were hatched from the 429 eggs. The eggs started to hatch on Monday, and I did not get them off until Friday morning. The chicks seemed to dry fast to the lining of the shell and could not get out. This is my first experience with incubators, and I do not know what the trouble was. I set the incubators in the summer kitchen. I would very much like some light on the situation.

This is indeed a discouraging experience. There are several different causes which might contribute to such a result. The parent stock from which the eggs were gotten might have been lacking in vitality, which would cause weak germs in the eggs. The very poor test points in this direction. Incubator experts will tell you that when eggs test poorly, they seldom have a good hatch. The long drawn out hatching would result from eggs that were too old, as well as weak germs. With the amount of heat kept up in this instance, it could not have been because of too low a temperature. Since a certain number of heat units are required to complete a normal hatch, it stands to reason that when they have been supplied in normal fashion, the chicks, if healthy and vigorous, should be hatched on time.

The chicks dying in the shell would indicate lack of moisture. "Subscriber" did not say whether the incubators were hot air or hot water. Hot air machines are more apt to require applied moisture than hot water machines. Much can be told during the progress of the hatch from the size of the air cell. If it grows large too early during the twenty-one days, it indicates that moisture is being removed too rapidly. Your incubator instruction book doubtless tells you of the proper size of the air cell at different stages of incubation. Should the air cell seem too large the last week, introduce a sponge moistened with hot water beneath the tray. It may be that your machines (if hot air) have moisture pans. If so, these are the appliances to use.

The moist air of a clean, well ventilated cellar is the best for successful hatches. There should be no direct drafts on the machine, nor direct sunlight. If our correspondent looks well after these various points, and secures eggs with strong vitality, and as fresh as possible, better results will be apt to reward labor. Discouragement is a poor asset. Keep on trying till success comes. Mrs. S. B. Titterington.

## Liver Trouble.

To the Editor of The Homestead:

The following communication has been received from a subscriber, Rufus Stefan:

I am losing my chickens in a strange way and desire some help from you. Their in-

testines are filled with fermented water, the gall is uncommonly large and dark and on some the liver is dark, the crops being almost always empty. Some are sick only a few minutes, others a day or so. I just lost ninety-two chicks that hatched in an incubator ten days ago. They started to die when twenty-four hours old, so the trouble was not in the feeding, as I do not feed them until from twenty-four to thirty-six hours old. Some live to be five or six weeks old. They seem to be worse on cold, damp, cloudy days, even though I keep them shut up in the hen house and have a fire. Some of the chicks had five to six white spots on the liver and the gall just runs over. They look well on a nice, bright day, but if it is cold and damp they die off fast. This batch of ninety-two that died puzzled me greatly, as they were never exposed to the cold at all. It surely is not the food, for I feed different flocks in different ways. I feed oatmeal in the morning, wheat once a day and so on. I feed four times a day—six in the morning, at ten, at two and six o'clock in the evening. I am wondering if this is contagious.

These hens evidently have some form of liver disease. Such a condition does not come in a day or a week, but requires months for its development. When it reaches the stage described, treatment is of little avail.

The cause lies far back—possibly in winter housing, feed and other things. Too steady a corn or grain diet with lack of grit and green food would be apt to result in some such way. Lack of exercise and fresh air, unsanitary surroundings would also help on the disease. Other symptoms are loss of appetite, sluggishness, and a yellowish color in the face. If treatment is undertaken, let it be one-grain pill of calomel one day, one-eighth teaspoonful of Epsom salts the next. Let the food be light, nourishing and unstimulating.

From the symptoms, it looks as if the chickens had inherited the liver trouble. There are three diseases which make a hen forever unfit for a breeder—cholera, (the genuine article), roup, and liver trouble. The chicks from hens having had these diseases will have weak constitution and a predisposition to the disease, even if the parents seem entirely cured. It is not probable that these chicks would many of them have lived to maturity, even under the most favorable conditions. The cold and dampness aggravated the inherited trouble. It is of little use to incubate the eggs laid by these diseased hens.

Liver disease is not usually contagious, but the conditions that cause it in one member of a flock, will be likely to cause it in others. We see no chance for success for our correspondent but to start anew with healthy stock, and guard against the wrong conditions that brought about this present trouble.

A Reader.

## September Hatched Chicks.

To the Editor of The Homestead:

The regular hatching season is approaching its close. In many incubators the lamps are put out, and hatching operations suspended for the present. As the summer heat waxes warmer, the sitting hens are released to seek comfortable nooks in the shade of the trees, and the chief attention is given to the growing chicks.

Much is being said nowadays of the advantages of late hatching. Especially are we urged to try September chicks. A prominent and successful poultryman said in one of the recent issues of a leading poultry journal that he preferred a September to a July chick. While the weather may be quite

## PLYMOUTH ROCKS.

**SOME FINE** Cockerels at \$1.50 each up to \$2.50 each. Twenty years breeder Barred Rocks. Exhibition birds and heavy layers have won their share of the prizes wherever shown. Four grand yards mated, 3 for chicks, 1 for pullets. Eggs, \$2 to \$3 for 15. Mrs. Eva E. Girard, R. F. D. 2, Schleswig, Ia.

## Barred Plymouth Rock Eggs

FROM the leading strains and from extra large birds at \$1.00 per sitting or \$4.00 per 100. Address, J. E. Wehr, - Portsmouth, Ia.

**FOX TERRIERS.** Pups from registered parents, excellent workers on all kinds of vermin. Will guarantee pups to make good ratlers. Males \$10, females \$7.50. C. H. Drake, Hazelton, Iowa.

warm during the early days of that month, the sultriness soon gives way to delightful autumn temperature and a long stretch of fine weather gives the chick a chance for good growth and development before winter. These chicks, it is claimed, will lay almost as early in the spring as June and July birds, and will keep at it when the older fowls are resting from their labors. The cockerels make acceptable winter fries, or soft roasters later on. While they may not be quite as large as the early hatched chick they fill an important place, and aid materially in adding to the profits. Subscriber.

Such a flood of light is being thrown on poultry questions, that many of our most conservative farmers are "beginning to sit up and take notice." If they would make a study of poultry raising as they do of stock raising, if they would avail themselves of poultry appliances—such as incubators and brooders, as they do of gluten meal, shredders and tankage, and study the approved methods as they do the latest ways of raising profitable hogs and cattle, they would find it a money-making proposition.

**ROUND TRIP PACIFIC COAST EXCURSION.** Daily to September 15th, the Minneapolis & St. Louis R. R. will sell round trip excursion tickets to Portland, Tacoma, Seattle and Vancouver for \$64.50. On account of the Christian Endeavor Convention at Seattle the rate will be \$54.00 to Puget Sound points. Tickets on sale June 20 to July 12; return limit September 15. Slightly higher rate to return through California. For further information write W. K. Adams, D. P. A., 512 Walnut St., Des Moines, Iowa.

## GREETING TO WOOL GROWERS.

As a greeting to old and new customers on the opening of the wool season the A. J. Child & Sons Mercantile Company, 511-513 North Main St., St. Louis, Mo., have issued a very neat and pretty booklet full of information for sheep men. Write for it, mentioning this notice.

## KEEP THEM HEALTHY

Don't lose the chicks now. Success with poultry depends not so much on the number of chicks hatched as on the number brought to maturity. They need a tonic—a medicine—a preventive of disease; something to reduce to a minimum the dangers from Cholera and Bowel Complaint, their greatest enemies during the hot months of June, July and August.

## GERMOZONE

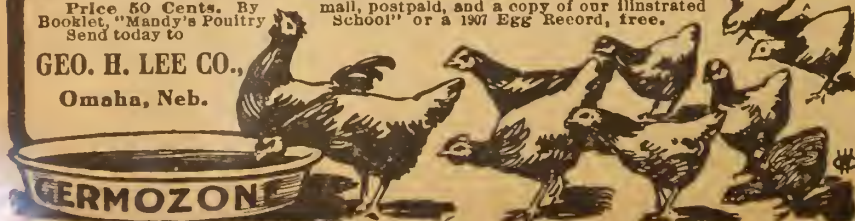

is a germicide—the best cure for poultry diseases such as Cholera, Bowel Complaint, Chicken Pox, Canker, etc., which cause so much trouble at this time of the year, and is used and endorsed by poultry raisers all over the world.

Give it in the drinking water twice a week. It prevents disease as well as cures, keeps fowls healthy and insures profitable, vigorous birds later in the season. You can not afford to be without it.

Price 50 Cents. By mail, postpaid, and a copy of our illustrated Booklet, "Mandy's Poultry School" or a 1907 Egg Record, free. Send today to

GERMOZONE

Omaha, Neb.

## VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating the age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

### SYMPTOMS AND TREATMENT.

#### SICK COWS.

My cattle have had a slight cough nearly all winter. Early in March I noticed a four-year-old cow failed to digest her food well, passing much that was undigested. She had been wintered with five others in a comfortable shed and fed plenty of roughage, and some grain. April 15th this particular cow calved and she was then put on a good grain ration. Now she is on grass, acting well and sick by turns. She is getting thin and is bloated some of the time and sometimes will not eat at all. Her teeth are all right. Can you tell me the trouble with this cow?

There is good reason to suspect that your cattle are afflicted with tuberculosis and you should at once have them tested with tuberculin which will settle the matter one way or the other inside of forty-eight hours. Under the circumstances we do not feel justified in prescribing medicine, but if they prove free from the disease tell us and we will be glad to suggest treatment.

#### RICKETS.

My hogs are affected with a disease that I do not understand. They break down and drag their hind legs behind them. I opened one that died and found the kidneys a yellow color, flabby and soft. I would be pleased to know what to do for them. Am feeding corn and alfalfa now, but they have been running after cattle until recently.

This form of paralysis is akin to rickets and comes from weakness of bone and muscle induced by feeding too much corn, which does not go to form flesh or bone. At once commence feeding your hogs slop of middlings or shorts, bran, ground oats or barley and corn meal, adding 10 per cent of tankage or flaxseed meal. In the slop mix linewater freely once a day for affected pigs and three times a week for unaffected. Allow free range on alfalfa. Treatment other than a change of food is of little avail in this trouble.

#### IMPAIRED BREATHING.

I have a thoroughbred Berkshire sow about two years old. I purchased her in February, 1907, at which time she was very fat. She farrowed a litter of pigs April 1, 1907, and is suckling them at the present time. When she takes violent exercise, and sometimes when she is quiet, she has trouble to get her breath, and at times she acts as though she would suffocate before she recovers from an attack, which lasts but a few minutes. The sow is very large and coarse, seems to be in perfect health and is in good flesh at the present time. She has been fed nothing but

shorts, bran and grass since I have owned her. What can I do for her?

It seems likely that the sow has a heart trouble which may be incurable and possibly due to over fat condition, causing fatty degeneration of the heart muscle. The best chance of recovery would come from reducing the sow in condition by letting her live without grain and take all the exercise possible on grass. We do not think likely that medicine without the reduction in flesh and exercise will do any good. On weaning the pigs and starting the treatment it would be well, however, to give her six ounces of epsom salts in slop or water and follow with a similar dose once a week until she is considerably reduced in flesh. This will help her greatly for future breeding purposes.

#### RUPTURE.

I have two sow pigs that have slight rupture or hernia at the navel. I saw some time ago where a writer said to shrink the covering of the hernia and reduce it that way, but I have forgotten the name of the acid used. What is the best way to effect a permanent cure?

Either nitric or sulphuric acid will do in umbilical hernia of colts, but we have not tried it on pigs. Where the hernia is sufficiently large it may be operated upon by returning the bowel, then pulling up the sac and loose skin and including them in wooden clamps such as are used in castrating horses.

#### BROKEN DOWN BOAR.

I have a valuable boar five years old. In 1905 this hog was fitted for show and at that time was made to weigh 1,150 pounds. Because of his great weight or some other unaccountable reason he hurt one of his toes on the hind foot, and in trying to favor this foot he did not walk around much. Since that time he has become weak in the hind legs, consequently making him unfit for service. He does not exercise much and if left alone will lie down most of the time. This hog now weighs 700 pounds. I keep him in a large pasture where there is plenty of grass and running water. I would be very grateful for advice regarding how to strengthen his hind legs.

There is no way that we know of whereby his legs can be strengthened to carry his great weight. He doubtless is affected with rickets and it proves incurable. Possibly we might alter this opinion could we see the hog, but without an examination we are unable to prescribe treatment.

#### TUMOR.

I have a cow that has a big hard lump under her throat. It was quite small and soft when it started about two months ago. It is now hard and seems to be stuck tight. Please advise me the cause and remedy.

Cause of tumor may have been a collection of pus due to a bruise or actinomycosis (lumpy jaw) which did not find a vent and became surrounded by a fibroid wall. Have the tumor cut out by a qualified veterinarian, as it is unlikely that external treatment will remove it.

#### SCOURS.

Please tell me what to do for a young cow that has had the scours since last winter. She eats well, but is thin in flesh. We have given her stock food, laudanum, flour, nutmeg and egg, etc., but to no effect. She is now on grass, but is no worse than when on dry feed.

The first step in such a case would be to have the animal tested with tuberculin, as tuberculosis affecting the alimentary tract often is the case of chronic

# Blacklegoids

Simplest, Safest, Surest Vaccination  
for the prevention of

## BLACKLEG IN CATTLE

NO DOSE TO MEASURE. NO LIQUID TO SPILL. NO STRING TO ROT.

Just a little pill to be placed under the skin of the animal by a single thrust of the instrument. You cannot afford to let your cattle die of blackleg when a few dollars spent on Blacklegoids will save them. Write for circular.

**PARKE, DAVIS & COMPANY**  
HOME OFFICES AND LABORATORIES, DETROIT, MICH.

NOTICE.—For a limited time we will give to any stockman an injector free with his first purchase of 100 vaccinations.

## IT'S SAFE, STRONG, SPEEDY, DURABLE

You can break colts easier with this cart. No matter what position animal gets in you can dismount instantly. Nothing to tangle legs. It's great for road use. Absolutely no horse motion. Pleasant to ride in. A "hummer" for track use. Seat can be adjusted to balance rider thus taking all load off the horse. Write quick for free descriptive booklet.

### CHAMPION CART

## BERRY'S BARB BEATER

Cures wire cuts, sore necks, and collar galls. A powder. 50c and \$1 cans at all medicine dealers or sent direct on receipt of price (we take stamps). Write for free sample box.

**W. F. Berry Medicine Co., 208 Main St., Moulton, Iowa, U. S. A.**

diarrhea and loss of condition. If she proves free from tuberculosis keep her up and feed whole oats and dry hay. Treat by giving twice daily a dram of powdered sulphate of copper, ten drops of pure beechwood creosote and half an ounce of laudanum in a quart of flaxseed tea. Before commencing the treatment better clear the irritants out of the bowels by administering a pint of castor oil shaken up in milk.

#### BOG SPAVIN.

I have a colt five years old that has a bog spavin. It was caused by getting her foot fastened in the barn. It has been there since the first of January. Can it be cured? If cured by applying blisters, will she become lame or will she have to stop work?

It will be necessary to keep her tied up for a week or more while blister is acting and then she should not go to work under two or three weeks. Blistering will not lame her, nor is it likely that the bog spavin will cause lameness if she is not lame now. The condition often proves practically incurable. A suitable blister is made by mixing a dram of biniodid of mercury in two ounces of cerate of cantharides.

#### H. H. Diers' Short-horn Sale.

On June 14th, at Farmersburg, Iowa, occurred the sale of some splendid Short-horn cattle to an audience that lacked appreciation of high-class cattle. It was the occasion for the dispersion of the Center Valley herd owned by Mr. H. H. Diers, of St. Olaf, Iowa. As had been properly set forth in The Homestead from time to time, there were some splendid cattle in this offering, including a goodly number of Scotch cattle whose breeding was as good as the best. The Homestead predicted that owing to the isolated place of Farmersburg and the difficult manner in which it had to be reached, that the chances were that many breeders who were in need of this class of cattle would not go, and in this respect the expected happened. But for the atten-

dance of a very few outside breeders, the sale would have been much poorer than it was. The place is very difficult of access, as has been before stated. Hence, the outside breeders were limited. Noted among those who were present are Messrs. Walpole Bros., of Rock Valley, Iowa; A. J. Andrews, of Melbourne, Iowa; F. A. Schaefer, of Raleigh, Iowa; C. A. Steward, of Ames, Iowa; R. W. Davies, of Lime Springs, Iowa, and W. F. McCormick, of Lancaster, Wis. All the other breeders were from a radius of twenty miles around. Unfortunately a goodly number of the cattle were dehorned, which militated against their bringing their full worth. Another explanation which is necessary to make is that the calves in almost every instance were separated from their dams and sold as a separate lot, one of them selling as high as \$300, this price being paid for the beautiful roan heifer calf, Sweet Dreams, seven months old. She is properly named and was secured by Messrs. Henry Brandt & Sons, of Garnaville, Iowa. She was a daughter of Imp. Gladstone and out of Imp. Sunflower 22d. This firm, the Messrs. Eno Bros. and S. H. F. Schoulte, in addition to the breeders previously mentioned, saved the day for Mr. Diers. His cattle under the existing conditions should have made an average slightly less than \$175. However, an average of only \$130 was made on the entire offering. There was absolutely no local demand for the Scotch-topped American sorts. There seldom appears at any sale such a large crowd of farmers and farmers' wives as were to be seen here, but they are a rich German class of thrifty people, whose bank accounts we were informed variously ranged from \$1 to \$30,000; in other words, they seemed to have had all the money they wanted and were not willing to take hold of one of the best-paying lines of live stock ever on Iowa soil. Mr. Diers conducted the sale without a murmur or complaint, although fully realizing that his cattle were selling at great bargain prices to those who were wise enough to be present and bid at all. We append a list of all cattle selling at \$100 or over, with buyers' names attached:

## WITH THE EDITOR.

(Continued from last issue.)

As the girl crossed the room a young man excused himself from his companion and with outstretched hand stepped to meet her.

"Surely I'm in luck today, Miss Nello," Mr. Talbot said brightly, as he pressed the girl's hand with unmistakable fervor. "I did not expect anything so jolly as meeting you here when I promised to drop in for mother as I passed. It's a case of virtue being its own reward, don't you think so?"

"My experience with virtue is too limited for me to venture an opinion as to the quality of her rewards," the girl replied demurely.

What might be the nature of Miss Nello's feeling for Mr. Talbot one could not tell, but his adoring glances left no room for doubt as to the state of his affections.

"How splendid Dr. Kendall is," Miss Nello said, lowering her voice and looking across at the group of which Dr. Kendall was the central figure. "I do so admire that style of woman."

"Yes," he replied doubtfully. "Personally I like another type better."

"Of course!"—with some scorn. "Young men generally prefer dolls. They like girls who look sweetly pretty and will have eyes for them alone. You will want your wife to confine her interests to your socks and buttons—and the cook book; I mustn't forget the cook book!"

"Nello!" The single word and the look which accompanied it expressed volumes.

"Well, perhaps I shouldn't have said that, but listen now!"

The discussion about women's clubs was still in progress and Dr. Kendall was speaking at the moment.

"Grant that we are overdoing it, that there are too many clubs and that women are neglecting other duties because of them, time will right all that. Women may be trusted to find the happy medium."

Her eyes glowed with a soft light and

her voice had the vibrant note which bespeaks deep feeling.

"Have you ever noticed cows or horses when first let loose in a green field after long confinement in a stable? The simile is a homely one, but it represents my thought. The present attitude of many women towards clubs is a temporary one. Clubs, to them, mean increased knowledge, better opportunities and more power. The enlarged mental horizon, the freer atmosphere and the boundless vista opened up to them by club life and study, intoxicates them for the moment."

No one broke the silence and she continued:

"Men, long parched with thirst or famished with hunger, are apt to indulge to their hurt when first they find water or food. Women are no wiser, but after the pangs of a great want are satisfied, both may usually be trusted to practice moderation."

"I entirely agree with you, Dr. Kendall. Only I can never say the things as you do. I can only think them," said Miss Sinclair, who had joined the group while Dr. Kendall was speaking.

"My husband does not approve of clubs, but I feel I must have outside interests if I am to be bright and cheerful. It is enough to drive a woman melancholy mad to have nothing to occupy her day in and day out, year in and year out, but the same old routine of sweeping and dusting, making and mending, with their deadly sameness."

The woman who spoke had a general air of repression and her words were hardly audible; she stopped abruptly as if suddenly aware that she was uttering words instead of merely thinking them.

"Men who go out every day to business do not realize the monotony of the ordinary home woman's life, I fancy, of they would object less to women's clubs," Mrs. McArthur said.

"Why, my husband likes me to go to my club. He says I'm twice as companionable since I've been studying current events at the club. Now, in the evening, instead of dozing over the paper—or openly taking a nap—he reads aloud this or that article or item of news about affairs at home or abroad and we talk it over. It has made us quite 'chummy.' I think it's so nice for husbands and wives to be chums. It's almost as good, for every day wear and tear as being lovers."

Mrs. Austin is a young matron, interesting largely because of the new grafts she is constantly inserting on the main branches of a rather conservative character tree.

"Now, Mrs. McArthur, we want to hear your views on this subject."

"We all know even virtues can be so practiced as to degenerate almost into vices," the hostess replied. "The very best things can be abused, but virtue is good just the same. I think the club question should be viewed in this way. Even if there are too many clubs in some places and even if some women are 'club crazy,' as people say, the underlying principle of women's clubs is good. Women have a perfect right to associate themselves together for helpful study or healthy recreation and the fact that some few abuse this right does not counterbalance the other fact that thousands of our sex are better, brighter and happier since they have become club women."

"Those who oppose women's clubs forget, I think, how much real service to humanity clubs like the King's Daughters, Women's Auxiliaries and such societies perform," said Miss Sinclair.

"I stand for the woman's club for what it does for herself, not for other people," Dr. Kendall said warmly. "It is high time woman led an individual life and took to herself Shakespeare's advice: 'This above all, to thine own self be true; thou canst not then be false to any man.' If only we could believe that what we are is of infinitely more importance than what we do, everything else would follow. If women in clubs will only seek for growth and culture, for the highest and the best along every line of development, nothing else matters. As surely as the lighted candle gives light so surely will the home life and the nation's life be enriched, in due time, by the fuller, richer life of the women."

Mr. Talbot had listened as intently as Miss Nello. Now he leaned over and whispered:

"You are right; she is splendid."  
"Yes, I can imagine good men inspired to great things by her. She has done even me good. I used to think of nothing but having a good time before I knew her. Now life looks so different."

ing but having a good time before I knew her. Now life looks so different."

Perhaps Miss Nello felt they were on dangerous ground, for she changed the subject by saying lightly:

"You notice the women here do not gossip. That is because they are club women and interested in so many things they can't be bothered with people's affairs."

"I don't object to women's clubs." "Don't you? How nice of you. There! Mrs. Morton is really going, so I must say 'good-bye.' This evening? Why, of course. Well, au revoir."

## HOME AND HOMEMAKING.

## LITTLE HELPS BY THE WAY—DR. GOODCHEER'S REMEDY.

Feel all out of kilter, do you?  
Nothing goes to suit you quite?  
Skies seem sort of dark and clouded,  
Though the day is fair and bright?  
Eyes affected—fail to notice  
Beauty spread on every hand?  
Hearing so impaired you're missing  
Songs of promise, sweet and grand?

No, your case is not uncommon—  
'Tis a popular distress;  
Though 'tis not contagious,  
Thousands have it, more or less;  
But it yields to simple treatment,  
And is easy, quite, to cure.  
If you follow my directions  
Convalescence, quick, is sure.

Take a bit of cheerful thinking,  
Add a portion of content,  
And, with both, let glad endeavor,  
Mixed with earnestness be blent;  
These, with care and skill compounded,  
Will produce a magic oil  
That is bound to cure, if taken  
With a lot of honest toil.

If your heart is dull and heavy,  
If your hope is pale with doubt,  
Try this wondrous Oil of Promise,  
For 'twill drive the evil out.  
Who will mix it? Not the druggist  
From the bottles on his shelf;  
The ingredients required  
You must find within yourself.

—Success.

## GEORGIA SPLIT BISCUIT.

Pare and boil three potatoes until perfectly done. While still hot mash them fine, add a cupful of blended lard and butter, two eggs beaten separately and a yeast cake dissolved in a pint of warm milk; then flour enough to make a stiff sponge. When this is light add a heaping tablespoonful each of salt and sugar, then work in flour to make a smooth, satiny dough. Let this rise again, roll to half an inch in thickness, cut in biscuit, butter each one on top and place on in another biscuit. Crowd them slightly in the pan to prevent spreading, and brush the tops with a bit of melted butter. They will rise very quickly the last time, and should be baked like any other roll.—Good Housekeeping.

## GOOSEBERRY PUDDING.

Stem the fruit and stew it gently till it will pulp, then heat it up. For each pint of pulp allow a quarter of a pound of sugar, one ounce of butter, a quarter of a pound of breadcrumbs and two eggs. Mix all these ingredients except the eggs and add them to the fruit pulp. When the mixture has cooled add the eggs, well beaten, and stir them in thoroughly. Turn the whole into a buttered dish and bake for thirty minutes. Sift powdered sugar over the top just before serving. This pudding is delicious and may be made from canned as well as fresh fruit.

## REGULATING THE DAY'S HOUSEWORK.

The ordinary daily labor of the household is made difficult and hard by lack of thought and method. If economy of time is to be considered, and a regular routine of work for servants laid down each day, a tremendous amount of work may be done without worry, flurry or fatigue.

Before preparing a dish think first of all the materials needed. Bring those from the cellar at a single journey; from the pantry and refrigerator the same; then stand perfectly still and prepare the dish, thus saving both your time and strength.

All trouble and irregularity when guests are present may be averted if the servants are required to prepare the table and food every day in the year in the best and most attractive manner possible.

Articles not liable to perish may be purchased in large quantities. They should be kept under lock and key.

Economy and wise forethought, not niggardliness, stand as the first of domestic duties.

Poverty does not prevent skill in the preparation of food. All food should have its proper flavoring, the individual ingredients needed for its proper preparation. These flavorings are given by using up the little

## Traction Engines For Sale.

We have on hand ready for delivery several 14 Horse-power Traction Engines, new and second hand, also one 8-horse-power Traction Engine second hand, that we will sell very cheap in order to close them out within the next few months. A great opportunity to buy a good engine at practically cost price.

## THE MERRY MAKERS

Benevolent Old Gentleman (rescuing one small boy from the pummeling of two others)  
—"What are you hurting this boy for?"  
—"Because he made so many mistakes in his arithmetic this morning."  
—"But what business was that of yours?"  
—"Why, he let us copy our answers from his."

"That new farm haul of yours used to be a hookkeeper."  
—"How do you know?"  
—"Every time he stops for a minute he tries to put the pitchfork behind his ear."

She—Isn't a railroad wreck a terrible thing?

He—Yes, it is—especially when you happen to own stock in the railroad.

## CHOICE RECIPES

Cherry Pie.—Stone one quart of tart cherries, saving the juice, add one and one-fourth teaspoonfuls of sugar and a heaping teaspoonful of cornstarch and stir well together. Cover a deep plate with paste, brush over the bottom with white of egg, spread the fruit over it evenly, wet the edges with white of egg, pinch the top close, sift one tablespoonful of powdered sugar on the top and bake in a hot oven.

A Delicious Dessert.—Mix three tablespoonfuls of flour with four of cream or milk until the resulting paste is perfectly smooth. To the thoroughly beaten yolks of four eggs, add slowly half a cupful of pulverized sugar, then the grated yellow rind of a lemon, then the juice and lastly flour paste. Cut into this mixture with a little stirring as possible the whites of the eggs stiffly beaten; place the puff immediately in a warm buttered pudding dish, powder with sugar, and bake for about twelve minutes in a rather hot oven. Serve at once with a berry sauce.

Mash three cupfuls of ripe berries; add one cupful of sugar; set over fire; add one tablespoonful of butter; stir well together, and serve warm.

## FOR THE BOYS.

Boys, when you speak of your father, don't call him "the old man." Of course, you are older now than when you learned to call him "father." You are much smarter than you were then; you are much more manly looking. Your clothes fit better; your hat has a modern shape, and your hair is combed differently. In short, you are "flyer" than you were then. Your father has a last year's coat, and a two years' old hat, and a vest of still another pattern. He can't write such an elegant note as you can, and all that—but don't call him "the old man." Call him father. For years he has been hustling around to get things together; he has been held to the thorny path of uphill industry for years, and the brightest half of life has gone from him forever. But he loves you, though he goes about without saying much about it, and if he knew you were bad, it would be the heaviest burden he has to bear.

The world is lookin' round for boys.

**FRUIT FREE.**

Of the right kind.  
Steady boys, who are not mere toys,  
Are hard to find.

Not boys who go by fit or jerk,  
But earnest boys who nothin' shirk;  
The boys who are not afraid to work,  
They're the kind.

#### AMONG OURSELVES.

Since our last talk about prohibition I have been reading that some man—I cannot at this moment recall his name—predicts that within ten years the manufacture and sale of intoxicants will be illegal in all these United States. I wish some one who has been reading about this would come and talk about it for the benefit of the circle. Meantime we shall hear from an ardent South Dakota prohibitionist, Mr. D. R. Hughes:

Yes, you are right, it is hard for some men to get their ideas on paper and that makes some of us prohibitionists slow. Yes, I can show you plenty of ministers that have preached from five to twenty-five years and haven't anything to show for it but a lot of saloon voters. It is no use telling of the ruin the liquor traffic has caused; any man that don't know about that is either a knave or a fool. There is 2 per cent of the church vote that is cast against the saloon; 98 per cent of the troubles of the fathers and mothers of this civilized country is caused by drink of their own choosing. We can't sit down by the door of temptation and not enter in to sin. If you want to make a man honest get God in him. When you see a man go into the polling booth with God in him you know he votes against the saloon. A gentleman or a Christian will not vote for a saloon. We have men born and reared in Christian homes, educated in free schools, men who attended the Sunday schools of a Christian country, who listened to the gospel of one thousand churches, yet we have nothing to show for all this work, but a saloon voter. The traffic has ruined the press of our country. We have a town here that had one clean paper that went into the Christian homes round about it. It was a clean town, then they voted to have licensed saloons and they seeded it down with three. The next week the paper came out with three saloon advertisements in it. Then they built a church and hired a preacher. He came to town and walked down the streets and saw the church members and their sons drinking their beer and playing their pool. Then he went home and told his wife, "I know what to preach in this town ruined by the traffic." But he must live.

It is easy to lay down the law for others, but I wonder if Mr. Hughes, were he a preacher or an editor, would boldly speak out his mind if he had reason to believe that it would make him enemies and possibly cost him his position. Preachers and editors undoubtedly have duties in this direction, but it behooves us to remember that we ourselves sometimes fail to do the duty nearest us. Pulpit and press frequently, generally in fact, do their fair share to develop sentiment in the direction of what is right in their eyes. Sometimes without direct mention of it they work for some reform by inculcating principles, the application of which would result in definite action in the desired direction.

A bit of rhyme by N. B., fits in just here:

#### DO THE BEST THAT YOU CAN.

You may not be able to accomplish o'ermuch,  
But do the best that you can;  
Life has a reward for every one, such  
As do the best that they can.

Great deeds,—you may never attain to such,  
And fame you never may win,  
But if content, you a hero may be  
Just doing the best that you can.

You may not be able to scatter the gloom

That darkens your life now and then,  
But pierce it with light, with courage and might;  
Do doing the best that you can.

Your face may not always light up with a smile  
Discouragements oftentimes may win,  
But discouragements flee, the smile will re-  
turn  
When you do the best that you can.

Then do the best that you can;  
Be strong; "quit yourselves like men;"  
Faint not by the way but press onward alway  
And the victory you surely will win.

Suppose we take "Do the best you can" as a command laid upon us for a week and see what comes of it. In a big circle like this the experiences incident upon trying—trying systematically, enthusiastically, sedulously—to do the best that we can ought to be decidedly interesting. May we hear some reports? I hope so.

We are to have a rich treat today—a book talk from Mrs. Ninette M. Lowater, of Rock Glen, Wis. Mrs. Lowater is equally an authority in matters literary or housewifely. We count ourselves honored to have such a one Among Ourselves:

Perhaps *The House of Mirth*, by Edith Wharton, is the most carefully studied and accurate picture of life in rich and fashionable circles of to-day that was ever written. This revelation of the real emptiness and greed hidden by the sparkling exterior of the relentless current which overwhelmed Lily Bart, cannot fail to leave the thoughtful reader more contented with the happiness and safety of the average humble home. *The Spoilers*, by Rex E. Beach, is a book of great interest, giving accurate pictures of the settlement of our still new domain of Alaska. Its story of the conspiracy for stealing the courts and looting the revenues of the mines, which was partially successful, would be beyond belief if the facts were not proved, and is very interesting. Many of the characters in the story are real people, with an easily penetrated disguise, and each is a vivid life-like portrait on a background of reality. *The Call of the Wild*, and *White Fang*, by Jack London, are stories of which a dog is the central figure, but each gives an interesting picture of life in the Arctic Circle also. I am now going to speak more especially of historical novels, for as they are now written they are accurate pictures of the times which they describe, and clothe the dry bones of history with the flesh and blood of reality. It is impossible for one to comprehend a by-gone period from history alone, or to understand any person's proper place in it from only history and biography. All biographers are more or less—and generally more—appreciative, and give an exaggerated idea of the importance and influence of the subject, and each person chooses books of this kind with reference to his own studies or desires for information. I wish to mention these books, however, as possessing all the charm of romance, combined with historical accuracy—Prescott's *Conquest of Peru*, *Conquest of Mexico*, *Ferdinand and Isabella*, and *Washington Irving's Alhambra*. Excellent historical novels to be read with these are *The Fair God*, *Haggard's People of the Mist*, and *Henty's By Right of Conquest*. In our country, the period of war between France and England for a foothold in America is well-told in *On the Old Frontier*, *The Seats of the Mighty*, and *Alice of Old Vincennes*, also in *Henty's With Wolfe in Canada*. The period of the Revolution is rich in its literature, but I will mention a few books I can recommend, especially in connection with the study of the history of that time. These are, *Hugh Wynne*, *In Hostile Red*, *Richard Carvel*, *Cardigan*, *The Reckoning*, and *In Defence of the King*. As I lived for some years in the place where *In Defence of the King* is located, and bad relatives who took part in the scenes in pictures, perhaps I may be permitted to say that its story is historically and locally accurate. *Cardigan* and *The Reckoning* deal more especially with the Indian allies of the British, and with the wretched officer, *Walter Butler*, who was responsible for the worst massacres. The war of 1812 is less rich in its fiction, but *By the Eternal*, (Opie Read) is a good picture of the hero and battle of New Orleans. Of the Mexican war, Mrs. Barr's *Remember the Alamo*, and Miss Evans' *Inez*, are the best I recall. Of stories of the civil war, *Fox's Little Shepherd of Kingdom Come* should head the list. *The Fortunes of Oliver Horn*, *The Crisis*, *In Circling Camps*, *My Lady of the North*, *Red Rock*, and *Carleton's The Boys of '61* are all very good. Any parent is perfectly safe in giving a child any of the Henty books, also *The Elm Island series* of books, by Rev. Elijah Kellogg. I do not think the *Oliver Optic*, *Harkaway*, etc., books, have a good influence for young people, however. For girls, any book by Mrs. Whitney, especially *A Summer in Leslie Goldthwaite's Life*, or any by Mrs. Ward Phelps, *Miss Burnham*, or Mrs. Ewing, rank with those of Miss Alcott. If one desires decidedly religious books, which shall be attractive to the young, the very best I know are these: *The Prince of the House of David*, *All He Knew*, *A Singular Life*, and *A Knight of the XIX Century*. A new nature book for young children is *Birds Every Child Should Know*, issued by Doubleday, Page & Co., New York. Our *Little Friends in Feathers* and *Fur*, is also good. Of miscellaneous books, some of the best are *Sir Nigel* and its sequel, *The White Company*; and *Micah Clarke*, all historical novels of the first grade, both of interest and excellence. There are also *Men of Iron*, *Chuck Purdy*, *In the Golden Days*, *The Last of the Flatboats*, all of interest to any member of the family. Before I conclude, I wish to protest against the too common practice of giving a child of eight or ten "baby books" to read. A child of that age, who has been a companion of its elders, in a family where good language is used, has a much larger vocabulary and more mature comprehension than is usually supposed. Such children understand every word of such papers as *The Youth's Companion*, and I have known them greatly excited over such

## FLINT-COAT ROOFING

QUALITY Remains After PRICE Has Been Forgotten.

Our roofing costs less than shingles; lasts longer. Does not rust like iron.

Every Roll Guaranteed Perfect

Water, Wind, Hail and Fire Proof

4-ply Flint Coat Roofing	.....\$2.50
5-ply Rock Asphalt Roofing	.....\$2.90

books as *Lorna Doone*, *The Spy*, *Days of Bruce*, and *Verne's Mysterious Island*. If the mother will read these books aloud, with a little occasional judicious explanation, she will find that her children enjoy them better than worthless "juvenile" books, and have, beside, a taste formed for reading which has a decided educational value.

Apropos of Mrs. Lowater's protest against baby books, in an article about Superintendent Cooley, of the Chicago schools, I notice his success—phenomenal success—is attributed largely to the fact that his mind was strengthened by reading good literature in his early years. Before he was eleven he was reading *Rollins*, *Josephus* and *Petrarch*; when the 'ologies and the 'onomies confronted him perception and memory were both equal to grappling with their difficulties. And yet there is another side to this matter. There are boys who could not be bribed to read *Rollins' Ancient History*, who eagerly devour historical pills sugar-coated by Henty or Abbott. These lads are kept out of mischief for the time being and frequently they acquire a taste for reading which sends them to better things in later life. It would be helpful to hear from the friends along this line. Will parents please report for the general good?

Mrs. Dodge, of the Canadian Northwest, has a word for us:

Oliver's advice to Mrs. Custer County, also the remarks of Mr. C. E. K. on Sunday ball games were timely and very well said. In Canada, the Lord's Day act, prohibits Sunday ball games, excursions, shooting, etc., consequently the Sabbath is a very quiet day with us. As the subject of Sunday entertaining is open for discussion, I will just add a word. If you invite company for Sunday, don't blame them for coming. When they come without invitation, treat them nice, but return their visit on a week day, and when asking company to visit you, set the day for them, whenever it is possible, also let it be known where you stand yourself on that question and the problem of Sunday entertaining will soon regulate itself. As to whether it is right or wrong, for me it would be wrong. Never take your Christianity from Christians, but ask yourself: How would the Lord have me act, and follow Him.

As illustrating the wide difference of opinion there is among Christian people regarding the observance of Sunday, here is an actual happening: Passing the house of an acquaintance while out walking one Sunday, the door opened and the lady of the house came running out to insist upon our going in. She and her husband are both teachers in the Sunday-school of an evangelical church, but to my surprise, they had been playing "flinch" and they invited us to take a hand. Half an hour later the young daughter, who sings in the choir, came in for a volume of college songs. Some young folks across the way were having "a sing" and they needed an extra copy of the college song book. As Mrs. Dodge says, Sunday in Canada is a very quiet day. I have never yet become accustomed to the American Sunday, but I have grown fearful of sitting in judgment upon those who see no harm in Sunday pursuits and occupations which I was reared to think sinful.

"A Happy Wife" comes to answer a curious question recently propounded here Among Ourselves:

Someone asked not long ago: "What is the sourest thing in the world?" To my mind it is the man or woman who has a "grouch" at everything and everybody; who sees the thorn, but not the rose; who hears the thunder crash and the down-pouring rain, but after the storm is unresponsive to the joyous sunshine, the lifting of birds and the general glad thanksgiving of nature. We've all met such people. Some specimens are everywhere; "calamity bowlers," my father used to call them. To such I should like to give the advice which the old Colonel in Arthur Goodrich's new novel, *"The Balance of Power"*, gave to a young friend of his: "Don't get grouchy if things don't come your way. If ye're grouchy ye can't blame 'em."

There will probably be a difference of opinion as to the answer to the question, "What is the sourest thing in the world," but there is food for thought in

## Nebraska Automatic Gate

OPENED from wagon or carriage. Any lady or eight year old child can operate this gate. All steel. Can be hung on any gate post. Nothing to get out of order. 12 ft. gate \$10. You can't afford to be without this gate for the price. Hog and cattle proof. Also Rice's Automatic Tilt Gate. Ornamental steel. Gates and rod fences a specialty. Catalog upon application.

the reply of A Happy Wife. Let us hear from others.

With a word from Kansas Girl, we shall stand adjourned:

I noticed last evening "Among Ourselves" your request for a good home-made furniture polish. A friend told me this spring to use equal parts of kerosene and turpentine. I tried it, but found it left a dull finish. Good results may be obtained by using equal parts of linseed oil and vinegar. This when applied with a woolen cloth gives the furniture a nice gloss. When furniture becomes scratched or marred all traces may be removed by rubbing with the meat of a hickory nut.

Dressmaking and Millinery. No. 574.

Sylvia Silverthorne, Muscatine, Iowa.  
(All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper, nor to the editor of the Home Department.) It is not a new suggestion that huttons of all sorts play an important part in the fash-

[5617 Five Gored Skirt, 22 to 30 waist.]

tures of dress this season, but I will mention here that one of the most attractive costumes I have noticed is made with a bolero, perfectly plain except for two very large buttons, say the size of a silver dollar, that are covered with the material and close the front. Embroidered huttons are very fashionable, and the work of preparing them is very simple. Any fancied design is stamped

## Our Liquid Extract of Malt

MADE FROM THE CHOICEST MALT AND BARLEY EXTRACTS.  
THE LIQUID FOOD AND THE PLEASANT JUICE OF NATURE.

The Mild, Soothing Nerve Tonic and Stomach Stimulant.

\$1.25

In Our Purify Malt Extract you have a liquid food which is not only nourishing but also a powerful tonic for the system. It is especially recommended for the weak, the nervous, and the debilitated. For a further description of its uses and benefits, see the enclosed leaflet, which may be had free of charge by sending a stamp to the nearest agent.

If You are Weak and Run Down, no Appetite, a wine glass full before meals will bring about a new era in your health. If you have a weak stomach, a glass full after meals will aid digestion, give tone to the stomach and you will find pleasure in your meals at all times.

If You Have Sleepless Nights and don't rest, a wine glass full before going to bed will bring about a new era in your health. It will bring about a new era in your health.

Our MALT EXTRACT is made from the purest and best of Malt and Barley. In order to give a more gentle and soothing effect, a touch of sweetened condensed milk will help the stomach and is a special aid for all nervous disorders.

If You are Just Getting Over a Sickness, there is nothing that will build you up so rapidly as a glass full of this extract. It is especially recommended for the weak, the nervous, and the debilitated. For a further description of its uses and benefits, see the enclosed leaflet, which may be had free of charge by sending a stamp to the nearest agent.

Women, so many who are troubled with weakness, find a glass full of this extract before going to bed will bring about a new era in your health. It will bring about a new era in your health.

So Many Do Not Know that there is a liquid food which is not only nourishing but also a powerful tonic for the system. It is especially recommended for the weak, the nervous, and the debilitated. For a further description of its uses and benefits, see the enclosed leaflet, which may be had free of charge by sending a stamp to the nearest agent.

These are Plain Facts, and in keeping with them is a Plain, Honest, and Satisfying statement of the value of this extract. It is not a new suggestion that huttons of all sorts play an important part in the fash-

A GREAT SPRING TONIC  
SPECIAL OFFER—We will give everyone an opportunity to buy this famous Malt Extract at a special price of \$1.25 a bottle for a limited time. Write for details to the nearest agent.

The V. M. Roberts Co-operative Supply Co., Chicago, Ill.

on material similar to the garment on which the buttons are to be used, or it may be on silk, care being taken that the design is not

[5626 Child's Dress, 2, 4 and 6 years.]

too large for the mold that is to be covered. Any of the simple or fancy stitches may be used in the work, and threads of different

colors may be used if an oriental effect is sought, using an occasional bead and some tinsel thread. Or a simple flower in a color corresponding with something in the material or with that to be worn with it will give pleasing results. These buttons are inexpensive when made at home, but far from it when purchased ready-made. Linens are especially easy to manage in this way, but any material may be so treated if handled with proper care.

The skirt that has a gathered flounce is favored again this season, and one in that mode is shown in 5617, and it has a five-gored upper portion to which two flounces are joined, adding to its length. Such a design is especially suitable in making up the light weight silks, and woolsens. Foulards are developed after such designs, and materials that are to be laundered also, although for the latter I would prefer a flat trimming at the top of the flounce, as better results are to be obtained in the ironing. Any mode of finish may be used, embroidery and insertions being desirable on wash fabrics. The skirt may be cut off for the short, round length if desired, as this is provided for in the pattern. Pattern 5617 is cut in sizes for a 22, 24, 26, 28 and 30 inch waist measure. Slight variations in waist sizes are easily made in a skirt that is gathered at the top.

The French dress is always a favorite, and the design shown in 5626 is very simple. It is pictured made with an epaulette-bertha, and with full length sleeves, but in the smaller design it is shown made with the plain yoke and with short sleeves. So you will note that there is a chance for variations to suit different tastes, also that with the same pattern there may be a variety in the making up of two or more garments. Such a dress when worn on dressy occasions may be worn with a sash of soft silk or of the wide sash ribbon in dainty effects, and this gives other "variety." Pattern 5626 is cut in sizes for girls of 2, 4 and 6 years.

Send eleven cents in money (not stamps), for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

#### Coker Cured of Cancer.

After resorting to the knife and burning plasters, Mr. Coker was completely cured of a malignant cancer, under the eye, the size of a turkey egg, by a combination of soothing oils, in a few weeks. A free book, giving full information sent. Address, Dr. Benj. F. Bye, Indianapolis, Ind.

## PLEASANT FIELDS OF HOLY WRIT

SAVE for my daily range  
Among the pleasant fields of Holy Writ  
I might despair.  
—Tennyson.

### The International Sunday-School Lesson.

Second Quarter. Lesson XII. June 23, 1907.

#### Review.

These pictures, forty centuries old, are still fair and fadeless. There is nothing intricate or occult about them. They are simple and true to life. That accounts for the hold they have upon the universal human heart. They are mirrors of good and evil. They reflect on the one hand the charm of saintliness, on the other the ugliness of sin. They show the ultimate coronation of goodness and the certain ruinous denouement of evil. The one class is inspirational, the other deterrent. It will never be known how much they have promoted the ethical evolution of humanity. They have been fairly interwoven in the thinking of all the races who have become the fortunate possessors of them and have powerfully affected the springs of human conduct in every age.

The first picture in this series represents Jacob in flight. A more vivid portrayal of the pains and penalties of trickery could not be made. The patriarch has gotten the birthright and blessing by guile, but it cost him dear. Out he goes, a shelterless fugitive, with four hundred and fifty miles and forty years of exile before him. But mercy lines with silver the penalty. A vision of a heavenly staircase thick with angel ministers cheers the exile.

Forty years later Jacob attempts a return in spite of the still cherished anger of his brother. On the boundary of Canaan he is in an agony of prayer for deliverance. There is nothing inexplicable in the wrestling scene commonly thought to be so mysterious. It was a merciful concession when the Lord took upon Himself a human form and allowed Jacob to vent his excessive grief and anxiety in the way of physical exertion. The corporeal struggle was an accompaniment of prayer. Jacob gets a new name and a new nature on the spot. But, after all, it is not an instantaneous and miraculous substitution of one nature for another. The ethical and spiritual evolution has been going on for four decades. It has taken forty years to make an Israel out of a Jacob.

From the thorny and thistly sons of Jacob grapes and figs could not be expected. They were rude, treacherous, belouin. The gentle and pure character of Joseph was a standing stricture upon

them. They nursed their jealousy until it reached the size of murder. There is an expulsive power in a new vice as well as in a new virtue. Avarice ousted murder. The sight of the approaching trading caravan suggests the possibility of making merchandise of this obnoxious brother. A moment later they gloat over their two shekels apiece and see their brother depart to hopeless servitude.

As in a microcosm one sees here the evolution of a man and a statesman. The circumstances which seem to retard really accelerate the process. Joseph had learned how to take honey out of the eater—one of the finest and most useful arts of life. As a slave he made himself indispensable to his master. Unconsciously he was schooling for the premiership. Faithful in few things, he was to be lord of many. The next incident seems to

# PILES NO MONEY TILL CURED.

FISTULA, Fissure, Contraction, Ulceration and all Rectal Diseases treated on a positive guarantee of permanent cure.—Established 29 Years.—See thousands of prominent names with statements that they paid nothing till satisfied of a cure in our free 32-page illustrated treatise, also our 132-page illus. book for women; both sent free and postpaid.

plunge Joseph in irretrievable ruin. Yet the possibility of dominating one's environment has a new proof, for in the shortest possible time the prisoner is the prison-keeper. Yet all turned on the character of Joseph. A meretricious promotion might have come to him, even had he been corrupt at heart. But a permanent exaltation in the hearts of his own and his adopted countrymen—an assured position among the immortal worthies in kingdom and patience of God—a good life only can win that distinction.

From prison cell to throne-room is a startling transition. But really Joseph had paved every step of the way, and it had taken him thirteen years to do it. The abruptness is in appearance only. The young Hebrew made the very best of his circumstances. He acquired the language, observed the manners and customs, detected the defects in public administration. He managed the estates of Potiphar with such fidelity as to prepare him to administer the empire of Pharaoh. When his environment narrowed down to prison walls, he availed himself of his enforced seclusion to reflect upon what he had observed. He kept himself unpolluted from the vices incident to prison life. He was ready when the hour struck.

Joseph was the "eyes of Pharaoh." He was devoted to his sovereign and to his adopted country. The splendor of his vesture, ornaments, palace, chariot, can hardly be over-estimated. In the midst of his glory the brothers who had sold him into slavery twenty-two years before were brought into his presence. No wonder they did not recognize him. He showed consummate skill in secreting his identity from them and discovering their present attitude toward the brother they had so misused.

The uses of adversity have fine illustration in Israel's experiences in Egypt. When they ceased to be guests and became slaves in the land of their adoption, their first gain was humility. Their second gain was nationality. Egypt proved the furnace in which a loose population was fused and compacted. Again they were shut up to God. There was no other eye or arm for them. So faith and all other graces of the spirit were nourished as "sharp frost nourishes corn."

The faith of Moses' parents was the

turning-point of Hebrew history. They recognized the child as the appointed deliverer. For three months they hid him in defiance of imperial edict and at peril of their lives. When pressed to it as a last resort, they used consummate strategy. They committed the babe in his ark to the sacred river at the very spot where Pharaoh's daughter bathed. As a reward of their faith their babe lodged in the imperial palace and made spoil of Egypt's wisdom in preparation to be Israel's deliverer.

The mystic flame, symbol of the Divine presence, had been unseen for four hundred years, when it burst upon the vision of the lonely shepherd far down towards Sinai. What an unlikely one to be called to be deliverer of Israel from Egypt. But a better emancipator could not be conceived than that very herdsman kneeling before the green bush transmuted into a flaming shrine. He knew Egypt, Pharaoh, Israel, and the Wilderness. He was a graduate from God's school of adversity. His wonder-working rod was his diploma.

The duel between Omnipotence and earth's proudest monarch is without a parallel. The plagues of Egypt are the Divine answer to the challenge, "Who is the Lord?" They illustrate the Divine power over every kingdom of nature. The impossibility of coincidence is proved by the uniformly ascending scale and the exemption of the Hebrews in every instance. It was fitting that a commemorative ordinance should be instituted. Nothing more significant than the domestic sacrament of the Passover can be imagined.

The exit of Israel was not the flight of criminals. They traveled by a special royal edict which gave them authority to do so. Their march was orderly, by tribes. God's banner floating in the sky before them—Pharaoh's attempt to reclaim the Israelites when he saw them apparently marching into a blind alley is true to nature to the dot. Israel was panic-stricken. A wind divides the sea and Israel crosses dry shod.

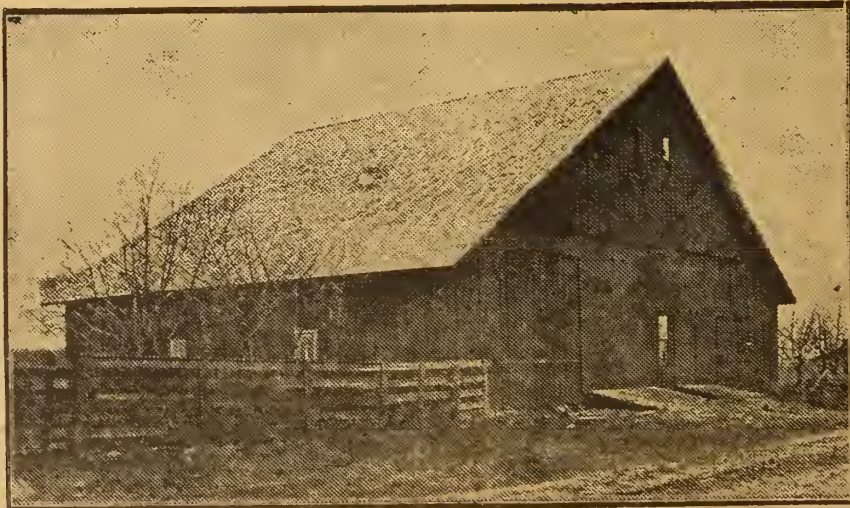

The fascination of this four-thousand-year-old story is, that it is a study in Life. It is no middle age piece of scholasticism, but a warm-blooded history of human nature; not a dissertation on metaphysical generalities, but a tale of human emotions, as they are felt today, and every day, and everywhere. It is the "proper study of mankind." It concerns Man, and is consequently universally interesting. The effort to re-tell the story is futile. To reclothe it is to do violence to it. Its own dress is its only dress. Its simplicity, genuineness, fidelity, make it a masterpiece of literature.

## ITCHING ERUPTIONS

Covered His Body--Suffered 14 Years--Completely Cured by

## THREE BOXES OF CUTICURA

"Small sores appeared on each of my lower limbs, and shortly afterwards they became so sore that I could scarcely walk. The sores began to heal, but small scaly eruptions appeared. The itching was so severe that I would scratch the sores until the blood began to flow. After I suffered thus about ten years I made a renewed effort to effect a cure. The eruptions by this time had appeared on nearly every part of my body. The best doctor in my native country and many remedies gave no relief. Finally my hair began to fall out and I was rapidly becoming bald. A few months after I thought I would try Cuticura Ointment and Cuticura Soap. After using three boxes I was completely cured, and my hair was restored after fourteen years of suffering. B. Hiram Mattingly, Vermillion, S. Dak., Aug. 18, 1906."

This barn is one of the kind that is to be found on some of the Michigan farms that are advertised in our columns this week. One of these is advertised on page 8, and consists of 480 acres of fine grain and grass growing land. Corn, as well as small grain, potatoes and other crops of its kind are well adapted to production on this southern Michigan farm. The market for these products is also easy of access, which adds to the value of its location. The total value of the buildings on this farm is something like \$10,000, which makes it well suited for stock raising, and for housing the machinery and products of the farm as well. While the owner of this farm hopes to sell it without reducing its size, he will cut it down to 380 or 240 acres in order to satisfy the demands of the purchaser. This farm is fully described in the advertisement and is priced very reasonably considering its situation and advantages. For terms and description of this farm, as well as many others in southern Michigan, address S. V. R. Hayes, 53 Ionia St., Grand Rapids, Mich.

## Lake and Stubbs Red Polls Sell Well.

The combination sale of Red Polled cattle held at Hampton, Neb., June 12th, by Messrs. W. H. Lake and H. F. Stubbs, was a decided success. A medium sized crowd of breeders answered the call of this sale and it is a pleasure for us to report that the sale cattle were all in the best condition and as the breeding was as good as could be found the sale was a good one. Owing to the fact that the weather was so favorable for farmers to be attending their growing crops, there was not much of a local crowd present. Therefore the breeders from a distance picked up a greater part of the stuff. The top price of this sale was \$260 for Lot 5 in catalog, one of the most promising young bulls of this breed that will go through a sale ring this year. He was a son of the great herd bull, North Star, a first-prize winner at the Nebraska State Fair, and the sire of many show animals of this breed. He went to the well-known herd of Mr. Chas. Graff, of Bancroft, Neb., and a bright future is looked for this young sire. There was quite a demand for the she stuff in this sale and the best of them were sold for good prices. Below is the list of the sales:

Lot.	Name	Price.
1.	B. N. Gasper, Linsey, Neb.	\$100.00
2.	R. H. Stafford, Bancroft, Neb.	90.00
3.	Chas. Graff, Bancroft, Neb.	125.00
4.	Frank Oakman, Atlanta, Neb.	92.50
5.	Chas. Graff	260.00
6.	G. H. Brabban, Bradshaw, Neb.	67.50
7.	S. McKelvie & Son, Fairfield, Neb.	75.00
8.	M. A. Sewell, Skidmore, Mo.	80.00
9.	S. McKelvie & Son	75.00
10.	Same	75.00
11.	Nels Holm, Osceola, Neb.	100.00
12.	W. R. Reeves, Afton, Iowa.	100.00
13.	Geo. Seaman, Utica, Neb.	72.50
14.	Chas. Graff	120.00
15.	Geo. Schwab, Clay Center, Neb.	55.00
16.	B. N. Gasper	80.00
17.	Geo. Schwab	55.00
18.	S. McKelvie & Son	90.00
19.	Geo. Schwab	102.50
20.	J. F. Glothlin, Beaver City, Neb.	90.00
21.	Nels Holm	147.50
22.	B. N. Gasper	80.00
23.	Frank Oakman	65.00

## The Thomas, Jameson &amp; Mitchell Sale of Short-horns.

The presence of so many breeders at the sale of Short-horns held at Kansas City, Mo., on June 13th, by Messrs. Thomas, Jameson & Mitchell, of Allen, Kan., shows an increasing interest in this breed in the West. The cattle were scattered over a large territory, three head—White Goods, 47th Duchess of Gloster and a cow with show calf at foot—going to Mr. N. C. Maris, of Portland, Ore., on an order from a northwestern breeder. Col. Geo. F. Bellows opened the sale with a few appropriate remarks and introduced Col. W. A. Harris who gave an interesting talk on Short-horn conditions as they are found today both in America and in Mexico. Colonel Harris bought two heifers for a shipment to be made to Mexico by Short-horn Breeders' Association. The show and breeding bull, White Goods, topped the sale at \$1,150, going to Mr. N. C. Maris, of Portland, Ore. Orange Viscount, the senior herd bull, went to Mr. H. T. Forbes, of Topeka, Kan., at \$600. Mr. Carey Cameron, of Herman, Neb., a rising young Short-horn breeder, furnished the competition on both the herd bulls and but for his persistent efforts to buy they would have gone at a much lower figure. The top on females was paid for the first cow sold, Sunbeam 2d, she going to Mr. E. H. Carter, of Mexico, Mo., at \$505. The bidding was good from start to finish.

## LANDS AND HOMES FOR SALE

HERBERT HURD.

I can sell you good land in the Coast Country now at \$20 to \$25 an acre—and this land will be worth \$100 in ten years, you mark my words. What was land worth in your locality ten years ago? The men who compose my company are among the largest land owners in South Texas, and we want settlers because all it's going to take to make this land worth a lot of money is people. If you knew this country as well as I do you'll get a slice of it—and the finest of climates. We have no long, cold winters, no droughts—32 inches annual rainfall—and the finest of climates. If you don't want land for yourself you may want it for the boys. I publish a little monthly magazine called "Hurd's Pipe Dreams" which I'll send you FREE. It's full of information about what the farmers in the Coast Country are doing. Write me today and ask for it. A postal will do. Don't wait—the price of land is going up. Let me show you "The Road To Prosperity." [I want good agents.]

HERBERT HURD, V.P. &amp; Gen. Mgr., The Fidelity Immigration Co., 1046 Union Ave., KANSAS CITY, MO.

## TEN : CENTS : AN : ACRE

FOR the best farming land on the continent. A 160 acre farm for \$16.00 (the government filing fee) in GOD'S COUNTRY, its rolling prairie covered with velvet verdure, and it's yours if you will come and get it. It's less than five miles from the Great Northern Ry. in the land of opportunity—Montana. Don't pay any more rent. You can get a round trip ticket from St. Paul for \$25.00, and if you come and see it you'll throw away the return trip stub. For further particulars address

Leo B. Coleman, Glasgow, Montana, Secy. Commercial Club.

## A Great Bargain

The Homestead and The Homemaker, \$1.25 per year.

I WILL SHOW YOU  
THE ROAD TO PROSPERITY  
IF YOU WILL COME TO  
SOUTHWEST TEXAS.

THE wonderful Gulf Coast Country. I've sold land for ten years, first in one state and then another. But I've quit doing business that way because when I went to the Coast country of Texas I found the best land I ever saw—and I've seen a lot of it. Now I sell nothing but Coast Country land. If you'll come to Texas I'll show you land as level as a floor—good black soil that will raise big crops of Corn, Cotton, Alfalfa, Rice, Sugar Cane, as well as practically all the vegetables and tropical fruits, and many farmers raise three or four crops a year. Why slave and save and raise ten dollar crops on hundred dollar land when I will sell you land that will raise fifty dollar crops for \$25.00? Here's an example: On eighteen different farms, comprising 3,118 acres the crop sold for an average of \$51.66 per acre. This was a field crop grown the same practically as oats or wheat. Can you do as well on your land?

I can sell you good land in the Coast Country now at \$20 to \$25 an acre—and this land will be worth \$100 in ten years, you mark my words. What was land worth in your locality ten years ago? The men who compose my company are among the largest land owners in South Texas, and we want settlers because all it's going to take to make this land worth a lot of money is people. If you knew this country as well as I do you'll get a slice of it—and the finest of climates. We have no long, cold winters, no droughts—32 inches annual rainfall—and the finest of climates. CORN and Alfalfa farms for sale; good improvements. Write for prices. Jas. S. Sheeran, Solomon, Kansas.

# DAY BY DAY

Agricola

Some of the most even-tempered people in the world are tempted to give hard names to animated beings which displease them. The scientists study such things out in cold blood, and they call the striped cucumber beetle diabrotica vittata. That is a bad name, and the way the beetle lives up to it is awful.

It is in the early life of a vine that the damage is done—while the leaves are young and tender. After it is well established it gives the laugh of scorn to the greedy diabrotica. How can we assist the vine in its babyhood?

The madam of this homestead covers the leaves with ashes. This is hard on the beetles, and somewhat so on the vines. Some gardeners prefer to use air alaked lime, with just enough Paris green stirred in to barely color it. This is still harder on the leaves, but they are careful not to put any on the top side. The under side and the ground is dusted with it, and the enemy completely routed.

Agricola often wonders if the inventor who fails is not often of greater benefit than the world gives credit for, and if he is not a necessary John the Baptist, without which we should yet be in the dark ages.

It was many years ago, when the Iowa State Fair was held in Brown's Park, being then on wheels, that "The Screw Pulverizer" was exhibited as the coming machine to prepare a seed bed. It was an immense drum mounted like a field roller, with a sharp edged spiral screw around it. Six extra good horses could pull it; eight were better, and if the ground were dry it would do good work.

None of them have been made or sold for a quarter of a century. It is because the principle was correct, and other inventors borrowed it and made the disk pulverizers. They are lighter, easier to control, draw much easier, and do better work. But the whole world waited for the screw pulverizer man to pave the way for the disk, and then consigned him and his machine to oblivion.

Blessed be the inventors, those who make money from their inventions, and those who do not. That they may have their inventions stolen and the profits snatched by greedy manufacturers does not rob them of all their happiness, for giving birth to something useful is itself a high honor and fruitful of inward happiness.

There are now so many different brands of American "Portland" cement that one may feel at a loss which to buy. Well, there are several kinds of grain harvesters, and any standard kind is safe to buy. The same with cement. It is easy to know whether any brand offered is all right by asking those who have used it.

Politicians and fruit trees of the Mississippi Valley are better off if they have their heads close to the ground. Less wind to harm them and turn their heads to larboard.

It is a standing wonder to Agricola why so few farmers have the windmills deliver water to the house, as well as to the barn-yard. It is easily arranged, and proves satisfactory all the year around. Better water than the city residents get can be furnished, for it does not have to stagnate in the mains.

Few original pioneers of a state remain there. This is due to two reasons;

the original pioneers were few in number, and some of them were so enamored with pioneer life, that they moved on when other settlers came thick and fast. But an old settlers' meeting in any county will bring out several pioneers and many who followed in their wake, and often proves to be the most enjoyable outing of the year. To Agricola's mind, it is better than a "hoss race."

It is well to have a pasture larger than is really needed for the stock on the farm, and still better to fence this into two pastures and alternate. The same land will produce more grass by alternating, and it will be better in quality, growing up fresh and luscious when taking its fortnightly rest.

A South Dakota young lady has made what she calls an original discovery—the similarity between 1907 and a lumber wagon. Asked to explain she remarked that there was "no spring to it." But there are springs to lumber wagons here, and the way they ease the jolts and jars, although not so perfectly as a phaeton, are good for live hogs en route to their destination, and they save bruises to potatoes and other loads susceptible to jars.

Once we had a bachelor president who cajoled a good woman to marry him right in the white house. This was on the second day of June, and remembering this and that a frost fell all over the broad corn belt that night, let none of us say that so cold a time was never before known. That ex-president still lives, the only one who does, and is still considered good authority on fishing.

The tile dealers in town tell me that they have sold about two car loads of tile per week since the season opened. It has been a good year to put in tile, but so much dry weather was deceptive earlier in the spring and some who contracted tile canceled their orders, thinking they can get along a year or two without them. None who have invested regret it, but are very glad that they are ready for rain and drouth, in so far as human foresight can provide.

Following the advice of the entomological authorities, Agricola delayed planting a piece of sod ground to corn, so that it did not come up until the 5th of June. It was a case of waiting for the cut-worms to metamorphose, but they also waited—and got the corn. I have not yet found any scripture verse of comfort that applies to this special case.

It has been the worst spring for years for turkey poults. Continued cold weather is something the newly-hatched turkeys can not endure, although when half grown they are as hardy as hoot owls. None but the rich will eat many turkeys in the coming winter months.

Michigan potato growers are planning for a big acreage, as the effect of backward weather has been detrimental to much of the vegetable crops and the demand for tubers will in consequence be active this fall and winter.

### IN THE LIVE STOCK FIELD.

#### HEREFORD BULLS.

A nice bunch of young Hereford bulls are offered for sale by Messrs. Hood & Baker, of Dunlap, Iowa. Some of these are intensely bred in the blood of Anxiety 4th and are good individuals. These are bargains if taken soon.

#### J. O. JAMES' POLAND CHINAS.

One of the best herds of Poland Chinas in southern Iowa is that of Mr. J. O. James, of Braddyville, and in a recent letter he writes as follows: "I have 100 head of March and April pigs, mostly of April farrow, and they are doing well. My early pigs are the best I have ever raised. Miss Allerton, the Garrett sow, has some good ones by Pawnee Lad, and Big Maria by Big Prospect has some extra good ones by the same boar. These are the big, smooth kind, and have the largest bone for their age of any pigs I have ever seen. I think I can make them look like 300 pounds by sale time. Old Anna Price 2d has got some more of the 1,000-pound kind that are O. K. and should interest the man who wants the big ones. I will also have some good fall stuff to go into my sale October 4th." At the head of the James herd stands the great breeding boar, Pawnee Lad, and he has helped materially to bring his herd to the front. We will have more to say of Mr. James' herd later in the season.

MR. J. F. COOK, OF LEXINGTON, KY., SAILS FOR EUROPE.

Mr. J. F. Cook, of J. F. Cook & Co., of Lexington, Ky., has recently left for Europe, to select their importation of jacks. He will attend the International Horse Show at London and will spend several days in Belgium and France visiting some of the principal horse breeding establishments, and while in England will go to Salisbury, Birmingham, Tamworth and Worwichshire to select an importation of Tamworth hogs, which will be shipped to their Lincoln county farm, where they have a large herd. This is the greatest of all bacon breeds and is fast growing in favor throughout the country. He is going much earlier this year than before, and expects to bring over one of the largest importations of jacks ever brought to the United States. The most of the jacks in Spain in the last ten years have been bought by the South Americans, and the only importation to the United States was by this firm. Mr. Cook expects to get back in time for the Kentucky and other big state fairs.

#### PEACH GROVE HERD OF O. I. C. SWINE.

Last week a representative of this paper called on Mr. A. T. Garth, at Larned, Kan., one of the foremost breeders of O. I. C.'s of this country. Mr. Garth has the best equipped farm for raising hogs that the writer has seen. Upon entering this farm, which is located about one-half mile from Larned, the first thing that attracts one's attention is a large barn built of cement blocks and used for no other purpose but for the breeding and caring of his herd. Upon entering the barn we find it equipped with stalls and breeding boxes, and everything that a pure-

## BALES 15 TONS HAY A DAY

The Gem Full Circle Steel Baler offers large feed opening, power head getting greatest baling pressure out of a light team, quick return plunger, allowing two charges to each circle, and brake device which relieves any jerk from the rebound. Easiest for men and horses and bales most. Our press weighs 2,600 pounds, some others only 1,500. Such light presses require constant repairs. We save you \$25 or more in first cost and more every year in repairs. Send us a postal today for prices, 5 days' free trial plan and a free copy of our new "Baler Book."

Established 1867  
GEORTEL CO., QUINCY, ILL.

bred hog breeder should have. The floor is made of cement with good drainage. See photograph of barn on page 11 of this issue. This is the home of Kerr Dick 9028, grand champion at the American Royal in 1903, also second in class to the grand champion at the St. Louis Exposition in 1904. He is now the only living senior champion O. I. C. boar. Mr. Garth was the best bidder at the O. L. Kerr Estate sale held last February, at Independence, Mo., and secured the cream of that noted herd with national reputations. Mr. Garth gives his entire attention to his herd. The different sows purchased by Mr. Garth were shown the writer. Kerr Tryxie 19539 by Kerr Shelton 9526, a young sow that Mr. Garth paid a long price for at the recent Kerr sale, has a litter of seven, four boars and three gilts, sired by Rex, one of the late Mr. Kerr's best breeding boars. Kerr Salla, Kerr Nat Jr., Kerr Illinois, Kerr Fay, Silver and all the other sows have uniform litters that are just getting along fine. Annie, Ida, Alice and Emily, sows purchased from the Vander-alice Bros., of Cheney, Neb., have litters which are in the best possible condition. It would be impossible to enumerate all the good hogs that are found on this breeding farm. Mr. Garth announces that he will hold a public sale at Kansas City during the week of the American Royal show. We will have more to say in regard to this excellent herd of O. I. C.'s at a later date.

#### WATSON BROS.' DUROC JERSEYS.

One of the firms that is strictly in it this year is Messrs. Watson Bros., of Creston, Iowa, who have 250 head of spring pigs this season, and they are a splendid lot. Many of these are February and March farrow and conditions seemed to be just right to insure a good growth. The three boars used in the herd and the sires of most of these pigs are Echo, a grandson of Echo King; Nidlinger's Improved, a son of J. B. J., and Choice Goods Best, a son of Addy's Choice Goods. They also have a good litter by Ohio Chief out of a Proud Advance sow. This sow farrowed nine and saved nine, and while not as early a litter as some of the rest, are nevertheless very good. They also have two litters by Iowa Chief and these are out of a Top Notcher and Matchless Chief sows. Queen Perfection, a daughter of Perfection Chief, farrowed a litter of fifteen and raised eleven. This is a May 6th litter and may be put in the Roosevelt class of brood sows. A Tom Watson sow, out of an Ohio Banner dam, has seven living pigs by the great young boar, Valley Chief, a son of Ohio Chief, and these pigs are line-bred Ohio Chiefs and we will watch the development of these to see what the outcome may be. Messrs. Watson Bros. also have two litters by Big Crimson Wonder, out of Proud Advance sows. They have about sixty pigs by Echo, fifty by Nidlinger's Improved, and sixty-five or seventy by Choice Goods Best. In this herd will be found four Tom Watson sows, two Advancer sows, one daughter of old Advance and one daughter of Perfection Chief, besides a splendid lot of other sows. The boys have been buyers of the very best that money and judgment would get and this year they will certainly be in a position to attend to the wants of all their friends and patrons. Their advertisement will be found in these columns about July 4th and they will be glad to have their friends and intending purchasers come in and see their crop of pigs. Kindly mention The Homestead when writing.

#### HOMESSEEKER EXCURSION RATES.

The Minneapolis & St. Louis R. R. will sell, on the first and third Tuesdays of each month, round trip Homeseeker excursion tickets to points in Minnesota, North and South Dakota and the Canadian Northwest. For full information write W. K. Adams, D. P. A., 512 Walnut St., Des Moines, Iowa.

DO YOU Want \$ Wheat

## OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

## MISSOURI DOG LAW.

A step in the right direction in the framing of more rigid laws pertaining to the restraining of dogs from inflicting damage on animals has been taken in the passage of the Brasfield dog law which was approved at the recent session of the Missouri legislature.

In substance, the law requires that every assessor shall list and register every dog over six months old, and in failure to do so he is liable to a fine of not less than \$50 nor more than \$100. The license tax for each male shall be \$1 per year and \$2 for females.

After receiving the registration from the assessor the clerk submits a list of the dogs owned to the constable of the township and it will be a part of his duty to collect the tax, and in cases where there is refusal, to put an end to the dog, for which service to the public he shall be recompensed \$1.

When any animal of the dog kind injures any person not a trespasser or kills or maims sheep or other domestic animals he may be killed by any person at any time or place. For the damage done, the full value including the court cost and other fees, may be collected from the owner of the dog by the person who suffered the loss. Should the owner of the dog be unable to pay the damages the county court shall order such judgment and cost to be paid out of the dog fund.

In any case where damage to domestic animals is done and it is impossible to discover or identify the owner of the dog doing such, claim may be made to the county court, and after a substantiation of the claim the damages may be paid out of the county dog fund.

This is the law in general, and while there are parts of it that may seem impractical, it no doubt is a long step in

the right direction for the elimination of the dog evil.

## The Needs for and Methods of Dipping.

To the Editor of The Homestead:

As has been oft-repeated, parasites in one form or another are the greatest evil with which the shepherd has to contend. Not only are they responsible for great losses, but they are persistent and often hard to eradicate. However, nearly all external parasites can be eradicated or kept well in check comparatively easy.

The scab-mite is the worst external parasite of common occurrence, but is practically absent in the corn belt. Ticks, however, and sometimes lice, infest sheep more or less and few flocks are entirely free from ticks. Inasmuch as a large number of ticks may become a serious pest, preventive measures should be employed rather than have them become so numerous as to cause a large loss. Dipping is the plan to follow in this, and is the only sure method. Two dippings a year will insure the flock free from external parasites, and also be conducive to the health and growth of the fleece. One dipping per year may be sufficient if the flock is dipped immediately following shearing. This is the best time to do the work, and the lambs should always be dipped a few days after shearing whether the old sheep are or not, for ticks will migrate from the old sheep to the lambs at this time, as they find the close-cut wool does not afford them protection enough from the sun.

As to methods of dipping, the simplest plan to follow for ordinary-sized flocks is to use the ordinary dipping tank. This may be either wood or sheet iron, and if wooden may be home-made. However, the cost of a ready-made iron tank is only \$12 or \$15, which is less than one can be made for as a rule. The tank should be at least four feet deep, the sides are flaring, being about thirty inches apart at the tip and only ten or twelve at the bottom. This shape requires less dip to fill deep enough for immersion of the animal. One end is perpendicular, while the opposite end is quite slanting, so the sheep may walk up and out. A wooden board with cleats cross-wise should be fastened in this end as a sort of stairway to afford a foot-

**Here's a SNAP**

Eight-foot galvanized steel tank for Sheep or Hogs and 5-gallon can Milk Oil Dip, free on board Chicago.

Special rates on large lots. Three \$2.00 packets of Cooper Sheep Dip may be substituted for Milk Oil if preferred. 5 gallons Milk Oil Dip, without tank, \$3.00, F. O. B. Chicago.

Our line includes **Summer's Worm Powders, Toxaline Worm Remedy, Ear Labels and Buttons, Branding Liquid, Tattoo Marker, Sheep Shears, etc.** Illustrated catalogue of all Stockmen's Supplies free by mail.

## MILK OIL DIP

**OLDEST AND BEST AMERICAN DIP**

**\$12.50**

**5 GALLONS**

hold to make it convenient for lifting the sheep into the tank and it should be sunk into the ground a considerable depth. Some provision should be made for draining the sheep after they come from the tank. Nothing is more convenient for this than a tight wagon-box with a couple of small cleats nailed on the floor at the back end in such a manner that the liquid will be guided back into the tank. By the time the bed is full the head ones may be let out at the front end and room made for more. Some firms manufacturing tanks also furnish a flat sheet iron plate that will go in the wagon-bed.

As to the kind of dip, practically any of the standard dips on the market are perfectly reliable, and these should be used strictly according to directions. Tobacco decoction is also a good preparation for lice and ticks. This should not contain over 2 to 5 per cent of tobacco. In using any dip, get it of sufficient strength, see that the animal is entirely immersed and keep each one in the liquid at least half a minute. Dipping requires comparatively little time, but will well repay any flock owner.

Ellis Rail.  
Story county, Iowa.

The flesh of goats is eaten in many places and where the animals have been fed properly the flesh is of a nice mutton flavor. In fact, many could not detect the difference. The flesh of any animal partakes of a flavor not unlike that of the food on which they subsist. The flesh of the common goat that has been pastured in the alley or the weed patch, naturally, would be coarse and strong, but goats that have grazed on good pastures and have had some grain or forage make a good substitute for mutton.

## The Week in Kansas.

To the Editor of The Homestead:

There is a saying which means, if there is ever a perfect day, it will be in June. At last we have had a whole week of perfect days. It is the kind of weather now that we have been waiting for so long. Sunshine, rain and warmth have all been in just the right quantities this week, consequently the crops have gone a long ways towards recovering from the long siege of unfavorable weather.

Last Friday, the 7th, was the hottest day we have had in 1907. The thermometer was well up in the nineties, with very little breeze. This caused us to remember that the winter underwear was not needed. Whether it was this hot day or just the natural coming of things that brought it, one of the best rains of the season fell on Sunday, taking the greater part of the day to fall in. Just the right amount of water fell, stopping only short of making water run out of the fields. Tuesday work was resumed in the fields, and ground is being put in the very pink of condition. The lumps have all vanished, and there is no sod of weeds or grass to bother, so a cultivation leaves behind nothing but a clean field of corn.

Wheat is looking well wherever the stand is sufficient to make a good showing, but there are very many fields of thin wheat. Some will hardly make four bushels to the acre and other fields look good for thirty bushels, so the reader will see that there is no uniform way of expressing an estimate. It might be said that the average wheat looks about like ten to fifteen bushels to the acre. Oats are very short in straw and head, but will probably stretch up enough so they can be bound with a binder. The yield will be very light, however.

Quite a crop of the later varieties of strawberries are being gathered now, so strawberries and cream are on the Kansas farmer's bill of fare, after all. There will also be a fair crop of the late vari-

eties of blackberries, if weather continues favorable. All the earlier varieties of berries were killed by the freezing.

This is one of those "just right" evenings. The wind blows balmy from the south, bringing with it the perfume of the timber along the creek. Everything is stretching up with growth, even the male and female population of a supposed "growing age." Weather like this, after so much of the unfavorable, cannot help but bring peace of mind, which is calculated to induce contentment and growth, or both. This is Kansas again.

Henry Hatch.

Coffey county, June 12th, 1907.

## Timely Books.

The Homestead has recently received from the Orange Judd Co., three timely works on three important subjects, namely: "Celery Culture," by W. R. Beattie; "Tomato Culture," by W. W. Tracy, and "Bean Culture," by Glen C. Sevey. These are 150-page books, all well illustrated, and while technically sound, yet nevertheless they are written for the practical man.

The work on "Bean Culture," for example, gives the history and botany of the bean, the conditions affecting growth, kind of soil adapted to it, varieties that should be chosen, methods of harvesting, and also insects and diseases that affect the crop, together with the remedies. The tomato is handled by Mr. Tracy much in the same way, and we have no hesitation in saying that those of our readers who grow tomatoes even on a small scale will be interested in this book.

Into his work on "Celery Culture," Mr. Beattie has certainly packed a large amount of useful information. Almost every page of the book is illustrated and it is adapted not only to beginners, but also to experienced celery growers.

These books are for sale by The Homestead Company at fifty cents each.

## OUR RED LETTER

## Combination Offer

AGAIN OPEN TO THE FARMERS OF THE MIDDLE WEST

**FIVE SPLENDID PAPERS and MAGAZINES for \$1.25 A YEAR. SEND US YOUR SUBSCRIPTION TODAY.**

The Homestead has never made an offer to its subscribers which proved so widely and immediately popular as did our famous "Red Letter Combination" last season. Thousands upon thousands of farmers throughout the corn belt took advantage of it to supply their families with an abundance of wholesome, instructive and entertaining periodical literature, and we have been asked many times if the offer would again be open to renewals and new subscriptions. Although the profit on such an offer is necessarily small, we have decided to repeat the offer during the present season and have secured the consent of the other publishers interested to advertise it again for a limited time, subject at any time to revocation without notice.

## THESE FIVE PUBLICATIONS FOR \$1.25 A YEAR.

The Homestead, the world's greatest farm paper, published weekly at the heart of the corn belt and dealing with agricultural problems from the middle-western point of view; edited by farmers residing upon and operating their own farms; not a one-man paper, but the embodiment of the combined wisdom and experience of a large staff of editors and contributors; with departments covering the whole range of farm life in this section.

The Chicago Weekly Inter Ocean, a grand general family newspaper, giving an abundance of news, literature, poetry, humor, market reports, reading matter for women and children—something for every member of the family.

The Kansas City Weekly Star, an able, fearless, independent newspaper, dealing with the problems of the day from an independent point of view. Literary contents very attractive and uplifting.

The Homemaker, a delightful monthly for the women and children of the farm, readable and valuable from first page to last—brightening and broadening the life of every member of the farm.

The Farm Gazette, a beautiful magazine of profitable agriculture, printed on fine paper, with elegant illustrations and a cover in colors.

If already a subscriber for any of them, your time will be extended for one year.

To secure this great bargain, clip and fill out the following coupon:

## FIELD NOTES.

A few splendid fall Poland China boars are offered for sale by Mr. F. W. McIntyre, of Red Oak, Iowa.

Any reader having farms or other real estate to exchange or trade should write what they have to Messrs. Fraley & Graham, Ulrich, Mo. Mention The Homestead.

A good farm in Keith county, Nebraska, is offered for sale at prices that should bring buyers quick, on page 15. Address for further particulars, Westenhaver Bros., Sheldon, Iowa.

About twenty Hereford bulls are offered for sale by Mr. A. Spooner, of Mondamin, Iowa. These are all sired by one of the best sons of Beau Donald and are ready for active service.

A cash price is made on a 376-acre farm on page 15 that certainly bespeaks a good offer for the person who takes it before the other fellow. Write for particulars to owner, D. care of The Homestead, Des Moines, Iowa.

A few good Ohio Chief hogs are offered for sale by Mr. W. A. Rankin, of Carson, Iowa. These are all right and Mr. Carson is pricing them within the reach of all. One of these is a splendid yearling that he has used in his herd. Write him and mention this paper.

A fine 160-acre Nebraska farm near Bayard, is priced on page 15. The land is suited well to irrigation and full particulars regarding the land and price will be answered by making inquiry of the owner, whose address will be M., care of The Homestead, Des Moines, Iowa.

The Andrew county, Missouri, Hereford breeders have formed an association for the purpose of holding annual sales and furthering their interests in the breed. Mr. W. H. Stevenson, of Savannah, Mo., has been chosen to manage the sales and claims April 16th for their first sale.

A half section of good Minnesota farm land, with first-class buildings, is listed among our land advertisements this week on page 15. School is near by and town but three miles. The seller will make very reasonable terms. Address mentioning The Homestead, Mr. Burt I. Weld, Slayton, Minn.

Anyone afflicted with piles should write for the cure offered on page 9. You pay for it only after you are satisfied that it has done you good. It is claimed by the makers to have cured thousands. Write for a full treatment, enclosing six cents in stamps. Address Phelps Chemical Company, Lynnville, Iowa. Mention this paper.

The Andrew County, Missouri, Short-horn Breeders' Association claim April 15th for their annual sale to be held at Savannah, Mo. Mr. H. R. Coffey, of Savannah, Mo., manages these sales and each member of the association takes pride in consigning only such stock as he is satisfied to have put up as representative of the class of cattle he breeds.

The attention of stallion buyers is directed to the advertisement of a four-year-old registered Shire stallion on page 19. This animal will be for sale after July 1st and in the absence of further particulars we would advise prospective buyers to write to the owner for information, mentioning The Homestead. Address Mr. D. K. Winter, Maryville, Mo.

Mr. G. E. Patch, Blandinsville, Ill., writes us that he is in line for business with his herd of Poland Chinas, as usual, and at present can supply animals of all ages and both sexes. Shipments can be made with two express companies and every effort will be made by Mr. Patch to insure satisfaction and safe shipments. Write him, mentioning The Homestead. See page 19.

Millet is a fine crop as a filler and its wide adaptability to soil and other conditions makes it a valuable side crop. Seed of good quality may be now secured of the Adams Seed Company, Decorah, Iowa. They also carry a good stock of field peas, and late sowing seeds. Write at once, as seeds of good quality are in active demand. See page 13 and kindly mention The Homestead when writing.

Mr. J. L. Slick, Lanark, Ill., has always got something good in the line of Poland Chinas and Short-horns for sale. At present writing he is offering some good substantial boars ranging from fifty to 200 pounds in weight, and also a nice lot of sows bred for August and September farrowing. His bull offering includes some well-bred Scotch-topped bulls ranging from ten to thirteen months old. Write him for prices or visit the farm, mentioning The Homestead.

Ranches in southeastern Wyoming are being thrown open to settlement as fast as fences can be removed. This land, formerly cattle grazing land, now offers great opportunities for the homeseeker. On page 15 is announced the opening of some 52,000 acres of choice ranch land. This is priced in the same place and will be sold in lots for farms suitable to the desire of the land seeker. Write or visit this firm and we are sure they will give any of our readers the best of treatment. Address Morden Land

& Loan Co., 576 Good Block, Des Moines, Iowa. Kindly mention this paper in your inquiry and favor both us and the advertiser.

A 480-acre Boone county, Nebraska, farm is offered for sale on page 15. Of this, 320 acres are in cultivation and good buildings go with the farm. Address for full particulars the O. F. Davis Co., 508 Bee Bldg., Omaha, Neb. Terms easy. See advertisement.

Two fall Aberdeen Angus sales of note in northwest Iowa will be those of Messrs. L. L. Atwood, of Langdon, and Wm. R. Mincer, of Spencer, October 23d and 24th respectively. Later announcements will set forth the quality and extent of the offering which will no doubt be of a character to command the attention of careful and thoughtful breeders of this popular breed of cattle.

"Come and see our bunch" is the hearty welcome that Messrs. E. L. Nagis & Son, breeders of Chester Whites, extend to prospective buyers and others interested in the future of this breed. They have some thirty head of Merck and April boars to choose from and they are a good, useful lot all through. Book your order or visit, mentioning The Homestead. See page 21 for advertisement.

Maple Grove Stock Farm, at Bowen, Ill., owned by Messrs. McNeil Bros., and noted for the great Duroc Jersey boars in service there, is quite alive with spring pigs and there are 100 choice ones from which breeding stock may be selected. The crop is sired by the best of the breed and no doubt offer unusual opportunities for most aristocratic selection of blood. See their advertisement on page 23 and mention The Homestead when having your order booked.

The Pella Drain Tile Co. are old and well-known makers of high grade tile. There is as much difference in the quality of tile as in brick or anything else. Few people realize this fact. We would recommend our readers to the Pella brand of tile. They will no doubt be able to quote prices on car-load lots as well as on small orders. Write them and kindly mention The Homestead. See page 17 for their notice. Address Pella Drain Tile Co., Pella, Iowa.

On page 19 of this week's issue will be found the advertisement of Dr. E. W. Gammon, of St. Charles, Iowa, who offers a yearling Hereford bull for sale sired by Polled Assurance 193115, the most noted double standard polled Hereford bull in the world. This fellow has horns, but he will undoubtedly breed off a large per cent of the horns, owing to his breeding. Any of The Homestead readers who want a nice young Hereford bull should write Dr. Gammon or go and see this bull.

But five of the sows bred to Crimson Wonder Again, writes Mr. H. S. Allen, of Russell, Iowa, are left and the first orders get them. They are mostly yearlings that have raised early litters and will be a safe investment for anyone. The fall boars are all sold out and now orders are being taken for the spring crop. Crimson Wonder Again pigs are a most promising lot and every breeder should covet some of this reliable blood. See page 23 and mention The Homestead when writing Mr. Allen.

Mr. A. H. Orr, of Lorimor, Iowa, is one of the newer breeders of Duroc Jerseys who is endeavoring to found a good herd of this breed. He has about thirty spring pigs sired by Advance Orion and a lot of fall sows sired by Modoc Chief. Among his best brood sows is Miss Surprise. She raised twenty pigs for him last year and seven this year. He has a nice Perfection Chief gilt out of a dam by old Brilliant, bred for July farrow to Advance Orion. He will make a public sale with his brother on October 24th, at which time he will sell the pick of his boar crop, as well as the choice of these fall sows. At the same time he will also sell some good cattle and horses.

Messrs. D. & J. McCarty, Winthrop, Iowa, breeders of registered Polled Hereford cattle, are offering some twenty-five head of choice heifers and young cows and a few young bulls old enough for service, in their advertisement on page 21. While this kind of cattle are not so well-known as yet, great interest is being shown by stockmen in the possibilities of the Polled Hereford. We would advise any stockman when in the vicinity of these breeders to call and see them. Any other parties interested should write to these advertisers for fuller particulars regarding their offer. They will be pleased to answer any correspondence along this line. Kindly mention The Homestead when writing them.

"We want to sell or trade Imp. Lord Mount Stephen 206904," write the Ardmore Stock Company, of Hoisteln, Iowa, "for some good Scotch heifers, and invite correspondence from any breeder needing a bull that is an excellent individual, with a good show record, a sire of the right kind of calves, and an imported bull from a good family of Scotch cattle, the Missies. This bull is fully guaranteed as a breeder, is offered because of no fault, but because we have one more herd bull than we need and we need more Scotch heifers of the right kind. We will trade for no inferior stuff. We have on hand for sale at very reasonable prices, quality considered, some Scotch bulls, a Victoria by Imp. Scottish Pride 128543, a Lavender by the same sire and a Miss Ramsden by Imp. Lord Mount Stephen. The Lavender is just three years old and prospective buyers can see his calves at our farm. The other two are twenty-one months old. They are good individuals, red in color. We also have two Scotch-topped calves, a twenty-months-old roan from a good milking Short-horn cow that is also an excellent flesh carrier, at \$125, and the other a Jenny Lind, a red, sixteen months old, at \$100. We have a few choice March boar pigs ready for sale and shipment. Also one or two February boars. Also sow pigs ready for shipment, and a few April pigs that will be ready to wean and ship within the next two weeks. We are going to price these young pigs at attractive prices to move them at once, as we recently made a purchase of thirty-six head of good Berkshire sows and need the room. This shipment of sows we purchased from Mr. C. J. Martin, owner of the Adaza herd of Angus cattle and Berkshire hogs. They are a very choice lot of the right type, with good heads, plenty of bone and length, and the kind of bodies that fill the pork cellars. They will be bred to farrow early next spring, and

we hope to be able to make a public sale offering of bred sows some time in latter February." Kindly mention The Homestead when writing this advertiser.

Act at once if you want a chance at the 800-acre tract of land in eastern Kansas offered on page 15. This is in the oil and gas belt and the soil within its confines is rich and productive, especially 500 acres of it. Some is timber. Being situated but three miles from railway this tract should offer a fine location for a grain and stock farm; but sixty miles from Kansas City. Write the owner for particulars of long-term payment. Address Jackson-Foster Land Company, 818 Wyandotte St., Kansas City, Mo. Mention The Homestead when you write.

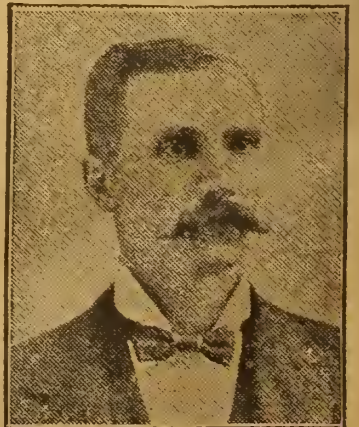

Messrs. D. R. Wilson & Son, of one of the prominent Duroc Jersey breeding farms near Redfield, Iowa, announce their offering of pigs in this week's issue of The Homestead. They have something like 100 head of well-bred youngsters on hand, and sired by such boars as La Follette and Wilson's Top Notcher. Both of these sires are splendid individuals, as their get will show on inspection. For those who want something mature they have a nice lot of fall stuff sired by College Chief. Any of our readers who are looking for this breeding should write for prices, and we can assure them their inquiry will be promptly attended to. Visit the farm if possible and make your selection early, as the demand for good breeding Duroc Jerseys will no doubt be strong this season, as in the past.

Mr. H. L. Ackerman, of Clearfield, Iowa, will make a public sale of Poland Chinas at the above place on October 17th. A few years ago Mr. Ackerman went out and purchased of Messrs. Fred Rood and J. H. Wintermute enough sows to establish a herd, and it is from this beginning that he has been enabled to build up a good herd. He has seven sows sired by old Jumbo (Mr. Wintermute's well-known herd boar) and they all have pigs by Napoleon Jr., a lengthy, big-boned boar that has been used with the best of results in his herd. A number of his sows are bred to a son of R's Pawnee Lad for fall litter. He has seventy-two spring pigs nearly all sired by Napoleon Jr., and these he is growing out for his October sale. Mr. Ackerman will make his first public sale this year and he will endeavor to put in some good things.

Mr. A. W. H. Orr, of Lorimor, Iowa, is one of the well-known breeders of Union county, and he has a nice bunch of about fifty spring pigs this year. While his crop is not a large one, there are, nevertheless, some very good ones in the bunch. These are sired by Advance Orion 52759, a son of Proud Advance, out of an Orion dam. This boar is owned jointly by himself and his brother, and is the sire of the most of the pigs in the herd. One of his best litters is sired by him and is out of Molly Moline, a great-granddaughter of old Orion. One of the best sows he has is called Graceful and she has a litter of six nice pigs by Fancy Perfection, the Jud Pollock boar. Mr. Orr has a litter by Modoc Chief, his former herd boar, out of a Leo Tolstoy sow. He also has seven good pigs by Advance Orion out of a sow called Red Ruby. On October 24th he and his brother will make a public sale, at which time they will offer for sale some of their best boars and a few choice sows.

In submitting copy for a change of advertisement Messrs. Maasdam & Wheeler, Fairfield, Iowa, write that their importation of twenty head of Percheron stallions and mares arrived at Fairfield, Iowa, May 30th, where they are now on inspection. They came through in good condition, considering the long trip, and present a splendid assortment for careful selection. All the individuals were carefully chosen from among the best on the other side, and represent the choicest breeding line that could be obtained in France. As in the past, the object of this firm has been to sell only the best. Their entire offering now numbers ninety-four head of imported and home-bred stallions and mares from one to eight years old. For quality, heavy bone and soundness these animals are difficult to excel. Anyone looking for good breeding stock is cordially invited to visit the farm at Fairfield, Iowa, and inspect the horses. The farm is three miles south of town and visitors will be met on notification and furnished with transportation to and from the farm. Kindly see their advertisement on page 21 and mention The Homestead when writing.

Col. C. C. Keil, well known to Homestead readers as a breeder of Short-horn cattle and Duroc Jersey hogs, and as live-stock auctioneer, advises us that he is now nicely located at Grinnell, Iowa, where he will attend to the auction business, exclusively, and devote all of his time to the sale business. Colonel Keil has made an enviable reputation

on the block, has sold for some of the best breeders in the middle West, is familiar with pedigree, especially Short-horn cattle and Duroc hogs. He has already booked a large number of sales for the fall and winter season, which he is empty able to fill. He talks English and German, has had twenty years of experience, selling everything from a mixed sale to bank stock. Address Col. C. C. Keil, 1121 Summer St., Grinnell, Iowa.

Long distance phone 554. Write or phone for dates, mentioning The Homestead.

S. G.'s Crimson Improver 50101, the Crim-son Wonder I Am Duroc Jersey boar now doing service in the herd of Mr. S. G. Colli-cott, of Lake City, Iowa, is for sale. He measures sixty-six inches heart girth and has ten-inch bone, strong, straight timber, too. He conforms in other points to a high-grade animal of this breed. He is guar-anteed a breeder and is being sold for no fault whatever. Visit or write for terms to Mr. Collicott, mentioning The Homestead.

Mr. Nick Loewen, of Lawler, Iowa, ad-vertises a bargain in Single Black Minorca hens and cockerels on this page. He makes this in order to reduce a large stock of birds which a dissolution in partnership has made necessary. Some ten dozen hens and five cockerels will be sold in numbers to suit the buyer, and at reasonable prices if taken at once. An opportunity like this does not appear in our columns often and we would advise any of our readers interested in this breed of poultry to write this ad-vertiser at once, mentioning The Homestead.

Mr. J. L. Slick, of Lanark, Ill., writes: "I am now changing my advertisement to Poland China boars from 125 to 225 pounds—good, substantial and royally-bred ones—sows bred for August and September litters, also Scotch-topped Short-horn bulls from ten to thirteen months old, all at bargain prices. Recently I shipped one of these young boars to Mr. T. M. Huddleston, of Centerville, Tenn., who writes: 'You bet I am well pleased with him. He is certainly a fine pig and everyone who sees him is of the same opinion. Ship the sows before the weather gets too warm.' Then later and on receipt of the sow he writes: 'The sow ar-rived in good shape and I was certainly well pleased with her. I wish to thank you for the square deal you gave me. Unless the sow brings about 100 pigs several of my friends are going to be disappointed.'"

#### A FEW DATES OPEN YET.

Mr. F. H. Jackson, Rutland, Ill., is still prepared to list a number of sale dates for the coming season, and as he is prepared to cry all kinds of stock sales we would advise those looking for a good auctioneer to favor him with their patronage if possible. Mr. Jackson has been selling in different states and has a nice list of sales for some of the best breeders during the coming sale months. Write him for open date, mentioning The Homestead. See advertisement on page 22.

#### ANGUS BULLS FOR SALE.

On this page of this week's Homestead will be found the advertisement of Mr. M. B. Walker, of Clarinda, Iowa, who offers three good yearling Aberdeen Angus bulls for sale. Two of these are sired by South Oaks Baron and one by Blencoe. These bulls are in nice condition and will be sold at reasonable prices. Mr. Walker will also dispose of a few good cows and heifers. Any man who wants a bunch of Angus cattle should write this gentleman at once. Please mention The Homestead when writing.

#### PIGS DOING WELL AT GWINNER'S.

A recent letter from Mr. E. C. Gwinner, of Holdrege, Neb., states that the crop of Duroc pigs now on the place are doing fine. They are running in the alfalfa up to their backs, which is sure to put the size and bone on them that is always needed. Mr. Gwin-ner was among the best buyers at the many good sales in southern Nebraska last spring; in many instances topping good sales. His crop of pigs are coming along fine and you will not make a mistake in placing your order with him for a male pig to be shipped in August or September. Write him for prices and description and mention this paper.

#### EDMONDS, SHADE & CO. SELL BULL, KING EDWARD.

Prof. Jas. Wilson, of Brookings, S. D., has purchased for the agricultural college at that place the noted Hereford bull, King Edward 165604. The intention is to put him at the head of the herd. In this capacity he will no doubt do full credit to the breed, as his record thus far has been a notable one. Sired by Columbus 35th gave him a good start in life and his winnings at western shows are too well known to need men-tion. In short, King Edward has a fine bunch of ribbons from the Nebraska, South Dakota and Interstate Fair at Sioux City. These were first prize or championships. Messrs. Edmonds, Shade & Co. inform us that the sale was very gratifying. Their herd now contains a fine bunch of young bulls from fourteen to sixteen months old which are ready for the trade. Write them your wants, mentioning The Homestead.

#### HERD-HEADING SCOTCH BULL FOR SALE.

Messrs. McKeever Bros., of Farley, Iowa, are offering their most excellent Scotch Victoria herd bull for sale. He is a red, four-year-old, 2,400-pound bull, very smooth and symmetrical and stands on short legs. His breeding could not be improved upon. As his name, Victoria's Prince of M. V., implies, he belongs to the famous Cruickshank family of Victorias and is one of the choicest bred, as well as best individ-uals of this family produced since the days of the famous Imp. Baron Victor, owned by Col. W. A. Harris. This bull is a splendid breeder of red calves. There are few bulls his equal in America today. He was bred by Mr. Chandler Jordan, sired by Prince Nonpareil 131222 by Prince President 2d by Imp. Prince President and out of 2d Glenn Nonpareil, a granddaughter of Imp. Non-pareil 39th, she by Vermont (78235). Victoria's Prince of M. V. has for dam Victoria 87th by Imp. Craven Knight; second dam Imp. Victoria 81st by Gondolier; third dam Victoria 77th by Dunblane; fourth dam Victoria 57th by Barnpton Prince; fifth dam Victoria 41st by Lord Privy Seal; sixth dam Victoria 39th, champion of England. It will be thus seen that this bull's breeding is of the very best from a Scotch standpoint. It is doubtful if there are two other bulls in Iowa his equal from an individual point of view. This bull is an exceptional breeder and his daughters are retained and another splendid bull has been secured in Cherry Grove Banff to use on these heifers. Hence the old bull is offered for sale at a price that he is really well worth. He is a great flesh carrier and lays it on very smooth, with a preponderance of mellow covering in the most desirable points. Anyone in need of a strictly first-class herd bull cannot afford to miss this opportunity. It is the opinion

of this paper that Messrs. McKeever Bros. are making a radical mistake in parting with this bull.

#### FESSEMEYER'S POLAND CHINAS.

One of the best-known breeders of Poland Chinas in southern Iowa is Mr. H. Fessen-meyer, of Clarinda. He breeds the "big kind," and this year reports about fifty spring pigs, as well as a lot of fall stuff. Mr. Fessenmeyer's herd is largely made up of the blood of old Giantess and other leading strains of big stuff. His present crop is sired by P. W. Perfection, Chief Tecumseh 4th and one litter by a son of old Thickset. Giantess 2d, one of his best brood sows, farrowed him a litter of eleven by Chief Tecumseh 4th, and saved seven. Old Nelson Superior, the sow that farrowed the litter that topped the Rood-Fessenmeyer sale last year, has six nice pigs by Chief Tecumseh 4th, and another good litter is out of a daughter of Big Prospect and the pigs are by the same boar. These pigs combine the blood of Chief Tecumseh, Pawnee Lad and Big Prospect. Another nice litter is out of a sow called Damask by old Peter Sterling, and the pigs are by a son of old Thickset. Mr. Fessenmeyer has recently purchased an interest in Matchless Perfection, a son of P. W. Perfection out of a daughter of old Expansion. He is a cracking good hog and Mr. Fessenmeyer will use him this year. He will have a nice offering again this year in the Rood-Fessenmeyer sale at Clarinda on October 28th, and we will tell our readers more about it later in the season.

#### ROOD'S POLAND CHINAS.

One of the breeders that has come into the limelight of late years is Mr. Fred Rood, of Clearfield, Iowa, who breeds the larger type of Poland China hogs. His name is in-separably connected with that of old Giantess, a sow that has made the Rood herd famous. This grand old daughter of Nelson has done wonders for this herd, and she has also en-abled her owner to collect a nice bank ac-count, which is something they are all striv-ing for. This old sow is still in the herd and a fall litter of hers will be put in Mr. Rood's fall sale. At the head of his herd today is R.'s Pawnee Lad, a son of Mr. J. O. James' noted boar, Pawnee Lad, and he has de-veloped into one of the best boars Mr. Rood has ever had in the herd. This boar will easily tip the scales at 1,000 pounds as a three-year-old, is very lengthy and wonder-fully deep in body. In fact he stands three inches higher than a kerosene barrel, and yet he is close to the ground. His back is well arched and he carries his width well, and with a deep, broad bam and an eleven-inch bone he comes more nearly filling the wants of Mr. Rood than any other boar he has ever owned. He has 100 spring pigs, mostly sired by the above boar, also by Jumbo (a boar owned jointly by him and Mr. J. H. Wintermute, of Blockton, Iowa), Crescent Chief, Crescent Prospect and a few litters by other boars out of sows purchased by other breeders. He has twenty fall boars and twenty fall sows sired by R.'s Pawnee Lad and out of old Giantess and daughters and granddaughters of Giantess, and these will be put into his fall sale at Clarinda on September 28th. Four of these boars will be out of old Giantess. Giantess 4th, Giant-ess 5th and Giantess A., all daughters of old Giantess, are raising good spring litters. Giantess 4th has nine good pigs by Jumbo out of fourteen farrowed; Giantess 5th has nine by Crescent Chief, and Giantess A. has nine by old Jumbo. A daughter of Giantess 3d, the sow that topped Mr. Rood's sale two years ago, has seven good pigs by Crescent Prospect, a son of Big Prospect. Another sow, a daughter of Extension, by Expansion, has a nice litter by R.'s Pawnee Lad, and he also has a cracking good litter out of a sow bought of Mr. John Trigg in Nebraska. Mr. Rood will make a sale with Mr. Fessen-meyer at Clarinda, on September 28th, and later will make a sale of his own at home. His share in the Clarinda sale will be large-ly of the Giantess, R.'s Pawnee Lad blood and it will be even better than he had last year, and that means a great deal. We will tell our readers more about his sale offering in due time.

#### A LETTER FROM D. W. WOODIN.

A veteran of the civil war writes his com-rades on an interesting subject, as follows: "This letter is written to the old soldiers of Iowa who desire to obtain homesteads from the United States government. I enlisted and served in Company K, Third Michigan Cavalry, from August, 1862, to June, 1865, which is my excuse for presuming to write it. Last year I purchased three sections of land in Township 16, Range 61, Laramie county, Wyoming, and I am putting the land in cultivation this year. It is situated about forty miles east of Cheyenne. There is about 100,000 acres in the same locality along the Union Pacific and Burlington railroads which can be homesteaded. Homesteads can be obtained within one to nine miles of rail-road stations. The country is comparatively level, about the same as the Red River Valley country in North Dakota. It has a black soil about the same as the rolling prairie of Iowa, and is about three feet deep, with a light colored clay sub-soil. The water is excellent and no alkali in the water or soil. There is no sage or other kind of brush, but there is a good sod of wild grasses. The rainfall is as great as the best districts where cheap lands can be purchased now, and there has been but very little variation as shown by the weather bureau at Cheyenne since 1871, and crops are as sure as in any of the states surrounding this territory. There has not been a crop failure in twenty-three years. The deeded land sells at \$10 to \$15 per acre, which gives some indication what a homestead is worth. I do not ask any old soldier to take my word or assur-ances, but do say to him, go and see for yourself and act on your own judgment. The railroad fare will not cost you much. Ex-cursion rates every first and third Tuesday. It may be asked, why is it this land has not been taken before if it is so good? Be-cause the ranchmen either purchased or leased the railroad land which are the alter-nate sections and put fences around the railroad lands and homestead lands, which excluded the homesteaders. A year ago last winter congress passed a law which com-pelled the ranchmen to take down their fences from around homestead lands, and the president is enforcing that law. The man who has lived in a prairie country a number of years cannot easily be deceived, and I say to the old soldier, go and see for yourself.

## Administrator's Sale of the Great

# ABERDEEN ...ANGUS HERD...

THE PROPERTY OF THE ESTATE OF  
THE LATE HON. L. H. KERRICK.....

ON THE FARM, BLOOMINGTON, ILL.,

TUESDAY, WEDNESDAY, THURSDAY,  
JUNE 25-26-27, 1907 .....

Following the instructions Mr. C. A. Ewing, administrator of the above estate, this entire famous herd numbering 253 head besides calves at foot, will be auctioned.

Thirty-seven bulls and 216 cows and heifers are cataloged, constituting the largest dispersion sale that has occurred in the history of the breed. They represent the blood with which Mr. Kerrick succeeded in producing more champion market-topping steers than any other man and the blood which has given him the honor of having done more for American breeding interests than any man engaged in the business. The offering includes the great \$5,000 stock bull, Imp. Lord Fretful, and numerous of his get, and thirty other representatives of the same family; the Trojan-Erica bull, Eric 9th of Keillor Park; the double Blackbird bull, Black Boy of the Wells; the Blackbird-topped Pride bull, Afton Jam, and other high-class herd head-ers. It is a great list of females cataloged, including members of the Black-bird, Erica, Pride, Lady Fanny, Queen Mother, Heather Bloom, Antelope, Mina, Pearl, Maid of Orleans and other noted strains, all of which have produced animals of the excellent type for which the herd is famed. Purchasers to the amount of \$300 will have railroad fare refunded. The sale will be held on the farm some twelve miles south of Bloomington, and the catalog, which contains full information concerning how to reach the farm and interesting details concerning the herd and the auction, will be mailed on application to

W. C. MCGAVOCK, SALE MGR., SPRINGFIELD, ILL.

27 High-grade heifers will also be auctioned some time during the three days of the sale.

TOO LATE TO CLASSIFY.

## A Cruickshank Herd Bull For Sale

VICTORIA'S PRESIDENT OF M. V. 208996. Red, 4 yrs. old, weight 2,400, sure, quick server, splendid breeder of red calves. We have bought Cherry Grove Banff to use on above bull's heifers. His sire is Prince Nonpareil 131222; dam, Victoria 87th by Imp. Craven Knight; 2d dam, Imp. Victoria 81st by Gondolier; 3d dam, Victoria 77th by Dunblane; 4th dam, Victoria 57th by Barnpton Prince; 5th dam, Victoria 41st by Lord Privy Seal; 6th dam, Victoria 39th by Champion of England. He has few equals and will make strong show at International if fitted. Address,

McKEEVER BROS.,

FARLEY, IOWA.

If any old soldier goes he better get off at Luther, as that station is the nearest to the land. The old soldier may enter by power of attorney and does not have to go out there to make the entry. The time served in the army can be credited on the time. I will gladly answer any question relating to this. Respectfully, D. W. Woodin, Des Moines, Iowa.

#### A. H. BRETT'S SHORT-HORN SALE.

On July 11th Mr. A. H. Brett will sell at Mason City, Iowa, some sixty head of Short-horn cattle, among which are a goodly num-ber of straight Scotch, including two imported cows. The offering, to be exact about it, is as follows: Fifty females, twelve of which are Scotch, including Imp. Likely and Imp. Roan Ribbon. There will also be twelve nice two-year-old heifers, and the entire female offer-ing will be bred to good Scotch bulls. Mr. Brett's present herd bull is a son of the great Imp. Merry Hampton. The remainder of the offering will be ten bulls of service-able age. It has been the custom for a number of years for Mr. Brett to make these July sales, and they have been marked with success from the start, and it is to be hoped that this offering will in no wise differ in this respect from its predecessors. Either before or immediately after the cattle sale Mr. Brett will sell four registered draft mares and one two-year-old registered Clydesdale stallion. They are all bred to the best of stallions and should be good property, inasmuch as the draft horse business is con-stantly on the ascendancy. The two imported cows that Mr. Brett is offering in this sale are a choice pair fit to grace any herd in the land. It will be remembered that they were purchased by a Minnesota party along with a lot of other cattle at one of Mr. Brett's former sales, and the party could not make proper settlement for any of the stock; hence these beautiful cows were left on hand at the farm. We offer this explana-tion for the reason that some may wonder why these cows are again listed for sale. They were bid off by an agent for a party who could not settle either by note or cash. There is scarcely a herd in America that would not be proud to own either of these imported cows. Their pedigrees and more minute particulars will follow in future is-sues. Inasmuch as the sale catalog has not as yet reached our hands, we are at a loss to give the breeding of any of the offering further than in a general way. Certain it is that Col. Al P. Mason, the auctioneer, will have the opportunity to dispose of a lot of

## A GOOD YEARLING HEREFORD BULL FOR SALE

CURED by Polled Assurance 193115, the most noted double standard Polled Hereford bull in America.

#### Polled Hereford Bulls.

I have a number of young Polled Hereford bulls for sale also. Address

Dr. E. W. Gammon, St. Charles, Iowa.

## GEO. E. PATCH, BLANDINSVILLE, ILL.

POLAND CHINAS, BOTH SEXES, ALL AGES. WRITE YOUR WANTS.

## CHOICE SHORT-HORN CATTLE FOR SALE.

Address, J. H. MOYER, Newton, Iowa

## Good Aberdeen Angus For Sale

THREE yearling bulls, two sired by South Oaks Baron and one by Blencoe; also a few good cows and heifers. Write

M. B. WALKER, CLARINDA, IOWA

L. H. ROBERTS & SON, PATON, IOWA.  
CHOICE Duroc Jerseys. Order now for spring pigs. Visitors always welcome. Farm on edge of town.

FOR SALE AFTER JULY 1ST.  
REGISTERED Shire stallion four years old, D. H. Winter, Maryville, Missouri.

cattle of the most practical sort. A Home-stead representative has inspected the offer-ing recently and finds them all out on grass, not fat, but in the pink of thrift and breeding condition. The cold and backward spring has retarded the growth of grass so that these cattle have not put on their sale clothes to the extent that they ordinarily would have done by this time. Nevertheless this is but a minor attribute and would only cause the buyer to pay more money for the cattle with-out adding one single dollar to their intrinsic worth from a breeder's standpoint. Mr. Brett is busy at work on the sale catalog and by the time this article is read it will no doubt be ready to mail and will be sent free to readers who say they saw the announce-ment of his sale in The Homestead. Future issues will contain further descriptions of

this very useful offering. The sale will be held at a very opportune time for breeders and farmers to get away from home for a day or two, and further, the pastures will doubtless be much improved by that time so that purchasers of cattle can turn them right out on the grass with little or no expense for keep for a number of months. The date of this sale should be firmly impressed on the mind of every breeder in the middle West who contemplates purchasing good Short-horns this summer. See advertisement on this page.

#### THE LADY FANNYS IN THE KERRICK DISPERSION.

In the dispersion of the herd of the late Hon. L. H. Kerrick, near Bloomington, Ill., June 25th, 26th and 27th, which is the largest dispersion sale ever held of the breed, there are necessarily many attractions. The 250 animals cataloged are wonderful in their uniformity of type, and in looking them over it is easy to understand why Mr. Kerrick made such an outstanding success in the production of the greatest of beef steers. It is not our intention to describe individuals, as a description of one of the short-legged, symmetrical animals of good scale and great quality, would be a description of many of the 250 head. We wish, however, to call attention to a family that was a favorite one with Mr. Kerrick. It is the Ballindalloch Lady Fanny and the thirty-two representatives of this strain included in this auction were his greatest pride and the breeding and development of the family was his greatest ambition in the pure-bred business. These thirty-two animals constitute the largest number of representatives of a Ballindalloch family that have been offered in any auction in America or perhaps in any auction anywhere. They descend from the cow, Fashion, by Trojan, the sire of the cows that have made the Ericas famous. A daughter of Fashion was imported to this country and in the herd of Mossom, Boyd & Co. was bred to Imp. Ermine Bearer, the greatest Erica bull brought to America, and the produce was Fair Lady of Verulam and from her all of the Kerrick Lady Fannys descend, with the exception of Imp. Lord Fretful that was bred at Ballindalloch, sired by the celebrated Eblito, one of the greatest sons of Imp. Prince Ito. Lord Fretful, while at Ballindalloch, sired the highest-priced bull sold in the Perth show and sale of 1904, and in this country has sired first-prize winners at some of our greatest breeding shows. He was second-prize bull at the International Exposition of 1903 and was at the head of a prize-winning herd for several years. At seven years old he is a valuable sire. The Lady Fannys have furnished many great show and breeding animals, prominent among which is Lord Chamberlain, the sire of the dam of Prince Ito 2d, the undefeated American champion. These Lady Fannys have been topped out in the most approved fashion, such bulls being used on them as Imp. Palmstake of Aherlour, an Erica-topped Pride, and Craigo of Estill, a Monthleton Fancy by the great Heather Lad 2d. Other Ermine Bearer dams have found a place in the Kerrick herd and their offspring will be offered on this occasion. Catalogs giving full particulars will be mailed on application to Mr. W. C. McGavock, sale manager, Springfield, Ill.

#### POLLED HEREFORDS.

One of the most noted Polled Hereford herds in America today is that of Dr. E. W. Gammon, of St. Charles, Iowa. Polled Herefords are comparatively a new thing in the cattle world, but they are here to stay. In the early days horns were considered a necessity as a protection against wild beasts, but no longer is this the case. Of late years buyers on the hoof have paid a premium for dehorned steers to go into the feed lot, and they have always topped the market when sold to packers. The desirability of breeding Polled Herefords was uppermost in the minds of several of the earlier breeders, and in 1893 a Kansas man began to establish a herd. In course of time he established the single standard Polled Herefords, using for a bull a "sport" or freak that came without horns. About 1902 Mr. Warren Gammon and his son, B. O. Gammon, of Des Moines, Iowa, wrote to all American Hereford breeders about "sports" or Polled Herefords that they might have in their herds. They secured four males and seven females. With these females and the bull, Giant (101740), they began the breeding of purebred Polled Hereford cattle. This bull dehorned 75 per cent of his calves, the tendency to "scurs" or horns, however, being more in evidence in the males than in the females. Among these cows was one called Blue Bell and she dropped a bull calf in May, 1904, which is registered in the National Polled Hereford Association as Polled Assurance (193115). This bull is considered the first pure-bred Polled Hereford bull in the world, and he stands today at the head of the herd of Dr. E. W. Gammon, of St. Charles, Iowa. This bull, a splendid specimen of the Hereford breed, with a long body, deep quarters and a good middle, now stands at the head of this herd, and he has proven himself a splendid sire by breeding the horns off 95 per cent of his calves. This is true of both polled and horned cows, and one can now see as uniform crop of calves on this farm, sired by this bull, as will be found in any other herd in this country. Quite a per cent of the females in the herd are naturally Polled, and therefore type and breed character are firmly established. The demand for Polled Herefords is very strong, and is the best evidence that the American people are favorable to this great breed of cattle. Dr. E. W. Gammon is one of the pioneer breeders who has given both his time and money towards founding this herd, and it is considered one of the best-bred Polled Hereford herds today in this country. Much of the foundation stock in this herd is of the well-known Anxiety strain, and therefore carries the blood of some of the greatest Hereford bulls known in recent times. The demand for Polled Hereford bulls is always strong, and there are very few that can supply them. Among these is a year-old bull last January, sired by Polled Assurance, and out of Stella Rose, an Anxiety-bred cow, and he is one of the best bred young Polled Hereford bulls living. Dr. Gammon would sell this fellow, but wants to reserve the right to breed him to a few heifers before he goes. He is as well bred Polled Hereford bull as ever lived, and he is a

splendid individual. Dr. Gammon has a number on hand and for sale and any of our readers who may want one should write him about these at once. A better way, however, is to go and see his herd and make your own selection. There is a great future for double standard Polled Hereford herds in this country, and we know of no place where a better foundation can be secured. Write Dr. E. W. Gammon at once and kindly mention The Homestead.

#### THE KERRICK DISPERSION SALE.

Only in dispersion sales are buyers afforded the opportunity to secure stock which has teuded toward making a herd a pronounced success. Such is the case with the dispersion of the Aberdeen Angus herd owned by the late Hon. L. H. Kerrick, of Bloomington, Ill. This event will be the most important in the live stock world of the present year. Never before have so many cattle the property of one man been offered to the public at auction. The work done by Mr. Kerrick in promoting the interests of the Angus breed needs no review to the breeder of pure-bred cattle. He was one of America's greatest breeders. He was not a speculator in any sense of the word, but a man who had the best interests of the breed in mind at all times. Two hundred and fifty head will be sold at auction on Tuesday, Wednesday and Thursday of next week, at the farm near Bloomington, Ill., under the direction of Mr. W. C. McGavock, of Springfield, Ill., who has charge of all details of the sale. In addition thirty-eight head of high-grade two-year-old steers will be sold some time during the auction. We have in previous issues called the attention of our readers to the fashionable breeding contained in this herd. The best families of the breed are represented, and were selected by Mr. Kerrick for their usefulness. He always used the best bull he had. As an example of this we wish to call the attention of our readers to the principal herd bull, Imp. Lord Fretful. Another good bull which has been used in the herd with success is the two-year-old bull, Eric 9th of Kellor Park, a two-year-old Pride-topped Trojan Erica. This bull is good enough to head the best herds of this country. His first calves are being sold in this sale with their dams, and they give evidence of his development into one of the best sires of the breed. The breeder who is in search of a herd bull will find in this young sire one that will please. Among the numerous families contained in this herd none have been more profitable than the Lady Fanny. Mr. Kerrick prized this family because of their wonderful breeding qualities. There are a large number in the sale and they are offered with the recommendation of having produced some of the best things that were sent out from this noted herd. As an inducement to those from a distance, Mr. C. A. Ewing, administrator of the estate, has made a most liberal offer of refunding railroad fare to those who purchase \$300 or upwards. This herd is in good, thrifty condition and will yield good profit to those who may be fortunate enough to secure some of the stock offered for sale. The catalogs are out and will be sent to all who write Mr. W. C. McGavock, at Springfield, Ill., mentioning The Homestead. The sale will be held at the farm, ten miles south of Bloomington, Ill., and near McLean, a station on the Chicago & Alton railroad; Heyworth, on the Illinois Central railroad; and Harlan's Crossing, on the Bloomington & Decatur electric line. All trains will be met with free conveyances at above named stations, to and from farm on sale days. There are electric cars every hour to Bloomington, where splendid hotel accommodations can be had and there are also hotels at Heyworth and McLean. Readers of The Homestead will find it to their interest to be present at the dispersion of what might justly be termed the greatest herd of Aberdeen Angus cattle in America. The large number of cattle to be sold assures those present of many bargains. Plan to be present at this sale. The announcement appears on page 19 of this issue.

#### LAST CALL FOR THE WAYNE SHORT-HORN SALE.

One of the most important and one of the largest Short-horn cattle sales that has ever been held in northern Nebraska will be that of Messrs. A. B. Clark and W. M. Lessman, at Wayne, Neb., on June 26th. There will be seventy head in the sale, including a liberal number of Scotch cattle. There will be sixteen bulls in the sale ranging in age from ten months to two years, and the rest will be cows and heifers. From eight to ten cows will have calf at foot, while a great many will be right at their calving. The cattle are in nice condition and individually are a splendid lot of Short-horn cattle. Mr. Clark contributes the most of the cattle, and the reputation of the Clark herd has been for well-bred, good-milking Short-horns with plenty of scale. We presume to say that there is not another herd in the West that can show as many large, broad-backed cows as will be found in this herd. In the bull offering he is selling a good two-year-old son of the \$1,000 bull, Merry Marshall, that formerly headed the C. A. Saunders herd. He also sells a two-year-old son of Cumberland Hero and a son of Scotch Cup. These bulls are big, strong, lusty fellows, just right to do hard service. He also sells four yearling bulls the get of Gwendoline Lad 2d, Scotch Cup and Gauntlet's Hero. There are a few younger bulls in the sale. Two of these are sired by Lord Banff 20th, one out of the Scotch cow, Daybreak's Maid 2d, the other out of Maid of Lancaster 3d. The dams of both of these young bulls will also go into the sale. The former is one of those well-bred Daybreaks, while the latter belongs to the celebrated Maid of Lancaster tribe. Duchess of Wayne is another Scotch cow that will be sold, and she is a daughter of Maid of Lancaster, referred to above. She will be sold with a nice heifer calf at foot. There will be a daughter of the great Canadian bull, Star of Morning, in the sale, and she will also have a calf at foot. There will be an eight-year-old Scotch cow in the sale called Pride B. of Elm Creek. She is a daughter of Scottish Butterfly out of Pride B. 13th by Field Officer 2d. She belongs to the noted Queen of Beauty family. She is safe in calf to Lord Banff 20th. Rose Champion is by King Champion, out of a Merry Marshall dam, and she belongs to the Dorothy tribe that is considered second to

# JULY SHORT-HORN SALE

## A. H. BRETT, MASON CITY, IA.

Includes fifty females, Scotch topped, straight Scotch and imported, Imp. Likely and Imp. Roan Ribbon included. A dozen nice two-year-olds in the bunch. Every female is bred to Scotch bulls. Ten bulls of serviceable age, will bear the inspection of bull buyers. The present herd bull is Imp. Merry Hampton.

### SALE DATE---JULY 11TH

I am also going to sell a number of registered horses in this sale, including three Clydesdales, two stallions and a mare; and four Percherons, three mares and one stallion. They are all exceptionally good, ranging in weight from 1,600 to 1,800 lbs., and ought to prove an attraction. Come and look them over.

## A. H. BRETT, MASON CITY, IA.

A. P. MASON, AUCTIONEER.

#### ABERDEEN ANGUS CATTLE.

## Holbrook Aberdeen Angus Breeders.

COMPRISING the allied herds of F. J., M. H. and Mike Donohoe and John and Michael Cash of Holbrook, Iowa. 200 head of choice Daddies within a radius of two miles of Holbrook. The International Champion Black Wood Lawn 42988 heads the herd. The following families are represented: Prides, Blackbirds, Ericas, Heather Blooms, Barbaras, etc. Other bulls used on the herd are Wood Lawn Blackbird Lad, Homedale Black Juno and Morning Star 2d. We can supply any class cattle desired. Come to Holbrook and allow us to convince you of this fact. Address any of the above breeders, mentioning this paper.

### PLEASANT GROVE HERD OF ABERDEEN ANGUS CATTLE

175 HEAD in the herd. 15 bulls for sale, 12 to 24 months old. Herd bulls, Imp. Pride of Aherlour 41204 Lowlander 21880, Newton Hero 46150 and Nugget of Cottage Grove 20th 68671. We can ship E. O. ## 10 Aberdeen Angus BULLS FOR SALE.

Twelve to Fourteen Months Old.

WILL sell at farmers' prices. \$100 gets a good bull. Prides, Queen Mothers, Heather Blooms, Rosethelm Queens, etc. Address:

**John E. Griffith,**

WASHINGTON, IOWA.

(Mention Homestead)

none among the Scotch families. There will be a splendid lot of Scotch-topped cows in the sale, carrying plenty of scale, and a great many of these are good milkers. There will also be a bunch of twenty-five young heifers in the sale, and these should furnish foundation material for some young breeder. One of the best of these is a nice roan, calved October 25th and sired by Roan Gauntlet. The most of these heifers are red in color and are a very uniform lot. The Scotch tribes represented in the sale will be Mary Ann of Lancaster, Daybreak, Queen of Beauty, Evangeline and Dorothy families, while the Scotch-topped Young Phyllis, Rose of Sharou, Arachella, Sanspareil and other well-known and popular strains will be very much in evidence. Mr. Lessman is selling a three-year-old daughter of Scotch Fashion and two yearling bulls, one by Scotch Fashion, the other by Gold Coin. The offering as a whole is a good, practical lot of Short-horn cattle. They are sold by reliable breeders who stand behind their cattle. They have been largely raised in northeast Nebraska, and a class of animals that any farmer or breeder can buy and make money on. There will be seventy lots in the sale and there will certainly be some good bargains. Write Mr. A. B. Clark, of Wayne, Neb., for catalog and be sure that you go to the sale, especially if you want some of these. Kindly mention The Homestead when writing.

#### PLEASANT HILL ANGUS.

SPECIAL prices for 30 days on 10 bulls, 20 cows and 5 heifers, 12 with calves at foot. Bulls, calves and some of the heifers are sired by the Pride bull, Baltimore of Glendale 24275, a prize-winner and sire of prize winners.

J. Nissen, Meservey, Cerro Gordo Co., Iowa

Head of Scotch and Scotch Topped Short-horn Cattle

70

..... WAYNE, : NEBRASKA, : WEDNESDAY, : JUNE : 26, : 1907 .....  
The Best Lot of Short-horns ever offered for sale in Northern Nebraska.

16 BULLS, 54 FEMALES, 25 CHOICE HEIFERS. 10 COWS WITH CALF AT FOOT

WE are selling some of the very best cattle we have in our herds, and this offering is largely a draft from one of the largest and best herds in the west. The Scotch families represented in the sale are Queen of Beauty, Mary Ann of Lancaster, Daybreak, Dorothy and Evangeline tribes. The American sorts are represented by Young Marys, Young Phyllis, Sanspareil, Arabella and other well-known tribes. We are offering a grand lot of bulls, ranging in age from 9 months to two years. The cattle that go into our sale are splendid individuals, having lots of scale and plenty of bone. Cows not having calf at foot and old enough will be bred to our well-known herd bulls. There will be sons and daughters in the sale of the \$1,000 bull Merry Marshall. King Champion (now at the head of the C. A. Saunders herd) Lord Banff 20th, Gwendoline Lad 2d, Star of Morning, Golden Champion, Scottish Butterfly, Commander and Cumberland. We are contributing twenty very choice heifers, the pick of our herds. We are doing this to give the young breeders an opportunity to get a bunch for foundation stock. The cows are splendid milkers and raise their own calves, always. Write for catalog and come to the sale. Address

AUCTIONEERS:

Ernest Pancake, Ransom, Illinois

Prolific Herd of Duroc Jerseys

I AM offering some very promising male and female pigs sired by Billy K. 4th, 2d, 3d, 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th, 12th, 13th, 14th, 15th, 16th, 17th, 18th, 19th, 20th, 21st, 22nd, 23rd, 24th, 25th, 26th, 27th, 28th, 29th, 30th, 31st, 32nd, 33rd, 34th, 35th, 36th, 37th, 38th, 39th, 40th, 41st, 42nd, 43rd, 44th, 45th, 46th, 47th, 48th, 49th, 50th, 51st, 52nd, 53rd, 54th, 55th, 56th, 57th, 58th, 59th, 60th, 61st, 62nd, 63rd, 64th, 65th, 66th, 67th, 68th, 69th, 70th, 71st, 72nd, 73rd, 74th, 75th, 76th, 77th, 78th, 79th, 80th, 81st, 82nd, 83rd, 84th, 85th, 86th, 87th, 88th, 89th, 90th, 91st, 92nd, 93rd, 94th, 95th, 96th, 97th, 98th, 99th, 100th.

Chas. Van Patten, Sutton, Nebraska

Gwinner's Duroc Jerseys

100 GOOD pigs on hand to supply the season's trade. They represent the most fashionable strains and among them are prospective show animals. I will book your order now. Write me.

E. C. GWINNER, Holdrege, Nebraska.

DUROC JERSEY HOGS.

OAKDALE STOCK FARM

A. E. MARTZ, PROP., NEBRASKA.

LIBERTY, NEBRASKA.

DUROC JERSEY SWINE

100 GROWTHY SPRING PIGS ON HAND 100

THESE pigs are mostly from Junior Jim 30437 sows and sired by Little M. 40343 by the prize winner Little K. 20373, others by Martz's Top Notcher 54987 by the world's champion Tip Top Notcher. Pigs shipped on approval. Write me for prices for Sept. delivery. Get your order in early. First in first served.

PENNYRILE HERD OF DUROCS.

HOME of Commodore 13381, the greatest boar of the breed, assisted by Top Notcher 10th, Sensation 9th, and Commodore 3d. Orders now booked for spring pigs. All others sold. Address,

AMOS W. HARRIS & SONS, WAVERLY, KY.

GOLDEN HERD DUROC JERSEYS.

HERD headed by Tip Top Notcher 20729, grand champion boar World's Fair 1904, and Ambition, first prize pig Illinois State Fair 1905 and 2d prize boar 1906, and sire of more prize winners at Illinois State Fair, 1906, than any other boar. Ambition's first 16 gilts sold for \$1,677.50. A few sows of late farrow bred to these boars for sale. Service fees to Tip Top Notcher \$100; to Ambition \$50. Will book a limited number of sows at above prices. The best is none too good.

L. E. Thomas, Golden, Illinois. R. E. Hogsett, La Prairie, Illinois.

AMERICA'S GREATEST DUROC HERD

Owned By S. E. MORTON & CO., CAMDEN, OHIO.

WE are now booking orders for spring pigs. Thirty daughters of Ohio Chief in pig to King of Colonels, the sensational breeding boar. Prices reasonable. Description guaranteed. Mention Homestead when writing.

DUROCS DUROCS DUROCS

OWNED by W. H. Halth, Vesta, Neb. Herd headed by Ed's Improver 43837, one of the greatest living sons of Improver 11 13865. 125 good pigs on hand from most fashionable strains. Am booking orders for spring pigs. Write me for prices. Inspection invited. Mention Homestead when writing.

WE WON 79 RIBBONS

OUT of ninety-two showed for including fourteen champion sweepstakes at Ohio, N. Y. state fair and Lexington, Ky. We bred and lifted all but one. We breed the winners. Stock of all ages for sale. Write or come.

WATT & FOUST CEDARVILLE and XENIA OHIO.

WALNUT GROVE HERD DUROC JERSEYS

HOME of the \$1,575 Rose Bud Lady with her litter by Medoc, a son of the \$8,000 Kant Be Beat. The \$600 H. Garnett with her litter by Improver 11. Many others of choicest breeding and individuality. Look me up at the Nebraska State Fair. Nothing priced at present.

H. G. WARREN, INLAND, NEB.

8 High Class Ohio Chief Boars For Sale

I WILL sell my great yearling boar, Wonder's Ohio Chief, a son of Ohio Chief and out of Wonder's Queen, a daughter of the great brood sow, Beatrice Queen. Here is a great herd boar for somebody. I also have seven good fall Ohio Chief boars for sale. If you want an Ohio Chief boar write me at once. Address W. A. Rankin, Carson, Iowa.

BUDDY K. IV ...EVER SOLD AT AUCTION...

HANLEY, one of the greatest sires of the breed. A few sows will be bred to these noted boars at \$100 each. Write for particulars. September boars by these noted sires for sale at reasonable prices.

McNEIL BROTHERS, BOWEN, ILL.

TIP TOP NOTCHER 20729 AT HEAD OF HERD

GRAND CHAMPION Duroc Boar World's Fair St. Louis 1904. Sire 2d prize get of boar and champion herd from Illinois same show, and sire of State Fair champions. We are booking orders for spring males by this sire and from dams of fashionable breeding. Address,

FAGAN, BROWNING & McCABE, HERSMAN, ILL.

THREE SPLENDID FALL BOARS

Sired by I Ama Wonder, a son of the sweepstakes boar Crimson Wonder I Am, and out of the \$1500 sow Ruberta. Come and see these if you want a herd header. Address,

F. E. Garrett, Lohrville, Iowa.

MAUPIN & APPELEGATE, SHELBY, MO.

GOOD DUROCS Fashionably Bred

NOTE the sires: Belle's Chief 51323, sire, Ohio Chief, dam, Savannah Belle; Queen's Advance by Proud Advance; Buddy O. 2d by the \$5,000 Buddy K. 4th; and Paul Kruger by Kruger. Sows as richly bred. We offer boar pigs by these sires, also some by Hanley. We like to show you, so come if possible.

M. S. MOATS & SON'S DUROC JERSEYS

125 CHOICE pigs, sired by such noted boars as Crimson Critic, 2d prize boar at Nebraska state fair, Duroc Challenger's Wonder, Jumbo Critic, Ohio Chief, John D. Rockefeller and Mo. Gold Finch. We have herd headers for the future. Write us at once.

M. S. MOATS & SON, RANDOLPH NEB.

DUROC FALL BOARS

THEY are good ones, got by Perfection Chief 23867, and Choice Goods 43367 a litter brother to W. L. A's Choice Goods. Write me if you want something good at a moderate price.

GEO. M. McMURRY, MARYVILLE, MO.

DUROC JERSEY HOGS.

Red Oak Herd

OF recorded Duroc Jersey Swine. We have a few of the last of May farrow, good ones. Write, phone, or come and see them. Satisfaction guaranteed. We can ship on C. R. I. & P. or Northwestern.

J. W. TROY & BROS. PROPS., Rosehill, Mahaska Co., Iowa.

Crimson Wonder Again 40785

CHAMPION Ia. State Fair 1906 heads Mulberry Grove herd of Durocs. He is assisted by Top Notcher again, champion of two State Fairs 1903, also sire of World's Fair Jr. champion, Top Notcher Chief. Fall boars by these noted sires for sale. Address,

H. S. ALLEN, RUSSELL, IA On main line C. R. & Q. R. R.

PIONEER HERD DUROCS.

WE have several good boars sired by Royal Top Notcher 23639, Sure Winner and Echo King 18415. If you want the tops come to us; we have the best. Correspondence promptly attended to. Address Arch Brown & Sons, Waterloo, Nebraska.

CLAREMONT

HOME of S. E.'s Model VIII and IX. Claremont Model, Proud Model and Proud Advance, 250 pigs of spring crop. 7 fall boars for sale. Orders booked for future delivery. Address:

Weighton & Ashby, Audubon, Iowa

Three Ohio Chief Boars

for sale. Two fall boars and one yearling. Write me at once.

C. F. KIRK, Ponca, Nebraska.

RUSSELL'S DUROC - JERSEYS

GLENDALIE CRITIC, the greatest son of Crimson Wonder, at head of herd. Booking orders for fall delivery. 125 pigs to pick from. Address,

E. Z. RUSSELL, BLAIR, NEB.

Smith Brown's Duroc Jerseys

HOME of the winners. 125 pigs by Echo King, Red Chief I Am, Crimson Wonder 2d, Waterloo Prince and other well known boars. I have the pigs this year; if you want a good one write me. Address,

SMITH BROWN, Waterloo, Neb.

GOLDEN QUEEN DUROCS

HERD headed by Crimson Jim, a grandson of the great Crimson Wonder, assisted by Lincoln Top by Morrison's Belle Top. I will offer a few good gilts bred to Lincoln Top that are right in every respect. Write me and I will tell you all about them.

W. M. PUTMAN, TECUMSEH, NEB.

NORTH BLUE DUROC JERSEYS

MY herd is headed by Echo Wilkes, the \$305 male pig. 120 pigs on hand, mostly of early farrow. I can supply your wants, be they large or small. Write me your wants and mention the Homestead.

Chas. Liebhurt, Marquette, Neb.

PLEASANT VIEW HERDS DUROC - JERSEYS

140 SPRING PIGS, Sired by such noted boars as Junior Jim, American Royal, IXL Advance, Reisser's Tip Top Notcher and other sires. We have some good boar prospects. Write us. REISSER BROS., Sanborn, Iowa.

C. M. Dewey, Shannon City, Ia.

FOR SALE—Duroc Jersey boars, summer farrow, sired by W. L. A's Choice Goods. Fall boars by Proud Advance and Teddy J. A few sows bred to Ohio Chief II for summer farrow. Write or visit.

25 Duroc Jersey Bred Gilts 25

I HAVE for sale 25 bred gilts for March, April and May farrow of best breeding and individuality for sale at bargain prices.

F. M. Erschen, Odell, Ill.

ROSE HILL HERD DUROC JERSEYS

TWO fall boars and a few sows for fall farrow. 125 March and April pigs, sired by Long Aliz, Arion and Redwood Chief, nearly all from mature sows.

AUSTIN RENSHAW, BLAIR, NEB.

SIX GOOD FALL DUROC JERSEY BOARS

FOR SALE—Extra good individuals. Priced right. Taken at once. Sired by Fancy Crimson Wonder. Limited number sows bred to Lincoln's Wonder for September farrow. W. A. Kirkpatrick, Lincoln, Neb., A. W. Wilson, Bethany, Neb.

# A WONDERFUL OPPORTUNITY for the Homesteader and Investor

## TWO HUNDRED THOUSAND ACRES

Of the Famous Golden Prairie District of

# Southeastern - Wyoming

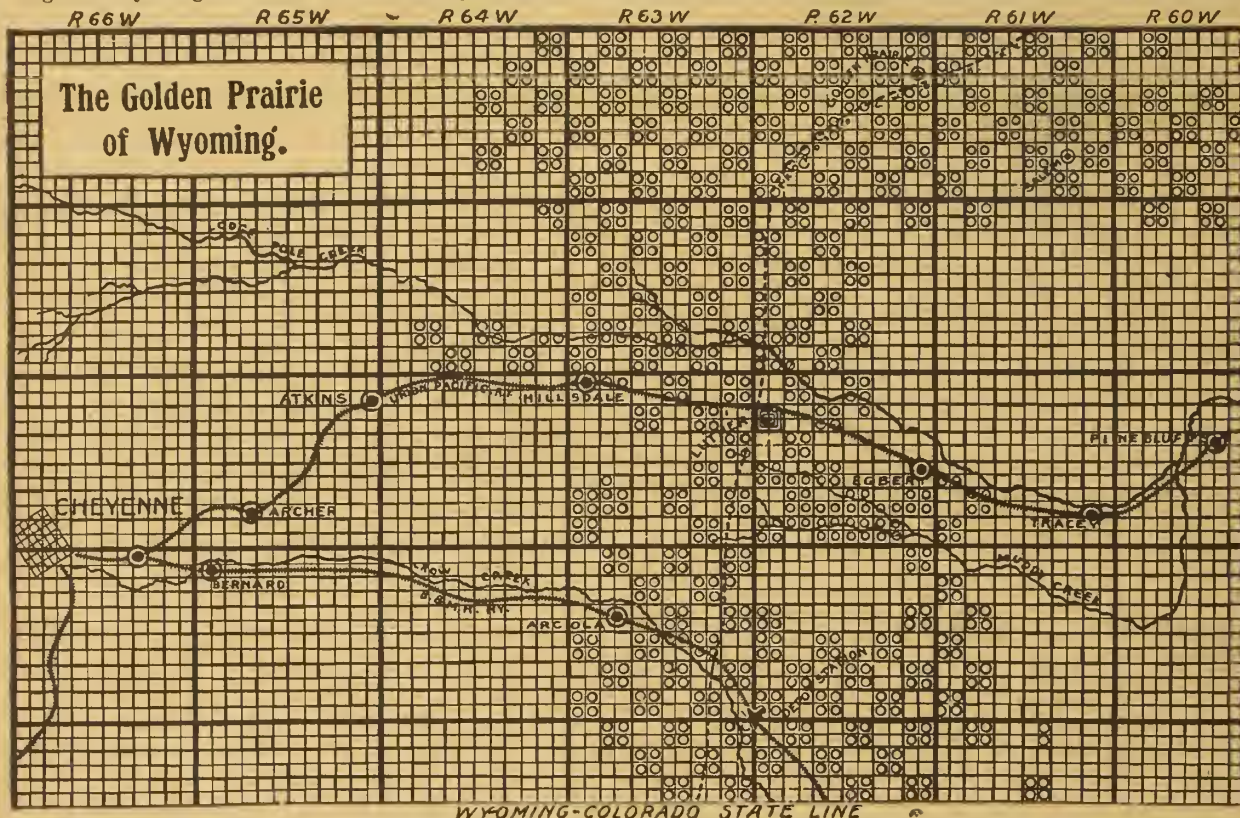

Now Thrown Open for Settlement.

The recent order of the National Government compelling the removal of all fences surrounding homestead lands has forced the stockmen of Laramie County, Wyoming, out of business.

We have purchased the deeded land as shown on the map found on this page, 10,000 acres of which we are keeping and improving, while the balance is being placed on the market in tracts of 160 acres and up, with prices ranging from \$8.00 to \$15.00 per acre, with small cash payment and balance distributed over a period of 10 years with low interest.

### A 160 ACRE HOME FREE TO YOU.

The even numbered sections, except school sections, are subject to homestead entry so that the purchaser of a quarter section of our land can, by taking the adjoining land as a homestead, get his land at half price. This unusual opportunity is being taken advantage of daily and those desiring free homesteads should not delay.

This sectional map shows the Golden Prairie District. Our lands are designated by a circle in each quarter section. We are now marketing that portion of the land south of the main line of the Union Pacific Railway. None of this land is more than six miles from railway station on either the Union Pacific or the B. & M. R., while the proposed C. W. & N. is projected north and south through the middle of the tract.

The land lies level to gently rolling and is good rich soil with no alkali, brush, gumbo or other imperfection. The whole tract is underlaid with pure sheet water at a depth of from 20 to 80 feet.

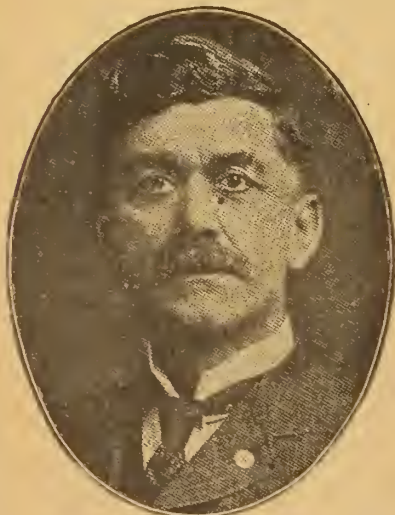

### AMPLE RAIN-FALL. NO IRRIGATION REQUIRED.

In the Swedish settlement adjoining our lands, large crops have been raised during the 20 years the settlement has been located there. These people follow the ordinary farming methods of the central states and their harvests of wheat, oats, barley, potatoes, etc., are remarkable, both in quantity and quality. Our literature, which is sent free for the asking, contains testimonials of a number of these people. They will be a revelation to you.

Fill out and mail us without delay, the coupon found on this page. It will supply you with much valuable information.

## LOOKS GOOD TO WRAGG.

Editor of Farming Papers Buys Farm and Daughters Follow His Example.

Mr. M. J. Wragg, Horticultural Editor of Twentieth Century Farmer who attests his faith in the Golden Prairie country by investing in 640 acres of the land.

"Mr. M. J. Wragg, an editor of the Twentieth Century Farmer, of Omaha, and an extensive contributor to the agricultural departments of various newspapers, is in the city today and was a caller at the Tribune office. Mr. Wragg has been spending several months in the West writing up agricultural conditions and opportunities, and was so impressed by what he found that he took his own medicine and purchased 640 acres of land near Salem, and his example has been followed by his two daughters who have taken up land near Luther. Wragg says that he would encourage young active, intelligent farmers who cannot afford to buy the expensive lands in the central states to come to this state where the conditions are so promising."

The above taken from the June 8th issue of the Wyoming Daily Tribune of Cheyenne refers to one of the leading agricultural and horticultural authorities of the country. We sold Mr. Wragg his land and he is now personally superintending the planting of crops and erection of buildings.

Statement of T. M. Rider, and W. A. Rider.

Mr. T. M. Rider is one of the best-known breeders of thoroughbred Clydesdale horses in Iowa. The following testimonials from him and his son dated Fairfield, Iowa, Feb. 20, 1907, afford us great satisfaction: We wish to state for the benefit of those who are interested in cheap land, that on December 4th we mailed to The Federal Land and Securities Company, of

Des Moines, Iowa, our order and draft for a section of land in the Golden Prairie District of Wyoming, to be selected by them subject to our approval. On December 18th we went out to see this land and were very highly pleased with the country and the selection made for us, in fact so much so that we refused an offer of Nine Hundred Sixty Dollars advance over purchase price on our section two days after our arrival.

We also took homesteads adjoining and expect to locate on our land in the spring. We think this one of the best cheap land propositions that remains in the United States today and is well worth anyone's time to investigate. Also the chance to obtain a free homestead makes it doubly attractive.

We have found this to be a very gentlemanly and obliging company to deal with and feel that we can recommend them to any who wish to make a paying investment in good cheap land.

Sincerely,

(Signed) T. M. Rider, W. A. Rider.

The Messrs. Rider are now located in their new homes with postoffice address Luther, Wyoming.

## Opinion of a Government Expert.

### Sugar Beets in Wyoming.

"Chas. F. Saylor, a sugar beet expert in the employ of the department of agriculture, has arrived at Cheyenne, and after a short visit in Utah, will make an investigation of the advantages of this state for sugar beet raising. Mr. Saylor states that the adaptability of the sugar beet to the soil of nearly all sections of Wyoming is already understood and that the era of the sugar beet in the state has arrived. He predicts that there will be many factories in Wyoming within a few years. Mr. Saylor is also a dry farming enthusiast and believes this state has a great agricultural future. He is of the opinion that land in the vicinity of Cheyenne ultimately will be worth more than \$100 an acre."—Cheyenne (Wyo.) Daily Leader of June 4, 1907.

THE FEDERAL LAND & SECURITIES CO.,

Des Moines, Iowa.

Gentlemen: Please send me at once, free of charge, sectional map and literature of the Golden Prairie District of Southeastern Wyoming.

#### THE ALFALFA SEED BED.

There is only one choice left this year as to the time of sowing alfalfa, and those who failed to get a catch last spring must wait now until after harvest. Alfalfa is not a difficult crop to grow on ordinary soil that is either naturally or artificially drained, and most of the difficulty about getting a stand is due to the fact that the correct cultural principles are not complied with in preparing the seed bed.

Men who have planned to get a stand this fall by leaving their land bare with the hope of cultivating it from time to time during the season need little advice from us, because that is really the ideal way of fitting the land for alfalfa. It destroys the annual weed seeds in the surface soil, conserves moisture, firms the lower soil, and ideally fits the seed bed for the reception of the seed, so that germination is uniform, quick and strong. On such a soil, if the seed is sown in August or during the first part of September, the chances of not getting a stand are, in our opinion, very slight.

Turning now to the plan that must be followed by the average man who expects to sow his alfalfa seed this fall, we first recommend that the stubble be plowed as soon as possible after harvest. This is necessary in order that full opportunity be given to work down the soil into a firm, yet friable condition. Furthermore, it is absolutely useless to plow early unless one fully makes up his mind to do the necessary work on the surface at intervals of one week or ten days. The harrow for this purpose is an ideal implement, though, of course, if the weeds start it may be necessary to use the disk to some extent. An instance was called to our attention where a Kansas farmer last fall harrowed a certain field fourteen times after plowing and before seeding, and yet the report that he has to offer on his success in getting a stand would indicate that all his labor was justified. We insist that half-hearted methods will not result in success in undertaking to get a stand of alfalfa, and the crop is so valuable and lasts so many years after a proper seeding that one can well afford to take the necessary time to fit the land. As to time of seeding, we have said before that best results are usually obtained by sowing in August, though in the southern half of the corn belt seeding may be done as late as the fifth or tenth of September. Each man must be his own judge of local conditions, the main object being to obtain a fairly good growth before the ground freezes. If the plants are small when growth ceases in the fall they are much more apt to be heaved out by the freezing and thawing of the ground, while a strong root system will in most cases prevent the occurrence of this. As to the amount of seed that should be used, there is some difference exists in the practice even of successful men. Ordinarily twenty pounds per acre has been recommended, but Professor Miller, superintendent of institutes in Kansas, a man who has taken special inter-

est in propagating alfalfa doctrine and one who has been successful in growing the crop himself, makes the claim that if the seed bed is right eight, ten or, at the outside, twelve pounds of seed per acre is an ample supply. Mr. Miller says that the reason twenty pounds has been so favorably recommended is because the seed bed has not been properly prepared for the reception of the seed. In his belief Professor Miller is supported by Professor Ten Eyck, of the Kansas station, who also recommends anywhere from eight to twelve pounds per acre; but each claims that the seed should be sown with a barrow seeder and half the quantity should be sown in one direction and the balance in the other direction so that not a single foot of land will be missed.

When you undertake to grow alfalfa you must have an absolutely perfect stand or the crop will always be a source of annoyance to you. You will be trying to patch, the weeds will come in on these bare places, and altogether you will possibly become disgusted and give up the battle. Do the work properly in the beginning, and if your land is drained the chances are that there will be no difficulty in getting a perfect stand.

#### TURNING HOGS ON RAPE.

One of our subscribers from LaSalle, Ill., sends the following communication:

I wish you would inform me, through the columns of your paper, when is the best time to turn hogs into rape, or, in other words, what condition should the rape be in as to size when hogs are first turned in?

No hard and fast rule can be laid down on this subject. Where the number of hogs is comparatively large for the acreage of rape it is advisable to allow the crop to make considerable growth before turning in. In that way much more feed will be raised from a given area than if it is pastured earlier.

Were we asked to give the ideal time to turn hogs into rape or to state the best condition of the rape, we would advise turning the hogs in when the rape is anywhere from six to eight inches tall. While it is true that the leaves are very succulent at that time, nevertheless we have never had any injury result and we always prefer, if it is at all possible, to allow the hogs to run in the crop before it is large enough to shade their bodies. If they are in it every day there is very little danger of blistering, at least that has been our experience in pasturing hogs on rape for many years.

Of course it should be remembered that rape, unlike cereal crops, never matures, the leaves and stems remaining succulent throughout the growing season. Because of that it may be pastured with good results, both while it is young and while it is more nearly mature.

#### SEEDING CORN LAND TO TIMOTHY AND CLOVER.

An immense amount of high-priced seed and considerable labor is annually wasted in attempts to get a stand of grass in small grain. Not that we have any fault to find with sowing clover and timothy along with cereals, because under average conditions it is the best possible method, but rather that we find occasion to inquire into other methods by which men have succeeded.

We desire to say that, although the practice is not common, at the same time it is entirely practicable to sow such grasses as clover and timothy in corn fields previous to laying the crop by. We have seen this plan tried well up into the northern part of the corn belt and followed by excellent results.

When seeding is done in corn there must at least be one condition present, namely, that the surface must be fairly free from weeds. If for any reason the

cultivators have not kept the weeds in check we would not advise seeding in this way, because so much of the land will fail to produce a stand that the results will be unsatisfactory. We would advise no man to undertake to seed his land when there is only a prospect of getting half or three-quarters of a stand. Such a stand is always unsatisfactory and rarely profitable. There must be a full stand or none.

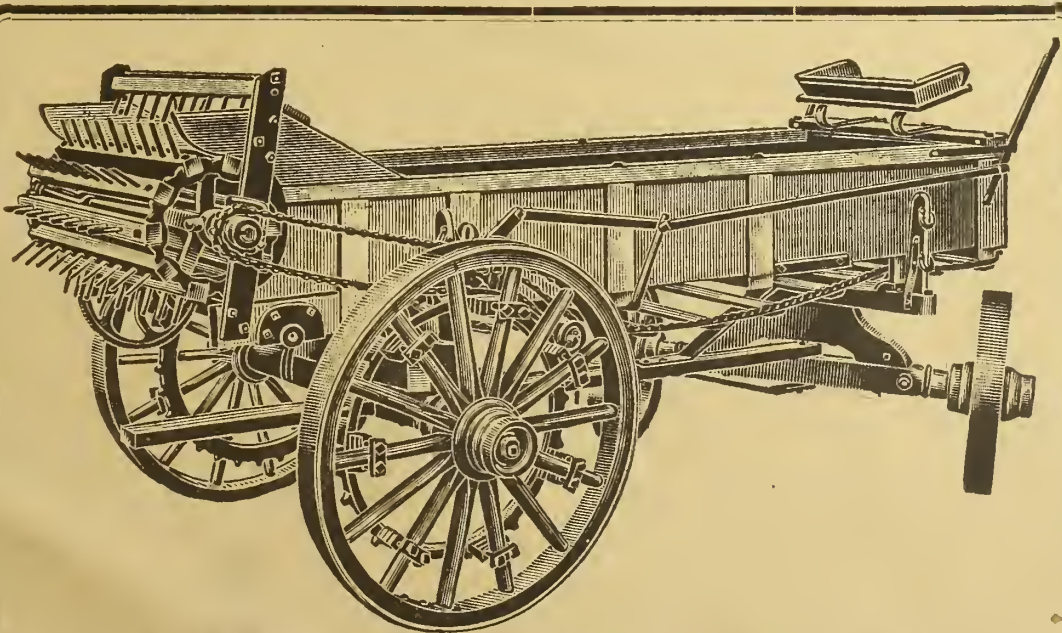

The ordinary cultivators are not specially adapted to the purpose of covering such small seed as timothy and clover, and consequently where one desires to seed down a part of his corn acreage it usually pays to use some kind of a harrow cultivator—something that will not cover the seeds more than an inch or an inch and a half and at the same time leave the surface soil as nearly level as possible. Moreover, it usually pays to run the cultivator both ways after sowing the seed, otherwise there will be a strip between the hills of corn that is apt not to produce any stand whatever; but by cultivating crosswise there will only be a very small space at each hill where one will not get a catch.

Those who are afraid that they will waste their clover seed need have no hesitation whatever about sowing timothy. This is a hardy crop, and even should one only get a growth of three or four inches the first year the chances are that the stand will come through the winter almost anywhere in the corn belt.

#### PREVENTING SOILS FROM DRYING OUT.

In an address delivered before the Kansas State Board of Agriculture at its last session, Professor Mosher, of the University of Illinois, gave some good advice on the above subject. He addressed himself to that phase of the subject which included the retention of moisture in semi-arid lands, and among other things, said:

In arid or semi-arid regions the soil should be kept loose as much of the time as the crops and weather will permit. Plow the ground as soon as the crop is removed, whether it be summer or fall. Follow the harrow or header with the disk, and then the ground can be plowed later, but plow the ground as soon as possible, so that the soil will be in the best condition for retaining the moisture present and absorbing the rainfall. A freshly plowed soil may be too loose, and is apt to be so if coarse organic matter, such as corn stalks or straw, is plowed under or if cloddy when plowed. This hastens evaporation. Use some implement for compacting it so that circulation of air cannot go on very rapidly in the plowed soil. The harrow will answer very well, although some may prefer the sub-surface packer followed by the harrow. The surface two or three inches should be loosened after every rain—no difference what implement is used, provided it does the work. To show the effect of fall plowing in arid regions, at the Utah Experiment Station, samples taken July 19th from fields, one of which had been plowed the fall before and the other in the spring, showed 7.47 inches more moisture in the fall plowing to a depth of five feet than in the spring plowing to the same depth. At various places in the arid west the value of summer fallow and fall plowing are receiving demonstration by the good crops that may be grown on land that was formerly thought to be worthless. The farmer is now able to keep the

This is the "Knox Simplicity Spreader" just now being placed on the market by the Western Harness & Supply Co., of Waterloo, Iowa. It is what is known as a wagon box spreader and can be used on any farm wagon or truck. A large sprocket wheel is clamped to the hind wheels of any regular farm truck and this generates the power that drives the spreader. This new "Knox Simplicity Spreader" is to go on the market at \$55, so that there is an immense saving made when the farmer supplies his own truck. This spreader is driven by both hind wheels of the wagon, which is an important feature, and no matter how short you turn, the heater still remains in motion. The drive sprockets are adjustable to meet the requirements of any wheel over thirty-six inches in diameter. All castings are heavy and fully equal to any duty that may be required of them. The apron slats are made of strong, well-seasoned hard wood. The spreader cylinder may be run at four different rates of speed, at the will of the operator. Although every part of this spreader is sufficiently strong to do the work, it is, nevertheless, of medium weight. As said before, the price of this spreader is \$55 and will be sold direct, to farmers only. Those interested in a good, inexpensive spreader cannot do better than communicate with the Western Harness & Supply Co., of Waterloo, Iowa, after reading the advertisement on page 3.

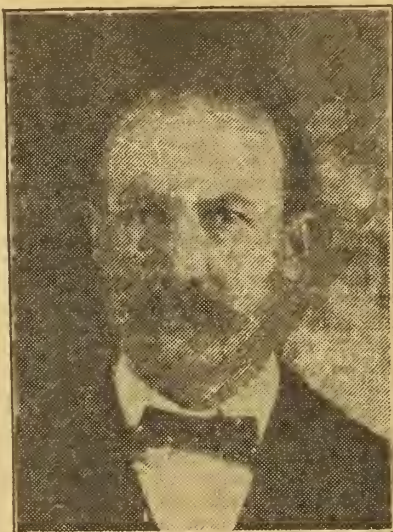

moisture in the soil and grow a crop with two seasons' rainfall where one would not be sufficient, or in some cases grow two crops with three seasons' rain. The practical application of the principles of conservation of moisture is opening up possibilities in the great West that were not dreamed of twenty years ago. Although plowing and the immediate preparation of the soil is of vast importance in the arid regions, it is necessary to produce a new mulch after every shower until the crop is planted. Weeds must not be allowed to grow. In the spring the soil must be worked as soon as the weather will permit, to restore the mulch that has been destroyed by the winter rains.

While in the main this doctrine applies to regions where conditions are not specially favorable for corn growing, at the same time Professor Mosher enunciates a principle that may in many cases be applied locally. We refer to the matter of plowing the soil as soon as cereal crops are removed, or if this cannot be done to at least disk the surface. Apart from the fact that this will tend to conserve the moisture for future use, the effect of the practice is to liberate fertility for the next year's crop. A dry, harsh stubble surface is to a large extent chemically dead, and this condition is not favorable to the production of maximum crops. Furthermore, the early plowing of stubble land will very frequently prevent the scattering of weed seeds, because we have many varieties of weeds that mature in a very few weeks after harvest. If they are plowed under lightly many of them will germinate, but fail to reach the seeding stage.

#### SPREADING ALFALFA DOCTRINE.

Although the state of Kansas holds the record as to the number of acres of alfalfa grown in a single county, yet within the last month the leading agriculturists of the state have deemed it wise to stir the people of eastern Kansas concerning the importance of growing a much larger acreage of this wealth-making legume. To this end the forces of the agricultural college and the industrial department of the Santa Fe Railroad were joined during the second week of June and a special train was operated through the eastern part of the state, carrying a corps of alfalfa experts. This

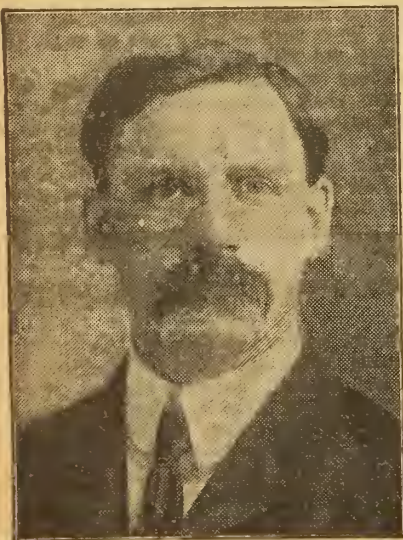

It was advised that the crop be sown some time in the month of August or early in September, but preparation of the soil must precede the time of sowing many weeks. If it is stubble land it should be plowed as soon as the crop is removed and harrowed thoroughly. In one week or ten days harrow again. If the weeds make their appearance, disk the land and then harrow. A case was mentioned where one man harrowed his land fourteen times between the date of plowing and the date of seeding, and yet the stand he obtained justified the labor spent on it. Unless men will put sufficient labor on the surface so as to make the soil fine and yet firm below, there is little need of sowing the seed because

PROF. G. C. WHEELER.

the crop will in all probability winter-kill. The advantage of sowing in the fall as compared with the spring is due to the fact that annual weeds make little or no opposition in the fall. If they germinate they are afterwards winter-killed, so that in the spring fall-sown alfalfa has clear sailing. On the other hand, if it is sown in the spring frequent low cuttings are necessary in order to keep the weeds in check, and this in many cases weakens and in some instances kills out the alfalfa itself.

Of course there is an ideal way to prepare the seed bed for alfalfa, and that is to give up the use of the land for one year in preparing the seed bed. Mr. Taylor, who is now growing 125 acres of alfalfa on his farm, freely expressed the belief that the crop is so valuable and the importance of getting a good stand so necessary that it pays to prepare the seed bed in the following way: Plow the soil in the spring and keep the weeds in check from that time until you are ready to sow the crop in August. It may require many diskings and frequent harrowings, but this labor conserves moisture, kills generation after generation of weeds, liberates fertility, firms the lower soil, fines the surface soil, and in every way makes a perfect bed for the reception of the seed. The plan of plowing stubble land after taking off a cereal crop very frequently succeeds, and under ordinary circumstances it may be expedient to undertake the preparation of the land in that way, but the ideal plan, in the opinion of Mr. Taylor, is to take the whole season until August to prepare for the crop.

PROF. A. M. TEN EYCK.

train halted for a period of three-quarters of an hour at seventy-two towns, located in the following counties: Jefferson, Atchison, Leavenworth, Wyandotte, Johnson, Franklin, Coffey, Anderson, Woodson, Allen, Neosho, Crawford, Montgomery, Elk, Wilson, Greenwood, Lyon, Osage, Douglas and Shawnee.

Prof. J. H. Miller, superintendent of the farmers' institutes of the state, had charge of the instruction work, he being assisted by Prof. A. M. Ten Eyck and Prof. G. C. Wheeler, of the agricultural college, and Mr. Edwin Taylor, of Edwardsville, Kan., an experienced alfalfa grower and at present a regent of the agricultural college.

The instruction given by these men related to the feeding value of alfalfa as a pasture as well as a hay crop, and to its ability to restore fertility to the land in the form of nitrogen. The claim was made that no pasture excelled alfalfa for hogs, while in the form of hay it was par excellence the king of roughage. As Mr. Taylor expressed it, "Alfalfa is the most palatable and nutritious food known to the appetite of domestic animals. As a fat and flesh-maker it has no equal, and the surprise is that a larger acreage of this crop is not grown in eastern Kansas."

But the burden of the talk of these experts related to the preparation of the seed bed and to the manner of sowing.

this train, that there are several grades of alfalfa seed on the market, but only one grade should be used, namely, the best, which is always the highest in price. Some time ago a farmer sent some cheap seed to the agricultural college at Manhattan, and an examination revealed the fact that on the basis of pure alfalfa his \$8-a-bushel seed had actually cost him more than \$40 per bushel. For germination tests and for the purpose of identifying weed seeds the Kansas Agricultural College officials stand ready to co-operate with seedsmen and with farmers so as to insure the sale of the best quality of alfalfa seed only.

We have briefly given the substance of the teaching that was done on this special train. To the reader there is not the enthusiasm experienced by the seventy-two audiences who faced the speakers, but, after all, the enthusiasm will disappear and each man must decide for himself whether or not he will undertake the growing of alfalfa. When you consider that under ordinary circumstances it will produce four or five cuttings of the richest hay on earth a year, you are not apt to go far wrong if you will comply with the principles enunciated above in preparing your soil and sowing your seed, providing your land is reasonably well drained, either naturally or artificially. Any kind of good corn land will grow alfalfa, while alfalfa lands always produce the best crops of corn.

#### A CLASS FOR SHORT-HORN CATTLE AT THE INTERNATIONAL OF 1907.

The International Live Stock Exposition, being desirous of determining and demonstrating the best and most economical method of feeding cattle, has created the following classes, to be known as "Short-fed Specials."

Cattle to be eligible for entry must not have been fed grain previous to the time application is made, but after that time the owner may feed the cattle such feeds, including grain, as in his judgment will accomplish the greatest results within the given feeding period, i. e., from the date application is made for entry to the opening day of the exposition.

The following rule governs this contest:

(a) Application for entry must be made between the 1st and 15th of August. (b) Cattle must be owned by exhibitor at the time application is made. (c) Cattle must not have been fed grain previous to the time application is made; they may, however, have been run in stalk fields previous to this time. (d) Eighteen cattle may be fitted, but only fifteen of this number can be shown as one carload. (e) Cattle must be weighed, 12 hours in dry lot off feed and water, on day application is made and a record must be kept of the weight of these animals. The cattle to be judged will again be weighed, under similar conditions, at 10 A. M., Monday, Dec 2d. (f) Sworn statement by the owner and two other reputable persons that cattle had not been fed grain previous to time application for entry is made, also covering the weight of animals on date of application, must be sent to the General Superintendent of the Exposition with said application. (g) A record of the kind, weight and cost of feeds consumed during the feeding period must be kept by the owner, who will deliver this information, together with the weight of the animals at time of entry, to the Superintendent of the Carload cattle division, on the opening day of the Exposition. (Blanks for all of these purposes will be furnished on request to the General Superintendent). (h) In judging these classes, quality and finish will count sixty per cent; gain forty per cent.

The following prizes will be offered for these classes:

	1st.	2nd.	3rd.
	Pr.	Pr.	Pr.
Carload of 15 head, one year and under two	\$100	\$50	\$25
Carload of 15 head, two years and under three	100	50	25
Champion carload of these classes	Cup		

#### Inexpensive Crib.

To the Editor of The Homestead:

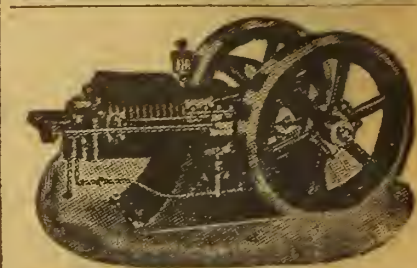

I noticed what your correspondent had to say about cement floors for corn cribs two weeks ago and what suggestions was made in reply in last issue, but it seems to me that the ground is not fully covered yet and as I have had considerable of experience in building cribs in a way that saves almost one-half of the cost of a frame crib, perhaps what I may suggest will prove of interest to those who are seeking ways to cut down the lumber bill. We are building all our cribs now by setting cedar posts in the ground about one foot deep and eight feet apart, then line them up, brace them and the plate can be put on as a part of the bracing, after which we fill the holes around the posts with concrete, which we make about one part cement to five

**WHAT DO YOU SAY?**  
Several hundred thousand farmers say that the best investment they ever made was when they bought an

**Electric Handy Wagon**

Low wheels, wide tires; easy work, light draft. We'll sell you a set of the best steel wheels made for your old wagon. Spoke united with hub, guaranteed not to break nor work loose. Send for our catalogue and save money.

ELECTRIC WHEEL CO., Box 43, Quincy, Ill.

#### GADE AIR-COOLED GASOLINE ENGINES

Sizes 2, 3 and 6 H. P.

We keep our cylinder cooler than it can be kept by water or oil. We have no frozen up water jackets or burst cylinders in cold weather like the old styled water cooled engines. Write for catalog and price list.

GADE BROS. MFG. CO., North Iowa Falls, Ia.

#### A Chance to Make Money

I have berries, grapes, peaches and apples two years old, fresh as when picked. Do not heat or seal the fruit, just put it up cold; keeps perfectly fresh and costs almost nothing. Last year I sold directions to over 120 families in one week. As there are many people poor, like myself, I feel it my duty to give you my experience, feeling confident anyone can make \$100 around home in a few days. I will mail bottle of fruit and full directions to any of your readers for 21-cent stamps, to cover cost of bottle, fruit, mailing, etc. Address Francis I. Turner, 170-172 Eighth Avenue, New York. Let people see and taste the fruit and you should sell hundreds of directions at \$1 each.

#### PILES CURED OR NO PAY

WE trust to your HONESTY and GRATITUDE to pay us after you have used our great discovery that has cured thousands. DON'T SUFFER, but enclose three two cent stamps, postage, for our \$1 treatment. Phelps Chemical Co., Lynville, Ia.

#### ANCHOR FIRE INSURANCE CO.

BEST terms for farmers ever offered. Capital \$100,000.00. Address, J. S. Clark, president, Des Moines, Iowa.

CELL TOBACCO AND CIGARS locally or traveling. Salary or commission. Full time or side line. Steady work; good pay; promotion. Address, Morotock Tobacco Works, Box 8-98, Danville, Va.

parts gravel. We usually use fence boards nailed to the outside of these cedar posts making the boards level on top and down to the ground where the ground is highest, then partly fill the space inside of these fence boards with any kind of earth, clay being preferable, which should be tamped well, then finish filling the boards with concrete, one part cement to five or six parts gravel, finishing with a one-inch coat of sand and cement, which should be one part cement to three parts of clean sand, troweled down smoothly and made somewhat higher in the center and sloping to each side. I might add here, that if a trench is left just inside of these fence boards to be filled with the concrete, instead of earth, that when the floor is dry, the boards can be removed, leaving the ripe concrete to protect the earth filling. Going back to the frame work, we run three stringers around the posts and put the siding on up and down instead of around, as cribs are usually built, however, fencing of four-inch stuff can be put on the old way if preferred, by setting a 2x4 or 2x6 between each of the cedar posts to nail to. The roof can be made either of roofing and bats or shingled as the frame crib.

Care should be taken to mix the ingredients well for the concrete, then to use it quickly and plenty of bracing should be used inside the building.

Calhoun county, Iowa. M. W. Fitz.

#### HENRY FIELD SEED COMPANY INCORPORATES.

Incorporation papers have just been filed for the Henry Field Seed Company which will begin business July 1st under the new name. There will be no change in management, however, as Mr. Field will continue to hold a large share of the stock and manage the company. The list of officers and directors include substantial and reliable business men, and Mr. Field will act as president, and H. E. Eaton, secretary and treasurer. Extensive building plans are a part of the program under the new regime, and it will be safe to say that whatever the company does in this line will be a fine monument to the seed business of the state. Our readers will continue to hear more of this company from time to time. We wish Mr. Field and his associates the best measure of success.

## Farm Furrows

Turned by a Practical Farmer.

Oats is recognized as the best feed for the brood mare. Why not for the brood sow?

The little boys are on their semi-annual good behavior just before the Fourth.

In view of the possible wheat crop shortage, cooks may be able to do with less shortening soon.

Not the quality of weather without, but that within is what determines the extent of our happiness.

A well-filled woodshed and a convenient water supply go a long way toward promoting domestic tranquility.

In some poultry houses it is a fight between the man and the louse to see which gets the most good out of the business.

Rats and mice do more damage than is ordinarily estimated. I have seen cribs of corn where the loss was easily 20 per cent.

Advertising has in the last few years taken on such an instructive mein that one may learn much by watching the columns devoted to this purpose.

Large fur establishments keep fur goods in cold storage to prevent injury from moths. However, they may be sprinkled with tobacco dust or leaves, and stored with impunity.

Did you ever know a farmer who quarrels with all his hired men about settling up time? I know one who has one every six months, or every year at least, and there has not been a single instance in several years where a satisfactory settlement was effected at the end. They always part as enemies and not as friends, and yet this farmer would be

## CONGO ROOFING

The time to be satisfied with your roofing is five years after you bought it. That's the test that Congo asks for. Durability is the only thing about a roofing that is really indispensable and Congo is full of it in the shape of high-grade weather-proof materials put together in the right way. Send for a free sample and see for yourself. Cut open the sample—test it. If you can recognize what is good in a roofing, you will decide on Congo.

Clean, fast work. It stands the wear and tear.

Favorite in every great potato growing district. Get free catalog. **The Hoover-Poot Co.,** Lock Box 41, Avery, O.

# You Can Afford A Spreader Now

You've been waiting and watching,  
We've been hurrying and building,  
All ready for business—

## The KNOX Simplicity Manure Spreader

**ON TEN DAYS' APPROVAL**

"The price is right. What do I get for my money?" A proper question.

Answer: You have the wagon trucks. Use them. We furnish everything else. Save the difference in price, nearly \$70.00.

Your wagon trucks are perfectly adapted to manure spreading, just as good and just about the same as you get in high priced spreaders.

The Knox Simplicity Spreader fits any wagon truck. It is a wagon box spreader with the operating machinery worked out in the best and most practical form ever put on any spreader.

With it placed on your wagon trucks you will have as reliable and smooth running a spreader

as any of the high priced machines.

It will do the same character of work, do as much work and do it as well as any—and you will have the most durable spreader ever built.

Why should you or anybody else pay more than double the Simplicity's price for a spreader, just to get the extra trucks, useless for any other purpose than manure spreading?

There is absolutely no reason if we make good our claims for the Knox Simplicity Spreader. We invite you, therefore, to make the fullest investigation.

**Western Harness & Supply Co., 613 Commercial St., WATERLOO, IOWA.**

horrified if anyone would say that he himself was largely to blame.

We largely live up to the measure of honor and respect which our friends bestow on us. Hence the importance of the right kind of friends.

The most recent idea in branding stock is to burn the telephone number in the skin. The owners of stray cows may then be easily located.

Did you ever notice how the mosquito annoyance disappeared with the draining of low and stagnant ponds? The scientists must be right about the hatching of this pest.

There is one food article that is pretty generally made true to name and that is strawberry shortcake. The pure food inspectors should find this article always up to the standard in "shortness."

Laws have recently been enforced in a few states whereby automobilists must stop at a wave of the hand. Formerly it was necessary to take a shot across the front of the car to secure attention.

A good disposition, steady from day to day, is a source of strength not often appreciated. It is insurance against the losses of energy and nerve force caused by worry, irritability and the rest in that line.

Every man with an ambition to improve his knowledge of stock should attend every good sale possible, if only to look on. A man must keep his eye full

of good animal type by constant association, to be able to develop a good judgment.

The latest gag that city people work on their visitors as an apology for lack of furniture is to say that most of the household goods are in storage.

This is the time of the year when it takes the tuck out of the boys to work much before breakfast. Don't expect to do a half day's work on an empty stomach. You wouldn't think of treating the horse that way.

If the corn cultivator undergoes as much improvement in the next few years as it has in the past, it will almost be a white shirt job to plow corn. The dustless feature should be next given attention by makers.

According to authority tuberculosis is not always confined to the lungs, as some think. Tubercles, the indication of the presence of tubercular germs, may appear on the inner linings of the alimentary canal, as well as in other parts.

It is little else than foolish to pump water, shell corn and do other things of this sort by hand when a mechanical means is possible. If a man considers his time worth much, it won't take long to save enough time as well as energy to pay for a windmill or have the corn shelled.

If anybody can afford to eat meat the farmer can. Some, however, reason the opposite way. At any rate the people

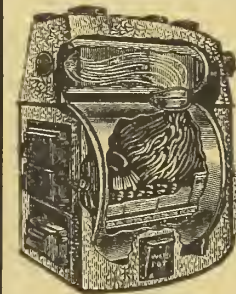

The Knox Simplicity Spreader is of superb strength. Chain driver from both rear wheels, no eccentrics, little gearing, endless apron style, four feeds, light running, easily handled.

**WE WANT YOU TO SEE IT.**

It talks for itself. Let us send you one on trial. When it comes you can operate it ten days free. Try it out at all kinds of work, with all kinds of manure every way you can think of. If you don't find it to be at least the equal of any other spreader you ever saw, or are not pleased with it, ship it right back. We will pay the freight both ways. Write and let us get started to-day. Catalog Free. Address,

## Install Boyee's Hot Air Furnace NOW!

who must buy meat will almost be in a position to adopt the policy of Jack Spratt and his wife, of nursery lore.

Many a young man has found that to be called "a good feller" is an expensive luxury.

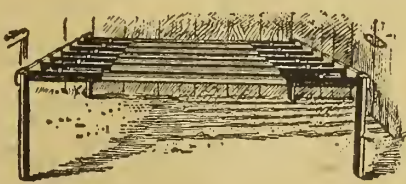

No doubt before many years we will throw out our present telephones and install wireless ones. People will then be literally talking at the atmosphere.

A light weight milk can may be all right for the whole-milk patron who lives near the factory, or one who uses a spring wagon for delivery; but for a long haul in a lumber wagon the eighteen or twenty-pound can is needed to stand the strain.

Procrastination spoils the hopes of many a nice crop of tomatoes, cabbage or celery. First we wait for the seeds, then for them to grow, and then for a good rain prospect. The next thing the plants are left unwatered and the old hen does the rest.

Alfalfa has scored another point. A Missouri woman instituted divorce proceeding against her husband, basing her claim on the fact that three years previous to that time he seeded a twenty-acre field to alfalfa and has been "hay-ing" ever since.

## NEW IDEA POULTRY ROOSTS AND MITE TRAPS.

put out under a positive guarantee to catch all the lice and mites from fowls that roost on them. They are a very simple device, but are the result of the discovered this method by spending many sleepless nights in the hen houses studying the habits and nature of the mite and louse. After the vermin have feasted on the fowls during the night on the roosts just about daylight in the morning he has discovered that they climb down from the roost, crawling down the legs and off on to the roost, hunting for some place of a secreted nature in which to hide during the day, resting up for another night's feast. These traps are arranged with a groove underneath them covered by a slat at either end, making the aperture dark and inviting to the vermin. There is a cork in the top of the roost inserted in a hole bored in the top of the roost which reaches down to this receptacle. All that is necessary to exterminate the mites and lice is to extract this cork, pour in a little boiling water and cook the vermin contained therein, which are in many instances millions. We have seen these roosts black underneath with vermin, the result of one night's catch. After a few trials and cleansing of the roost there are no more mites and lice left, they acting as a trap. There is not a cent of expense except the cost of the loose bars. The roost bars are easily fitted in any hen house. There is an iron clamp at either end that fits over a fence board nailed up on edge. They are sold on thirty days' trial and money refunded if they do not do all that is claimed for them. The firm that manufactures them is called the Cedar Rapids Poultry & Supply Co., 113 A. Ave., Cedar Rapids, Iowa. This paper has made inquiry galore relative to the efficacy of these roosts, as well as to the standing and reliability of the manufacturer, and can assure our readers that they will do just what they agree to. They are sold at a very low price and no poultry raiser would think of being without them after giving them a ten days' trial. Almost invariably where a dozen roosts are ordered it is but a short time until the same party orders from one to two dozen more. The advertisement can be found on page 8.

### TESTING CATTLE FOR TUBERCU- LOSIS.

The following inquiry has been re-  
ceived from one of our subscribers, Mr.  
A. C. Muns, of Blackhawk county, Iowa:

Since the recent action of the big packers,  
and later by many local packers and butch-  
ers, in refusing to buy cows and heifers only  
on the results of post mortem inspection,  
thus throwing all the losses upon the farm-  
ers, it looks as if the proposition now is  
up to us. I do not object to the movement  
but, on the other hand, I think it is just  
and will be a great stimulus toward stamp-  
ing out tuberculosis and other contagious  
diseases which endanger our families as well  
as our herds. If we get fair and honest  
treatment at the hands of the inspectors it  
will in the end be greatly to our benefit.  
But what many of us farmers need—and I  
judge others by myself—is more light on the  
subject. If a cow has tuberculosis and will  
be rejected by the inspector I ought to know  
it before I waste a lot of valuable feed in  
fitting her for market. So if you will in-  
form us, through the columns of this paper,  
about the tuberculin test I think you will  
confer great benefit upon all. I will ask a  
few questions to enable you to see our needs.

Can a farmer make the test without em-  
ploying a veterinarian? If so, where can  
tuberculin be obtained? What instruments  
are necessary? If the test shows the pres-  
ence of tuberculosis, what steps should be  
taken? Does the state of Iowa repay any  
part of the loss of animals destroyed by the  
state veterinarian in case of tuberculosis?

While the action of the packers is  
arbitrary in the extreme there can be  
no doubt that you are perfectly correct  
in your belief that eventually the en-  
forcement of their refusal to buy cow

## Farm Bargain

320 ACRES in southern Michigan, thirty miles from Ohio line, forty miles from Toledo,  
fifty miles Detroit, one and a half miles to two good towns. Corn and clover soil.  
Extra good buildings, fine water, excellent home features. It is a big bargain. Write for  
particulars and ask for our great bargain list of Michigan clover farms.

**S. V. R. Hayes, 53 Ionia St., Grand Rapids, Mich.**

stock without a post mortem examina-  
tion will benefit the farmer. It certainly  
will prove beneficial if it leads each  
owner of cattle to employ the tuberculin  
test at home for the detection of tuber-  
culosis.

Any man of ordinary intelligence can  
test cattle with tuberculin without em-  
ploying a veterinarian. The test indeed  
is very simply made and as no man is  
sufficiently expert to detect tubercu-  
losis in its starting stages the veteri-  
narian has no advantage over the lay-  
man in that respect. The expert, how-  
ever, has had experience in making a  
test and in making correct deductions  
from the temperature readings; he also  
is best able to say when or when not  
to test cows and how to examine for  
lesions of the disease in apparently af-  
fected animals and in the animal car-  
casses after death. For these reasons  
and the comparative cheapness of the  
test it is well for the nonexperienced  
farmer to employ the qualified veteri-  
narian when possible or if he is sure  
the disease is present in his herd he  
may call upon the state veterinarian  
to apply the test free of charge. Laws  
relative to making the test officially  
and remunerating the owner for cattle  
killed differ in different states and we  
must therefore ask our correspondent to  
submit questions pertaining to the legal  
aspect of this subject to the state veteri-  
narian.

Tuberculin may be bought from the  
manufacturer by ordering through a  
druggist, but as it has been found that  
some commercial tuberculin is not re-  
liable care must be taken to obtain tu-  
berculin that is fully guaranteed and  
known to be reliable in every way. The  
tuberculin made by the Bureau of An-  
imal Industry of the Government De-  
partment of Agriculture is perfectly re-  
liable and is used by state veterinarians  
and agents of state sanitary boards and  
veterinaries of state agricultural ex-  
periment stations and in some states  
this tuberculin is sent out to farmers  
for their personal use in testing their  
herds. The testing work also is being  
done sufficiently well by agricultural  
students who have been trained in the  
work at the state agricultural colleges.  
This is especially the case in Wisconsin  
where at present a general crusade is  
being waged against bovine tuberculosis  
under the auspices of the state agricul-  
tural college.

For the purposes of the test the farmer  
will require a hypodermic syringe  
holding two to four drams; a few  
short, strong, sharp, hollow needles;  
one or more strong, metal cased clini-  
cal thermometers, with which to take  
temperatures before and after injecting  
the tuberculin; a small graduate glass  
into which to pour the tuberculin at  
time of filling the hypodermic syringe;  
the necessary tuberculin and a chart  
upon which to set down the thermome-  
ter readings.

The test is made as follows: The  
cattle are to be placed in stanchions  
and accustomed to being in-doors for a

## WANTED 100,000 FARMERS

to buy a postal card. Address it to me and write on it: "Send me your Manure  
Spreader Proposition." Get the proposition before you buy a spreader of any  
make or kind or at any price. I then leave it  
entirely to you to be the judge if it's not a little  
bit the most interesting ma-  
nure spreader proposition  
you ever heard of. It's away  
out of the ordinary. I not  
only make you a price of  
on the best manure spreader built, which can be put on  
any wagon gear, but I give you a chance to get it for  
nothing, if you accept my proposition. Buy a postal and  
send it to me before you lay this paper down.  
Write me personally. **WILLIAM GALLOWAY, Pres.**  
**THE WILLIAM GALLOWAY COMPANY, 109 Jefferson St., Waterloo, Iowa.**

**\$59.50**

few days prior to making the test. Hot  
weather is to be avoided, cool weather  
being preferable for test making; cows  
that are near calving, just calved, in  
heat, sick or febrile should not be  
tested until in normal condition. By  
inserting the thermometer in the cow's  
rectum and leaving it there for four or  
five minutes the temperature is to be  
taken in the morning, at noon and at  
night of one day and the three read-  
ings are to be set down upon the chart  
provided for the purpose. These three  
readings give the average normal tem-  
perature of the cow prior to injecting  
the tuberculin. It will be found that a  
cow's normal temperature ranges be-  
tween 100 degrees and 103 degrees,  
Fahrenheit. At nine or ten o'clock at  
night of the day the preliminary tem-  
peratures are taken the tuberculin is to  
be used. The average dose is one cubic  
centimeter (fifteen drops) for each 500  
pounds live weight of cow so that one  
commonly uses from two to two and  
one-half cubic centimeters of the tuber-  
culin according to the strength of the  
preparation which is indicated on the  
vial in which it comes from the maker.  
The dose is measured in the graduate  
or from the graduate sucked up into the  
barrel of syringe and measured by the  
marks engraved upon the side of the  
piston rod of syringe. This done one of  
the hollow needles is thrust through a  
fold of the thin skin of the cow's neck  
or just back of her shoulder and when  
it has been seen that the point of the  
needle is worked free from the tissues  
underlying the skin the barrel is fitted  
onto the needle and the contents of the  
syringe slowly injected through the  
needle and so under the skin where it  
is left. The needle then is withdrawn  
and the next cow is then injected in  
the same way and so on until all have  
been injected.

If a cow is affected with tuberculosis  
the injection of tuberculin will cause  
her to have a fever which is best de-  
termined in eight to ten hours follow-  
ing the injection of tuberculin. To this  
end the temperature of each tested cow  
is to be taken every two hours com-  
mencing at five or six o'clock the next  
morning after the tuberculin has been  
injected and continuing until it is  
proved whether or not there is to be a  
rise in temperature sufficient to denote  
the presence of tuberculosis. Each tem-  
perature reading is to be set down upon  
the chart already mentioned and care  
should be taken to shake down the  
mercury in the thermometer after each  
reading. If it is found that the tem-  
perature rises one and one-half degrees  
above the normal temperature of the  
previous day the cow is to be consid-  
ered "suspicious" and should be re-  
tested in three months. If her tempera-  
ture should rise to two degrees or  
more over the normal temperature of  
the previous day and the rise in tem-  
perature should be sustained for some  
hours or gradually increase for several  
hours and then as gradually fall toward  
normal temperature the cow is to be  
considered tuberculous and dealt with  
accordingly. Where the owner makes  
the test himself he may, if he so de-  
sires, retain slightly affected cattle and  
use them for breeding purposes, pro-

vided he does not use the milk of the  
affected animal either for human use or  
feeding calves or pigs. The calf will  
escape the disease if raised on a non-  
affected cow or fed milk known to be  
free from tuberculosis bacilli, but at the  
same time must be kept entirely apart  
from animals affected with the disease.  
Tuberculosis is not hereditary. It is  
contagious and acquired by association  
with affected cattle or from consump-  
tion of milk from a tuberculous cow or  
from food contaminated with the manure  
of an affected animal or from factory  
milk containing tuberculosis bacilli.

Once the disease is stamped out in  
a herd it need not enter again, provided  
care is taken to test each new pur-  
chased animal and to avoid feeding raw  
skim milk from a factory. Tuberculosis  
of swine, becoming common on many  
farms, is acquired by feeding hogs on  
skim milk tainted with the bacilli re-  
ferred to or from allowing hogs to fol-  
low tuberculous cattle whose manure  
contains the bacilli.

### The N. P. Halgren Short-horn Sale.

June 19th was the day on which Mr. N. P.  
Halgren, at Vinton, Iowa, practically dis-  
persed his herd of Short-horn cattle. It was  
an ideal day for a public sale and there was  
a good gathering of breeders from a distance,  
as well as a fine local crowd. Col. Carey M.  
Jones, of Chicago, assisted by J. W. Hite  
and David Wilson, dispersed the cattle. Col-  
onel Jones did all the selling, assisted in the  
ring by the other two gentlemen. It has  
been the pleasure of one of The Homestead  
representatives to hear Colonel Jones at a  
great many sales during the past ten or  
twelve years, but it was left for the Halgren  
occasion to give him an opportunity to outdo  
himself. On this occasion Colonel Jones made  
the opening speech of his life. He is cer-  
tainly improving in this respect more than  
our most sanguine expectations could hope  
for. The cattle were a good, useful lot, but  
no guarantee whatever was made on any of  
the offering as to future usefulness. This  
fact militated more or less against the suc-  
cess of the sale. However, fair prices were  
secured notwithstanding this. A great many  
of the cattle were of plain breeding, tracing  
to Red Rose of Ernesty, and some to the  
Teesswater cow, but were interspersed with  
a very few Rose of Sharons and one or two  
Scotch cows. All things considered, the sale,  
was a success and satisfactory to all par-  
ties. A large per cent of the offering sold  
at prices under \$75. We append a list of  
names of the buyers with postoffice addresses  
on all purchases bringing \$100 and over:

FEMALES.	
Imp. Louise 2d, four years, sire Golden Fancy, John Padden, Fredericksburg, Iowa .....	\$175
Royal Lassie, three years, sire Royal Rosewood, same .....	160

## DAY BY DAY

Agricola

Agricola has dropped the pole lima bean from the garden. It is a splendid bean to eat when it grows well, but it is work to pole it and needs the best of care, and even then you are not at all sure of a good crop. Of all garden vegetables, the pole bean is the hardest to make a success. It absolutely will not do well unless conditions are just to suit. If the weather is unfavorable it will make a poor start and a worse finish regardless of good weather later.

Taste in eatables is hard to explain. Agricola noticed when in the South that they wanted butter and cheese a very deep yellow color, what looked to northern eyes almost red. One section demands white cornmeal and another yellow, and neither will accept the other color. Another peculiarity is that Boston demands heavy hogs and Buffalo light hogs. The Chicago packers are now shipping to country dealers slabs of side meat almost large enough for mattresses.

Pumpkin seeds are cheap, and they can be saved on any farm with almost no trouble. The cost of the seeds is the main expense of a good supply of pumpkins, when planted in the cornfield, and they are very valuable to feed. Why, then, do farmers not plant them? Because the modern cultivator when adjusted for corn is hard on the vines.

It is better to plant fodder corn as late as July 4th than not to plant it at all, and there is a good show for better fodder than when planted six or eight weeks earlier.

To rush corn growth and enable it to mature, use shallow cultivation in a year like this. It has no time to spare stopping to repair root damages through deep cultivation.

Long range prophecies are of two classes—reliable and unreliable. When causes are plain the effect can be forecasted with reasonable accuracy, otherwise it is mere guesswork.

Here is a prophecy for the spring of 1908: Rhubarb, or "pie plant," will average a light crop from the Atlantic coast to the slope of the Rockies. Why?

Because people hanker for acids in the spring and pie-plant is the pioneer plant to furnish it in the garden, and this year strawberries—the second in order—were very late, so the temptation was to keep pulling rhubarb stalks.

The amount which can be taken away without limiting the root growth is limited, and time, as well as cultivation and fertilizing is necessary for the plant to recover. When forced in a hot-house the plants must remain idle the next year. When the stalks are unduly removed one year the next year's supply of stalks will be less.

Cement roofing is yet in the experimental stage with more failures than

successes recorded, but the successes show that, if done right, satisfaction is assured. Half-inch wire is preferred to reinforce and bind it together, and a rich cement—half and half—with the finishing coat a thin cement wash.

The girl gardener of this homestead has planted onions for next spring's use. They are the Welsh variety. They stand at the head of the whole onion class for eating raw, being mild, tender and just what every member of the family likes. The ordinary tough and strong onions are tolerated only because people want something green and can get nothing better. Plant Welsh onions in spring or early summer, keep the weeds out, and let them stay in the ground all winter, then in the spring eat them as Nebuchadnezzar did grass.

I found some thirty or forty young cocklebur plants in my cornfield. This is the worst weed by far that I have found. There may be worse; velvet weed probably is harder to exterminate, but the cocklebur is the limit on this farm. I did not do a thing to these weeds but pull them out root and top, and carry them out of the field.

When cut-worms take half of a field of corn it is generally wise to disk the field and re-plant entirely, but the temptation to save what is there and plant in is so strong that one does not always have the courage of his convictions. I think I made a mistake in this line this spring, but it is too early yet to know certainly.

A breeder of blooded hogs tells me that from five sows he has saved only four pigs this spring. They were farrowed in April. Last year his March pigs suffered so much from cold, wet weather that he learned a lesson, as he thought. But this year March was better than April, and now he banks his faith on June, the hog being a semi-tropical animal. But what about the demand for breeding stock if farrowed as late as June?

My mature sows save about eight pigs to the litter, and what is another good thing, they are all strong, robust fellows, even in shape and size. It is expensive keeping three-year-old sows over for breeders, but it is also expensive to depend upon young sows. Tried and proved is the only safe recommendation.

## The Week in Kansas.

To the Editor of The Homestead:

This has been another of the ideal weeks of weather. Rain, sunshine and warmth have all been given in just the right amounts, consequently nothing is slow in responding. Corn is making a wonderful growth. It is time, too, that it should, for the usual day of reckoning in comparing one corn crop with another, the Fourth of July, is but two weeks away.

Five years ago this week, at least half of all the corn in this locality had received its last cultivation and the remainder was pushing the work along. Now very few are over their fields the second time, with no corn that can possibly be large enough to warrant the last cultivation by as soon as the Fourth. Five years ago we raised the largest crop we had in years; what the outcome of this, the opposite extreme of growth, will be remains to be seen.

Grass in the pastures and meadows has been making steady gains, though the prairie hay crop cannot help but be short. Pastures, however, are now gaining on the stock, and all stock is doing well, as the flies have been almost a minus quantity so far this season.

Many years the wheat and oat harvest is well under way during this week of the month, but it will be some days before the oats will be ready for the

## HAY FORK RETURNER

OUR RETURNER is a simple but effective device, invented for the purpose of returning the fork and carrier to a position directly above the load, immediately after the fork is tripped, saving both time and labor. Price \$3.00 complete, except rope, weight and wire. Particulars free. Address, The Laybourn Co., 61420 Center St., Sioux City, Ia.

thus far this year 12,360,000, against 11,892,000 corresponding time a year ago and 12,167,000 same period two years ago.

## Rogers' Combination Hereford Sale.

The combination Hereford sale held at South Omaha on June 14th brought out only a fair-sized crowd, which was due to the very busy time among farmers and breeders. Mr. W. N. Rogers, of McCook, Neb., managed the sale and consigned the greater part of the cattle sold. The top price was \$500, paid by Mr. J. G. Von Seggern, of Wisner, Neb., for the grand heifer, Monarch's Maid 1st, a daughter of the great Monarch of Shadeland, and a show animal in every respect. The average on twelve females was \$136 and twelve males averaged \$92. Below is the list of sales of \$80 and over:

Monarch of Shadeland 10th by Monarch of Shadeland 3d, John H. Starns, Yutan, Neb.	\$115
Lady Con 9th by Depositor, A. C. Powell, Exira, Iowa	100
Barto 3d by Lear, W. C. Fleury, South Omaha, Neb.	82
Millie by Duke of York, H. F. Hann, Harlan, Iowa	95
Monarch of Shadeland 16th by Monarch of Shadeland 3d, F. Jahnke, Modale, Iowa	130
Monarch of Shadeland 18th by Monarch of Shadeland 3d, Sam Wadington, Alselmo	125
Monarch Maid 15th by Monarch of Shadeland, Alfred Renney, Dawson	109
Beau of Shadeland 24th by Beau Donald 28th, L. L. Young, Oakland	170
Monarch's Maid 1st by Monarch of Shadeland, J. G. Von Seggern, Wisner	500
Washington's Beau by Beau Donald 28th J. E. Deeds Stromsburg	160
Dolly Rogers 2d by Jury, same	105
Shadeland's Maid 36th by Beau Donald 28th, Albert Alexander, South Dakota	200
Duchess of Lakeview by Halbred, F. Zanher	115
Stuart of Shadeland 14th by William, J. E. Roberts, South Omaha	90
Perfection 4th by Keep Ahead, F. Ronne, Weeping Water	85
Shadeland Hesiod by Hesiod 37th, Alfred Ransey	87
Rambler by Godwin, James Lawson, Yorkshire, Iowa	80

## SAFETY BREEDING CRATE.

In later issues of The Homestead will be found the advertisement of the Safety Breeding Crate Company, of Sioux City, Iowa, manufacturers of the Improved Safety Breeding Crate, a crate that is simple, strong, quick and easy to operate, adjustable to any size sow or boar, made from good material and fills all requirements completely. The fact that this crate is used and endorsed by such men as Messrs. E. B. Parker & Son, Winfred, S. D.; O. S. West, Paulina, Iowa; C. F. Hutchison, Bellair, Kan.; J. C. Hanna, Middleton, Iowa; M. S. Moats & Son, Randolph, Neb.; G. M. Hebbard, Peck, Kan.; A. B. Winger, Kingsley, Iowa, and hundreds of other breeders as well known as the above gentlemen. We would suggest that readers of The Homestead who are in need of a crate write the above concern in regard to their crate, mentioning the Homestead, and addressing them at 61420 Center St.

A 2,040-acre rich prairie land farm, sixty miles south of Kansas City, in Missouri, is for sale as advertised on page 13. The farm is represented as being well fenced and with six tenant sets of buildings. This is a fine blue grass and grain farm and should bear close investigation at once. Prices quoted in the advertisement. Address for further particulars, Dyas Realty Co., 107 N. 9th St., St. Louis, Mo. Mention this paper when you write.

The Kretschmer Manufacturing Company, of Council Bluffs, Iowa, is one of the best bee material supply firms in the West. Anything in the bee line can be bought here. Write them for free catalog and mention The Homestead.

**ROUND TRIP PACIFIC COAST EXCURSION.** Daily to September 15th, the Minneapolis & St. Louis R. R. will sell round trip excursion tickets to Portland, Tacoma, Seattle and Vancouver for \$64.80. On account of the Christian Endeavor Convention at Seattle the rate will be \$54.00 to Puget Sound points. Tickets on sale June 20 to July 12; return limit September 15. Slightly higher rate to return through California. For further information write W. K. Adams, P. O. A. 512 Walnut St., Des Moines, Iowa.

## No More Sore Necks or Shoulders

This is guaranteed if you use the "Whipple" Humane Horse Collar, made for general farming and heavy draft purposes. Thousands in use. The Nebraska State Agricultural farm is now using eight Humane Collars.

The farmer who is torturing his horse with the old style collar, producing sores and galls, hereafter must do so from choice. Are you to plead guilty to the charge? The "Whipple" Humane Collar will allow the sores to heal while the animal works. Sold subject to fifteen days' trial when used on sore horses. Write for particulars and testimonials.

**HUMANE HORSE COLLAR COMPANY,**  
OMAHA, NEBRASKA

## VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

## SYMPTOMS AND TREATMENT.

## GREEN TAR.

In a late issue of the paper you gave a recipe for wind puff on hock. Please state what green tar is and how it differs from any other boiled pine tar.

"Green tar" is a term used in Great Britain and as we understand it applies to pine tar that has not undergone any purifying treatment.

## GARGET.

I have a five-year-old cow. Last summer when she was fresh she gave blood out of her right front teat and matter later on as long as I milked her. She is fresh again now and still gives matter out of that teat. The milk out of the other three teats seems to be normal. Is her milk good to use? What would you advise me to do for her? Her udder is very much enlarged above the teat and has also festered during the time that she was dry.

Have her tested with tuberculin, as the trouble (mammitis) may be due to tuberculosis and in that case you would not want to use the milk or feed it to animals. If she proves free from the disease try to dry up the discharge from affected quarter, but it never will regain its lost function and we would not advise again breeding the cow. Inject 5 per cent solution of permanganate of potash into the discharging sores and peroxid of hydrogen into the teat and

rub the affected quarter twice daily with camphorated oil.

## BONE SPAVIN.

Two years ago I bought a horse that had a little bunch on his leg which seems to be a bone spavin. When I would drive him hard he would limp, but at ordinary farm work he would not go lame. The bunch did not seem to grow any until last fall, and since that time it has been growing and he is lame all the time. He is fourteen years old. What can I do to cure this and can I work the horse while treating him?

Have the spavin fired and blistered by a graduate veterinarian; then tie him up short in stall so that he cannot lie down or move back or forth for at least six weeks. He cannot be successfully treated while at work.

## LAMENESS.

I have a black mare nine years old that is a good driver. When the roads are not too dry and hard she seems to be all right and when the roads get dry her feet get dry and crack on the bottom. I would like to know what to put on her feet to soften them up.

Soak feet in cold water twice daily for an hour or so and on removing from tub smear well with any simple greasy hoof dressing. In a month clip hair from coronets (hoof heads) of fore feet and blister one foot at a time with cerate of cantharides. Repeat two or three times at intervals of a month. She should run on wet grass if possible when blister is not acting.

## CHOREA.

I have some pigs about three months old that have something the matter with their backs. They bend or break down right back of their shoulders. They only stay that way a moment and then straighten up and seem all right again. These pigs are not fed heavy on corn. They get bran, shorts, oil meal, milk and grass.

Without an examination we cannot make sure what is the matter, but the symptoms suggest chorea (St. Vitus' dance) which is incurable. Were it not that you are feeding a nitrogenous ration we would suspect rickets. Nuxvomica in small doses is indicated. Commence with a grain or two night and morning and very slightly increase the dose daily, but go back to first dose at the first sign of twitching muscles or other abnormal result. Keep their bowels acting freely.

## AZOTURIA.

Will you please give a reliable treatment for azoturia, or congestion of the kidneys? After a horse has had this ailment do you think he is subject to it afterwards?

No specific cure has been found for azoturia. In some cases a particular treatment seems to work very well and in other cases the medicine proves useless. Prevention is the most important consideration, for no man need have a case of azoturia to treat if he makes it a practice never to allow a horse to remain idle a single day and always to cut down the oat ration when there is no work to be done. At times of idleness horses should be turned out in the yard, paddock or pasture or at least have some walking exercise every day. The disease comes on invariably after a well fed horse has been idle for a day or two in stable and during that time has been fed the usual amount of oats. At the outset of an attack horse should immediately be rested, given a purgative and fed mashes until the physic has operated. Affected muscles of hind quarters should be covered with blankets rung out of hot water or be rubbed with strong liniment twice daily. If

the horse goes down it will be necessary to call in a graduate veterinarian.

The Homestead and The Homemaker, \$1.25 per year.

H. A. Cole's Angus Dispersion Sale.

A medium sized crowd, but one with plenty of money, gathered at the State Fair grounds at Des Moines, Iowa, last week Tuesday in response to sale announcements, and hid off the entire offering of sixty head of males and females brought out by Mr. H. A. Cole of Chicago, Ill. Col. Woods, assisted by Messrs. Graham, Harding and Binie, collected the bids, which came none too fast, but which showed appreciation for merit as it appeared in the sale numbers. A trifle over an average of \$96 was realized on the entire offering, which was generally considered very satisfactory in view of the fact that the offering was a little too extensive for the buyers present, especially the male end of the consignment, which was good nevertheless. Quite a number of very good young bulls sold below what they should have, had there been a better demand displayed for such. C. J. Martin of

Adaza, Iowa, claimed the honor of topping the sale with a Blackbird cow sired by a 2d Lad of Emerson. She is a splendid breeder, as well as an individual of fine feminine character and conformation and brought \$200. F. Story of Odebolt, Iowa, was a liberal buyer and besides securing an imported K. Pride cow for \$260 got several others. Brown & Walker of Clarinda, Iowa, took an Imp. Queen Mother cow, a fine, straight individual, for \$250. Rosenfeld & Siverly of Kelley, Iowa, added a fine yearling bull, No. 33, to their herd for \$200. Among others who were present and secured a part of the offering were John Marshall & Son and M. W. Harding, both of Humboldt, Neb.; from Kansas came Emil Marmet of Sahetha, who bought liberally; Iowa breeders were represented by John Ver Steeg of Pella; J. E. Griffith of Washington; J. M. Graham of Des Moines; B. Groendyk of Lytton; A. C. Binie & Son of Alta; M. Dyer of Pleasantville; A. G. Warner of Bloomfield; W. D. Greene of Jewison; A. G. Messer of Grundy Center; J. C. Carter of Ellison; I. Stewart of Des Moines; W. F. Mountain of Anita; Buckman Bros. of St. Olaf; B. F. Fontz of Nevada; J. K. Myerly of Des Moines; G. M. Bennett of Earlham; Henry Palas of Luana; C. S. Fulton of Lewis; John DeBok of Percy; W. C. Emary of Osceola and John Graham of Des Moines. The herd bull, Imp. Electrician 41376, was secured by M. Dyer of Pleasantville, Iowa, for \$210. Bambo of Glen Lea 73043 was secured by C. S. Fulton of Lewis, Iowa, for the bargain price of \$130.

## LITTLE ONE SUFFERED

For Over a Year—Itching Skin Like Eczema Covered Face and Neck—Mother Lost Faith in Medicines.

## CUTICURA REMEDIES CURED HER

"My baby's face and neck were covered with itching skin similar to eczema, and she suffered terribly for over a year. I took her to a number of doctors, and also to different colleges to no avail. Then Cuticura Remedies were recommended to me by Miss G—, who was telling me how they helped her. I did not use it at first, as I had tried so many other remedies without any favorable result. At last I tried Cuticura Soap, Cuticura Ointment, and Cuticura Resolvent Pills, and to my surprise noticed an improvement. After using three boxes of the Cuticura Ointment, together with the Soap and Pills, I am pleased to say she is altogether a different child and the picture of health. Mrs. A. C. Brestlin, 171 N. Lincoln St., Chicago, Ill., Oct. 20 and 30, 1906."

## OUR DAIRY DEPARTMENT

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

### FIXING THE DAIRY TYPE.

The following communication has been received from a subscriber from Butler county, Iowa:

I am thinking of building up a herd of dairy cows and am somewhat at a loss to know just what breed will answer my requirements best. I would like to have you inform me what strain of Short-horns is the dairy strain, or dual-purpose, and is the type fixed enough to insure a dairy offspring? Is there any marked difference in the value of skim milk from the different breeds for feeding swine? If so, please compare the Short-horn, Guernsey and Holstein. As I understand it, the Holsteins average a test of 3 to 3.5, Short-horns from 3.5 to 4.5, and the Guernseys from 4.5 to 5.5. Am I correct, and do the Holsteins give enough to make the difference?

Taking these inquiries up in the order in which they are given, we will say that the Bates strain of Short-horns are as a rule good milkers, and excellent milkers may be found among the Scotch tribes, though as a general thing the Scotch Short-horns go more to meat and less to milk. It cannot be said that the type is absolutely fixed, because there are poor milkers even among the dairy breeds, and likewise these are found among the Bates Short-horns.

The skim milk of different breeds, as well as from different animals, varies about in the same ratio as the butter-fat content, for the reason that the percentage of casein in the milk bears almost a fixed relation to the percentage of fat, and the feeding value of skim milk which tested 5.5 before skimming would be greater than skim milk which tested only 3.5 before skimming. The actual difference in the feeding value of different kinds of skim milk has, so far as we know, never been tested, nevertheless the principle enunciated above may be relied on as true.

### SUDDEN COOLING OF MILK.

No principle involved in dairying will bear repetition better than that concerning the importance of cooling milk quickly after it is drawn. In the ordinary summer atmosphere, unless special pains are taken to reduce the temperature, ideal conditions are furnished for the development of germ life. It matters not how cleanly one may be at milking time, it is absolutely impossible to do the work without the introduction of a certain class of undesirable germs, and the high temperature makes conditions ideal for the development of these forms of life.

Where there is a plentiful supply of ice the problem is solved, but our opinion is that less than half the farmers of the great central West put in an ice supply. The next best thing, therefore, is to make the right use of water. With the ordinary shot-gun can of about eight-inch diameter one should have no difficulty in quickly lowering the temperature to 55 or 60 degrees. This cannot always be done with one water only, it being generally advisable, if it is at all possible, to change the water after the first hour. It is true that it involves a little labor, but as the principal errors in the making of good butter are made right there, one can well afford to take a little pains to insure this rapid cooling.

Where milk is suddenly cooled the growth of all forms of germ life is checked, so that later on when the development of the lactic germ is desired this development is not interfered with by undesirable germs.

### Dairying As a Science.

To the Editor of The Homestead:

I believe it can be proven that dairying is the most scientific of all the various branches of agriculture. I refer to the subject as operated in connection with the average farm. You may say that crop growing is based on scientific principles, but unfavorable weather may upset one's plans completely. You may prepare ground properly for small grain and do your part thoroughly and yet sultry weather at the proper time may so rust your grain as to make it hardly worth the harvesting.

In corn growing you may plant your seed deep at a time when the soil is dry and the seed afterwards rot on account of a sudden change in climatic conditions, causing heavy rains and lowering of the temperature. No man can foresee this, and consequently corn growing can never become a science. You

must simply use your best judgment and, as it were, guess at it.

Turning to dairying, however, we find a different state of affairs. Any kind of a healthy cow, if bred at intervals, will produce milk and the milk of one healthy cow, practically speaking, if properly handled, will make just as good dairy products as the milk of another cow. One may make more than another, it is true, but the quality of the product is practically the same in each case.

Starting, then, as the milk is drawn from the cow you can employ in every detail of the operation absolutely scientific principles that are under your control. There is nothing to guess at and the outcome of any operation need not be a surprise, but may be calculated in advance unerringly.

If you are clean at milking time and prevent filth or foreign matter of any kind from entering the milk, and if you will thoroughly strain it immediately after milking through two or three ply of cloths, as well as a metal strainer; if the milk is quickly removed from the "barny" atmosphere, and if it be cooled quickly afterwards, there will come from that milk a sweet, pure cream. If, then, the cream is kept at a low temperature, say anywhere from 45 to 55 degrees F., until twenty-four to thirty hours before churning time, and if the atmosphere in which the cream is kept is pure, you will know in advance just how butter from that cream will look, how it will taste and how it will sell on the market. You even know in advance, if you have properly controlled all the conditions, how long it will take to churn, at least within a very few minutes of the time it will take—all of which goes to prove, as I said in the outset, that dairying in its every phase is based on scientific principles.

The reason we have so much bad butter and such poor milk and cream delivered to the populated centers is because at some step in the proceedings men fail to comply with the scientific principles that should be utilized if a good product is to result. They are either filthy at milking time, allow the milk to remain in a polluted atmosphere too long, keep the cream at too high a temperature, allow the cream to get too old, skim too thin a cream, or make some other little mistake that counteracts and annuls the results of every sensible move that is made in the whole process.

I take an interest in disseminating the right kind of information on the subject of dairying for the reason that with the improvement of the product the country over, there will come an enlargement of the market, due to an increased consumption. Dairymen generally should make it a rule to educate consumers into the belief that the scientific principles touched on above are employed at all times in their operations.

Mercer county, Mo. John Jason.

### The Babcock Test.

To the Editor of The Homestead:

It seems strange to me that farmers are so slow to use the Babcock test and scales. It isn't such a hard job as many suppose. Have a pair of scales and note book handy and it is only the work of a minute to weigh and take your sample. Even if you only do it once a month and take about four milkings you can get a very good idea of the value of your cows. I weigh once a week and test once a month.

The cows that I had supposed to be my best had to take a back seat, falling at least \$3.00 per month behind in actual profit over feed consumed. It is a very interesting process and will make the boys interested in milking before you know it, and you will all be watching results of feeding, etc., and learning before you are aware of it how to save dollars.

For instance: One particular cow was giving a net profit of about fifteen cents daily. One night she had a sore feat and kicked, for which I chastised her, but not very severely. She dropped in her butter-fat production immediately and barely paid me for the feed she ate for three or four days. I think it cost me all of seventy-five cents for striking her.

Think it over, subscriber, for I know it will pay. I paid \$4.15 for a four-bottle tester and it paid me well. Full instructions come with the machine.

Butler county, Iowa.

Ernest N. Neal.

The Homestead and The Homemaker,  
\$1.25 per year.

## MILK CANS ROB YOU

Look through a microscope at milk set to cream in pans or cans and you'll see how they rob you. You'll see the casein—the cheese part—forming a spider web all through the milk. You'll see this web growing thicker and thicker until it forms solid curd. How can you expect all the cream to rise through that? It can't. This

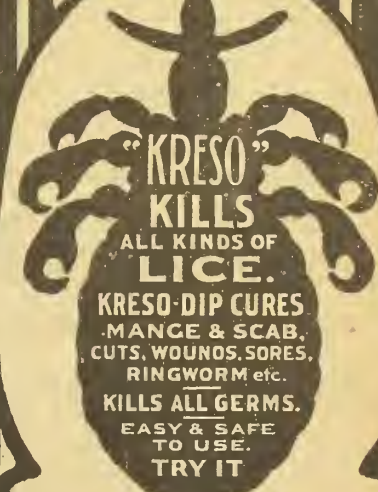

casein web catches a third to half the cream. You stand that loss just as long as you use pans or cans for they haven't enough skimming force to take out all the cream. But, just the minute you commence using Sharples Dairy Tubular Cream Separator, you stop that loss.

Sharples Dairy Tubular Cream Separators have 10,000 times more skimming force than pans or cans, and twice as much as any other separator. They get all the cream—get it quick—get it free from dirt and in the best condition for making Gilt Edge Butter. Casein don't bother the Tubular. The Tubular is positively certain to greatly increase your dairy profits, so write at once for catalog I-121 and our valuable free book, "Business Dairying."

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

## Look Out for the Family Cat.

To the Editor of The Homestead:

Nearly every family has a favorite cat which is above such a low down vice as killing chicks. She would not touch them, oh, no! With a virtuous look of absolute innocence, she will walk past a flock of toothsome little morsels, and never so much as wink an eye in their direction.

But look out! A cat can be very innocent and very sly. Give her a good chance, and quick as a wink one of the feathered babies is in the clutch of those cruel claws, and in some hidden nook, is gloated over and devoured, only to be followed by another if opportunity favors.

We have been enjoying (?) some harrowing experiences. A really valuable cat, a descendant of a tortoise shell, mighty in the hunting line, began to give us cause for suspicion. We found her eating chicks on two occasions, but it seemed probable that they had died on the range, and she had picked them up. As our neighbors were greatly troubled with rats, while she kept our premises free, we were reluctant to believe that she would really eat live chicks. It was proven one day when, having put some valuable Rhode Island Red chicks in a brooder, and the heat of the sun being too great without air, a screen was arranged and, as we supposed made secure. But on going out a little later, we found Jinnie inside the brooder, deliberately devouring one of the little Red beauties. Ordinarily this would have sealed her fate immediately, but Jinnie had kittens, and it seemed dreadful to let them starve. So we kept close watch, hoping to avert further loss. But the first day I let the little birds out into their wire covered run, she worked at a loosened wire, and we found her calmly finishing her second chick inside the run. A grave under an apple tree soon covered all that remained of Jinnie.

We have other cats, and must have as a safeguard against the rats that infest the neighborhood. They all seem very innocent, but we shall take no chances. The minute one of them shows the least sign of the cloven foot (or paw) she will join Jinnie under the apple tree.

Seriously, very few cats can be trusted. They do their mischief in such a

sly way that it is hard to detect them until the habit is so formed that they become bold in their depredations. Cats are like people in that bad habits grow until it is impossible to conceal their existence. So I utter this word of warning, and repeat my admonition—"Look out for the family cat!"

Subscriber.

Some very humane people are now claiming that poultry killed by being stabbed in the mouth are being cruelly murdered. Such a belief is not born out by facts. In stabbing in the mouth the brain is penetrated, and the bird almost immediately becomes insensible to pain. At least this conclusion is reached by the fact that a fowl will struggle longer by having its head cut off than by being stabbed.

According to history, when the Pilgrim fathers first reached the New England shores, in 1620, the woods of that section were alive with wild turkeys. Although this fowl was exclusively found in North America in its wild state, the earlier naturalists supposed it to come from the East Indies and Africa, and that it originated in Turkey—hence the title.

Thos. F. Rigg says that one reason why the English produce birds of larger bone and frame than we do in this country, is because they feed a ration of oats, wheat and other grains which are rich in blood and bone-producing properties, and that Indian corn enters but slightly into the food supply.

The shipper of eggs or poultry should not only aim to please, but also aim to attract the attention. Pack carefully, market regularly, and take pride in your shipments. Have your goods "gilt edge," for a satisfied customer is almost always sure to return.

Cowpeas are excellent as a poultry food, cheap in price, and complete in the elements that make eggs. One poultryman says that when his hens seem about to quit laying he boils cowpeas until nearly done and feeds them. He says it has a magical effect upon egg production.

Where the runs are proof against dogs, it is best to allow the ducks to remain out-doors during the night. They will not be so nervous as when penned up in the house, especially during warm weather, and besides they will be able to get a drink whenever they want it.

Diarrhea in fowls is caused in many different ways, such as indigestible food, a chill, coarse or half-cooked food, too much bran, lack of grit, exposure to heavy rains, irregular and improper feeding, filthy water and over-fat.

The average laying of a hen is nine dozen eggs a year, during which time she will hatch two broods. A turkey seldom lays over two dozen eggs; a goose, three dozen; a duck, eight dozen; and a Guinea, eight dozen.

It takes about a handful of whole grain to fill the crop of a fowl. Therefore, in feeding grain at night, it is a good rule to allow a handful for each fowl in the pen.

Try Neats' Foot Oil for greasing the legs of sealy-legged fowls. Those who have tried it say a few applications will cure some very bad cases.

As the duck has no crop, it cannot assimilate and thrive upon whole grain. The ration should be in the form of mash.

Careful estimates place the cost of keeping a duck at \$2 per annum, or about twice what it costs to keep a hen.

Feed wheat, oats, bran and middlings for eggs; corn for heat and fat.

## IN THE LIVE STOCK FIELD.

Three Ohio Chief boars are offered for sale by Mr. C. F. Kirk, of Ponca, Neb.

Some good Aberdeen Angus bulls and cows and helpers are offered for sale by Mr. M. B. Walker, of Clarinda, Iowa.

A few fall sows bred for fall farrow are offered for sale by Mr. Austin Renshaw, of Blair, Neb., the well-known Duroc Jersey breeder.

Messrs. B. M. Eastburn & Son, of Hillsboro, Iowa, write us that they have a fine bunch of March and April Chester pigs and some of them are coming to the state fair. Plan to look up these pigs, as they will contain some forty head of the best in the bunch. They are mostly sired by a boar on which an offer of \$100 was refused at eight months of age. The dams are mature and money takers, too. If you want to get ahead

# INVEST TWO CENTS FOR One Thousand Dollars Profit

## Winneshiek Threshing Machinery

That is what we save you on a big rig. THINK OF IT—more than you save in three average years' hard work. We make the largest grain separator in the world and have traction engines to correspond; also the smaller sizes, and special big engines with plow gears; we have on hand rebuilt outfits of the leading makes which are practically good as new and at unheard of prices. COME RIGHT HERE AND LOOK AT THE GOODS. We can convince any man of experience. We pay your railroad fare and hotel bill if you buy. You will get a square deal. Our unequalled facilities for manufacturing and shipping enable us to supply the best line of threshing machinery ever offered at prices that insure a saving for our customers of almost one-third in first cost. WE CAN AND WILL SAVE YOU JUST AS MUCH IN PROPORTION ON YOUR OTHER GOODS. Get our catalog of famous DAVIS frost-proof gasoline engines. Alfalfa King rakes and stackers, Cascaden hay press, Giant Killer sweep feed mill, corn drills, farm boilers, tank heaters, Northwestern steam feed cooker and all styles and sizes of Progressive steel ranges, cook stoves, Oak and Hot Blast heaters. Send for catalog and proposition covering the article you want.

## BLACK SPANISH EXCLUSIVELY

FOR 11 years. Winners at Kansas and Missouri's best shows; also the World's Fair. 50 hens, 7 cocks for sale at prices that will move. Eggs 1/2 price balance of season, 75c per 15. H. W. Chestnut, Centralia, Kansas.

## Being Crowded for Room

OFFER my last year's stock of Single Comb Black Minorcas consisting of 120 hens and 5 cockerels one year old, at reasonable prices if taken at once. NICK LOEWEN, LAWLER, IOWA. Successor to Fitzsimmons & Loewen.

## S. C. White Leghorn Eggs

I WILL MAKE SPECIAL PRICES ON EGGS for hatching during the month of June. All eggs carefully selected. Write for prices. R. E. BROWN, RICHLAND, IA.

WHITE WYANDOTTE EGGS, \$1.25 per 15, \$2 per 30, \$5 per 100. Hens score 95 to 96½. Address, Mrs. L. M. Estes, R. 2, Audubon, Ia.

of the crowd book an order with this breeder at once. Mention The Homestead.

Some good fall Duroc Jersey boars are offered for sale by Mr. August Voge, of Portsmouth, Iowa.

Mr. C. M. Dewey, of Shannon City, Iowa, offers a few fall Duroc Jersey boars for sale sired by Proud Advance and W. L. A.'s Choice Goods.

Messrs. M. S. Moats & Sons, of Randolph, Neb., have a few fall Duroc Jersey boars for sale and will also sell a good herd boar. Some man will get a good bargain in any of these.

Mr. W. H. Jones, of Quimby, Iowa, offers a splendid young Blackbird and an Erica hull for sale. These are both ready for service, and one is a son of the noted bull, Imp. Edward R.

Three good fall Duroc Jersey boars sired by I Am a Wonder, a son of the sweepstakes boar, Crimson Wonder, and out of the \$1,500 sow, Ruberta, are offered for sale by Mr. F. E. Garrett, of Lohrville, Iowa.

A good farm helper or young man with a liking for stock should write to Mr. T. A. Davenport, of Belmond, Iowa, for work. An all summer's job is offered. See page 4 and mention The Homestead when you write.

Do you want a Shetland pony or a faithful Scotch collie dog? If so, write for a fine illustrated catalog just off the press, describing the fine collection of this kind of stock now for sale by Messrs. Cassidy & Thompson, of Jamaica, Iowa.

Among the Angus bull advertisements will be found a new one in the name of Messrs. R. Wilkinson & Son, Mitchellville, Iowa. This breeder is offering a few choice yearlings and two year olds that are in fine shape for service, and represent the most popular lines of breeding. They are out of dams from the Wallace Estill dispersion, the merit of which needs no description. Write this breeder if you want a good "doddle" bull. Mention The Homestead. See page 16.

## FEEDING STEERS.

Some 300 head of feeders of three beef breeds are offered, as well as a load of steer calves on page 15 by Mr. H. I. Ball, of Fairfield, Iowa. These are good feeders, dehorned and they must be sold quick. Write or go and select. Mention The Homestead. RAISE A GOOD POLAND CHINA BOAR.

Mr. F. W. McIntyre, of Red Oak, Iowa, has a number of fall yearling and mature sows bred for fall litters to P. W. Giant. Write him an order for one or more. Boars are selling well and recent sales have been made to the following breeders: Victor Arnold, Griswold, Iowa; H. C. Gilbert, Tabor, Iowa; G. J. Coon, Warsaw, Mo.; P. P. Clarke, Greenwood, Neb., and M. M. Ryan, Tarkio, Mo. Prices on these were from \$35 to \$40. Do you want one? If so write at once or buy a sow and raise your own boar. Mention The Homestead and see the advertisement on page 17.

## POULTRY.

## Black Langshans

IN order to make room for my young stock I will sell a few pens of good breeders at \$5 per six; five hens and a male. Eggs \$1 per 20 for balance of season. MARGARET C. DALY, ANAMOSA, IA.

## Barred Plymouth Rock Eggs

FROM the leading strains and from extra large birds at \$1.00 per sitting or \$4.00 per 100. Address, J. E. Wehr, Portsmouth, Ia.

## Barred Plymouth Rock Eggs For Sale

BRADLEY BROS., the leading breeders of Barred Plymouth Rocks, from which my stock is from, sell their eggs \$5.00 and \$10.00 a setting. You can buy that strain at much less by writing, Geo. H. Lawshe, Route No. 3, Harlan, Iowa.

## S. C. WHITE LEGHORN EGGS

AND ALL kinds of pet and live stock. Send 10 cents for six-page descriptive illustrated catalog. MOUNT PENN KENNELS, Reading, Pa.

Shetland Ponies and Scotch Collie Dogs SEND for illustrated catalog. Cassidy & Thompson, Des Moines, Iowa, and Jamaica, Iowa.

FOX TERRIERS. Pups from registered parents, excellent workers on all kinds of vermin. Will guarantee pups to make good raters. Males \$10, females \$7.50. C. IL Drake, Hazelton, Iowa.

## STOMACH TROUBLES

Relieved By a Simple Mixture That You Can Get at Any Drug Store For Little Money.

Here is a prescription that any druggist will put up for you at little cost; or you can buy the ingredients separately and mix them at home; this simple prescription is highly recommended for all cases of stomach troubles; the digestive ferments and vegetable tonics tone up the stomach and increase the secretions of the gastric juices, making the stomach perform its work.

Here is the prescription; if you suffer from stomach troubles have it filled and give it a trial:

Compound Tincture of Cinchona, one ounce; Proseine Compound, one ounce, and Sherry Wine, half a pint. Mix and take one teaspoonful in a wine glass full of water before meals and at bed time.

## New Idea Roost Bars and Mite Trap

THEY catch the mites automatically as fast as they come to the chickens. While in the traps they deposit their eggs and in this way we get them all, both present and future. Sold under a positive guarantee and at such a little price that no one raising fowls can afford to be without them. Let us explain them further and send you prices. Write us today. The Cedar Rapids Poultry Supply Co., 113 A Avenue, Cedar Rapids, Iowa.

## WATCH FOR MITES

Spray Lee's Lice Killer into every crack and crevice of your poultry house. Paint it on the roosts. Don't let lice and mites get a foothold this year. Lee's is the original liquid lice killer, strongest and best. No handling, dusting, dipping or greasing. It kills them all. Price \$1.00 per gallon. One gallon express prepaid for \$1.25. GEO. H. LEE CO., OMAHA, NEB.

## ADVERTISING NOTES.

A good 640-acre farm in Keith county, Nebraska, is offered for sale by Messrs. Westenhaver Bros., of Sheldon, Iowa. This must be sold to close up an estate.

Farms in different parts of the corn belt are advertised on page 13 for sale or exchange. One of these is a well-improved farm in southwestern Minnesota, 520 acres in extent. Other smaller farms in eastern Kansas are also listed and may be paid for on the crop payment plan. For full particulars address Mr. L. H. Mulhall, Sioux City, Iowa. Kindly mention The Homestead when asking for particulars.

Why blister your hands and waste a lot of energy in pulling back hay forks when you can buy a good hay fork returner, constructed entirely of steel and iron, that will do the work quickly and effectually while you rest and look on? On page 3 such a device is advertised by the Roney Returner Co., Box A, Independence, Iowa. This can be used with any kind of carrier, on any kind of track. For full particulars and prices address as given, mentioning this paper.

## HEAVY MACHINERY CATALOG.

The attention of users of thrashing machines, shredding outfits, saw mills and hay presses is called to the big supply catalog of the Port Huron Machinery Company, Ltd. They sell machinery on its own merits. Write for their catalog and save money on heavy machinery. Address Port Huron Machinery Company, Ltd., Des Moines, Iowa. Kindly see page 5 and mention The Homestead when asking for catalog. Call on them when in the city.

## "HIGH STANDARD" FARMER'S PAINT.

Proper paint and painting on the farm are not only the mark of self-respect, but the long-headedest kind of economy. But the kind of paint is a mighty important thing to consider. The wear of paint on farm buildings is a most severe test and the fact that Lowe Brothers "High Standard" Paint has given unusually good results under the hardest farm conditions proves that it is a safe and saving paint for the farmer to tie to. Lowe Brothers are an old and respected firm—have been making good paint for over thirty-three years. Their word of honor goes with every can. "High Standard" Paint pleases the farmer because it is always ready to use, greatly saving the time of whoever does the painting, and making sure that the mixing is right. It contains purest paint materials, carefully ground and mixed by perfected machinery to a velvety fineness and just the right thinness for best painting. Lowe Brothers emphasize these claims: That "High Standard" Paint is always full, generous measure; that it has greater covering power, spreading capacity and gives years longer wear than ordinary paint; that it presents a clearer color and higher luster and fades gradually, leaving the surface in best condition for repainting. Lowe Brothers paint are square-deal paints and money-saving paints for the farmer in every way. They include, besides "High Standard" house paint, barn paint, implement paint, etc., and can be had at leading dealers. Lowe Brothers' products are marked with the famous "little blue flag." The Lowe Brothers Com-

pany have published a handsome and interesting book called "Paint and Painting," which tells valuable things that every farmer and home owner should know. They will mail you a copy, free, if you will ask for it. Address Lowe Brothers Company, Dayton, Ohio.

## A DOLLAR A MONTH PER ACRE BUYS A FARM IN SOUTH TEXAS.

On page 13 of this issue you will find the advertisement of Messrs. Eastman & Shaw, the leading real estate dealers of Enid, Okla. They offer to sell you a farm in south Texas for \$1 down and a dollar a month per acre. This is an opportunity for you to obtain a good home in the beautiful Texas coast country. Every reader should write for their folder, which gives a full description of the offer. A postal card will bring it. Write them to-day and please tell them you saw their offer in this paper.

## A GOOD IOWA FARM FOR SALE.

A 240-acre farm six miles from Melvina and six miles from Ocheyedan, and ten miles from Sibley, the county seat of Osceola county, Iowa, is offered for sale. Phone and rural free delivery and three-quarters mile to school; good eight-room house, good barn 40x50 with cattle shed 20x50; good new hog house, granary, corn crib, chicken house, good well with windmill, good big grove and small orchard with plenty of small fruit. Farm is nearly all fenced and has twenty-five acres to pasture. Price \$65 per acre. Small cash payment and balance on time to suit. Write Mr. W. D. Creglow, Remsen, Iowa, about this, and mention The Homestead.

## A LIFE SAVER FOR ANIMALS.

Since the discovery of Zenoleum a great many stockmen, in fact the great majority of them, are using it to spray horse, cattle, pig and sheep quarters, as well as poultry houses. It is a mighty good plan. In every case this work is worth far more than it costs. In many cases, many, many times more than its cost. One of the chief uses of Zenoleum is to disinfect, to destroy smells and to kill disease germs and to keep the live stock well. That is an important use. Zenoleum is perfectly in place anywhere where live stock is kept, and besides this it is an economical disinfectant, too. Read the advertisement in another column, and write for their sixty-four page free "Veterinary Adviser" to the Zenner Disinfectant Company, 131 Lafayette Avenue, Detroit, Mich.

## NEW IDEA IN HORSE COLLARS.

Until recently horse collars have been little improved since the advent of this piece of harness. Recently, the Humane Horse Collar Co., Omaha, Neb., devised a collar which is entitled to the attention of every horseman. It is made entirely on a new principle which makes sores and galls almost impossible; in fact, the manufacturers claim that when properly used this collar will heal up shoulders that are sore from bruises and hard usage. Now is a most opportune time to give these collars a trial, and as they can be bought subject to this condition we would advise every farmer to write to the manufacturer for terms and conditions of this offer. So far there has been a heavy demand for the collar and out of every one hundred put out on trial only two have been returned. We would call attention to the advertisement on page 5. Direct your inquiry to the Humane Horse Collar Co., Omaha, Neb. Kindly mention The Homestead when writing.

## "AMONG THE LAKES OF WISCONSIN AND MINNESOTA"

is the title of a handsome booklet of some eighty-four pages presenting a series of fascinating word pictures of the leading lake resorts of those states. It contains handsome views and full instructions to pleasure seekers regarding the most popular resorts and train service. Minnesota and Wisconsin lakes appeal to the individual seeking rest and recuperation, and the scenery about many of the resorts has a charm and fascination which visitors never grow tired of recounting. In the last few years most extensive improvements have been made around the principal lake resorts, and now it is safe to say that no summer places in the country offer any better facilities for enjoying a vacation than do the popular lake resorts in the two northern states mentioned. By sending six cents in postage to S. H. Vaughn, Division Freight and Passenger Agent, Des Moines, Iowa, beautiful illustrated literature on the above mentioned lakes and resorts will be mailed to any of our readers. Kindly mention the Homestead when writing for this material.

## HIGH CLASS IOWA LAND DEALERS.

The success of a firm selling land cannot be based on the number of sales made, but on the number of satisfactory sales. Hamilton Bros., of Madison county, Iowa, have made for themselves a name for square dealing that is considered one of their most valuable assets. We refer our readers to this firm because we are certain that it will be a pleasure to deal with them. The firm, Messrs. S. M. and J. E. Hamilton, have gained the distinction of being one of central Iowa's most respected real estate firms for several seasons. To start with, they know good productive farm land when they see it. Both gentlemen are practical land men, having had a long acquaintance with every foot of Madison county and having traveled over much of central Iowa. Besides this, they have the best of farm land, for an Iowa farm never goes wanting a buyer long, especially in this famous blue grass region. Think of the value of a prestige gained by selling 7,000 acres of Madison county land during the first six months of doing business! This is what the firm did five years ago and since then they have been steadily selling, and satisfaction has attended every transaction. It is due to this fact, that the firm has earned the title of "Honest Land Men." Their plan of selling eliminates excessive commissions. They buy direct from the owner at lowest cash price. Each piece of land is then examined and an exact description is taken. Thus the information which you receive is accurate and exact. The firm issues a catalog which would be a credit to any land company. In it the location of their different lands are described accurately and in detail. Everyone knows that Iowa is an ideal stock raising region, and for this purpose Madison county and adjacent ones, with their luxuri-

## CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.25; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 190,000, reaching a farm population of at least 950,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

## REAL ESTATE.

**HARPER COUNTY, KANSAS.** where they raise winter wheat, corn, alfalfa, fine cattle and hogs every year. 320 acres sub-irrigated second bottom land, gently undulating, dark, sandy, loam soil, one year from the soil. 100 acres winter wheat, 100 acres corn, 100 acres kafir corn now growing, 20 acres fine pasture fenced, good well and pump. 1/2 rent delivered at elevators in good town on two railroads. **SPECIAL**—Write for circular my Turtle Lake, Michigan, tract. Mrs. Nellie W. Merritt, Manistee, Michigan.

**WANTED**—A Dakota land bargain. Box 400, Buffalo Center, Iowa.

ant blue grass slopes, well watered, and rich black corn and grain land is especially suited. The country is a growing one, too, and it is safe to say that before many years the transportation facilities will be augmented with several interurban lines. This means a rapid rise in values. So we see the situation. No one can go amiss by buying a good Madison county farm. Why not get the advice of these respected and honest land men by sending for their catalog? Address, mentioning the Homestead, Hamilton Bros., Winterset, Iowa. See page 13 for advertisement.

## A SAFE HAIL INSURANCE ASSOCIATION.

As early in the season as this, hail storms have damaged crops in several Iowa counties, and from now on every farm crop in the state will be more or less in danger of destruction by hail. The only safeguard against losses of this kind is hail insurance. It is one of the most beneficent kinds of protection, for it may save the work of a whole season. No county in the state or in the corn belt is immune from losses by hail. On the whole, hail insurance probably pays a greater return to its holders

## REAL ESTATE.

**SUGAR**, vegetable and fruit lands on Rio Grande, south Texas, 700 to 6,000 acre tracts, cheap; also black prairie, old Mexico, near border, new railway. Grows everything, 4,000 to 50,000 acres, \$2 acre. American Colonization Co., Waverly, Iowa.

**DUROCS**—spring pigs, breeding and prices right. Wm. Hartman, Marshfield, Mo.

than does fire insurance. Few people would consider it prudent to be without fire insurance. Why should hail insurance not be just as necessary? In choosing a company in which to take out hail insurance we would recommend the Mutual Hail Storm Insurance Association of Iowa, of which Mr. O. L. F. Browne, of Des Moines, Iowa, is secretary. For straightforward, square dealing and fair treatment we know of no better company. The officers of the association are well known to The Homestead and we can recommend them as honorable men in every sense of the word. You can depend upon them to fulfill every obligation which they undertake. The company is organized along economical lines. It is the constant aim of the company to conduct their business in such a way as to furnish the most economical yet safest insurance to their patrons. Why not drop them a card today for what they can offer you in hail insurance protection? It is no more than good business policy for you to do so. Address Mr. O. L. F. Browne, secretary, Des Moines, Iowa. See page 12 and kindly mention The Homestead in your inquiry.

250,000,000  
Sheep Every Year  
Dipped in

**COOPER DIP**

Has no equal. One dipping kills ticks, lice and mites. Increases quantity and quality of wool. Improves appearance and condition of flock. **GEORGE ALLEN,** Lexington, Neb.

## OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 727, Kansas City, Mo.

## WITH THE EDITOR.

## With the Children.

A little bird whispered to Mrs. Walker that the boys and girls enjoyed their party last summer so much that they have been waiting and watching each week hoping for another. When Mrs. Walker got this message she decided that the grown-ups must make way for the children on June 27th, and so here we are again.

You are hoping I remember that I promised to tell you about the working dogs in Holland.

Of course I remember. But first of all, although some of you no doubt know it, I should tell you, that Holland is a tiny little country largely composed of land captured from the sea and kept prisoner by great stone dikes. Once upon a time it was almost all swamps and islands. That is why there are so many windmills in Holland—the windmills pump the water into great ditches called canals. These canals are the roads of the country. When the peasants go to market, instead of going in a buggy or a wagon, as farmers in America do, they usually go in boats. Land is so precious it cannot be spared for roads. It is so precious and so costly that most of the farms are very small. The peasants who work these tiny farms are too poor to have horses or machinery—they do all the work themselves. Sometimes they keep cows and make butter and cheese; sometimes they raise garden stuff.

If you look at the map you'll see that Holland is dotted with towns and cities. The people who live in these towns and cities need quantities of vegetables, so the peasants are kept busy raising potatoes and cabbage and carrots and such things. They rise very early, gather the garden stuff that is ready for market, pack it into carts, and then—but you'll never guess what they do next, so I'll tell you—they harness a dog to the cart. Sometimes the dog is harnessed in front, as our horses are, sometimes right beneath the cart.

I shall never forget the dogs I saw in Holland; especially do I remember those I saw first, on a market day at Zaandam.

It was at Zaandam that Peter the Great worked as a ship carpenter, you remember. I went there to see the house he lived in. It was afterwards, as I was strolling about the quaint old town, that I came upon a place where there were a number of peasants making ready to go home. Market was over, and under or beside the empty carts lay the dogs, such dejected, miserable, wicked-tempered, starved-looking creatures as I hope never again to see. The sight of them nearly broke my heart.

You see a dog is not built to draw That is what the Society for the Preven-

loads, and when he is made to do it soon kills him, and, as he is in misery all the time, his temper becomes soured. Then, too, as the peasants are poor and do not have very much to eat themselves they cannot feed their dogs well, so the poor thing is usually hungry. If we were half-starved and made to do work which would wear our bodies out in a very few years our tempers wouldn't be very good, would they? I guess not. It's no wonder those dogs at Zaandam looked so savage I feared to go near them. I wanted very much to comfort them, but as there was no butcher shop anywhere about and I could not speak Dutch to them all I could do was to pity them at a distance. While I was watching the dogs two peasants made ready for home. They put some goods in their carts, got in themselves, and then called to the dogs who wearily turned their faces homeward.

The Dutch are very good, indeed, to their cows. I daresay they do not mean to be unkind to their dogs. They probably do not know that it is cruel to compel dogs to draw heavy loads. Societies for the prevention of cruelty to animals do, however, and they are trying to have laws passed forbidding the use of dogs as beasts of burden. They have succeeded in Belgium, where the same custom used to prevail, so we may hope that better days are coming for the poor dogs in Holland.

What I have been telling you is rather sad; I must tell you something to make you happy. I read the other day about a wonderful new school that has been opened in Paris. It is a school to teach cabmen and drivers all about the care of horses. I'll tell you a little story which will show you what a delightful piece of news this is to those who love horses.

As we were returning from church one very cold morning last winter, when I was away in Germany, you know, we came upon a crowd gathered about a horse that had slipped and fallen on the icy pavement. The driver and some other men were trying to make the horse get up. First they urged him by beating and kicking him, next they tried to lift him bodily. They did get him up part way a few times, but always he fell back on the stone pavement with a sickening thud. My sister, who speaks some German, tried to tell them that they must loosen the harness and free the struggling creature, but they could not understand. When we were almost frantic with rage and pity (they were actually trying to lift the horse by his tail!) a young lad pushed his way through the crowd, said a few words, and in a masterful way undid buckles and straps. As soon as the horse was free they got him upon his feet without the least trouble. Now you see if that driver had been taught, as Paris drivers will be in future, much suffering would have been saved the poor horse.

Much cruelty to animals results from ignorance and want of thought. The great thing is to get the men who drive horses to thinking about the horses.

**SIMPSON  
EDDYSTONE  
PRINTS**

**Simpson-Eddystone  
Shepherd Plaids**

**THOMAS & SMITH** 288 Hudson Street, New York.  
17-19 S. Carpenter St., Chicago.

tion of Cruelty to Animals is trying to do in Italy, and it is quite wonderful how things are changing there. I was told that the horses in the south of Italy used to be such unhappy-looking objects it was painful to ride behind them, but in Naples I remarked on how well-kept the horses were, and more than once I drove with a cabman who asked me to notice how well his horse looked. It was the same in Sorrento, Capri, and other places I visited.

Italian cab drivers always expect something over and above the regular fare. If you do not give them this "tip" they will ask for it. Sometimes it is "macaroni money" they ask for, sometimes for something to buy a drink. I never waited for them to ask; always as I paid them I gave them a few copper coins, saying they were for the horse. Perhaps the drivers spent the money on themselves, but at any rate if people of tender did that or gave the horse a lump of sugar, as I sometimes did, it would have a good influence on the drivers. When we drove from La Cave to Amalfi we had a fine team of horses with gay feathers at their heads. The road was long and in some places quite steep. Every now and then I got out of the carriage when the driver did and walked up a steep bit; sometimes I stroked and patted the horses, too, and you should have seen the driver's eyes shine. I'm quite sure he did not spend on himself the money which I gave him to buy the horses an extra good supper.

But I have talked enough. Now run away and play.

## HOME AND HOMEMAKING.

## LITTLE HELPS BY THE WAY.

For the heart grows rich in giving;  
All its wealth is living grain;  
Seeds which mildew in the garner,  
Scattered, all with gold the plain.  
Is thy burden hard and heavy?  
Do thy steps drag wearily?  
Help to bear thy brother's burden;  
God will bear both it and thee.

Is thy cruise of comfort wasting  
Rise and share it with another,  
And through all the years of famine,  
It shall serve thee and thy brother.  
Love divine will fill thy store house,  
Or thy handful still renew;  
Scanty fare for one will often  
Make a royal feast for two.

## TO LIVE COMFORTABLY IN HOT WEATHER.

To enjoy good health in summer weather is the power of every one if they only observe a few rules. Let me suggest a few.

Do not fret about the heat, for that cannot be changed and you have it to stand. So take it calmly and you will feel it much less, as fretting only causes one to be warmer.

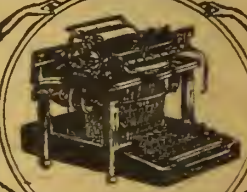

Dress suitably. Wear something which is thin and cool. Not many starved things if possible, as they exclude the air. Leave the starched high collars and cuffs for a cooler season.

Don't eat too much. Especially must you eat very little meat, as it causes you to be warm. Winter is the time for it. Eat fruits and of course vegetables. Get up early so as to prepare and cook most of your vegetables in the cool of the day. Serve cold meals and save yourself as much as possible. Rest during the hottest part of the day and then you will feel better prepared for the rest of the day; a little nap will refresh you wonderfully.

Bathe, either sponge or tub bath, frequently. This is absolutely necessary in summer and health depends upon it as well as cleanliness.

Do not drink too much water. Particularly ice water should not be drunk to any extent; some physicians say not at all. It is very easy to drink too much and still not have thirst quenched. Drink slowly, moistening the mouth, lips and throat well.

Arrange to sleep well. Cool the room off as much as possible, placing the bed in as cool a place as can be found. Sleep on a

mattress that is well aired daily. Be sure to have a light supper and one easily digested. I have heard that cloths wrung out in cold water and hung up will cool the room considerably.

Above all take things easy. Worry over anything only exhausts and heats one, doing no good at all. The best way to avoid worrying is to provide literature or work of some kind which will occupy the mind to the exclusion of the subject of worry.

## HELPS IN MAKING GIRLS' CLOTHES.

The careful and economical mother, when making wash dresses, makes allowances for growth and shrinkage and the allowances should always be made, as an outgrown garment is not only unsightly, but very uncomfortable. The best way is to make the waist, skirt and sleeves several inches longer than necessary, then the belt can be set up on the waist, a wide tuck can be taken underneath the trimming on the sleeves and in the hem of the skirt, or if the skirt is gored and trimmed with a ruffle, the tuck can be taken under the heading of the ruffle. If a full skirt is too short it can be cut apart and a two or three-inch piece of some material to suit the goods inserted and the waist and sleeves can be trimmed with the same goods and the seams covered with finishing braid.

## SOME WAYS TO COOK RHUBARB.

Baked Rhubarb.—This requires less sugar than stewing. Peel the stalks, selecting red rhubarb. Cut into inch lengths and place in a stone crock. Add one part sugar to two parts of the fruit, unless you like it very sweet, then add nearly half and half; arrange the fruit and sugar in layers; use no water. Stand the crock in a pan of hot water, cover and set in the oven and bake until the pieces are clear. This may be used for a meringue by filling a shell of good, light pastry, covering the top of the fruit

## I Stand Back of Huttig's Rubber Roofing

WITH A WRITTEN, PERSONALLY SIGNED, LEGALLY BINDING GUARANTEE.

Yes, sir,—I can afford to stand back of my roofing because it stands back of me, and makes my word good as gold.

**I GIVE** you a written guarantee that this roofing will do what I claim—not a mere VERBAL PROMISE, through your dealer, but an ironclad, legally binding guarantee, signed by the HUTTIG MFG. CO., capitalized at \$1,000,000, and responsible for every promise it makes.

No other roofing gives you a personally signed guarantee as strong as this. No other roofing can AFFORD to do so. Why can I do it?

Simply because my roofing is the only roofing on the market, made from pure, natural, imported Asphalt.

Asphalt comes from the Island of Trinidad. A large part of it is used in the exclusive manufacture of HUTTIG'S RUBBER ROOFING.

My roofing is made of long-fibered wool felt, densely compressed and heavily saturated with this specially prepared Natural Trinidad

Asphalt, which protects every particle of fiber. Now, mark this carefully: The saturation of Felt with Asphalt in HUTTIG'S RUBBER ROOFING is 150 per cent as against 104 per cent, the highest saturation of ANY of the roofings with the crazy names.

That's the principal reason why my roofing will not "stick" in the hottest, nor crack in the coldest weather.

HUTTIG'S RUBBER ROOFING requires no skilled labor to lay it. Every roll contains enough liquid cement, nails, caps, etc.

It will not run, rust, rot, crack, leak, blow off, require frequent repairs, and is not a fire trap. Now, here's how I feel about it. If you have use for roofing—

You don't want to fool with a doubtful article, when you can get HUTTIG'S with a guarantee that means absolute protection, both to your roof and to your pocketbook.

Just put the burden on HUTTIG. My shoulders are broad. I will take care of all your roofing troubles, if you will trust me.

Ask your dealer for HUTTIG'S RUBBER ROOFING. If you can't get it of him, ask ME, and I'll see that you do get it.

Any way, write for a big, free sample of my roofing and let me send you my booklet B and special Ironclad Roofing Guarantees. Write me personally, and do it to-day.

**HUTTIG MANUFACTURING CO.,**

707 East Second Street, Muscatine, Iowa.

**H.W. Huttig**

PRESIDENT

with a meringue and coloring a delicate brown in the oven.

**Rhubarb Fritters.**—Select the smaller stalks of tender, fresh rhubarb. Cut into pieces two inches long; cover with cold water and steam until tender; drain and spread on a platter. Make a sirup of sugar and water. Pour this over the rhubarb and let stand until perfectly cold. Drain off sirup, dust the rhubarb thickly with granulated sugar. Make a fritter batter in the usual way, dip the pieces of rhubarb in the batter and fry in deep hot fat.

**Rhubarb Dumplings.**—While rhubarb is still so good and cheap try this suggestion for a quick dessert that does not take over twenty minutes to prepare, then cut it out and paste in your scrapbook for ready reference. It is the invention of an old and resourceful Arizona housekeeper, a natural cook, and one always ready to rise to the occasion for unexpected guests, even on an isolated ranch miles from any base of supplies. When rhubarb is in season she washes and cuts it in inch pieces, and stews with little more than half its weight in sugar and just a little water. It does not need much, for as soon as it begins to cook the juice forms plentifully. While it is cooking she mixes up a flour batter the same as for meat dumplings, using in the proportion of a pint of flour, a half teaspoonful of salt, two teaspoonfuls of baking powder and a scant cup of sweet milk, then drop it by the spoonful into the boiling rhubarb. The result is delicious, eaten hot with or without cream. As the same thing can be done with any kind of stewed fruit, this stock emergency dessert may find appreciation in other places than on the desert.

#### AMONG OURSELVES.

When it is announced that Mrs. Vanderhoeft is with us to speak a few words, I feel sure every ear will be attentive and every heart send out a wave of loving sympathy. Mrs. Vanderhoeft, friends:

Not long ago I heard a lady remark: "I have every one of Mary J. Holmes' works and also E. P. Roe's. They are my favorite authors and I don't care much for any other books." Then she asked me what were my favorite books. And I swung open the doors of my bookcase and asked her if she could guess by the books there. She could not, and I can hardly tell myself. Anything good, clean, pure, full of rich and rare thoughts, where one finds something new or interesting or even fancy on every page, appeals to me. Scott, Dickens, Shakespeare, ancient and modern histories grace the upper shelf. Coopers' books, history of civil war (as seen by a boy), Algers and King (for you see we have boy readers), followed closely by Connor's (every volume). Roe, Holmes, Stowe are near neighbors to Lew Wallace's "Ben Hur," "Prince of India," etc. "David Harum" is side by side with "Milt's Travels in Venice" and "The Origin of Man." And such lots of others! I like diversified reading. And of course we have our dailies, weeklies, farm journals, and The Boy has his "Youth's Companion" and "American Boy." You see I write that word boy with a very large B. I wish to emphasize the word and I wish everyone who owns one of them would take those papers for him. I find such a very few who take any kind of a paper for their boys. And our papers go to a number of families where there are boys and girls who are hungry for something interesting to read. Don't be surprised if your boys wander away from home looking for something interesting if you do not make home the best place on earth for them. Our dining room is a tiny place, but there is where you always find our boys, while waiting for a meal on rainy days, etc. Here are all the papers, magazines, flowers, and my box of letters and stationery. Over the table is a picture of beautiful scenery, a scene in Norway of mountains and rock-bound coast, and such a queer-looking old castle, and the picture of a lad with such a sunny, laughing face. It cheers one just to

see it. We are having the latest, coldest, "freeziest" spring and not a flower has dared to show its head, but we enjoy a bouquet of just branches of ash and elder with their lovely green foliage. I was so thankful for all the kind helpful letters written to me by members of this "Home." We are terribly lonely, and it is a sad task to have to go on alone, but for the children's sake I am trying to pick up the broken threads and do the best I can.

The soul that seeks happiness in the good of others cannot be utterly miserable for very long. In service there is healing for every wound and though the heart be lonely it finds peace. It is bound to be well with our friend, but let us help her until she gets her bearings and readjusts her life.

Mrs. Vanderhoeft has been a member of this circle for many years, but even she must, I fancy, yield the palm of seniority when Mrs. Amelia Willard Hillier rises to speak:

A decade or more ago I was for several years a contributor to this paper. Since that time I have quite lost sight of the paper, yet not forgotten the pleasant circle I once met there. I have often thought of the congenial spirit that prevailed there, except now and then one for variety's sake would "drum on a tin pan and set the bees a-humming," which was so much enjoyed that the act could not be justly condemned. Recently through the medium of the pen of a relative I was informed that a somebody (a stranger to me, I presume) wished me again to write for the paper. The request revived many pleasant memories of the past, hence I decided to comply. I have frequently meditated over the changes in homes a decade of time will make and as it has in our own it no doubt has to some extent in all others that I have met in the "Home Circle" of this paper. At that time our children were at home and we resided on Hillier Hill, the old homestead in Springfield, fourteen miles from the capital city. Now my husband and I dwell mostly alone in Waukegan, a village of about 600 inhabitants some ten miles by rail to Madison and four and one-half miles from our old home. Our four boys are married. The eldest resides in Iowa, our second lives at Hillier Hill. The third is an official at the Bons Industrial School at Waukesha, Wis. Our youngest son living is an instructor at the Home for Boys, at St. Charles, Ill. Our youngest and only girl, of nineteen summers, has been teaching for the past two years at the stone school house that was erected in the fifties in Springfield, and boards with her brother at Hillier Hill. Her father attended school there when a boy and some are great-grandmothers now who secured all their school education within its humble walls. Some doctors, a lawyer and many teachers learned A, B, C, there. The old stone school house was famous for miles around in pioneer days. It was used for church service until the M. E. church was erected; also for all public meetings and entertainments, and as a town hall, it being near the town center. And excitement ran high at war meetings during the civil war. Many a youth and married man contracted the war fever there and went to the South, leaving the endearments of home for the hard life of a soldier, and many of them now repose "neath the grasses in the sunny South. My daughter brought me home this spring violets and crocuses that she and her pupils had gleaned from the range of bluffs back of the school house where the soldier boys trained before joining the army, and where the liberty pole stood for many years. Oh, where are all those people now who attended school, service, political meetings, etc., thought I, in the old school house? Many sleep in the pioneer burial grounds, many have gone West, a few of the old ones still survive, some are dwellers in Iowa, yet all is well. The descendants of the English, eastern and German pioneers are scattered, yet are useful citizens mostly wherever they may be.

Mrs. Hillier speaks for many who love Among Ourselves, but have allowed the cares of life and the weight of years to prevent their taking part in the meetings of late. Perhaps her coming will bring some of them to their feet once more. We shall hope so.

#### Dressmaking and Millinery, No. 575.

Sylvia Silverthorne, Muscatine, Iowa.

(All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.) While plaids are holding much favor in summer fabrics there is a marked liking for stripes and these are shown in quite as great a variety as are the plaids. Some of the fabrics show the stripe without any change of tone or color, that is it is seen only in the weave, and in this there may be the same variety as when different colors enter into the striping, hairline effects alone or together with broader stripes being noted. Then again the stripes are of two or more colors, or of varied shades of one color. Frequently when two shades are used a line of black marks one side of the deeper tinted stripe. When it comes to trimming these striped fabrics a novelty is noted in the use of lengthwise strips of the material used as a band trimming. These are applied on both skirts and waists, but should be used principally in a way that they are put crosswise of the material. They may encircle the skirt in rows, or in a series of short lengths placed at intervals. In fact they may be used in any way that bias bands would be used, and we are all familiar with the use of these.

For drop skirts and slips to be worn under sheer cotton fabrics lawn is being used, and as this is inexpensive one may have more than one (of different colors), to be worn with any one gown, and variety is thus afforded. Especially do the cotton voiles so much in vogue, call for these, and very pretty effects may be achieved. White or natural color linens are given a

## CANADIAN IRRIGATION LAWS ARE PERFECT

THE Canadian Government looks after the interests of the farmer just as closely as he looks after his own affairs. When the settler goes to Canada he is assured that he will receive just treatment. The justice of the Canadian irrigation laws has attracted the attention of the states in the United States where irrigation is practiced.

There is no question but that irrigated farming is the most profitable farming but the settler should be certain that he is going to get a full and bountiful supply of water for his land and live stock before he depends upon irrigation.

The Canadian irrigation laws provide that no ditches shall be built where it is not an absolute certainty that they will be supplied with water, and plenty of water even during the very driest year. On the great Canadian Pacific irrigation tract near Calgary, Alberta, Canada, the lateral ditches are brought to the highest point on each farm—Thus the expense and work of constructing laterals does not fall upon the farmer, but he is ready to begin farming the moment he enters his land.

The expense of maintaining the irrigation works falls very lightly upon the farmer, too, because he is only required to pay 50 cents per acre per year on each acre of irrigated land for keeping up the ditches, which is much less than the actual expense of the work and this small payment is nothing when the increased yield of irrigated land is considered.

Thus everything is made easy for the settler—He spends no time getting ready to farm but begins at once when he arrives and his water rental is so slight that he hardly feels the expense.

Almost anything can be raised under irrigation in Alberta. Sugar beets produce enormously and every ton can be sold for \$5, this price is guaranteed, and it is a higher price than they usually bring in other sections. Alfalfa is one of the staple crops and it produces forage which makes stock raising a certain and sure profit bringer on a large scale.

Almost any of the cereal or root crops can be raised and the production is large—Good markets at the very door of the settler make farming conditions as nearly perfect as are to be found anywhere.

The man who settles on irrigated lands in Southern Alberta is not a pioneer—He has good neighbors and all advantages of modern civilization that are to be found on the farm anywhere.

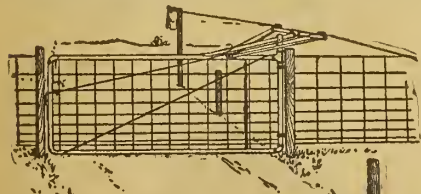

We don't want you to come to Alberta unless you are satisfied that you can do better here than anywhere else. If you will send your name and address we will tell you how to see the country at the least possible expense and how to get a farm that will make you rich. In short, we will prove to you that Southern Alberta is the place you are looking for.

CANADIAN PACIFIC IRRIGATION COLONIZATION CO., Ltd.

nobby effect by the use of a color in collar, cuffs, and vest if such is used in the development of the costume. Brown, rose pink and green are especially favored colors for these, although one may consult her fancy.

The girl's dress shown in 5656 certainly has simplicity for its keynote, but a little study of the design will bring to mind its possibilities of more elaborate development should something in that line be desired. It

5656 Girl's Dress. 6 to 12 years.

may be made of the simplest material, and one used throughout, or embroidery may be used as shown or in any manner desired. The square, half-low neck is so appropriate for summer, and the gathered epaulettes add a charming touch. Embroidered flouncing may be used for the full skirt, and all-over or alternate rows of insertion and the ma-

terial may be used in the waist. Wide embroidery may be used for the epaulettes or they may be of material trimmed with narrow edging of embroidery. The elbow sleeves are just the thing, but if full length sleeves are wanted at any time they may be cut by the pattern, allowance being made for length desired. Pattern 5656 is cut in sizes for girls of 6, 8, 10 and 12 years. Give age when ordering pattern.

The Princess Jumper gown seemed such a novelty at first that I hesitated about offering it, but now that it is becoming common many of us will be wanting one, and certainly a very simple development is shown in 5643. But right here will you make a note of this, that the guimpe is not

5643 Princess Jumper Gown. 32 to 40 bust.

part of the pattern. In fact the Jumper gown may be worn with any lingerie or fancy waist just as you would wear a jumper waist. Tucks adjust the fullness at the waist line in girdle effect, and these may be varied in depth in fitting the garment. I cannot imagine any difficulty in the management of the pattern. 5643 is cut in sizes for a 32, 34, 36, 38 and 40 inch bust measure. Give size when ordering pattern.

## OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

### LAW QUESTIONS CONSIDERED.

#### MAIL BOX NOT A FIXTURE.

Mr. John L. Gourley, Villisca, Iowa.—A sold his farm to B, making no reserve or mention of the mail box, and now B objects to A removing the box. Who is lawfully entitled to the box?

Answer.—The box is not a fixture, but personal property belonging to A, and he has a right to remove it.

#### RIGHT OF WAY—DRAINAGE.

A Subscriber, Grinnell, Iowa.—A owns a farm on the upper side of a railroad, and B owns a farm on the lower side of it, contiguous. In draining their lands, it is desirable to connect their tile drains. Can either or both compel the railroad company to give them the right to construct the tile drain through its right of way?

Answer.—Either party or both can compel the railway to give the right of drainage across its right of way. See page 677 of the Code of Iowa, Sec. 1955. In all such proceedings it is advisable for the party to engage a competent attorney to manage the matter.

#### DOWER—DESCENT.

An Illinois Subscriber.—A and B were husband and wife. A deserted his wife. Shortly afterwards the wife bought a house and lot in town with her own money, and took the deed in her own name. A never lived with her or supported her afterwards. Ten years after she bought the property she died. Before her death she deeded the property to her sister, who is still living. A is still living. (1) Is A entitled to any of this property under the laws of Illinois? (2) Has the sister of B a good title to the property?

Answer.—(1) If B left a child or children, or descendants of such, her surviving husband, A, is entitled to dower in said house and lot, that is one-third of it, for his natural life. If B left no children or descendants A is entitled to one-half of the house and lot. (2) B's sister has not a good title to the property because it is subject to either the dower right of A, or to his right to half absolutely, according to whether B had heirs surviving her.

#### PROPER VOTING PLACE.

A Subscriber, Moorhead, Minn.—A owns a section of land in a certain township and county in this state. There is a town in the township. There is a voting place in the township for the residents who live there outside of the town limits, and there are voting places in the various wards of the town for the residents thereof. In November, 1906, A rented his land to B and moved into the town, reserving, however, a room in the house for his use, and leaving a lot of stock on the farm. The spring election is held on the second Tuesday in March. Has A a right to vote in the township voting place?

Answer.—We think that he has not a right to vote in the township vot-

ing place, but at the ward voting place in the town where he has his residence.

#### CONSTRUCTION OF LEASE.

A Subscriber, Webster City, Iowa.—A rented a farm from B. In the lease is the following language, viz.: "A gives two-fifths of all grain delivered to market, and two dollars and fifty cents (\$2.50) per acre for all hay and pasture land." Under this clause can B compel A to pay for roads, lots and yards at \$2.50 per acre?

Answer.—He cannot.

#### LIVE STOCK—ADJOINING FARMS.

Mr. John N. Anderson, Stanton, Iowa.—A and B are neighbors owning adjoining farms. A has two pastures. In one pasture he keeps his bull and cows, and in the other he keeps his young heifers. This last named pasture adjoins B's pasture, in which B keeps a bull. A fears that B's bull will break through the fence and serve his heifers. Can A compel B to tie up his bull?

Answer.—He cannot. If the fence is a lawful fence and the bull breaks through it and injures A's stock he can recover damages from B, and if the fence where the bull breaks through is not lawful, but is the part which B is bound to keep in repair, B would be liable for damages, but one man cannot compel another man to tie up any animal on his own premises.

#### HEDGE FENCE—OWNERSHIP.

A Subscriber, Shamhaugh, Iowa.—A owned a farm of 160 acres, and a farm of eighty acres adjoining. He lived on the larger farm, and his son lived on the smaller one. There was a fence between the farms. The north eighty rods of it was hedge that had grown for years, taking up land on both sides of the division line. The south eighty rods was part hedge and part wire. The hedge part was kept trimmed. A died, and the farms were sold six years ago. B bought the 160-acre farm and C bought the eighty-acre farm. B claimed that the big hedge belonged to him, and he took some of it for posts. The land he bought has changed hands twice since he owned it, and each owner has taken posts from the big hedge, but C, the owner of the eighty-acre farm, has never taken any. I have just bought the land from C and he says I am entitled to half the hedge. What is the law about it?

Answer.—You are the owner of half the hedge and the owner of the adjoining land owns the other half. If the hedge is to be removed, each one is en-

AUGUST POST, MOULTON, IOWA.

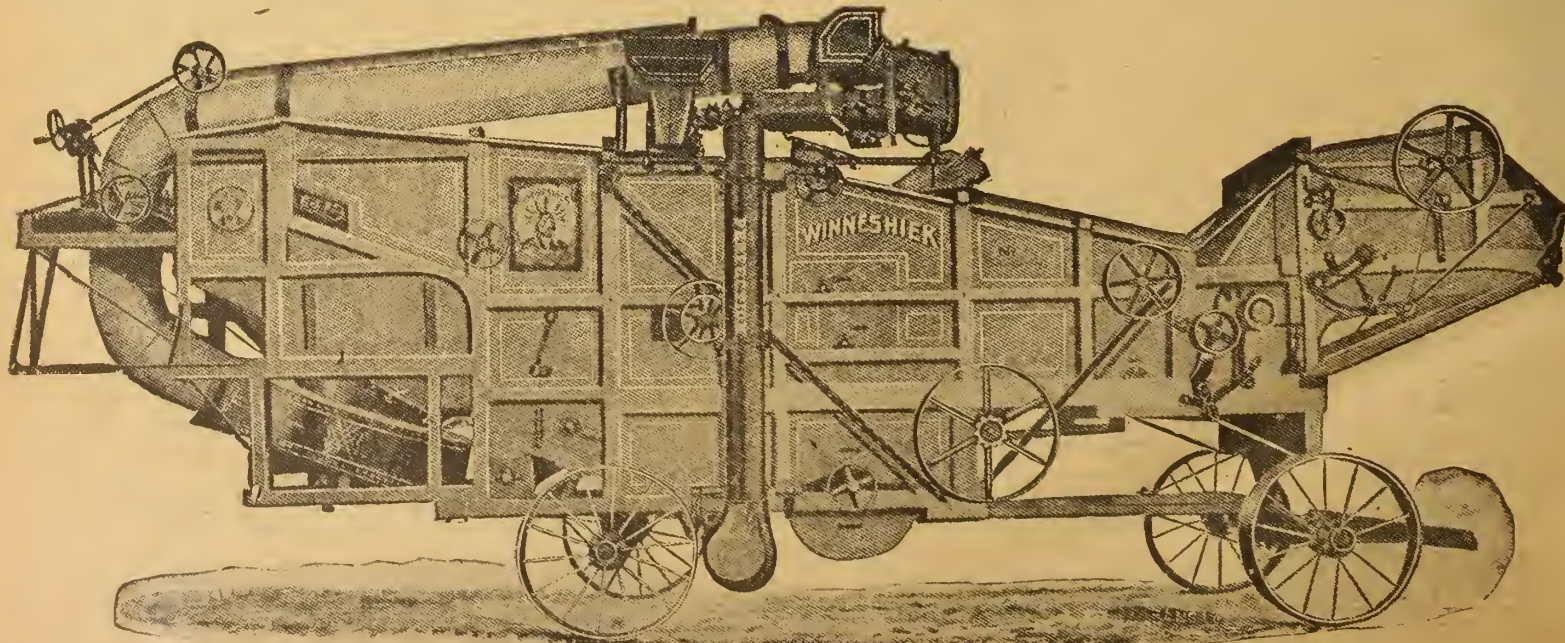

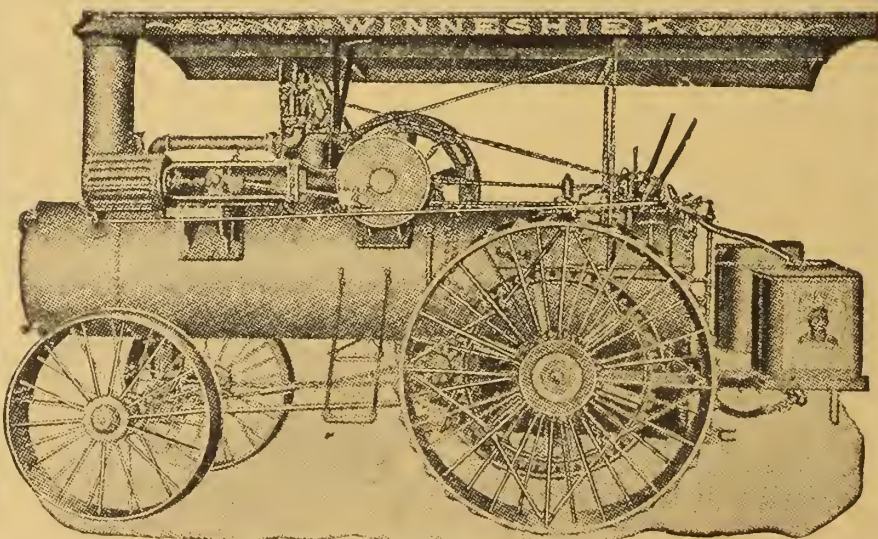

titled to half of it, or if posts are cut from the hedge each one is entitled to half of them, but neither one can remove the hedge or destroy it as a fence without the consent of the other. Better come to an agreement

about the matter without a lawsuit.

#### UNFAIR ASSESSMENTS.

A Subscriber, Forest City, Iowa.—In Forest township, farms of 160 acres, from six to eight miles from town, are assessed for taxation at \$2 less per acre than twenty and forty-acre farms adjoining the town limits. The 160-acre farms could not be sold for more than \$60 per acre, while the small farms adjoining the town are worth \$100 per acre without improvements. Again, land just out of the town limits is valued at \$35 per acre, and adjoining land inside the limits is valued at \$60 by the assessor. The township trustees as a local board of review refuse to equalize and adjust this inequality of assessment, and the county supervisors refuse to change it. (1) What legal remedy is there if any? (2) Is there any appeal from the decision of the township trustees?

Answer.—(1) There is probably no adequate legal remedy for the situation. The real remedy is political in its nature. It consists in electing trustees who have more sense of proportion in the relation of things to each other. (2) An appeal may be taken from the decision of the local board of review to the district court. This appeal is taken by giving written notice to the presiding officer that such appeal is taken. It would be advisable to have a lawyer conduct the proceedings. This is the only legal remedy, and does not work very satisfactorily. The county

We are pleased to call the attention of our readers to the Winneshiek line of traction engines and grain separators as illustrated above and which are furnished by the Cascaden Manufacturing Co., of Waterloo, Iowa, the big "one price factory" which is advertising to save buyers of thrashing machinery fully one-third on all styles and sizes of engines and separators. Their advertisement which appears on page 8 should interest every reader of this paper. The Cascaden Mfg. Co. was established in 1870 and is now making an extensive line of goods in one of the largest and best equipped plants in the country.

board of supervisors has no power to raise or lower the assessments of individual taxpayers, but only to adjust assessments of the several townships, cities and towns in the county.

#### VETERINARY CHARGES.

A Subscriber, Denison, Iowa.—Please state the rate of mileage and fees which a veterinary surgeon is allowed by law to charge for his services?

Answer.—The charges of a veterinary surgeon are not regulated by statute and probably cannot be. They are a matter of private contract, and if no contract be made as to the amount, and a dispute arises concerning the same, the veterinary surgeon can recover by law what he can prove his services are worth, and no more.

#### DAMAGE BY DOGS.

A Subscriber, Shenandoah, Iowa.—(1) Has the owner of a female dog the legal right to allow it to run at large about the country? (2) In case dogs collect together and get into my sheep pen, can I recover damages from the owners of them?

Answer.—(1) There is no state law prohibiting dogs of either sex from running at large in Iowa. (2) If the dogs cause damage, you can recover the amount of such damage from the owner, and if you find them in the act of worrying, maiming or killing your sheep, or any other domestic animals, you may lawfully kill the dogs at once.

#### DORMANT JUDGMENT—REVIVOR.

A Subscriber, Red Oak, Iowa.—C was surety on some promissory notes held by A against B. In 1898 A tried to collect the notes from B, but B had no property. A got judgment and filed it against C's land in Nebraska. When will the judgment have to be renewed according to the laws of Nebraska?

Answer.—In Nebraska a judgment can be kept alive by having executions issued on it not less than five years apart. If an interval of time exceeding five years elapses wherein no execution, the judgment becomes dormant, but it can then be revived by proceedings in court.

#### STREET—CONDEMNATION PROCEEDINGS.

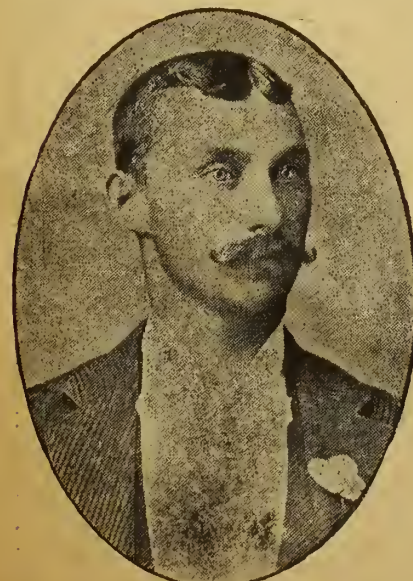

A Subscriber, Chester, Neb.—A deeded to B a tract of land adjoining the town limits of an incorporated town. The town has set apart a strip of land forty feet wide, next to B's land for the half of a street. (1) Is B required by law to give a forty-foot strip of land adjoining it, for the other half of the street? (2) The town put down a well on B's land within forty feet of the division line, six years ago when A owned the land. It was put down without A's consent. Who is the owner of the well?

Answer.—(1) B is not required by law to give any of his land for part of the street. It can be taken for such a purpose by condemnation proceedings in which B would be given full compensation for the land taken. (2) The well belongs to B.

#### SURGICAL EXAMINATION.

A Subscriber, Williamsburg, Iowa.—I called at the office of a surgeon and told him I wanted an operation performed for hernia, and asked him what he would charge me therefor. He made an examination of me and stated his price. I then told him I would go to other places and if I concluded to have him perform the operation I would come back. I went to another doctor and he examined me, and stated his price, and I engaged him to perform the operation. The first named surgeon now demands a fee of me for consultation. I did not ask his opinion or advice, but only what he would charge for the operation. Can he recover a fee for consultation?

Answer.—You ought to be willing to pay him a reasonable fee. You bothered him about your ailment and submitted

to an examination; probably he could not make an estimate of proper charges without an examination. He could probably recover a reasonable fee for the examination.

#### STOCK INSPECTION—MINNESOTA.

A Subscriber, Jefferson, Iowa.—(1) A neighbor of mine shipped his live stock by rail, from Iowa into North Dakota. When he reached the Minnesota line he was compelled to stop and have his horses examined by a veterinary. The authorities informed him that he should have had the examination made before he started. What is the law about the matter, and who should pay the charges for examination? (2) For what length of time can a railroad company hold emigrant cars on a side track, according to law? (3) If live stock is injured in the cars by reason of the crews making flying switches, and jamming cars together violently, can the owner recover damages from the company?

Answer.—The State Live Stock Sanitary Board has power to regulate or prohibit the arrival and departure of stock, under certain conditions, and may detain animals if diseased, at the owner's expense. See Sec. 2158, revised laws of Minnesota, 1905. (2) The statute law fixes no specific time. (3) In such a case the owner can recover damages.

The Homestead and The Homemaker  
\$1.25 per year.

**BE WISE BUY LAND**

**Come to Texas Now**

The time to visit the big new opening of fertile land at Mendota, Hemphill County, Texas, is now — this Summer — not a few months hence when the land is all sold to farmers and every acre has gone up \$5 to \$10 in price.

To-day you can get some of this splendid land as cheap as \$8 an acre, but that low price cannot possibly last long. The Mendota Colony Farms, now being sold by the Colony Farm Homes Association, consist of about 25,000 acres of land in the Eastern part of the Panhandle of Texas not far from the Oklahoma line—all within 6 miles of Mendota on the main line of the Atchison, Topeka and Santa Fe Railway.

The land was recently sold by cattle men who have held it for years. In the Red Deer and Washita River Valleys. It is tight soil, very fertile and has abundant water by rainfall and by natural underlying water-sheet. Adjoining land under cultivation for several years produces bountiful crops of wheat, corn, oats, alfalfa, potatoes, etc. Healthful climate. No alkali. No gumbo. Country rapidly settling. Canadian, county seat, town of 1,200, only 11 miles away. College, schools, churches, telephones, etc.

Prices Mendota Colony Farms now \$8 to \$18 an acre. Payments extending over 4 years. See the land on next Homeseekers' Excursion. Write to-day for full information and illustrated literature giving particulars. Even if you cannot go now it will pay you to get information at once.

**The Colony Farm Homes Association**  
21 Equitable Building, St. Louis, Mo.

**\$1.00 Down AND A DOLLAR A MONTH PER ACRE**

**BUYS A FARM** in the Gulf Coast country of Texas. Larger farms, one-fourth cash, balance, one, two and three years. Fifteen dollars per acre. No interest, no taxes. Oklahoma farms, Texas ranches very reasonable. Write or call on **EASTMAN & SHAW, ENID, OKLA.**

**TEN : CENTS : AN : ACRE**

FOR the best farming land on the continent. A 160 acre farm for \$16.00 (the government filing fee) in GOD'S COUNTRY, its rolling prairie covered with velvety verdure, and it's yours if you will come and get it. It's less than five miles from the Great Northern Rv. in the land of opportunity—Montana. Don't pay any more rent. You can get a round trip ticket from St. Paul for \$25.00, and if you come and see it you'll throw away the return trip stub. For further particulars address **Leo B. Coleman, Glasgow, Montana, Secy. Commercial Club.**

**FOR SALE OR EXCHANGE.**—One of the choicest and best improved farms in Southwestern Minnesota, containing 520 acres for a smaller farm. A few smaller improved farms for sale on the crop payment plan, and Western Kansas farms for sale on easy terms. For particulars address L. H. Mulhall, Sioux City, Ia.

**FARMER! STOCK GROWER!**

**AVOID** the blizzard swept prairies of the North, the stifling heat of the Southwestern plains.

**Come to Northern Minnesota!**

Enjoy life in a timbered country, where water is pure, soil strong and quick, climate mild, and where you can buy of us, close to good markets, in any sized tracts, bordering on lakes and streams, rich natural grass lands at from 10 per acre up, **IF YOU ACT QUICKLY.** Send for Maps and Folders, with views taken on these lands. There is timber enough, in many cases, to more than pay the price we ask. Address **ROGER C. SPOONER, President, Donald Land & Lumber Co., Bemidji, Minn., Drawer N.**

FIELD NOTES.

Buff Cochins, both new and old stock, are offered for sale on page 8 by Mrs. Amos Hanson, Collins, Iowa. Being overstocked with poultry, exceptionally low prices will be made to buyers. Write this advertiser for fuller particulars of the offering, mentioning this paper.

Mr. Wm. Bartlett, of Pierce, Neb., is one of the successful Chester White breeders in the West, and has an excellent crop of spring pigs this year. One of his sows raised a litter of nine pigs this year that averaged considerably over 100 pounds at four months. He will have some good things to offer the boys this fall.

Mrs. Margaret C. Daly, of Anamosa, Iowa, is now offering a few pens of good breeding Black Laughs in order to make room for her young stock. These pens consist of five hens and one cockerel and they are priced in the advertisement on page 8, as well as eggs from this breed of poultry. When you write kindly mention The Homestead.

Some fine Ohio Improved Chesters are offered on page 17 by Mr. H. C. Mehrling, Manson, Iowa. They include fall gilts, bred or open, mature sows and boars, all at prices that Mr. Mehrling believes should prove attractive. He is also offering some sheep which are as good as pure-bred, but cannot, however, be recorded. Write your wants, mentioning The Homestead.

Red Duke 185361, a six-year-old Short-horn bull, bred by Messrs. Alcott Bros., of Brucefield, Ontario, is offered for sale by Messrs. Reisser Bros., of Sanborn, Iowa. His sire was Vice Royal 140883 and his dam Susie 2d by Lindeu Chief. He will weigh 2,200 pounds, and as Messrs. Reisser Bros. cannot use him in their herd any longer, they will sell him for \$125. Anyone wishing such a bull should write them at once, mentioning The Homestead.

Mr. F. E. Garrett, who is doing great stunts in breeding Duroc Jerseys at Lohrville, Iowa, is now offering two splendid fall boars sired by I Am a Wonder. He also has others of equally noted breeding, among which are two out of the \$620 sow, Cambridge Girl. He also offers one yearling by Oriou, the old boy himself, and one by Proud Advance. In fact, he offers a little of something extra fine in different lines, and if you will write him he will be glad to tell you of his offering more in detail than we can. Kindly mention this paper in any inquiry you might make. See page 15.

Mr. W. J. Wendt, of Marcus, Iowa, has 160 Duroc Jersey spring pigs this year and they show up well at this time of the year. They are mostly sired by Wouder C., a son of old Crimson Wonder, and Lottie's Top Notcher, a son of Top Notcher Agaiu. Mr. Wendt is one of the well-known breeders in northern Iowa and if nothing goes wrong this year he will be in excellent shape to supply his trade this fall. There isn't a big-eared, ungainly pig in the bunch this season, and one could easily pick out the making of a good herd boar. Just keep your eye on Mr. W. J. Wendt and his crop of pigs this year.

With this week's issue we start the Duroc Jersey advertisement of Mr. J. S. Golder, of Scribner, Neb., who has one of the good herds in the West. He has 175 spring pigs, mostly sired by Gold Dust Critic 59403, one of the best sons of Glendale Critic, and other good boars. He writes as follows: "I have four good half brothers to the great Junior Jim which I think will make good boars. I don't care to sell anything until after September 1st, but I will have some good ones then, and they are bred in the best blood of the leading winners." If any of our readers want a pig they cannot do better than to book an order with Mr. Golder.

Messrs. Demme Bros., of Emerson, Neb., are young breeders of Poland China swine and Short-horn cattle and they are building up two good herds. At the head of their Poland China herd stands Ideal Tecumseh and Columbia's Standard, and the most of their spring pigs are sired by these two hogs. They have recently purchased a new boar to assist in the herd, and they are breeding him for fall litters. They have ninety spring pigs, together with about forty good fall sows, and these will be ready for their trade later in the season. At the head of their Short-horn herd is the three-year-old bull, Perfection, a son of Banner Bearer, purchased of Messrs. Lee & Prentiss. He is a thick-fleshed, low-down, blocky bull, with a nice head and horn, and he is doing good service in the herd. The boys have about fourteen head of registered cattle, but are building up as rapidly as they can. They

# I Cure Catarrh To Prove it I Will Send

To every reader of this paper or any of their friends having Catarrh of the Head, Nose or Throat or Constitutional Catarrh in any manner, shape or form.

## One Months FREE Medicine

This offer is the fairest, most liberal one ever made the readers of this paper. I want every person having Catarrh to accept it. I want to convince them that any form of Catarrh can be cured. I want to prove to those who have used many different remedies and failed to get the cure they wanted, that it was the fault of the remedy or treatment they used and not because their case is incurable.

My treatment is the right kind; I want to prove to every afflicted person that it reaches the cavities of the head, nose and throat, purifies the blood and penetrates every part of the body wherever Catarrh germs can possibly locate. That is the reason my treatment cures when others fail. It removes the cause first; then the symptoms. Then, and then only is the disease really cured. If that is what you want, write to-day.

### Send Your Name and Address For Free Treatment

A letter or on a postal card will do. Just say that you have Catarrh. I will send you the medicines you need for one month's treatment free of charge, without putting you under any obligations to me whatever. I simply want to show you how easy and quick Catarrh can be cured with my new system of treatment. Don't put this off but write to-day to

ter of seven sired by American Lad. These are very smooth. There are some tops in every litter raised this year. One of the best sow pigs ever raised is out of Peerless Block V by Crimson Wonder I Am. There is also a very fine boar pig in this bunch, the same quality as many other winners that have come from this herd. The dam of this pig is a daughter of Leo Tolstoy, a litter brother to Tientsin, the sire of the great sow, Ruberta. Mr. Davidson will have some choice boars to offer this year and the wise ones will make a journey to his place early enough to select a winner.

W. J. Stone, of Lyons, Neb., reports about fifty head of Duroc Jersey spring pigs this year. Mr. Stone usually has over 100, but this year the season was not just to his pigs' liking. He is endeavoring to make hogs of these, and will have a few choice things to offer the boys this fall. These are sired by the noted sweepstakes boar, Crimson Wonder I Am, out of an Iowa Wonder sow. He has three or four litters by Orion's Redeemer, and two litters each by Royal Pride and Logan Pride, both grandsons of the sweepstakes sow, Royal Blossom 5th. These pigs are all out of Proud Advance sows. There is also a litter by Capadura by Duroc Challenger, out of a granddaughter of Young John. Mr. Stone made a good sale last winter and he will be with the boys again this winter, and will also have some nice boar pigs for sale this fall.

One of the splendid herds of Short-horns that is building up in northeast Nebraska is owned by S. S. Hall, of Pender. Mr. Hall will be remembered as one of the breeders who made a successful sale at Wisner last fall, and the cattle that he sold there have given good satisfaction. He has about forty head in the herd, headed by the Scotch bull Morning Star. He is a son of Prince Gerald and out of the 1,600-pound cow, Roan Bess, considered one of the best cows in the herd of J. D. McDermott, Anita, Iowa. Including calves and he has about twelve to fifteen head of Scotch cattle, largely of the Duchess of Gloster, Orange Blossom and Butterfly tribes. Emily T., a straight Scotch cow, has two nice heifers by Royal Cup-bearer, and he has about ten calves so far this spring sired by Morning Star. Mr. Hall also has a superior lot of Scotch-topped cows in the herd and it is his intention to make it one of the most select herds in the state.

Chas. Warner, Pender, Neb., one of the well known breeders in northern Nebraska, has a nice crop of Duroc Jersey spring pigs this year, and will have some good boars for sale later in the season. These are sired by Gold Bug Jim and Bar None Hero. Mr. Warner's two herd boars, and he also has a number of litters by Grant Hero and Russell's Choice. He is now using West's

# PILES

## FISTULA--NO MONEY TILL CURED

R. Lattimer, General Merchant, Imperial, Neb., writes: "I will say that after sixteen months from discharge from your treatment for Ulcerated Piles of fifteen years' standing, I have had no recurrence of the trouble and consider that I am permanently cured. Eight persons of this locality with whom I am acquainted, have been cured by you, and I believe they will stay cured."

All diseases of the rectum treated on a positive guarantee and no money accepted until patient is cured. Send for free 352 page book, a treatise on rectal diseases and hundreds of testimonial letters, valuable to anyone afflicted. Also our 132 page book for women. Both sent free. Address either our St. Louis office or

Duroc, a son of Noble King, and many of his fall litters will be sired by this hog. One of his best litters is out of Long Price, the sow that he paid \$113 for at Carey Cameron's sale last winter. The pigs are sired by Russell's Choice. Another good litter is out of his old brood sow Glendale, and the pigs are by Gold Bug Jim. He also has five good litters out of daughters of Old Acme and these are sired by Gold Bug Jim and Bar None Hero. Later in the season Mr. Warner will have something to say through the Homestead advertising columns, when we will again call our readers' attention to his herd.

Mr. Jas. P. Milliken, Media, Ill., is the owner of one of the good Galloway herds of the central West. At the head of his herd he has the noted prize-winning bull, Imp. McDougal 4th. He has probably won as many ribbons as any bull of the breed. His calves are showing up well this year. Mr. Milliken recently purchased an imported bull from the well-known breeder, Mr. O. H. Swigart. He is called Imp. Tarbroech Earl, by Great Scot and out of a daughter of Harden from a Scottish Borderer dam. Mr. Milliken is offering some good young heifers for sale, also a yearling bull, Baron of Corn Belt. The herd is founded upon correct lines and those interested in good Galloways will do well to write Mr. Milliken as per his announcement on this page of this issue. Prices are reasonable and the herd is worthy a visit from breeders in search of good breeding stock. Kindly mention The Homestead when writing.

Mr. Chas. Van Patten, of Sutton, Neb., writes us under recent date that his spring crop of pigs are doing fine and that he expects to be at the fair this fall with some extra good ones. He also states that his herd leader, Brooklyn Boy, is coming fine, and he considers him a hog that is sure to make his mark. He is the son of the great Keep On, having for his dam Lady Advancer, by the Great Advance. On this page of The Homestead will be found a photograph of his new hog house, which we consider a model hog barn and it might be well for those who are contemplating building a new hog house in the near future to write Mr. Van Patten for the plans for this house. It can be built at a moderate price, and affords abundant light, which is so necessary in starting the young pigs off on the right track. His this year's crop of pigs numbers about 90 and we wish to say that they are among the growthiest that we have looked at this year. He would be glad to hear from prospective buyers and he is sure he can supply your wants. When writing please mention The Homestead.

Mr. Geo. E. Patch, of Blandinsville, Ill., is offering some good spring pigs for sale at reasonable prices in his announcement on page 17 of this issue. Mr. Patch has in use in the herd the two-year-old boar Correct Mischief 40843 by Corrector 63379, dam Merry Maker 93561 by Mischief Maker 30216. This boar has produced some of the best pigs in the herd. A litter by him that attracted the attention of the writer is out of Maidette 87663 by Klever's Ideal 28438 by Ideal Sunshine 22985. Another litter by this boar is out of U. S. Sunshine 97661 by Sunlight 31130 by Perfect Sunshine 61129. One of the best sows in the herd is Miss Light 87662, she by Searchlight C. 66728 by Perfection Chief 30073. Her litter is sired by Grand Success 36881 by Perfect Success 29110 by Perfect Perfection 24235, dam Miss Tecumseh (65403) by Chief Tecumseh 2d 9115. A good litter of May pigs is out of Darleen (108570) by Top Chief. This litter is also sired by Grand Success. Mr. Patch has two good fall gilts by Grand Success and out of the sow mentioned above that he is offering for sale at \$20 each. These will do well in any herd. Mr. Patch prices his stock within the reach of farmers and will be pleased to hear from Homestead readers in the market for good Poland Chinas. Write him, mentioning The Homestead.

### RHODE ISLAND REDS.

On page 8 of this week's paper will be found the advertisement of Mrs. F. W. McIntyre, of Red Oak, Iowa, who offers chicks from standard Rhode Island Reds at \$3 per dozen. Write her and send her an order.

### ANGUS BULLS.

A few good yearling Aberdeen Angus bulls are offered for sale by Mr. M. B. Walker, of Clarinda, Iowa. These bulls are ready for service and are good individuals. He also offers a few good cows and heifers for sale at very reasonable prices.

### HEREFORD BULL FOR SALE.

A good young Hereford bull is offered for sale by Dr. E. W. Gammon, of St. Charles, Iowa, also some splendid polled Hereford bulls and heifers. He has one of the best-bred Polled Hereford herds in this country. Write him or go and see his cattle.

### FLYNN FARM SALE.

The well-known Flynn Farm Co., whose large and beautiful stock farm is situated nine miles northwest of Des Moines, Iowa, claim November 7th for their regular sale of Short-horn cattle. It is the intention to present at that time a class of animals fully equal and probably better than has ever been offered in previous sales. Every Short-horn breeder should pin this date in his hat and plan to be in attendance. More detailed announcements will appear in due time in our columns.

### McKELVIE'S POLANDS DOING WELL.

A recent letter from Mr. Homer McKelvie, of Fairfield, Neb., informs us that his spring pigs are coming along fine. He has quite a variety of breeding, having pigs from nine or ten good sires. Among them are sons and daughters of Grand Look 38405, the sensational yearling boar of 1906. There are also pigs by such boars as Expansion 67901, Blain's Tecumseh 2d, and many

other boars that have been among the leading producers of the Poland China breed. He states that he is ready to receive visitors or book orders for these pigs. Write him your wants and you will be properly treated if you place your order with him. When writing please mention this paper.

### IOWA FARMS TO RENT.

Renters should look into the offer made by a Laurens, Iowa, land firm on page 13. They have several farms to let out and will open negotiations to this end at once. They also have a nice list of farm lands in different parts which they will be glad to describe to interested parties. Write them to-day mentioning The Homestead. Address, The Allen Land & Loan Co., Laurens, Iowa.

Mr. J. C. Porter, of Ogden, Iowa, recently purchased of Messrs. Manley & Co., of Lyons, Neb., a son of Proud Advance to head his Duroc Jersey herd. In a letter to the above firm he writes: "Messrs. Manley & Co. Gentlemen.—The boar arrived last evening at 5 o'clock, in good shape, and he certainly is a good one. I am well pleased with him." This boar is a son of the great Proud Advance and his dam is the same breeding as the great sow, Alix II., the undefeated sweepstakes sow of 1905, and the highest-priced sow ever sold at public sale. This boar should do Mr. Porter a lot of good, as he is bred along the most popular blood lines.

### HERD BOARS FOR SALE.

Messrs. Manning Bros., of Chillicothe, Ohio, have one of the good herds of Duroc Jerseys to be found in Ohio. They have bought carefully and have paid good prices, and while they have not the largest herd it stands well in the front ranks. At the present time they are offering two good boars for sale. They are Top Sensation by old Sensation, and Czarina's Choice by Choice Goods, a boar that did much for the herd of Mr. Ira Jackson, and sired Golden Rule. The breeder of Durocs who is in the market for a tested sire will find in either of these two boars the kind that will suit the most discriminating buyers. Write at once for descriptions of the boars mentioned. They will be priced reasonably. Kindly mention The Homestead when writing.

### OREGON BREEDERS TAKE VALUABLE SHORT-HORNS.

Mr. N. C. Marris, of Portland, Ore., has recently made several valuable purchases of Short-horns for the herds of Mr. John H. Garrett, of Mountain Home, Idaho, and Mr. W. O. Minor, of Heppner, Ore. Included in the purchases was Golden Goods at \$3,500 and a heifer from the herd of Mr. H. C. Duncan, Osborn, Mo.; Viscountess of Fairview 6th from the herd of Purdy Bros., Harris, Mo. This was the junior champion heifer at the International show last December. Slippers, a roan two-year-old heifer, was secured from the herd of J. G. Robbins & Son, Horace, Ind. This is said to be the highest-priced female in the shipment. A young bull and heifer were taken from N. H. Gentry's herd at Sedalia, Mo. Mr. Marris attended the Thomas, Jameson & Mitchell sale at Kansas City and bought the show bull, White Goods, the two-year-old heifer, 47th Duchess of Gloster, and a cow with heifer calf at foot by White Goods. All go to the Northwest to be shown at the leading fairs on the western coast and for the improvement of the Short-horn in the West.

### DREAD NAUGHT 18229.

One of the splendid Duroc Jersey herd boars recently come to Nebraska is Dread Naught 18229. He is a son of the noted boar, Kan't Be Beat 10239, and his dam is Rubertha by Top Notcher by Orion II. He is a September yearling and was bred by Messrs. Watt & Foust of Ohio. The purchasers are Messrs. Manley & Co., Lyons, Neb.; John H. Tyron & Son, Lyons, Neb.; Geo. Blessing, Homer, Neb., and C. F. Kirk, Ponca, Neb. He was selected by Mr. Bert Manley after visiting all the leading eastern herds. He is a richly-colored, deep-bodied and well-lined hog, with good length of body, and excellent feet and legs. He has a good head and ear and a nice ham and is one of the smoothest hogs in the West. He will be brought along for the fall shows and the various breeders will have an opportunity of seeing him at the fairs. Messrs. Watt & Foust say he is the best hog ever turned off their farm. His dam was the dam of the first-prize two-year-old sow, one-year-old sow, under year and under six months sows at the New York and Kentucky State Fairs, and she is also a litter mate to the sow that won championship at the Illinois State Fair. Dread Naught was a

### TOO LATE TO CLASSIFY.

## 19 Fall Proud Advance Boars For Sale

ALSO seven Junior Jim fall boars and one good Orion boar for sale. These are all out of Orion Dandelion, and Proud Advance dams. If you are in the market for a herd boar, be sure to write us. We have the kind you are looking for. Address, **MANLEY & CO., LYONS, NEB.**

## EVERGREEN: HERD: HEREFORD: CATTLE

ST. ELMO 13th 92074, KEEP ON 23d 125151 AND TROT ON 181064 HEAD HERD. 20 Bulls 10 to 14 months; some fine material for herd headers in this lot. COWS and HEIFERS. Write for prices or come and see them, as we have the quality that will please you, and prices right.

KATER & SMITH,

GRANT CITY, MO., C. B. & Q. R. R.

## TWO SPLENDID FALL BOARS

Sired by I Am a Wonder, dam the \$1,500 Ruberta; two out of the \$620 sow, Cambridge Girl, litter sister to Ruberta, one yearling by Orion 5293; one by Proud Advance. Will also price a few sows bred to Tientsin, "Sire of Ruberta," prices right.

F. E. GARRETT,

LOHRVILLE, IOWA.

## 175 Duroc Jersey Spring Pigs.

Sired by Gold Dust Critic 59403, one of the best sons of the great Glendale Critic, and other good Duroc boars. Have five splendid half brothers to Junior Jim that will be ready to go soon. Address

J. S. GOLDER,

SCRIBNER, NEB.

winner of first prize himself at New York and Kentucky State Fairs. He is without doubt the best Kan't Be Beat ever seen in the West.

### SUTTER HAS A GOOD DUROC JERSEY BOAR FOR SALE.

Those in the market for a good yearling boar, should write Mr. Wm. Sutter, of Liberty, Neb. This boar is the son of the great prize winning Billy K. and having for his dam Vans Lady by Vans Perfection, the sweepstakes boar of three state fairs, and the sire of many of the highest price Duroc's ever sold at public auction, including the \$1,575 Rosebud Lady. He is extra well bred and from the looks of the spring crop of pigs now on Mr. Sutter's place that are sired by him he would be a profitable boar to be added to any good herd. Write Mr. Sutter for price and description. Mention this paper.

### TRYON & SON'S DUROC JERSEYS.

Among the many good herds in northeast Nebraska, is that of Messrs. John H. Tyron & Son, of Lyons, Neb. When the Duroc Jersey breeders in Nebraska could be counted on one hand, we first met the senior member of this firm, and he was buying the best things offered. Since that time he never was found guilty of purchasing an inferior sow. To prove our statement we need only mention that at their last sale they averaged \$116, and breeders were there from several different states. This year they have eighty spring pigs and a few fall gilts. These are sired by Junior Jim, Crimson Choice, W's King, Improver Lad 2d, Jumbo John, Mo. Gold Finch, Crimson Critic and other leading boars. A daughter of Glendale Critic has a splendid litter by Crimson Choice and a daughter of old Orion has a good litter by W's King. Lady Onward by Carmine Wonder (a half brother to Crimson Wonder) has a nice litter of six pigs by Improver Lad 2d, and a daughter of Dandy Orion has a nice litter by Jumbo John. Messrs. Tyron & Son own one-fourth interest in the boar, Dread Naught, recently purchased by four of the leading breeders in northeast Nebraska. They formerly owned an interest in Junior Jim and they always endeavor to keep in the front of the procession. They will have something to say to Homestead readers later in the season, and expect to have a lot of nice boars for sale about fair time.

### A PROMINENT LIVE STOCK AUCTIONEER.

Homestead readers, at least very many of them, have met Mr. F. O. Cubbage, of Battle Creek, Iowa, at many of the leading ring sides. Mr. Cubbage has been acting in the capacity of live stock auctioneer for many years and is a man of pleasing manner and possessed of ability in his chosen profession. Not only has he had plenty of experience, but is well versed in pedigrees of the various breeds of live stock, more particularly that of pedigreed swine. Mr. Cubbage has been putting up sale tents all over the state of Iowa for a number of years, and does so in a very able manner at very modest prices. He is making a striking announcement to the live stock breeders of the middle West when he offers his great sale tent, erected free of charge on any and all sales at which he is employed as auctioneer; and when not so employed will still furnish tents at very low rates. He has a great number of these sale tents and can accommodate quite a number of sales on the same date. He has a number of able lieutenants who will take charge of the other tents when such conditions arise. The Homestead takes pleasure in introducing and recommending Mr. Cubbage to any and all breeders who may need the services of a competent man, either as auctioneer or in the capacity of furnishing and erecting their sale tents. A line addressed to him at Battle Creek, Iowa, will bring speedy response as to terms, etc.

### BRIDGFORD & NESBITT'S POLAND CHINAS.

The firm of Poland China breeders, Messrs. Bridgford & Nesbitt, of Aledo, Ill., have long been known to readers of this paper as breeders of high-class stock. This season finds them with over 100 head of spring pigs by boars representing the best strains of the breed. In addition to the spring crop of pigs, they are offering for sale two of their herd boars and ten head of good brood sows, bred to farrow in July, August and September. One of the herd boars offered for sale is On the Dot 2d. This boar was farrowed in March, 1906, and has for his sire the noted prize-winner On the Dot, by On and On. He is the sire of many of the spring pigs and has proven himself a valuable breeder. The other boar for sale at this time is Young America by Keep On, Jr., by Keep On. He is also a spring yearling. These boars are offered for sale for no fault, but simply because the herd is not large enough to profitably keep four herd boars. They will be offered for sale at very reasonable prices. The sows represent some of the best strains of the breed and are bred to the herd boar, Young Delight, a grandson of Chief Perfection 2d, also the sire of many of the spring pigs. Bargain prices will be made on these sows. Write at once if in the market for sows bred for fall litters. Full particulars regarding this good herd later. Look up the announcement on page

Photograph of new hog barn, owned by Chas. Van Patten, Sutton, Nebraska.

15 and write for prices and description, kindly mentioning The Homestead.

#### RUSSELL'S DUROC JERSEYS.

On page 15 of this week's issue we begin the advertisement of Messrs. J. A. Russell & Son, of Corning, Iowa, who are building up one of the high-class herds in southern Iowa. They are fortunate this year in having 125 spring pigs sired by such noted boars as Ohio Chief, Crimson Wonder Again, Tip Top Notcher Jr., Prond Lady's Best, Higgins' Improver, Crimson I Am and Iowa Standard. They have five Proud Advance sows in the herd, two Ohio Chief sows, two Higgins' Model sows, two Orion and two Improver 11 sows. Readers of The Homestead who are wanting some of the good things should write them. Keep the Russell herd in mind when buying a boar and remember they will make a public sale on October 26th, when they expect to put in the very tops of their herd. Kindly mention The Homestead when writing.

#### FRANK'S DUROC JERSEYS.

Mr. Sol Frank, of Sioux City, Iowa, has about eighty nice, choice, even spring pigs on his farm at present. They are the get of King Solomon by Charlie Bly, Spotless Top Notcher and Ohio Chief Again. His grand show sow, Marie, has ten nice pigs by her side sired by King Solomon. In the entire eighty head there are only two of what you might call off pigs, the balance being very smooth and even, with good heads and ears. Mr. Frank also has a few very fine fall boars that he will sell. He also has a very choice litter out of a full sister to King Solomon by Crimson Wonder Jr., and two litters by Romeo by Meddler Chief. Mr. Frank has proved himself one of the best Duroc breeders in northwestern Iowa and he will be able to furnish as good Durocs as the best of them. Anyone wishing to purchase anything in this line can do no better than to correspond with or go and see Mr. Frank, mentioning The Homestead.

#### FANCY VISCOUNT TO NEBRASKA HERD.

Mr. Fred Case, manager of the Shadewell Stock Farm, Carthage, Mo., writes: "Mr. G. W. Post, of York, Neb., visited the Shadewell herd of Short-horns last week and while there bought the assistant herd bull, Fancy Viscount, sired by Lavender Viscount, and out of the grand imported cow, Fancy of Ardmore 2d, a cow that is probably as close to old Champion of England as any in this country. Fancy Viscount's mother while being a grand individual of the best beef type, is also an extraordinary heavy milker. We think Mr. Post got one of the best two-year-old show and breeding bulls in the West. Mr. Post had visited a great many herds in Iowa, Illinois and Minnesota before coming to Shadewell. Fancy Viscount was shown as a yearling, standing first in class at the Missouri State Fair and other shows. We feel that on the select herd of cows at York, Neb., he will prove a valuable investment. Our herd never looked better, as they are living as nature intended, in blue grass pasture up to their knees. Master of the Grove never looked finer, not excepting the day he carried off the grand championship honors. We have a select lot of Scotch bulls got by Imp. Roan President and Lavender Viscount that we are pricing worth the money and are satisfied they will please any on the hunt for herd bull material."

#### LEWIS' POLAND CHINAS.

A recent visit to the well-known herd of Poland China hogs owned by Chas. Lewis, Beatrice, Neb., found him busily engaged caring for what he considers the best lot of Poland China pigs he has ever raised. Most of these pigs are the get of the great toar, Norval Chief, a cut of which can be seen in this issue of this paper. Norval Chief was shown at Nebraska State Fair in 1906 and was good enough to win fourth in just fairly good condition. He is the son of Johnson's Chief, a first-prize hog at Nebraska State Fair and his dam was Nan Patterson. There are a number of good fall boars on the place by Norval Chief and among them are prospective herd headers. Norval Chief is assisted in service in this herd by Corrector, a son of Lawrence Perfection, and having for his dam Mary Ann by Lawrence Chief. He is a hog of much quality and as a breeder he is proving one of the best that Mr. Lewis has ever owned. One of the best prospects in the yearling boar class is the young boar Challenger, by Chancellor Win, dam Queen Perfection by Mischief Maker. He is of the type that would be a credit to any Poland China boar. This young hog will be among Mr. Lewis' show herd this fall. He has a number of extra good fall boars that he will price worth the money to early buyers. Write him and mention this paper.

#### SCHMIEDER'S POLAND CHINAS.

When many of the present day breeders were in their swaddling clothes, Mr. John Schmieder, of Remsen, Iowa, was breeding Poland Chinas. He has 125 head of spring pigs on the place this year, and they would be a credit to any herd. These are sired by Winning Perfection 105015, a boar bred by Mr. W. Z. Swallow, and also by Large Dude 116965 and All Dude 2d, his litter brother. Large Dude 116965 was a year old last April and is a son of All Dude 106413. Mr. Schmieder raised him and he is one of the best yearling boars we have seen this season. He has received several good offers for this boar, but has refused to price him. He may be seen at the fairs this fall. Mr. Schmieder also has a nice litter of six pigs by the great and noted boar, Corrector 2d, out of a Chief Perfection 2d sow. Every one of these is a boar, and any of our readers who want a Corrector 2d boar should speak early. One of his best and most growthy litters is sired by Winning Perfection and out of Good All Over, the dam of the yearling herd boar referred to above. There are four boars and two sows in this litter. Another splendid litter is sired by Winning Perfection and out of Best of 1904, the dam of the first-prize boar pig at the Interstate fair last year. This sow is the dam of four of the best fall boars he is now offering for sale. A very topdy litter is out of Maplewood Queen, sixth-prize sow at Des Moines, and the pigs are sired by L's Pride, a son of Perfection E. L. Just now Mr. Schmieder is offering thirteen good fall boars for sale, all sired by Winning Perfection and out of Proud Perfection Jr., and Moss Chief dams. He is pricing these right if ordered soon. He is also book-orders for spring boars, or he will sell a

few choice gilts or sows bred for fall litter. Read his advertisement on page 15 and when writing him kindly mention The Homestead.

#### CHAPEL HILL BERKSHIRES.

In conversation recently with the proprietor of Chapel Hill breeding establishment, Mr. W. D. McTavish, of Coggon, Iowa, remarked that the 125 young Berkshire pigs of spring farrow were all weaned and coming on nicely. We were much impressed with this bunch of pigs, as it was the best that we had seen thus far this spring, and among them is plenty of show-yard material. They are sired by three or four different boars, all strictly first class in every way. These pigs will soon do to ship out, and inasmuch as Mr. McTavish could not anywhere near fill his orders in 1906 for young boars, we would certainly advise our readers to have their orders booked early. In this same connection we might say that Mr. McTavish is now prepared to let go one of his choice yearling herd boars. As he will not breed heavily for fall litters one of them can be spared. He is a long-bodied, rangy hog, with splendid back, good on his feet and legs and has an ideal Berkshire head and ear. An attractive price will be made on this fellow if taken in the near future. The Homestead takes pleasure in recommending Mr. McTavish as one of the most honorable as well as one of the best breeders of Berkshire swine in America. His announcement appears at all times in these columns.

#### KATER & SMITH OFFER BULLS AND FEMALES.

Messrs. Kater & Smith, of Grant City, Mo., breeders of Herefords, have a change of advertisement on page 15 in which they offer young bulls ranging from ten to fourteen months of age. These are the get of St. Elmo 13th, Keep On 23d and Trot On. The older bulls are all sold. In this lot of twenty are many promising herd bull prospects. They also offer a number of cows and heifers all of high quality and well grown. St. Elmo 13th was got by St. Elmo and out of a cow that is strong in Anxiety blood. St. Elmo was a sire of show stock. Keep On 23d, the second herd bull, was got by Imp. Keep On and out of a Bean Real cow. He is one of the best sons of the great Keep On and as a sire he is among the best. Messrs. Kater & Smith think so much of him that they have retained one of his best sons, Trot On, which has for his dam a good Anxiety-bred cow as they own. The cows in their herd are the grand, matronly kind, short legged and thick from end to end. A large majority descend from original foundation stock that was strong in the blood of Lord Wilton. Among the later additions were cows by Hesiod 14th and Blue Grass. Today the herd has grown to such proportions that these gentlemen feel that they can spare some females and are offering young cows and heifers bred or open. Every animal they sell is of such quality as they are pleased to have the purchaser show and tell people that Kater & Smith were the breeders. These gentlemen invite your correspondence but prefer to have prospective customers visit the herd.

#### MANLEY & CO.'S MT. PLEASANT HERD DUROCS.

For many years our readers have been familiar with the herd of Messrs. Manley & Co., of Lyons, Neb. Few herds have produced more of the sensational ones than have come from the Mt. Pleasant herd. The names of old Peerless, Orion, Long John, Dandelion and Junior Jim are familiar to all those who have kept in touch with the best things of this breed, and now they have secured an interest in the splendid boar, Dread Naught 18229, a son of the great Kan't Be Beat, to follow up these other noted boars. We make mention of these herd boars because they have had so much to do in bringing the Manley herd to the front. About sixteen public sales in 1906 were topped off by sows that were bred or raised by the above firm, so it records count for anything they have had their share of the honors. They have about eighty spring pigs this year sired by Junior Jim, Advance Lad, Crimson Wonder I Am, American Royal, Kruger Lad and old Tientsin, the sire of Ruberta. They also have a grand lot of fall sows sired by the noted boar, Prond Advance, and they also have nineteen fall boars sired by the same boar. They are making a special run on the latter just now. These are all out of Orion, Long John and Dandelion sows. There is not one of these that has not had a well-bred dam for a mother. One of the best is out of a daughter of old Dandelion called More Profit. This fellow is a \$100 boar and the first man who sends the price gets him. There are several others, however, that are worthy a place at the head of good herds. If any of our readers want one of these they will have to write the above firm soon as they are in demand. They also have seven good Junior Jim boars for sale and a son of Orion, a litter mate to the sow that topped the Harris sale in Kentucky. Kindly mention this paper when writing.

#### McMAHON'S TOPPY DUROC JERSEYS.

A representative of The Homestead paid his respects to Mr. Albert McMahon, of Craig, Neb., and his herd of Duroc Jerseys, recently, and found everything flourishing on the place. There is not a more critical judge of a Duroc in the West nor a better buyer of the good things, as an inspection of his herd will show. He has ninety spring pigs this season and they are just as good as will be found. He has been using the boar, Agitator, a son of Proud Advance, in the herd and the most of the pigs are sired by him. This hog has been one of the best breeding sons of old Proud Advance, and he is the sire of a June gilt out of his great sow, Fancy Crimson by Crimson Wonder, that is one of the nicest things we have seen this year. Had this sow been farrowed in March she would have made good company to go in the junior yearling class this year. He has another good thing in his herd and that is his present herd boar, Defender, a son of Duroc Standard, the boar that headed the Stow & Gingrich herd at Hamburg, Ia. He is out of Proud Wonder by Proud Advance and was a year old March 26th. He is good in the bone and has lots of size for his age, and all around he is one of the good young boars that will be found in the state this year. He has several litters by him and it looks as though he is going to make good as a sire. He also has a litter by Orion's Redeemer and Russell's Choice, the latter hog being a son of old Crimson Wonder. One of

#### ABERDEEN ANGUS CATTLE.

## Holbrook Aberdeen Angus Breeders.

COMPRISING the allied herds of P. J., M. H. and Mike Donohoe and John and Michael Cash of Holbrook, Iowa. 200 head of choice Daddies within a radius of two miles of Holbrook. The International Champion Black Wood Lawn 42983 heads the herd. The following families are represented: Prides, Blackbirds, Ericas, Heather Blooms, Barbaras, etc. Other bulls used on the herd are Wood Lawn Blackbird Lad, Homestead Black Jun and Morning Star 2d. We can supply any class cattle desired. Come to Holbrook and allow us to convince you of this fact. Address any of the above breeders, mentioning this paper.

## PLEASANT GROVE HERD OF ABERDEEN ANGUS CATTLE

175 HEAD in the herd. 15 bulls for sale, 12 to 24 months old. Herd bulls, Imp. Pride of Aberlour 41201 Lowlander 21890, Newton Hero 46150 and Nugget of Cottage Grove 20th 68671. We can ship P. O. B. on the following roads: C. R. I. & P.; C. N. W.; C. M. St. P. & C.; C. & G. W. Address: DUNNING, JOHNSON & ALLEN GREEN, IOWA

his best litters at this writing is by Agitator out of Cherry Lady by Dandelion 2d. There are five sows and one boar in this litter and they are as Frank Iams would say "peaches and cream." Fancy Crimson, a daughter of Crimson Wonder, and one of the best daughters that he ever sired, has a nice litter by Agitator. There are five boars and two sows in this litter and there has always been a good come out to her pigs. Easter Maid, possibly the most profitable sow he has ever owned, has ten good pigs again this year by Agitator. This sow has saved forty pigs in four litters in two years. Princess Pauline by Oriou has a nice litter by Defender, as has also two daughters of Belle's Chief. Another very good litter is out of a Glendale Critic sow and the pigs are by Crimson Choice. American Lady by American Royal has nine pigs out of a litter of thirteen farrowed and these are by Masterpiece. A daughter of Top Pride out of Proud Addy, the sow that Mr. Will Stone sold for \$600, has six good pigs by Orion's Redeemer. There are others, but this is enough to show how he is hooked up this year. He will be in the boar business later in the season. He will make a brood sow sale on February 28th and Mr. McMahon will put up an offering that will be a credit to himself and his herd. His advertisement will be found in The Homestead later in the season. Write him and have him pick you out a pig. Mention the Homestead.

#### NORTHERN IOWA SHORT-HORN SALE.

Lovers of Short-horns residing in Iowa, Minnesota and the Dakotas should take notice of the fact that Mr. A. H. Brett, of Mason City, Iowa, will sell sixty head of Scotch and Scotch-topped cattle at Mason City, on July 11th. We are still without the catalog and cannot enter into detail concerning the breeding of this good offering of Short-horns. We can, however, say that there are several imported Scotch cows and a splendid bunch of two-year-old heifers. The entire lot of females are bred to the best of Scotch bulls and good results may reasonably be expected. As has been previously stated, the most excellent cows, Imp. Likely and Imp. Roan Ribbon, are included in this sale and are bred to a son of Imp. Merry Hampton. There are listed ten or a dozen bulls, all of serviceable age. Mr. Brett has endeavored in this offering to put forth a class of cattle that will not only be a credit to himself, but of such good qualities as to interest buyers from a distance. At the close of this cattle sale or immediately before it opens, Mr. Brett will sell four registered draft mares and one two-year-old registered Clydesdale stallion. These mares are all bred to the choicest of registered stallions of their respective breeds. There will be three Percheron mares and one Clydesdale mare. In inspecting this offering a Homestead representative was much impressed with the general thrift, healthy and vigorous appearance of all the cattle offered. These cattle will be sold fresh from the pasture and will not be overloaded with fat, but are presented in the best possible breeding condition. From an individual standpoint, which we must alone deal with at this time, the offering is a desirable one. In addition to the dozen or more Scotch cattle will be a fine supply of richly Scotch-topped ones that are fine propositions. The size of the offering will enable the ranchman to secure a car load without any difficulty. The Homestead's 7,000 readers in the Dakotas will doubtless be interested in this sale, as there are few countries better adapted for the growing of good cattle than are the Dakotas. The sale catalog should be ready for distribution before this article is read, and Mr. A. H. Brett will be pleased to mail them free of charge to all of our readers who make application for the same saying that they saw the advertisement in this paper.

#### SCOTCH HERD BULLS FOR SALE.

On page 18 of this issue of The Homestead will be found the new announcement of Mr. W. W. Vaughn's Wildwood herd of Shorthorns. At this particular time Mr. Vaughn is offering two special bargains in the way of Scotch herd bulls. One is an Orange Blossom eleven months old and weighs 1,000 pounds. Is solid red and is the ideal type for a strictly first-class herd bull. He was sired by Headlight 233913 and Headlight was by Imp. Red Knight. It will be remembered that he sired the young herd that won first honors at the International for Mr. N. P. Clark, of St. Cloud, Minn., also was the sire that sired the young animals winning the much coveted prize, "Get of Sire" at the same show and the same year. Headlight is a half-brother to the champion cow at the Portland Exposition, as well as the reserve champion. Headlight's dam was the splendid Secret cow, Imp. Strawberry 6th by Mountain Archer, she out of Imp. Strawberry 4th by Popsman. This beautiful young Orange Blossom bull referred to is certainly bred up in the purple and any one desiring a first-class herd bull should not overlook this fellow. His stable companion is the red bull Brawith Prince and belongs to the celebrated Cruickshank Brawith Bud tribe: his dam is a splendid cow, regarded as one of the best propositions in Mr. Vaughn's herd. This young bull was sired by Princess Hero of M. V. 173391. Either of these bulls are herd bulls that will do to tie to, as their breeding is fully up to their strong individual merit; it is doubtful if at any time Mr.

## 10 Aberdeen Angus BULLS FOR SALE.

Twelve to Fourteen Months Old.

Will sell at farmers' prices, \$100 gets a good bull. Prides, Queen Mothers, Heather Blooms, Rothermie Queens, etc. Address:

John E. Griffith,

WASHINGTON, IOWA.  
(Mention Homestead)

## Aberdeen Angus BULLS

A FEW yearling and two year old choice ones left. In O. K. condition. Price from \$100 to \$200. They represent Blackbird, Queen Mother, Erica and Drumlin Lucy breeding. Dams were bought at the Wallace-Jestlin dispersion in 1900. Known to be the best ever sold at auction. Am making this offer as I can't have public sale. Write or visit.

R. WILKINSON & SON, MITCHELLVILLE, IA.

#### PLEASANT HILL ANGUS.

SPECIAL prices for 30 days on 10 bulls, 20 cows and heifers, 12 with calves at foot. Bulls, calves and some of the heifers are sired by the Pride bull, Baltimore of Glendale 24275, a prize-winner and sire of prize winners.

J. Nissen, Meservey, Cerro Gordo Co., Iowa

#### High Class Angus Bulls

FOR SALE—An Erica, 22 months old, sired by Imp. Edward R. (61744); a Pride, 12 months old, and a 10 months old Blackbird, besides several younger ones. These are herd leaders. Address: W. H. JONES, QUMBY, IA.

#### GOOD ABERDEEN ANGUS BULLS FOR SALE.

THREE yearling bulls, two sired by South Oaks Baron and one by Blencoe; also a few good cows and heifers. Write M. B. WALKER, CLARINDA, IOWA

#### 7 YEARLING ABERDEEN ANGUS BULLS FOR SALE

FROM Willow Grove Farm, one mile southeast of Fayette, Ia. The above bulls are the best that I have ever bred. They are all out of heavy milking dams and sired by the Queen Mother bull, Major Midnight 17169. These bulls are priced at farmers' prices, and there is show yard material among them. Mention Homestead when writing. E. C. FUSSELL, Owner, FAYETTE, IA.

#### POLLED DURHAM CATTLE.

#### DOUBLE STANDARD

## Polled Durham Short-Horns

HERD headed by Secret Knight, he by the \$1,000 Idle Knight X 1374-159582. A few young bulls and heifers of this famous Polled breed for sale at reasonable prices. Farm five miles from town. We won 50 prizes at the Iowa, Nebraska and Kansas State Fairs this fall, including 21 firsts and 10 sweepstakes.

#### SHAVER & DEUKER,

Kalona and Wellman, Iowa.

#### ONE DOUBLE STANDARD POLLED DURHAM BULL, TWO YEARS OLD, FOR SALE.

THIS bull is red with little white, a splendid server, and is big bargain. Have used him some but he is too closely related to our cows. Address: Mack Stevens & Son, Iowa City, Iowa.

#### CHESTER WHITE HOGS.

CHESTER WHITES 100 extra early March pigs—Best of breeding—Will ship C. O. D. and prepay express to August 1st. Order early. 16 Ang. and Sept. gilts; very growthy and to farrow in August. Prices reasonable. MAPLEAWN FARM, W. M. Mercer, Prop., Aurora, Ill.

Fifty Chester White Boars and Gilts BOOKING orders for boars and gilts at any time. These are sired by Dandy Boy 12791, a full brother to Modeller, and out of my best sows. Address: E. J. Rodewig, Newcast, Nebraska.

Vaughn has had better value for the money asked than is wrapped up in these two young bulls. In addition to the sale of these bulls, Mr. Vaughn is pricing a car load of from fifteen to twenty young cows with calves at foot, or heifers bred. They are of the following families: Young Mary, Constance, Beauty and Orange Blossom. Those that are not Scotch have from three to seven Scotch tops and all are good milkers or from very heavy milking families. Certainly this desirable offering presents an opportunity to a beginner to get a herd of young cattle, all reds and bred to the best Scotch bull ever owned by Mr. Vaughn at bargain prices. The sale of these females is imperative, as Mr. Vaughn, Jr., who has been taking care of these cattle, will enter the Iowa Agricultural College at the next term and the elder Vaughn cannot possibly give these desirable cattle the care that they have been accustomed to; hence this sacrifice sale at this time. Homestead readers will do well to take notice of this offering.

CHESTER WHITE HOGS.

MAPLE GROVE CHESTER WHITES.

125 PIGS of March and April farrow by Prince O. K., Neponset Boy, Neponset Ed., Mear's Medium, Neponset Billie. Will ship at three months old. 25 extra good fall boars by Prince O. K., noted prize winning boar at Iowa, Illinois State Fairs and Inter-State Fair 1905. Write for prices.

AUCTIONEER, A. P. MASON.

SHORT-HORN CATTLE.

ARDMORE

BERKSHIRES and SHORT-HORNS

WE offer for sale or trade for good Scotch heifers, Imp. Lord Mount Stephen 208904, one of our Missie herd bulls (sweepstakes bull Interstate Fair, Sioux City, 1904, first in class 1905 and fifth in class, American Royal, Kansas City, 1905.) Just past six years old. In good health and condition, quick and sure, fully guaranteed. Sold only because we have more herd bulls than we need, and need more good heifers. Write for pedigree. Young Scotch bulls for sale now—a Victoria, twenty-one months old and a Lavender just three years old by Imp. Scottish Pride 128543 and a Miss Ramsden by Imp. Lord Mount Stephen, twenty months old. All are reds. Also some good Scotch topped bulls at \$100 and \$125. Berkshire boars—large, thrifty, big boned, good headed, thick, March and April pigs with plenty of length and the kind of bodies that fill the pork cellars. Also some sow pigs, ditto. All at prices that are low, to move them, as we need the room for our later pigs, and the fine bunch of Berkshire sows bought the other day. You can get better value for less money by buying a choice weanling boar pig now and raising him yourself, than by waiting till November to buy. Address, ARDMORE STOCK COMPANY, HOLSTEIN, IOWA

ALL RED SHORT-HORN BULLS

FOR SALE

Got by Imp. Cypress 2d 191756, a 2,400 pound bull got by Cypress by Wm. of Orange.

J. W. McDermott, Kahoka, - Missouri.

P. S. These bulls must go at once.

COWS AND HEIFERS

BRED TO

FAIR GOODS 253391.

SON of the Champion Choice Goods and out of the great A. Roberta. I am pricing the bulls to farmers, and range men at such prices as will move them. All are good, strong, useful fellows, ready for service. The cows and heifers are rich in the blood of Grand Victor, Imp. Nonpareil Victor and Imp. Cypress. Bred to Fair Goods; they will prove great bargains. Write me or come and see the stock.

A Cruickshank Herd Bull For Sale

VICTORIA'S PRESIDENT OF M. V. 208996. Red, 4 yrs. old, weight 2,400, sure, quick server; splendid breeder of red calves. We have bought Cherry Grove Bull to use on above bull's heifers. His sire is Prince Nonpareil 131222; dam, Victoria 87th by Imp. Craven Knight; 2d dam, Imp. Victoria 81st by Gondolier; 3d dam, Victoria 77th by Dunblane; 4th dam, Victoria 57th by Barmpton Prince; 5th dam, Victoria 41st by Lord Privy Seal; 6th dam, Victoria 39th by Champion of England. He has few equals and will make strong show at International if fitted. Address,

McKEEVER BROS., - FARLEY, IOWA.

TWO RED CRUICKSHANK HERD BULLS

FOR SALE

I WILL offer for the next few weeks two of the best young Scotch bulls ever bred at Wildwood. One is an Orange Blossom, eleven months old and weighs 1,000 pounds. Sired by Headlight 233913. The other is Brawth Prince, twenty months old, sired by Princess Hero of M. V. 175881. Brawth Prince is a Cruickshank Brawth Bud. Either of these bulls are fit to head good herds; the younger one is a show bull. I will also sell one carload of strictly choice yearling two year old heifers and young cows with calves at foot. Bargain prices will be made on the above, and remember that the "early bird catches the worm." Address,

W. W. VAUGHN, - MARION, IOWA

NORTON'S

Cruickshank Herd Headers

I HAVE two excellent Duchesses of Gloster bulls, a very choice Barmpton Rose, a Rosemary and several others, sired by Imp. Bapton Admiral and Bunker's Victor. I also have some Secrets, Lavenders and Charity tribes. Come and see me.

G. C. NORTON, - CORNING, IA.

SHORT-HORN HERD HEADERS

Cookson Bros., West Branch, Iowa,

Breeders of Scotch Short-Horn Cattle.

WE have a few strictly choice straight Scotch Short-horn bulls now ready for service, sired by Young Commodore, conceded to be the best Short-horn bull in Iowa. The best Short-horn bull that we have ever raised is now on our farm and is open for inspection. Come and see the herd. Mention The Homestead when writing.

SHORT-HORN CATTLE.

CRUICKSHANK

....Herd Bulls....

FIVE Top Notchers, four reds and one dark roan, one Lavender, one Victoria, one Dorothy, one Marry Anne and one Splenwort or Secret. These bulls will compare favorably with the best. If you have any doubt, say, just come and we will take pleasure in showing you. We are from Missouri.

ISAAC A. NOVINGER & SONS, - Kirksville, Adair Co., Missouri.

SCOTCH BULLS

FOR SALE

I AM offering two splendid young Victoria bulls for sale sired by Golden Champion 138590, also an Acanthus and a Miss Ramsden. I have a few good Scotch topped bulls that I am pricing right. Write or come and see me.
